We've spent an awful lot of time and effort and, so far, allocated substantial financial resources in the South Bronx. I don't remember the exact amount of money that we put in there extra to try to start making progress, but it's been substantial. And I don't claim, standing here before all of you, that we have cleaned up the South Bronx or put the South Bronx back in a profitable or a successful state. I can't claim that, but we've made good progress.

And I think, as you know, your own local officials, on one major proposal for the South Bronx, decided not to go ahead with it. I don't believe in a philosophy of government that lets the Federal Government come in and take over and run things in contradiction to your locally

elected officials. And I'll ask my good friend Ed Koch to be responsible to you for the rejuvenation of the South Bronx in the future.

SOVIET TROOPS IN CUBA

Q. Good evening, Mr. President. My name is Pete Reilly, from Syosset, Long Island. I'm a student at C. W. Post College. I'm studying economics and acting. [Laughter] I want to be a politician.

I would like to challenge you on your answer about the Soviet troops in Cuba.

THE PRESIDENT. I don't know which is worse right now, to be an economist or a politician. [Laughter] Go ahead and challenge.

Q. You said that the status quo is unacceptable—

THE PRESIDENT. That's right.

Q. —and you'll take appropriate measures to alter it.

THE PRESIDENT. That's correct.

Q. What are "appropriate measures?"

THE PRESIDENT. I would rather not spell out at this point what we will do.

There are two ways to change the status quo. One is by the action of the Soviet Union. If the Soviets fail to act, then the other way to change the status quo is by action on the part of the United States. And I will report to the Nation, probably within the next week, after we get through with our negotiations with the Soviet Union, what action I will take. But it would not be appropriate tonight for me to give you the details of what we might do.

Q. I understand that.

THE PRESIDENT. Okay, go ahead, Pete.

Q. What I wanted to say was, you know, you're trying to separate the SALT II issue from the Cuban issue.

THE PRESIDENT. Yes, they ought to be separated. There ought not to be any connection.

Q. Okay. But I want to tell you, the assumption of the SALT II treaty is that—we're laying the groundwork for peace between the Soviet Union and America. Why do they have troops in Cuba? For that matter, why do the Soviets back troops if they want peace? Why are they eating up Southeast Asia? Why are they in Africa? Why do they denounce peace in the Middle East? Where are we going to draw the line? Our measures have got to be effective.

THE PRESIDENT. You put me in the position of defending the Soviet Union, which I have no inclination to do. [Laughter] But let me say this: There have been troops in Cuba for a long time.

Q. I understand.

THE PRESIDENT. In 1962 there were 22,000 troops in Cuba. Evidence is that ever since that time, there have been substantial numbers of Soviet troops in Cuba.

We, this year, began to monitor that situation much more closely. In the past Cuba was not a high priority for us to monitor with our surveillance systems on a concentrated basis. We were looking at the Soviet Union to make sure they complied with the provisions of SALT I; we were monitoring Vietnam during that war, and we, this year, earlier, focused our attention more on Cuba to monitor what the Soviet troops were doing. My judgment is that the number of Soviet troops is less now than it was in 1963, for instance, months after all the missiles had been moved out of Cuba in October, I believe, of 1962.

The question is whether this is a combat unit—we're convinced it is—and whether that combat status should change. I might point out to you that the United States has troops in several coun-

tries around the world, some of them very close to the borders of the Soviet Union. This is part of a normal interrelationship between major powers, like ours, and the Soviet Union. We have troops in South Korea, we have troops in Japan, we have a few troops in Turkey, we have had some troops in Iran, and so forth. And so, this is not a new thing.

But we want the Soviets to understand that the American people are exceptionally sensitive about Soviet combat troops in this hemisphere, particularly in a country like Cuba, which acts, in effect, as an arm of the Soviets in adventurism and intervention in other countries.

How to deal with this successfully is not an easy task, but we'll do the best we can. And I believe that you will be satisfied when I make my report to the country within the next week.

Q. One departing remark. Thanks a lot. That's the first time I ever spoke to a President. [Laughter]

THE PRESIDENT. This is your last question. [Laughter]

Q. Yes. I just want to say a departing remark. I'm just worried about the principle of the matter, not the threat of invasion. Thanks, President Carter.

THE PRESIDENT. Thank you very much.

OIL PRICES

Q. My name is Lori Kober, and I'm a student at Saint Mathias School, and I'm 11 years old. This is my question. There are four kids in my family, and my parents just bought a house. This house is to use oil heat, and my mom says that oil is very expensive. Is there anything you will do to help about these high prices?

THE PRESIDENT. Thank you. Your first name is Laura?

Q. No. Lori.

THE PRESIDENT. Lori, okay. It's very difficult for me to answer your question, because there's a limit to what I can do.

Throughout the entire world, Lori, the price of oil is going up. It's increased 65 or 70 percent, almost doubled, in the last 8 months. In the last 5 years, the price of oil has gone from \$2 a barrel to almost \$30 a barrel. It costs 15 times as much as it did in 1973. And as the price of oil goes up, which everybody has to pay, then the price of gasoline and diesel oil and home heating oil and kerosene also go up.

What we are trying to do now is to cut down or reduce the amount of oil that we buy from overseas. We buy about half our oil from foreign countries. This is what we are trying to correct with our new energy policy.

Next year we'll send about 70 billion American dollars overseas to pay for foreign oil. And we import, with the oil, high inflation—which is what bothers your mother—and also unemployment.

We have made some progress. Earlier this year, we thought that there would be a shortage of home heating oil this winter. I think we've now got the oil companies to produce enough oil to take care of the needs of people who live in New York and the States further north.

One thing that you and your family can do is—since the oil companies now have enough oil for the winter—is to cut down on the amount that you use. The less oil people use, the more we save; the less we waste, then the cheaper the price is going to be, because you have a certain amount of oil, and if people don't buy as much as you have in the past, then there will be more competition and people will have to sell their oil at a lower price.

We've also gotten a few of the oil companies—Texaco and seven or eight more—to agree not to raise their prices any more in the next number of weeks, as

the winter comes on us. The prices have already gone up too much. We want to make sure they don't go up any more.

And the other thing that we are doing is providing help for poor families, who are the first ones to suffer when the price of energy goes up, particularly oil. We will have the Congress pass this year \$400 million worth of aid for families that are poor to help them pay their heating bills. And we've asked, in the windfall profits tax, which I hope the Congress will pass without delay, a tax on the oil companies, another \$1.6 billion to take care of tax credits for poor families as well.

So, we're trying to get the oil companies to hold down the price. We're asking people to save oil and not waste it, to hold down the price. And we're going to provide financial help, direct grants, that the Governor will administer, for families that are poor and who cannot afford to pay for oil.

But I don't think there's any need to—I don't want to mislead you, Lori—the price of oil is going to continue to go up in the future no matter what I do or what anybody else does, because all over the world it's getting scarcer and people are demanding more. We're going to move toward solar energy. We're going to move toward a greater use of coal, and we're going to move toward a greater development of our own energy supplies. And I think that will help us a great deal in the future.

But our country waited too long to start acting to get an energy policy. Now we are moving. And as I predicted earlier, by the end of this year we will have a good energy policy passed into law by our Congress, which will help you and your family in the future.

That's a great question and I thank you for it.

I can take one more question, I understand.

TAX REDUCTIONS

Q. Mr. President, I'm Kathleen McGilloway. I'm a housewife, and this is also the first time I've ever spoken to a President.

THE PRESIDENT. I'm glad to talk to you, Kathleen.

Q. But it has generally been acknowledged that our present tax structure is grossly unbalanced, penalizing married working couples and middle-income families. They pay high taxes while many large corporations pay little or none. Do you plan to rectify this situation?

THE PRESIDENT. I could hear you, Kathleen.

That's one of the failures that we've experienced since I've been in office. When I was here in New York in August of 1976 and made my acceptance speech at the Democratic National Convention, I pointed out then that the tax system in this country is a disgrace to the human race. It still is. It's not fair.

We've made some changes in it, very minor changes, because the pressure groups and the lobbyists in Washington are almost beyond comprehension. And when you start trying to make corrections to the tax laws, quite often the Congress goes in the opposite direction and opens up more loopholes for those who are powerful enough and influential enough to have active lobbyists there.

We have had some reduction in taxes since I've been in office, about \$28 billion. We may have to have some more in the future. But I cannot tell you that we have made any substantial progress in that respect. And it's only going to be when an aroused public demands action by individual Members of the House and the U.S. Senate that we will ever have sub-

stantive tax reform. I wouldn't say it's hopeless, but it hasn't happened so far.

Two years ago we could not get the public to demand an energy policy. It looked hopeless. And now we see progress. And I think the same thing applies to the Middle East, and the same thing applies to SALT, and so forth. You just have to take one thing at a time until the public is genuinely interested, and then you can make progress.

But I hope and pray that in the future we will change the tax structure to make it fairer to the average citizen and take away the gross loopholes that reward the powerful and the rich, who can pay lobbyists to protect their interests in Washington. I'm with you. I have not been able to do anything yet.

Let me say one other thing in closing. I think your questions have been very good, and I've enjoyed them and enjoyed the chance to answer them. I learn a lot from you, by knowing what is of interest to you and having a chance to explain what I have done and what I have not done, the successes we've achieved and the failures that we've achieved so far.

We're in it together. If I'm successful as a President, then you have a better country. When I fail in my duties, because of obstacles that I just cannot overcome, it hurts you as well. But I think we all ought to remember this: No matter what your political affiliation or no matter what your special interest might be, we tend to dwell in this country on the transient inconveniences and disappointments, and we remember very vividly the things that divide us one from another and the intense debates and the times when we've failed to overcome a challenge the first try. But what we forget is the manifold blessings that we have in this country and how many things bind us together and the principles of freedom in a democracy,

which make us able, in the future, to achieve success where we haven't yet done it.

And I would like to remind you in closing that not only is this a nation that believes in free speech, but we are also the greatest nation on Earth. And if you help me, we'll keep it that way.

Thank you very much.

NOTE: The President spoke at 7:35 p.m. in the Charles S. Colden Auditorium at Queens College. In his opening remarks, he referred to Donald R. Manes, president of the Borough of Queens, and Saul Cohen, president of the college.

Energy and Water Development Appropriation Act, 1980

*Statement on Signing H.R. 4388 Into Law.
September 25, 1979*

It is with mixed reactions that I sign H.R. 4388, the energy and water development appropriations bill.

With one major exception, this is a sound and responsible bill. It recognizes the need to hold down spending. It does not commit to unacceptable future expenditures. It provides for sound water projects and for energy development. It represents a commendable step by the Congress in the direction I have been urging through my water resources development and energy policies. It does not fund water projects which, at my request, were terminated in past appropriation bills, and it generally reflects restraints in water project funding.

On the other hand, this bill mandates the completion of the Tellico project on the Little Tennessee River. This project has been halted because of conflicts with the Endangered Species Act. A decision was made through a deliberative process to deal with these conflicts. A special

Cabinet-level committee, authorized by the Congress, unanimously concluded that the project should not be completed, on economic grounds.

This action by the Congress overturns that decision and directs the flooding of the Little Tennessee River Valley. I am satisfied, however, that the Congress clearly confronted this issue and settled on its action with clear majority votes in both Houses. I accept, with regret, this action as expressing the will of the Congress in the Tellico matter. I am also convinced that even if I voted this bill, Tellico exemptions would be proposed repeatedly in the future.

Nevertheless, I believe firmly in the principles of the Endangered Species Act and will enforce it vigorously. I do not consider that the action by Congress on the Tellico matter implies congressional intent to overturn the general decision process for resolving conflicts under that act. I am convinced that this resolution of the Tellico matter will help assure the passage of the Endangered Species Act reauthorization without weakening amendments or further exemptions.

I also expect the Congress to move vigorously to solidify progress in water resources policy. Prompt action is needed to authorize and appropriate funds for the Water Resources Council water project review function, so that proper technical analysis can ensure executive branch recommendations for sound water projects. I believe firmly that my decision on the bill I am now signing will further progress on obtaining a strong Water Resources Council.

As President I must balance many competing interests. With many important national issues before the Congress—including energy, SALT, the department of education, the Panama Canal implementing legislation, the Endangered Species

Act, and water resources policy—I believe that avoiding a divisive veto battle will help focus congressional efforts on priority concerns.

NOTE: As enacted, H.R. 4388 is Public Law 96-69, approved September 25.

Federal Consumer Programs

*Remarks on Signing Executive Order 12160.
September 26, 1979*

Thank you. First I'll do my duty, and then I'll explain why.

[At this point, the President signed the Executive order.]

Congressman Rosenthal and Esther Peterson, distinguished representatives of consumer groups from all over the Nation:

I've just signed an Executive order entitled "Providing for Enhancement and Coordination of Federal Consumer Programs." This is a result of a lot of work by me and by 50 leaders in our Government, who represent the major agencies, by many consumer groups throughout the country, by Members of Congress, who have been in the forefront of the fight for consumer rights, and, I think, above everyone else, by Esther Peterson, who deserves and who has the gratitude of everyone here.

The longer I've been in the White House as President, the more I have recognized the importance of each individual person in our country. Traveling around the Nation during the long campaign years and since then, it's been a striking thing for me to have brief encounters with and conversations with Americans. Quite often, as they touch a President's hand or pass me in a corridor or on the street, they impart to me, in that brief, rare moment, their deepest

thoughts. And quite often I'm struck with how distant they are from government and how many of the decisions of government that are made that impact that person's life are never known or understood by them. They have no direct representative within an agency or within a decisionmaking body that's relatively obscure but vital.

I think it's particularly important that their voices be heard in government on a continuing, sustained basis, and that's the reason for this Executive order.

As you know, the first year I was in office I proposed to the Congress, and we fought to the last vote, to get an independent agency established—an independent office established to protect consumers' rights. We have not yet been able to get that legislation passed. It is still absolutely important. And this Executive order does not supplant the need for a coordinated, single consumer protection agency. It's important for all of us to remember that. But at the same time, I've had to turn to alternative means by which I, as President, could help to protect consumers' interests in the most effective way.

I asked Esther Peterson to join my staff. She is at my right hand. She works with other members of the White House staff and with every agency in this Government in the most highly effective way. She's been assisted by large numbers of volunteers, who have confidence in her and who share her determination to protect the consumers in our Government.

We have now come to a point of realization that her presence in the White House, no matter how effective, is not enough. There are so many agencies in the Government. And I asked her a few months ago to consult with the Office of Management and Budget, with the agencies themselves, to see how we could expand her

influence. And the result of all that work is this Executive order, which is now effective.

It prescribes a standard for the protection of consumer interests throughout Government—a single, carefully drafted, comprehensible standard that will provide coherence and unity and a better understanding of the purposes that we want to accomplish. And it also establishes a strong leader within each agency, who will be designated by the head of each agency, to protect consumer interests.

Esther, of course, will continue to represent me directly in these relationships. But in this process of evolving the Executive order, I think we've aroused to a high pitch of interest the leaders throughout Government who will be affected by the order itself.

OMB is extremely reluctant to expand the bureaucracy or to make an ineffective Government effort possible, and they are extremely important to save taxpayers' funds. They are enthusiastic supporters of this Executive order, because they see that this is a contribution to the efficiency of Government and does not create additional bureaucracy nor delay decisions in their final judgments.

I might add one other thing, and that is that recent trends in Government have been very disturbing to me, particularly on Capitol Hill. The attacks that are being made against the Federal Trade Commission, the recent effort in the Senate to have every regulatory decision be subjected to proof in court before it can go into effect, the efforts to block sections of bills that would directly give consumers a stronger voice in Government, the trend toward increasing one-house vetoes over decisions made by agencies responsible for protecting consumers' rights—these kinds

of trends are a bad omen. And I would like to ask all of you to monitor very carefully what goes on in Government to prevent these unwarranted encroachments on the basic rights of every American citizen.

We have worked together in the past. Many of you have been in the forefront of battles to make the civil service system more effective. You've helped me greatly in the progress that we've made so far in hospital cost containment, to reduce the inflationary pressures on American citizens, and of course, you've helped me with the evolution of the concept of the cooperative bank and many other items on which we share a major interest. We are in this fight together. And I welcome your support and the partnership that we share.

And I'm particularly grateful to your leader and to my leader, Esther Peterson, who will continue the fight, with us as her army. And I'm very grateful to serve in this capacity under one of the greatest leaders in Government. And now I'd like to introduce to you Esther Peterson.

NOTE: The President spoke at 11:50 a.m. in Room 450 of the Old Executive Office Building. Following his remarks, Esther Peterson, Special Assistant to the President for Consumer Affairs, spoke to the group.

Federal Consumer Programs

Executive Order 12160. September 26, 1979

PROVIDING FOR ENHANCEMENT AND COORDINATION OF FEDERAL CONSUMER PROGRAMS

By virtue of the authority vested in me as President by the Constitution of the United States of America, and in order to improve the management, coordina-

tion, and effectiveness of agency consumer programs, it is ordered as follows:

1-1. *Establishment of the Consumer Affairs Council.*

1-101. There is hereby established the Consumer Affairs Council (hereinafter referred to as the "Council").

1-102. The Council shall consist of representatives of the following agencies, and such other officers or employees of the United States as the President may designate as members:

- (a) Department of Agriculture.
- (b) Department of Commerce.
- (c) Department of Defense.
- (d) Department of Energy.
- (e) Department of Health, Education, and Welfare.
- (f) Department of Housing and Urban Development.
- (g) Department of the Interior.
- (h) Department of Justice.
- (i) Department of Labor.
- (j) Department of State.
- (k) Department of Transportation.
- (l) Department of the Treasury.

Each agency on the Council shall be represented by the head of the agency or by a senior-level official designated by the head of the agency.

1-2. *Functions of the Council.*

1-201. The Council shall provide leadership and coordination to ensure that agency consumer programs are implemented effectively; and shall strive to maximize effort, promote efficiency and interagency cooperation, and to eliminate duplication and inconsistency among agency consumer programs.

1-3. *Designation and Functions of the Chairperson.*

1-301. The President shall designate the Chairperson of the Council (herein-

after referred to as the "Chairperson").

1-302. The Chairperson shall be the presiding officer of the Council and shall determine the times when the Council shall convene.

1-303. The Chairperson shall establish such policies, definitions, procedures, and standards to govern the implementation, interpretation, and application of this Order, and generally perform such functions and take such steps, as are necessary or appropriate to carry out the provisions of this Order.

1-4. *Consumer Program Reforms.*

1-401. The Chairperson, assisted by the Council, shall ensure that agencies review and revise their operating procedures so that consumer needs and interests are adequately considered and addressed. Agency consumer programs should be tailored to fit particular agency characteristics, but those programs shall include, at a minimum, the following five elements:

(a) *Consumer Affairs Perspective.* Agencies shall have identifiable, accessible professional staffs of consumer affairs personnel authorized to participate, in a manner not inconsistent with applicable statutes, in the development and review of all agency rules, policies, programs, and legislation.

(b) *Consumer Participation.* Agencies shall establish procedures for the early and meaningful participation by consumers in the development and review of all agency rules, policies, and programs. Such procedures shall include provisions to assure that consumer concerns are adequately analyzed and considered in decisionmaking. To facilitate the expression of those concerns, agencies shall provide for forums at which consumers can meet with agency decisionmakers. In addition, agencies shall make affirmative efforts to in-

form consumers of pending proceedings and of the opportunities available for participation therein.

(c) *Informational Materials.* Agencies shall produce and distribute materials to inform consumers about the agencies' responsibilities and services, about their procedures for consumer participation, and about aspects of the marketplace for which they have responsibility. In addition, each agency shall make available to consumers who attend agency meetings open to the public materials designed to make those meetings comprehensible to them.

(d) *Education and Training.* Agencies shall educate their staff members about the Federal consumer policy embodied in this Order and about the agencies' programs for carrying out that policy. Specialized training shall be provided to agency consumer affairs personnel and, to the extent considered appropriate by each agency and in a manner not inconsistent with applicable statutes, technical assistance shall be made available to consumers and their organizations.

(e) *Complaint Handling.* Agencies shall establish procedures for systematically logging in, investigating, and responding to consumer complaints, and for integrating analyses of complaints into the development of policy.

1-402. The head of each agency shall designate a senior-level official within that agency to exercise, as the official's sole responsibility, policy direction for, and coordination and oversight of, the agency's consumer activities. The designated official shall report directly to the head of the agency and shall apprise the agency head of the potential impact on consumers of particular policy initiatives under development or review within the agency.

1-5. *Implementation of Consumer Program Reforms.*

1-501. Within 60 days after the issuance of this Order, each agency shall prepare a draft report setting forth with specificity its program for complying with the requirements of Section 1-4 above. Each agency shall publish its draft consumer program in the *FEDERAL REGISTER* and shall give the public 60 days to comment on the program. A copy of the program shall be sent to the Council.

1-502. Each agency shall, within 30 days after the close of the public comment period on its draft consumer program, submit a revised program to the Chairperson. The Chairperson shall be responsible, on behalf of the President, for approving agency programs for compliance with this Order before their final publication in the *FEDERAL REGISTER*. Each agency's final program shall be published no later than 90 days after the close of the public comment period, and shall include a summary of public comments on the draft program and a discussion of how those comments are reflected in the final program.

1-503. Each agency's consumer program shall take effect no later than 30 days after its final publication in the *FEDERAL REGISTER*.

1-504. The Chairperson, with the assistance and advice of the Council, shall monitor the implementation by agencies of their consumer programs.

1-505. The Chairperson shall, promptly after the close of the fiscal year, submit to the President a full report on government-wide progress under this Order during the previous fiscal year. In addition, the Chairperson shall evaluate, from time to time, the consumer programs of particular agencies and shall report to the President as appropriate. Such evaluations shall be informed by appropriate consultations with interested parties.

1-6. Budget Review.

1-601. Each agency shall include a separate consumer program exhibit in its yearly budget submission to the Office of Management and Budget. By October 1 of each year the Director of the Office of Management and Budget shall provide the Chairperson with a copy of each of these exhibits. The Chairperson shall thereafter provide OMB with an analysis of the adequacy of the management of, and the funding and staff levels for, particular agency consumer programs.

1-7. Civil Service Initiatives.

1-701. In order to strengthen the professional standing of consumer affairs personnel, and to improve the recruitment and training of such personnel, the Office of Personnel Management shall consult with the Council regarding:

(a) the need for new or revised classification and qualification standard(s), consistent with the requirements of Title 5, United States Code, to be used by agencies in their classification of positions which include significant consumer affairs duties;

(b) the recruitment and selection of employees for the performance of consumer affairs duties; and

(c) the training and development of employees for the performance of such duties.

1-8. Administrative Provisions.

1-801. Executive agencies shall cooperate with and assist the Council and the Chairperson in the performance of their functions under this Order and shall on a timely basis furnish them with such reports as they may request.

1-802. The Chairperson shall utilize the assistance of the United States Office of Consumer Affairs in fulfilling the responsibilities assigned to the Chairperson under this Order.

1-803. The Chairperson shall be responsible for providing the Council with such administrative services and support as may be necessary or appropriate; agencies shall assign, to the extent not inconsistent with applicable statutes, such personnel and resources to the activities of the Council and the Chairperson as will enable the Council and the Chairperson to fulfill their responsibilities under this Order.

1-804. The Chairperson may invite representatives of non-member agencies, including independent regulatory agencies, to participate from time to time in the functions of the Council.

1-9. Definitions.

1-901. "Consumer" means any individual who uses, purchases, acquires, attempts to purchase or acquire, or is offered or furnished any real or personal property, tangible or intangible goods, services, or credit for personal, family, or household purposes.

1-902. "Agency" or "agencies" mean any department or agency in the executive branch of the Federal government, except that the term shall not include:

(a) independent regulatory agencies, except as noted in subsection 1-804;

(b) agencies to the extent that their activities fall within the categories excepted in Sections 6(b) (2), (3), (4), and (6) of Executive Order No. 12044.

(c) agencies to the extent that they demonstrate within 30 days of the date of issuance of this Order, to the satisfaction of the Chairperson with the advice of the Council, that their activities have no substantial impact upon consumers.

JIMMY CARTER

The White House,

September 26, 1979.

[Filed with the Office of the Federal Register,

Consumer Affairs Council

*Memorandum From the President.
September 26, 1979*

*Memorandum for the Heads of Executive
Departments and Agencies*

I hereby designate Esther Peterson, my Special Assistant for Consumer Affairs, to be Chairperson of the Consumer Affairs Council established by Executive Order 12160, which I issued today.

JIMMY CARTER

Saudi Arabian Crude Oil Production

White House Statement. September 26, 1979

We have received official confirmation of today's reports that the Government of Saudi Arabia intends to continue production of 9.5 million barrels of oil per day—1 million barrels above its established limit—for 3 more months.

President Carter welcomes this decision as "a constructive complement to the efforts of the oil-importing nations to curb consumption and switch to other fuels."

"I hope no one will take this news as a signal to relax the effort that each citizen must make to ease our demand on a limited world supply of oil," the President said.

Continued high production by Saudi Arabia and several other countries will relieve concern about the adequacy of oil supplies this winter. It will permit full restoration of oil inventories drawn down after Iranian oil exports were halted last winter and subsequently reduced to about half their usual volume. It should help to stabilize prices in the world oil market.

Democratic National Committee

*Remarks at a Fundraising Dinner.
September 26, 1979*

Are we going to win in 1980? [*Applause*] Right on. Thank you very much.

Thank you, Governor Jim Hunt, for that very good introduction, and thank all of you who are here for letting us participate in the largest, most successful single fundraising event in the history of the greatest political party on Earth. Thank all of you very much.

We've already recognized the Governors, the Cabinet, the Members of the Congress, who do give me remarkably good support, the last 2 days. And I thank you for it. [*Laughter*] Last week was just one of those weeks best to forget about. But we're correcting all our mistakes. [*Laughter*]

But I'd like to recognize one special Democrat, who means as much to me as anyone that I have known since I've been involved in politics. He represents the essence of the Democratic Party, the kind of principles and achievements and ideals and accomplishments that make every Democratic chest swell with pride. I'd like for all of us to express our appreciation and admiration to Averell Harriman. Averell. [*Applause*]

He's helped to carve out the history of our country in the past. He's helping to forge the history of our country now. And he provides the guidance for an even greater America in the future.

We have a lot to be thankful for. We are here tonight because we know, as Harry Truman said in September, 26 years ago, the principles and the programs of the Democratic Party are exactly what's best for the United States of America. We still have that relationship

with our country, and we are going to keep it that way.

I'm sorry I wasn't here early enough to eat supper with you. Rosalynn and I will stop on the way home and get some ice cream. *[Laughter]* And I would like for there to be no political analysis made of the fact that I still eat ice cream. *[Laughter]*

Jim Hunt complained about the \$1,000-a-plate supper. I understand that it costs a thousand dollars just to eat lunch with John Connally, the famous friend of the few—*[laughter]*—which reminds me of one of those few, Bob Strauss, who's already been introduced. *[Laughter]*

Bob finished his job helping me control inflation, and then he's now working in the Middle East. *[Laughter]* He's taken the same kind of dedication and modesty to the Middle East that he used to fight inflation. *[Laughter]* If there's one thing you can say about Bob Strauss, he's always loyal to the Democratic Party, and I thank him very much.

Sometimes he goes too far. I had a call this morning from Prime Minister Menahem Begin, who said—he said, "Mr. President, I am willing to take on new friends, to meet with President Sadat, who was an enemy of mine for the last 20 years." He said, "I am willing to give up the Sinai, because you and President Sadat asked me to." He said, "I am willing to put my political future on a piece of paper, the treaty between us and Egypt. But I am not willing to buy a table to the DNC fundraising banquet this evening." *[Laughter]* He said, "As you well know, the people of Israel have never had any interest in United States politics." *[Laughter]*

I'm also glad that Senator Bob Byrd is going to play his fiddle for us tonight. He's a wonderful man, a close friend, and

a great supporter of mine in the Senate. I meet with him regularly. Rosalynn can always tell when I'm in trouble in the United States Senate. Every time I come back from a leadership breakfast on Wednesday morning with another \$25 worth of fiddle records—*[laughter]*—she knows I'm still trying to buy influence. *[Laughter]* But it works.

And I would like to express my thanks, particularly tonight—if I don't do it all the way through my speech—to the tremendous Democratic Congress, which means so much to our country.

The Members of the Congress have just recently returned from their home work period with their constituents, where they listened to hear expressions of concern, even fear, but a modicum of hope. And I, too, have been visiting with the same people, who are also my constituents, from one end of this country to the other. During that August recess period, I made about 60 speeches about the greatness of our country and the need for a new energy program. I've listened, I've debated, I've answered questions, I've talked, and I've learned. And the Congress and I came back to Washington filled with, in some ways, with a feeling of being refreshed, even inspired. But in other ways, we came back concerned and reflective.

The people tell me and they're telling the Congress that this is a crucial time in the history of our country. And that means, for you and me, that it's a crucial time for the Democratic Party, because there's no way to separate the two. Our very way of life is literally being transformed. Historians will prove that this is true. Rapid, uncontrollable, unpredictable changes confront us on every hand.

Many Americans are genuinely filled with troubled souls and doubt about the future. But this is not the first time this

has happened in the history of our country, and time and again, we Democrats have been called upon to lead the American people through times like these. We Democrats are not crippled by fear or trepidation or doubt. That's a characteristic of our party which has prevailed in every time of trouble and strife and challenge. And we have always met that challenge successfully, and I guarantee you that we always will.

We brought the Nation through a great depression as a united Democratic Party. We fought and we won World War II and saved the world for freedom and forged a long peace that followed, as a united Democratic Party. We got the country moving again in the 1960's, and we made an enduring commitment to the poor and to the people struggling for basic human rights, as a united Democratic Party. In 1976 America turned to us again, and now we must meet the challenges of the 1980's as a united Democratic Party.

Those 8 years of Republican rule could not erase what we had begun to build in this country, but 8 years of Republican rule could and did damage the faith of American people in our own government and in the very institutions of democracy. It's hard to remember clearly now how seriously our Nation was afflicted 3 or 4 or 5 years ago. We inherited illegalities and embarrassments, confusion, deprivation, and deep unemployment. But we've never confronted any of those tough issues which we inherited and flinched from our duty. We have never avoided a single difficult issue, no matter what the political consequences might be.

Our Federal, State, and local officials, I guarantee you, in an unprecedented way are now working as a team. This was not the case before. Our party, as Tip O'Neill pointed out so well, is putting America

back to work. We created 8 million new jobs. We increased job programs for the poor and the minorities to a level 10 times greater than that of the Ford administration budget, and we have knocked the unemployment rate down by 25 percent.

We've increased education aid by 60 percent. We've added massive improvements in housing, public transportation, agriculture. We've cut the unwarranted intrusion in the private enterprise system by government and eliminated regulations and cut out redtape. We've boosted business profits. And as Tip said, again, at the same time, in spite of all those better services for our people, we have slashed the Federal deficit by more than 50 percent.

We've not yet solved all the problems of our country. For more than 10 years now, our Nation has faced a serious problem of inflation, a problem that wracks our economy, that frightens our people, and which is at the top of our legislative and the national agenda. But we have refused to take the road that some would suggest to lick inflation by sacrificing jobs and employment opportunities. The Democratic Party never has and will not now turn its back on the working men and women of America.

We've listened to Americans who are concerned about the way government works, about the growing impersonality of government bureaucracies. We didn't just listen; we acted.

We put through the first reform of the civil service system in a hundred years. It's paying off. And it will help all Americans, those who work inside government as employees full-time and those who receive the benefits of government service for the next hundred years.

We've begun to reorganize the structure of the Federal Government. Let me just give you one recent example of what

that means to the American people. This reorganization plan, so far as I know, never got any media attention. But earlier this month, three Governors in the gulf coast region called me about the damage being done by Hurricane Frederic. Because we had reorganized our emergency services—eight different programs now into one; five agencies now into one, under one solid and competent administrator—we were able to guarantee effective assistance for their States in minutes. In the past, it could very well have taken weeks or more, and then the assistance would not have been well coordinated or effective.

We've faced up to the problem of a social security system that was headed down the road toward bankruptcy. And again, at some considerable political cost, we put the social security system back so it was secure again, and we kept faith with millions of hard-working Americans, both young and old, who had their faith shaken during the '74, '75, and '76 period.

We're delivering on another promise, too—the promise that we would maintain an America that is strong and an America at peace. NATO is revitalized. Our alliances are strengthened. And under this Democratic administration and under this Democratic Congress, not one single American life has been lost in combat, and I thank God for that. And we've maintained this peace without retreating 1 inch from our responsibility to America or to our allies—not with saber-rattling rhetoric, but with calm, reason, and persistence.

And we've made historic progress toward peace in the Middle East. A year ago, we had the Camp David accords; 6 months ago, a Mideast peace treaty. It's imperative that all of us—and these days, especially, American Jews and American blacks—must unite in securing peace and

justice in that historically troubled land. This is no time for division; it's no time for criticism. It's a time for searching together for a common ground.

We've created a new and beneficial relationship with one-fourth of all the human beings who live on Earth, in China. We've taken the lead, and we continue the Democratic Party's tradition, of seeking to prevent the proliferation of nuclear weapons. We've dared to put the issue of human rights on the permanent international agenda. Only the history books will ever record how many jail doors are open and how many formerly oppressed people, who lived under a totalitarian regime, now know the benefits of human freedom and a chance to choose their own leaders.

Our concern with human rights, which is a foundation of the Democratic Party, begins here at home. We've chipped away at decades of neglect, and we've tried to root out examples of blatant prejudice. We've placed minorities, qualified in every way, in many decisionmaking jobs in the Federal Government. We've whacked away subtle forms of discrimination. We've improved the enforcement of Federal equal opportunity laws. We've brought more minorities and more women into our judicial system than in all the rest of American history combined. And we are not through yet. And we have waged an intense State-by-State effort for the adoption of the equal rights amendment. And we are not through yet.

I could go on and on about the achievements of this administration and this Democratic Congress. It's a record of courage and of dedication and of leadership. But the truth is that, despite our record of accomplishment, much of what we do here in Washington too often seems confusing and irrelevant to millions of Americans. You who are in the Congress share that problem. You know that your

constituents may love you as a person, but they think poorly of the institution of which you are a part and which you represent.

You know how easy it is for us to reap the benefits of the Democratic Party and our own incumbency in high office and, at the same time, to attack in a subtle way the system or the government in order to derive transient political advantage. It's the simplest job for us to tend to a certain home base or some narrow constituency, while giving national interests less attention. And because of this temptation, party unity sometimes goes lacking and our Nation suffers, because national priorities are sometimes met at a snail's pace.

Look, for example, at the energy problem. Is it real? It certainly is. But it's taken 2½ years—I'm not exaggerating—2½ years to get the people of this country to face the fact that our very Nation's security is in danger. Is the energy problem understood? My mail says that, to an increasing degree, it is understood by the the American people and that the American people are crying out now for action, bold action, and action without any further delay.

Americans will not long permit and not long suffer those who do permit the drain of billions of dollars going overseas to pay for oil—next year \$70 billion sapped out of the American economy. Along with those dollars go jobs, and with those millions of barrels of oil every day, we import inflation. United Democrats can now and are making good progress toward giving our Nation, finally, after long years of neglect, a comprehensive national energy policy that will heal our troubled land, bind us together in a spirit of unity and accomplishment and also hope and confidence to the future, cut down on inflation, put our people back to work, and

let our Nation be secure. I'm proud of the progress made so far.

I'm also convinced that Americans want nuclear weapons controlled. The SALT treaty must be ratified. And I tell you, it is easy to find a reason, if one is a U.S. Senator, not to support SALT.

I could have written a better SALT treaty had I done it unilaterally, without consulting the Soviet Union. This treaty was hammered out over 7 years by three Presidents. It's fair; it's balanced. It contributes to our Nation's security. It lets us monitor what the Soviets are doing. It puts a limit and an actual decrease of 10 percent on Soviet missile launchers. It keeps us in a role of leadership for the Western World. It holds NATO together. It contributes to world peace. It gives us authenticity and influence in preventing non-nuclear weapons from turning toward that horrible option.

But if SALT is rejected by the U.S. Senate, that will be a terrible blow to our country and to our party and to our security and to our unity and to our influence in the world and to our alliances and to our own future and to world peace. It is extremely important. And I hope that every single Democrat who listens to my voice will put the ratification of the SALT II treaty at the top of your priority and help me get this done. We must not betray Americans who want peace. We must not betray Americans who look to us for leadership. We must not play politics with nuclear arsenals.

I know that Americans want a nation at peace and a strong America. A strong America is the best guarantor of peace for our own country and for the world. I tell you quite frankly, I believe in a united nation, and I believe in a strong defense. And as long as I'm in the White House, this Nation is going to have a

strong defense. And you can depend on it.

I'm sure you would agree with me when I say that it's not easy these days to be a President or to be a Governor or to be a Member of the Congress or to be a mayor. But through unity, we can share the responsibilities that fall so heavily on our shoulders, and we can enjoy the honor and the pleasure and the gratification of effective public service.

This is a time of testing, for us and for our country. It's time to make the American people understand what we are doing and understand government and, therefore, to trust and respect and support government in difficult times. How? By beginning to speak to one another, to work with one another, and to reason more closely together, by spelling out a common vision of and for America, a vision that our party has always had and a vision that we are now bringing into reality.

Our party has always represented the best in American thoughts and ideals and values. Our party has had the ability to deal with change, change without timidity and without fear. There are others, not Democrats, who long for the past, who resent the present, and who fear the future. That's not the story of the Democratic Party. Our theme song isn't "Auld Lang Syne" or some funeral dirge. Our theme song is "Happy Days Are Here Again."

Let me say in closing that it's time now to shape the Democratic Party for the 1980's. We, the Democratic Party, have the biggest stake of all in making government work, because we intend to be the majority party permanently.

The people give us their confidence, but they also give us a great responsibility. It's a greater responsibility than a Republican has. We must understand that unless we make government work well, some day

it may not work at all. We must recognize and we must understand the impatience and the frustration with government that is so common in our Nation. We must fight the splintered special interest and single issue politics that tend to dominate our national debates.

The challenge that we face is to build a party for the rest of this century that's strong enough to be effective and broad enough to be representative, a party that speaks the meaning to the people of what democracy is, what compassion is, what truth is, what peace is, what harmony is, what unity is, what freedom is, what leadership is. That's our responsibility, and together we can do it. But with selfish divisions among ourselves, our voice is fractured, and it cannot be clearly heard.

This forthcoming year will be filled with campaigns and caucuses, conventions and debates, and we look forward to it. There will be disagreements, and there must be. We will argue about the issues among ourselves, and we ought to. But we can make the system work. We can sharpen our focus on the common agenda items which pull us together, which unite us as Democrats.

We must join together in the fight for SALT II, for hospital cost containment, for better environment, for healthy and growing and happy cities, for a national health plan, for welfare reform, for a windfall profits tax on the oil companies to finance energy security for our country. We've got a lot to do. Let's do it together.

In my speech on July 15, a Sunday night speech, I spoke of a crisis of confidence and a lack of unity in America. The outpouring of mail and telephone calls to the White House after that speech was overwhelming. The professionals that have been there 25 or 30 years said they have never seen so many letters or had so many telephone calls on any single inci-

dent, in wartime or peacetime. Tens of thousands of people, literally, from all over the country wrote similar letters. "You're right," they said. "Tell us how we can help." Sometimes it's hard for that person, who probably wrote their first letter to a President, to find an avenue to the core of American Government. That avenue is through you and through other members of the Democratic Party.

I say to you tonight what I've said to them: The answer to the crisis of confidence is action, and the answer to fragmentation and doubt is unity. It's this belief that holds us together here tonight—that we believe in working together as a great party, that we can shape the destiny of a great nation—the faith that as a free people we can join together to improve our own lives and the lives of others not nearly so fortunate as any single person in this room, that as a strong nation we can build a community of nations at peace. These are not just dreams. They are the long-term agenda that gives purpose to our Democratic Party.

We believe with William Faulkner that mankind will not merely endure, but will surely prevail. So, let us think and consider and rededicate ourselves tonight to the simple truth of that conviction. We shall prevail, we shall overcome, together.

Thank you very much.

NOTE: The President spoke at 10:25 p.m. in the International Ballroom at the Washington Hilton Hotel.

Hospital Cost Containment Legislation

*Statement on Action by the House Interstate and Foreign Commerce Committee.
September 26, 1979*

I am very pleased by the action of the House Commerce Committee today in

favorably reporting, 23 to 19, with bipartisan support, the administration's bill to contain hospital costs. Since the Ways and Means Committee has already reported similar legislation, the full House will at last have an opportunity to act on one of the Nation's most serious problems—soaring hospital costs.

Although it promises to be a close vote, it is inconceivable that a majority of the House would refuse to join in this effort to attack directly one of the primary causes of inflation and to save billions of Federal and State taxpayers' dollars. This is undoubtedly the single most important anti-inflation and budget-saving bill the Congress will face this session. Every Member's seriousness in dealing with excessive inflation and wasteful Federal spending will be judged—correctly—in large part by his or her vote on this issue. I am confident the full House will follow the lead of the Senate during the last Congress and act favorably at long last to restrain soaring hospital costs.

I am grateful for the leadership of Commerce Committee Chairman Harley Staggers and Health Subcommittee Chairman Henry Waxman in seeing the bill successfully through the committee.

Budget Deferrals

Message to the Congress. September 27, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals of budget authority totalling \$61.9 million and a revision to one previously transmitted deferral increasing the amount deferred by \$3.8 million. These items involve the Departments of Agriculture and Commerce and the Railroad Retirement Board.

The details of each deferral are contained in the attached reports.

JIMMY CARTER

The White House,
September 27, 1979.

NOTE: The attachments detailing the deferrals are printed in the *FEDERAL REGISTER* of October 2, 1979.

President's Commission on the Holocaust

Remarks on Receiving the Final Report of the Commission. September 27, 1979

Mr. Chairman, the beauty of your words and the solemnity of your thoughts and the importance of the work of this Commission are all very impressive.

Eight months ago, I asked Elie Wiesel and a distinguished group of Americans, some from the Congress, to take on an awesome responsibility. Jim Blanchard of Michigan and others said they couldn't be here because there is a vote pending in the House, but they have served well, along with a broad cross-section of Americans who have gone into this effort with a great deal of dedication and who have produced a report that will solve problems and picture for us proper actions in the future.

This is an awesome responsibility that you have performed. I asked this group to recommend a fitting memorial in the United States to the victims of the most unspeakable crime in all of human history—the Holocaust. Rarely has a Presidential commission faced a more sobering or a more difficult or a more totally important challenge. This event of the Holocaust, the crime against humanity itself, has no parallel in human history. A philosopher wrote that human language

itself breaks down when confronted with the monstrous challenge of describing this evil.

So, I want to pay a special tribute, on behalf of our Nation, to all those who have contributed to this effort and for the tremendous service that you've performed.

Your very work as a commission is part of a living memorial to the victims of the Holocaust. Your grappling with the meaning of this event has helped bring new understanding and moral vision to all who must confront this question. Your historic trips to the concentration camps in Eastern Europe and to Babi Yar in the Soviet Union have helped to arouse the conscience of the world and to remind us once again that we must never forget. And I know our country appreciates the fact that many of you went on those trips, not at Government expense, but at your own expense.

Out of our memory and understanding of the Holocaust, we must forge an unshakable oath with all civilized people that never again will the world stand silent, never again will the world look the other way or fail to act in time to prevent this terrible crime of genocide.

In addition to the Jewish people who were engulfed by the Holocaust simply because they were Jews, 5 million other human beings were destroyed. About 3 million Poles, many Hungarians, Gypsies, also need to be remembered. To memorialize the victims of the Holocaust, we must harness the outrage of our own memories to stamp out oppression wherever it exists. We must understand that human rights and human dignity are indivisible. Wherever our fellow human beings are stripped of their humanity, defiled or tortured or victimized by repression or terrorism or racism or prejudice, then all of us are victims. As

Americans, we must and we always will speak out in defense of human rights at home and everywhere in the world.

And I might add that as Americans we must share the responsibility for, 40 years ago, not being willing to acknowledge that this horrible event was in prospect.

And I think that the action of this Holocaust Commission is long overdue, because we've not had a constant center which could be visited by Americans of all faiths and all races to be reminded of our omission in the past, to have the memory of this horrible event kept vivid in our minds, to prevent a recurrence of such an action anywhere on Earth in the future.

In view of the 6 million Jewish victims of the Holocaust, it's particularly appropriate that we receive this report during the High Holy Days, just prior to Yom Kippur, the Day of Atonement. Yom Kippur is a day and a time for looking back. It's a time for reflection. It's a time for remembrance. But it's also a time for the reaffirmation of life, a time for looking ahead.

So, I will consider this report most carefully and will respond personally to this Commission and to the people of our Nation with my personal prayer that the memory of the Holocaust shall be transformed into a reaffirmation of life. And as President, I can pledge to you that I will do everything in my power to carry out the recommendations of this report.

The Members of the Congress will be intensely interested in arousing support in our Legislature. And I'm sure the people of this country will be looking with anticipation to this reminder of the victims and also a warning that this horrible event will never again occur on Earth.

Thank you very much, Mr. Chairman, and all the members of the Commission.

NOTE: The President spoke at 2:15 p.m. at the ceremony in the Rose Garden at the White House. Prior to the ceremony, the President met with Mr. Wiesel, Chairman of the Commission, in the Oval Office.

Department of Defense

Nomination of Robert W. Komer To Be Under Secretary for Policy.
September 27, 1979

The President today announced that he will nominate Robert W. Komer, of Alexandria, Va., to be Under Secretary of Defense for Policy. He would replace Stanley R. Resor, resigned.

Komer is Advisor to the Secretary of Defense on NATO Affairs.

He was born February 23, 1922, in Chicago, Ill. He received a B.S. from Harvard College in 1942 and an M.B.A. from Harvard Graduate School of Business Administration in 1947. He served in the U.S. Army from 1943 to 1946.

Komer was with the Central Intelligence Agency from 1947 to 1961, and served as alternate National Security Council Planning Board member and staff assistant from 1958 to 1961. From 1961 to 1965, he was a senior staff member on the National Security Council.

From 1965 to 1966, Komer was Deputy Special Assistant to the President for National Security Affairs, and from 1966 to 1967, he was Special Assistant to the President. From 1967 to 1968, he was Deputy to the Commander of the United States Military Assistance Command, Vietnam.

From 1968 to 1969, Komer was U.S. Ambassador to Turkey. He was a consultant with the RAND Corp. from 1969 to 1976, and a consultant to the Secretary of Defense during 1977.

Department of the Interior

Nomination of William E. Hallett To Be Commissioner of Indian Affairs.
September 27, 1979

The President today announced that he will nominate William E. Hallett, of Broomfield, Colo., to be Commissioner of Indian Affairs. He would replace Ben Reifel, resigned.

Hallett is Assistant Regional Administrator of the Office of Indian Programs for Region VIII in Denver.

He was born May 18, 1942, in Red Lake, Minn. He received a bachelor's degree in business administration from Bemidji State College in 1965.

From 1965 to 1967, Hallett was a personnel technician for the Chicago Police Department. From 1967 to 1968, he was director of housing and manpower programs for the Red Lake Band of Chippewa Indians, where he set up and directed the Tribal Home Construction Co.

From 1968 to 1970, he was director of industrial development for the National Congress of American Indians. During 1970 Hallett was a consultant to the National Council on Indian Opportunity and the President's National Advisory Council on Minority Business Enterprise.

From 1970 to 1975, Hallett was special assistant to the Regional Administrator for Indian Affairs for Region VIII. He has been Assistant Regional Administrator since 1975.

Department of Health, Education, and Welfare

Nomination of William B. Welsh To Be an Assistant Secretary. **September 27, 1979**

The President today announced that he will nominate William B. Welsh, of Annandale, Va., to be an Assistant Secre-

tary of Health, Education, and Welfare. He would replace Richard Warden, resigned, and his area of responsibility would be legislation.

Welsh is Assistant Secretary of Housing and Urban Development for Legislative Affairs and Intergovernmental Relations.

He was born September 18, 1924, in Munfordville, Ky. He received an A.B. from Berea College in 1949 and an M.A. from the University of Kentucky in 1952. He served in the U.S. Army from 1943 to 1946.

Welsh was legislative assistant to U.S. Senator Herbert H. Lehman from 1952 to 1956, and research director of the Democratic National Committee from 1957 to 1958. From 1959 to 1967, he was administrative assistant to U.S. Senator Philip Hart.

In 1967 and 1968, Welsh was administrative assistant to Vice President Hubert Humphrey. From 1969 to 1971, he was executive director of the Democratic National Committee. From 1972 to 1979, he was executive director for governmental affairs of the American Federation of State, County, and Municipal Employees.

National Highway Safety Advisory Committee

Appointment of 12 Members.
September 27, 1979

The President today announced the appointment of 12 persons as members of the National Highway Safety Advisory Committee. They are:

PETER J. ALLEN, owner of Allen's Home Furnishings in San Jose, Calif., where he is active in civic and political affairs;

RALPH V. DURHAM, director of safety and health for the International Brotherhood of Teamsters;

FRANCES H. GOODWIN, an associate judge of the Municipal Court of Dallas, Tex. (reappointment);

JOHN C. LANDEN, vice president of 3M Co. for traffic control products;

WILLIAM L. MALLORY, majority floor leader in the Ohio House of Representatives and an adjunct professor at the University of Cincinnati;

DANIEL F. PORTIS, of Lepanto, Ark., director of the Portis Mercantile Co., and a past member of the Arkansas Highway Commission;

DEBORAH D. RICHARDS, founder, board chairman, and manager of Action for Child Transportation Safety, Inc.;

PETER W. RODINO III, assistant county counsel for Essex County, N.J., and an attorney in East Orange, N.J.

CARL E. SERNA, director of the Project Development Division of the New Mexico State Highway Department;

ADELE D. SPIELBERGER, chief of the Bureau of Highway Safety, Florida Department of Administration, and Governor's highway safety representative for Florida;

LAWRENCE H. STERN, president of Sterns Transport, Inc., an ICC common carrier, and past president of the New Jersey Motor Truck Association;

PATRICIA F. WALLER, associate director for driver programs at the University of North Carolina Safety Research Center.

education. Billions of dollars were being spent, but education programs continued to be denied the full-time attention from a Cabinet Secretary that would make these programs perform effectively. That is why I proposed a separate department of education and why I have made it one of my highest legislative priorities over the past 2 years.

With a separate department of education, we will finally have a single agency and a single Cabinet official responsible full-time for the effective management of Federal aid-to-education programs. As a result, the American people will now have a much clearer picture of what the Federal Government is doing in education and who is in charge of those activities.

I would like to especially thank Chairman Brooks and Speaker O'Neill for bringing this important measure to final passage. I would also like to thank Senator Ribicoff for his successful leadership on this matter in the Senate. I look forward with great pleasure to signing the bill that these congressional leaders have helped pass.

Department of Education Legislation

Statement on House of Representatives Approval of the Legislation.
September 27, 1979

The House's vote today approving the creation of a department of education is a significant milestone in my effort to make the Federal Government more efficient. We will now have a single Cabinet department which can provide the coherence and sense of direction needed for Federal education programs.

When I came to Washington, I was convinced that the Federal Government had failed to deliver adequately on its limited, but important role in American

Panama Canal Act of 1979

Statement on Signing H.R. 111 Into Law.
September 27, 1979

I am pleased to sign into law the Panama Canal Act of 1979, which implements the Panama Canal Treaty of 1977.

The Panama Canal Treaty and the Neutrality Treaty were the result of 13 years of careful negotiations. They have been hailed throughout this hemisphere as a model for equitable negotiations between ourselves and our smaller neighbors. As I said when I signed the treaties, they express the commitment of the United States to the belief that fairness, and not force, should lie at the heart of our dealings with nations of the world.

The treaties also protect our economic and security interests. We will continue to operate the canal until the end of the century through the Panama Canal Commission, an agency of the United States in which Panama will have a minority voice. We will maintain military forces in Panama until that date. After the year 1999, Panama will assume responsibility for operating the canal. A regime of permanent neutrality is established under which both nations have the right to act against any aggression or threat directed against the canal. The Panama Canal Act provides a framework in which the United States can exercise its rights to operate and defend the canal in a manner consistent with our responsibilities and obligations under the treaties.

I particularly want to thank Senators Stennis and Levin and Congressmen Murphy, Bowen, and Derwinski for their outstanding leadership in resolving the many difficult issues embodied in this act.

In signing this act, I want to assure Members of Congress and the Government of Panama that this legislation will be interpreted and applied by the executive branch in strict conformity with the terms and the intent of the treaties. In this respect, I believe that certain technicalities in several sections of the act require comment.

Section 1503 requires congressional approval for transfers of property to Panama. Section 1504 grants such approval subject to a 180-day notice requirement and a prohibition against transfer of the canal itself before termination of the treaty. It remains the position of the administration that the treaty is self-executing with respect to the transfer of property, and thus no additional legislative authorization is required. With regard to the condition contained in Section 1504 (c) concerning transfer of the canal, I note that this does not preclude other discretionary transfers during the lifetime

of the treaty, as provided for in Article XIII, paragraph 2(b) and 2(c) of the treaty.

Section 1341(e) lists certain costs which must be paid prior to any contingent payment to Panama under paragraph 4(c) of Article XIII of the treaty. It is my understanding that costs listed in this section are identical to those which will be included in the tolls base under Section 1602 of the act. These costs are related to the operation and maintenance of the canal and are thus properly considered as "expenditures" under paragraph 4(c) of Article XIII, to be paid before any surplus is due to Panama under that provision.

NOTE: As enacted, H.R. 111 is Public Law 96-70, approved September 27.

Anti-Inflation Program

***Remarks Announcing a National Accord
Between the Administration and the
American Labor Leadership.
September 28, 1979***

In my Sunday night speech to the Nation in July, I said that the people of our country want to see government and our great institutions pull together to face the complex challenges which confront us as a people. Inflation is the most persistent challenge to our economy, primarily fed by escalating energy costs, which are predominantly controlled by others in foreign countries. Inflation tends to pit our people and our institutions against each other and contributes to a sense of frustration and doubt and concern, which is so worrisome to our people. Ultimately, if not curbed, inflation will sap our confidence as a nation, will erode our faith in the future, and will threaten those basic human values which make our country great.

I've called for our institutions and our people to regain a sense of shared purpose

and shared cooperation and to join in a successful fight against inflation. Today, I'm very pleased to announce that enormous progress toward that goal has been made. I'm pleased and proud to announce that this administration has achieved a new national accord with the broadest possible impact in order to fight against inflation.

This accord is represented by a statement of principles which we've been pursuing since July in discussions with representatives of organized labor. Parallel discussions have also been held with the leaders in the business community.

The communication from President George Meany—that the AFL-CIO executive council has today endorsed the statement of principles—means that for the first time in history, such an accord has been reached on a voluntary basis. I'd like to say that President Meany, who's announced that he will not seek reelection today, has contributed with his heart and his mind, his experience, his inspirational leadership to the reaching of this agreement, and I'm deeply grateful to him.

I also want to commend especially Secretary William Miller and the members of my economic policy group, the key leaders, in addition to Mr. Meany, of our major labor organizations, and representatives of the business community for working so constructively together in search of this understanding.

As part of our national accord, we will be establishing a Pay Advisory Committee and a Price Advisory Committee. Organized labor leadership has agreed to serve on the Pay Advisory Committee, and I'm counting on business leaders to join it also.

This Committee, which will play an important role in assuring restrained but equitable pay increases, is to be made up of 15 members—five each from labor, business, and the public. John Dunlop has accepted my invitation to serve as

Chairman of this Pay Committee, and other members will be announced in the near future. The Price Advisory Committee will consist of five public members whom I will name in a few weeks.

I want to emphasize again that if substantial progress is to be made to reduce inflation in this country—and this will obviously take time and sustained effort—we will need the active and dedicated support for Government of both business and labor.

The developments of today provide us the initial framework for such an effort, and I pledge to do my utmost to follow through and to make this initiative a significant forward step in our continuing and determined fight against inflation in the United States.

I would like now to introduce the Secretary of Treasury, William Miller, who, along with others on the stage with me, will be glad to answer your questions.

Bill Miller.

NOTE: The President spoke at 1:47 p.m. in Room 450 of the Old Executive Office Building. Following his remarks, Secretary Miller, Alfred E. Kahn, Advisor to the President on Inflation, and Lane Kirkland, secretary-treasurer of the AFL-CIO, held a news conference on the national accord.

Anti-Inflation Program

Executive Order 12161. September 28, 1979

SECOND YEAR OF THE ANTI-INFLATION PROGRAM

By the authority vested in me as President and as Commander in Chief of the Armed Forces by the Constitution and statutes of the United States of America, including the Council on Wage and Price Stability Act, as amended (12 U.S.C. 1904 note), and the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(a)), and in

order to supplement the anti-inflation program established on November 3, 1978, Section 1-102 of Executive Order No. 12092 is hereby amended to read as follows:

"1-102. Anti-inflationary wage and price behavior shall be measured by the following standards:

(a) For prices, anti-inflationary price behavior of a company is a current rate of average price increase no greater than its historical rate of price increase during 1976-77, except where the company experiences uncontrollable increases in the prices of the goods and services it buys, and subject to the provisions of paragraphs (c) and (d).

(b) For pay, anti-inflationary pay behavior is the holding of pay increases to not more than 7 percent annually above their recent historical levels, subject to the provisions of paragraphs (c) and (d).

(c) These standards, which shall be further defined or modified by the Chairman of the Council on Wage and Price Stability, shall be subject to limitations and exceptions as determined by the Chairman and shall be administered so as to take into account any inequities that may have been created by the standards during the past year.

(d) The Council is directed to reconstitute in accordance with the Federal Advisory Committee Act, as amended, a Pay Advisory Committee and a Price Advisory Committee in order to provide greater participation by the public in the anti-inflation program. The Pay Advisory Committee and the Price Advisory Committee will advise the Council on developing policies that encourage anti-inflationary pay and price behavior by private industry, employers, and labor, that decelerate the rate of inflation and that provide for a fair and equitable distribution of the burden of restraint. To the extent permitted by law, the Council is directed to provide the Pay and Price Advisory

Committees with all information required to perform their duties."

Department of Agriculture

Nomination of James C. Webster To Be an Assistant Secretary. September 28, 1979

The President today announced that he will nominate James C. Webster, of Madison, S. Dak., to be Assistant Secretary of Agriculture. He would replace Dale Hathaway, who has been appointed Under Secretary of Agriculture.

Webster has been director of the Office of Governmental and Public Affairs at the Agriculture Department since 1977.

He was born February 9, 1938, in Grand Island, Nebr. From 1961 to 1963, he was South Dakota manager for UPI, and from 1963 to 1968, he was managing editor of the Madison Daily Leader. From 1968 to 1969, he was editor of the East River Guardian.

From 1970 to 1973, Webster was director of public relations for the American Public Power Association. From 1973 to 1975, he was legislative assistant and press secretary to Senator George McGovern. From 1975 to 1977, he was chief clerk and press secretary of the Senate Committee on Agriculture and Forestry.

Gasoline End-User Allocation

Executive Order 12162. September 28, 1979

AMENDMENT TO EXECUTIVE ORDER 12140

By the authority vested in me as President by the Constitution and statutes of

the United States of America, including the Emergency Petroleum Allocation Act of 1973, as amended (15 U.S.C. 751 *et seq.*), Executive Order No. 12140 is hereby amended by deleting the first sentence in Sec. 1-105.

Budget Deferral

Message to the Congress. September 28, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report a routine revision to a previously transmitted deferral for the Department of Transportation. This revision increases the amount deferred by \$5.0 million. The details of this revised deferral are contained in the attached report.

JIMMY CARTER

The White House,
September 28, 1979.

NOTE: The attachment detailing the deferral is printed in the FEDERAL REGISTER of October 3, 1979.

Procurement of Grain in Nicaragua

*Memorandum From the President.
September 28, 1979*

Presidential Determination No. 79-17

*Memorandum for the Administrator,
Agency for International Development*

Subject: Determination and Authorization under Section 614(a) of the Foreign Assistance Act of 1961, as amended, for

Procurement in Nicaragua of Rice, Sorghum, Beans and Corn

Pursuant to the authority vested in me by section 614(a) of the Foreign Assistance Act of 1961, as amended (the Act), I hereby

A. Determine that the use of approximately \$5.0 million in funds available in FY 1979 for the procurement in Nicaragua of rice, sorghum, beans and corn, without regard to the requirements of section 604(e) of the Act, is important to the security of the United States; and

B. Authorize such use of approximately \$5.0 million in funds for the procurement in Nicaragua of rice, sorghum, beans and corn.

This determination shall be published in the FEDERAL REGISTER, as required by law.

Thanksgiving Day, 1979

Proclamation 4693. September 28, 1979

*By the President of the United States
of America*

A Proclamation

Thanksgiving Day was first celebrated in this land not in a moment of unbridled triumph, but in times of great adversity. The colonies of Massachusetts and Virginia had few material possessions to help them face the dangers of the wilderness. They had no certainty that the harvests for which they gave thanks would be sufficient to carry them through a long winter. Yet they gave thanks to God for what they had and for the hope of this new land.

In the darkest hour of the American Revolution, when the young Republic

faced defeat by the strongest military power on Earth, our forefathers also saw fit to give thanks for their blessings. In the midst of a devastating Civil War, President Lincoln proclaimed a day to express gratitude for our "singular deliverances and blessings."

The ensuing years have multiplied our nation's blessings. We have been delivered from repeated perils, and we have been blessed with abundance beyond the imaginings of those who offered thanks in the chill of approaching winter more than three-and-one-half centuries ago.

Succeeding generations have broadened the freedom they cherished and the opportunity they sought, and built a mighty nation on the strong foundations they laid. In this two hundred and fourth year of our independence, we have good reasons for gratitude: for liberty in a world where repression is common, for peace in a world of threats and terror and war, for a bounteous harvest in a world where hunger and despair still stalk much of mankind.

Like those who came before us, we come to give thanks for our singular deliverances and blessings, in a time of both danger and great promise. May we be thankful in proportion to that which we have received, trusting not in our wealth and comforts, but in the strength of our purpose, that all nations might be similarly blessed with liberty and abundance and live in peace.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, do proclaim Thursday, the 22nd of November, 1979 as Thanksgiving Day. I ask all Americans to give thanks on that day for the blessings Almighty God has bestowed upon us, and seek to be good stewards of what we have received.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of September, in the year of our Lord

nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

Visit of President López Portillo of Mexico

*Toasts at the State Dinner.
September 28, 1979*

PRESIDENT CARTER. President López Portillo, we welcome you and your lovely wife, Carmen, and your personal family and your official family back to the White House. Tonight we're determined to make the result of our toasts better than they were when I was in Mexico City.
[Laughter]

You represent a great democratic nation, growing in world influence. And, Mr. President, your depth of insight and your breadth of vision match the past and the future achievements of your great country.

Your speech yesterday at the United Nations on the future of the world as it relates to energy was indeed one of the most profound and the most beautiful speeches I have ever read. This can lay the groundwork for discussions among all nations on Earth—as you said, democratic nations and socialist nations, developed nations and undeveloped nations—which can lead to the resolution of one of the most difficult challenges of our time. This is typical of your personal leadership, Mr. President, and the leadership of your great country.

It's an honor and a privilege and an exciting experience for us to have you again in our country for serious discussions that will affect your people and mine.

Our nations are linked by both border and by destiny, by blood kinship and by a love of freedom. Both of us have thrown off colonial rule. Our ancestors know what it means to go from oppression to liberty. The relationships between our two countries have not always been happy, nor always peaceful. Some differences in the past, unfortunately, have even been settled by bloodshed. Some differences even in our own lifetime have been too long ignored or hidden. Now I believe that these troubled and uncertain times between our two countries are gone forever. If we lead well, we can write a new and a long history of peace, friendship, cooperation, and understanding between our people.

We are determined that our dialog will always be creative, that our negotiations will be frank and fair and mature and productive, that we will solve problems so that our people will have a better quality of life, and that together, through leadership, we can benefit the people of other nations.

When I had the honor to speak to the members of the Mexican Congress, I quoted the words of your great leader, Benito Juarez, that are inscribed on the walls of the Chamber of Deputies. The people of your country—through television, thanks to you—heard these words, but I would like the citizens of my country to hear them tonight here in the White House. *Entre los individuos, como entre las naciones, el respeto al derecho humano es la paz.*

INTERPRETER. Between individuals, as between nations, respect for the rights of others is peace.

PRESIDENT CARTER. Very good. [Laughter] I might say that that is a perfect translation. [Laughter]

And in that spirit, ladies and gentlemen, that between nations and between

individuals there can be a perfect peace, I would like to offer a toast—without wine, but with water, and we'll drink wine later on—to the President of Mexico, to the family which he has brought here, both official and personal, to peace between our two countries, to better understanding throughout the world, and to the people of Mexico.

[At this point, there was a brief pause as wine was served.]

If I could have your attention again, just to make sure that the toast is authenticated—[laughter]—I would like to again offer a toast to the President of a great country and to the people of Mexico. Welcome to our Nation.

PRESIDENT LÓPEZ PORTILLO. *Mr. President of the United States and Mrs. Carter:*

For me, for my family and the members of my party, it is a great honor to meet again for the third time.

Our two peoples feel great security in the fact that since we are neighbors, the two Presidents of the two countries can meet as frequently as we do. To communicate is actually to open up the possibility of a peaceful coexistence, to live together. Communication is a guarantee of human coexistence.

For me, it is a great satisfaction to communicate with the President of the United States for the third time, to be able to once again witness the enormous values that he holds in himself as a human being—his generosity and his bravery. For me, President Carter, it is a great pleasure to see you again and a great honor to take up, once again, the very serious matters in the very open way in which we have dealt with them.

Today we could see that we were not mistaken when we decided upon a certain way of work between the two coun-

tries. It was a new system that had some problems in taking off, but which is now working very well. We were right, President Carter, and I am very happy that we were. We can now analyze in depth the bilateral problems that, perforce, have to come about when two countries are neighbors.

Life is risk; life is a solution of problems. As we say in my homeland, it is only the dead that do not make noise. [Laughter] Noise is life, and our two countries are very vital countries. They are both located in the same continent, but they have two different roots.

We are learning to live together. It is a great guarantee for us that we have this possibility of living together at a time when the head of the Government of this great country is a person like Mr. Carter. He has been very generous, as he always is, when he referred to the proposal that we made yesterday in my address before the General Assembly of the United Nations. In this proposal, we stand on opposite sides.

The United States is the powerful nation, perhaps the most outstanding expression of this kind of a nation in the world. Mexico is a developing nation. There is a border between us 3,000 kilometers long, and perhaps this is the best expression of the north-south relationship.

If we can understand the facts of our reality as a problem, if we can state our facts as a problem within this climate of mutual respect, which has prevailed today and which has prevailed always when we have met, we can then prove that we can win out, and we can transcend the differences between the north and the south, between developing and the developed. That is why I have high hopes that at the only universal forum that we men have been able to create, and which we sometimes tend to ignore as if it had just

fallen upon us from Mars—since the real fact is that we created that forum ourselves and it will be whatever we want it to be, at that forum, no doubt, we can bring up problems that are of interest to all.

I am obsessed with the problem that I consider to be fundamental for the future of humanity, the problem of energy. We have this energy supply in Mexico. We have hydrocarbons, but we know that it is a depletable resource. I would like to transmit to you the need to create an awareness in all of mankind, so that they will understand that the generation that is represented here tonight is the generation that will see the end of the era of oil and will witness the beginning of a new era or the end of them all. With this thought in mind, we have come to the United Nations, and now we have come to the United States to present our reflections to Mr. Carter, in order to be able to win the political will of the United States.

We have many times said that to be strong means great responsibilities towards humanity. I am fully convinced that if the United States expresses its political will to put order into the world of energy sources, but within a framework of responsibility that will comprise all of humanity and not through bilateral agreements, bloc agreements, or unilateral struggles, in order to become independent—I am convinced that we can survive, that we can go ahead, that we can cross a bridge that connects one era with another.

However, sometimes I reflect, and I think that what is reasonable and simple is not always what is possible. Many times, unfortunately, humanity seeks absurd solutions. Perhaps it is because what is absurd does not require great discipline. But I feel that humanity can become disciplined, and it can go from one style of

energy into another lifestyle which requires another energy source. And I insist, once again, if the United States expresses its political will in this direction, this will be made possible.

The objective is a very simple one. The proposition is a very simple one. Let us prepare to go from one era into another era by putting order into a resource, into the exploration, exploitation, distribution, and consumption of the resource we have now, and let us prepare to use another one later on, because if we do not, life will no longer be possible.

Mexico is willing to do whatever it can do. Before all the nations of the world, it has expressed its political will to take on a commitment. We consider that it is indispensable to commit ourselves. We must think about our children and our children's children and the world we're going to leave behind for them to live in. Will it be an orderly, peaceful world, or will it be the world of the apocalypse? Will it be a disorderly world? I believe that it is not a difficult selection. I forgive for insisting upon this idea once and again, I beg your forgiveness.

It is with this idea in mind that we have come to the United States in order to have the satisfaction to review, within the framework of that very intelligent instrument that was established by President Carter and myself, the state of our relationship, to seek your solidarity, to solve a problem that is everyone's problem, and to recommend what I would consider to be a very simple remedy.

During my political campaign, I insistently said that the solution is to be found in all of us. I believe, in the case of energy sources and ever so many other matters that are very serious for mankind, we must constantly think that the solution is to be found in all of us.

To these values that are common to all

of our democracies, the friendship of our peoples, with the hope that our communication lines will be always open between us, and to the happiness of the United States and, particularly, the Carter family, I ask you to join me in a toast.

NOTE: President Carter spoke at 8:15 p.m. in the State Dining Room at the White House. President López Portillo spoke in Spanish, and his remarks were translated by an interpreter.

Earlier in the day, President Carter and President López Portillo held a meeting in the Cabinet Room at the White House to discuss bilateral issues.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

September 23

The President and Mrs. Carter hosted a dinner for Members of Congress at the White House.

September 24

The President met at the White House with:

—Zbigniew Brzezinski, Assistant to the President for National Security Affairs;

—Frank B. Moore, Assistant to the President for Congressional Liaison;

—the Bee Gees, a musical group.

The President met in the Oval Office with Lou Brock, an outfielder for the St. Louis Cardinals professional baseball team, to congratulate him on achieving his 3,000th career hit. Other participants included Mr. Brock's family, Vice President Walter F. Mondale, and Members of Congress.

Administration of Jimmy Carter, 1979

September 25

The President met at the White House with:

- Dr. Brzezinski;
- members of the Congressional Suburban Caucus;

A joint resolution to provide for a temporary extension of certain Federal Housing Administration authorities, and for other purposes.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, October 5, 1979

Visit of President José López Portillo of Mexico

*Remarks Following a Meeting.
September 29, 1979*

PRESIDENT CARTER. I would like to say to the press that President López Portillo and I have had very friendly and constructive and profitable discussions this last 2 days. We have prepared a joint communique to outline the results of our discussions.

But I believe that this visit has been not only a delightful one for us but has served to convince the people of our two countries that we live in a state of harmony, of mutual purpose, and of friendship and of cooperation. And I'm deeply grateful to President López Portillo for his contribution to the outcome of this meeting.

Thank you.

PRESIDENT LÓPEZ PORTILLO. Thank you very much, Mr. Carter.

Yes, actually, I do want to say that our meetings have been very good ones. I'm very grateful to President Carter.

The meetings have taken place within the framework within which they have taken place during our other two previ-

ous times. There's a framework of friendship and deep understanding. They have served to prove that the lines of communication are alive and working. And this is the only way that it can be and the way that it should be. This is the only way in which we can guarantee our constant contact, communication, for harmonious coexistence and the only manner in which all the countries of the world can live within a system of dignity and peace.

Thank you.

NOTE: President Carter spoke at 11:27 a.m. on the South Lawn of the White House. President López Portillo spoke in Spanish, and his remarks were translated by an interpreter.

Visit of President López Portillo of Mexico

Joint Press Statement. September 29, 1979

President Carter and President López Portillo met at the White House September 28-29 for the third in a series of reviews on the status of bilateral relations and consideration of regional and global issues of mutual interest.

At their second meeting the Presidents had agreed to a restructuring of the Consultative Mechanism and had requested their Secretaries of State and Foreign Relations to report on the matter. The first order of business at this meeting, accordingly, was to review that report. The Presidents expressed satisfaction with the intensive effort made by the working groups of the Consultative Mechanism and the substantive progress achieved in those groups. They concluded that the Mechanism has proven to be an effective vehicle for coordinating and further defining bilateral relations. They therefore instructed their Administrations to continue working through the Mechanism in the areas of mutual interest already identified.

President Carter and President López Portillo reviewed the status of bilateral consultations in the energy field and expressed their pleasure at the successful conclusion of governmental negotiations for the sale of Mexican surplus associated natural gas to the United States. They considered this agreement advantageous to both countries. Regarding another energy source, the Presidents expressed their hope that ongoing negotiations for electric energy interchanges along their common border may also be satisfactorily concluded in the near future.

Both Presidents noted that the common border offers unique opportunities for close collaboration in many areas. They expressed their interest in enhancing the environment along the border and preserving the quality of life in the region. Presidents Carter and López Portillo agreed on the need for both countries to prevent events or actions on one side of the land or maritime boundary from degrading the environment on the other

side. They also instructed their Administrations to give a high priority to such questions. They also agreed to work within the Consultative Mechanism to determine if it is possible or appropriate to conclude agreements for measures by both countries to lessen or eliminate environmental damage in the future.

The Presidents recalled that last February they had instructed the International Boundary and Water Commission to recommend measures that might be adopted within the context of existing agreements to achieve further progress towards a permanent solution to border sanitation problems. The Presidents reviewed the recommendations submitted by the Commission, and found them satisfactory as a basic agreement for solution of border sanitation problems. The Presidents asked the Commission to proceed as soon as possible to conclude the supplementary recommendations for completion of the works required to provide the good quality water which they had recognized in February to be so important for the health and well being of the citizens of both countries living and traveling in the border area.

The Presidents paid special attention to the phenomenon of the migratory flow between Mexico and the United States, including specific issues that arise therefrom on both sides of the border. They recognized that, as they had agreed last February, it is essential to know with greater precision and detail all aspects of the matter.

The President of Mexico accordingly outlined the purposes and first partial results of the national survey of emigration to the northern border and the United States, undertaken by the Department of Labor and Social Welfare. This large-scale

study, which is in an advanced stage, will provide more precise information on the size and nature of emigration, including data on the number of emigrants who annually enter the United States, how many return to Mexico, their contribution to the U.S. and Mexican economies, and the degree to which they draw upon and contribute to social services in the United States. President Carter agreed on the importance of statistical consistency in approaching questions of migration and was pleased to learn of the progress of the survey.

President Carter described the steps he has taken to ensure that all Departments and Agencies of the United States Government give priority to the protection of the human rights of all persons in the United States, whether or not they are American citizens.

Both Presidents repeated their commitment to combat the smuggling of undocumented persons, which constitutes a serious threat to human rights.

Following their review of bilateral matters, President López Portillo and President Carter discussed recent developments in Central America and agreed that progress toward a democratic government in Nicaragua had improved the prospects of peace in the region and a greater respect for human rights. They committed their governments to continue supporting the Nicaraguan Government of National Reconstruction with a view toward assisting it in the task of economic and social recovery. Both Presidents exchanged points of view on the Caribbean.

President Carter congratulated President López Portillo on his proposal to the United Nations on rationalized production and consumption of energy, both in the industrialized countries and the developing countries, saying that it was a bal-

anced presentation, positive in tone. President Carter also referred to the energy plan proposed to the U.S. Congress and agreed on the need to devote increased efforts to alternative sources.

Finally, there was a review of the latest developments on the Middle East and SALT II Treaty.

Trade With Argentina

Proclamation 4694. September 29, 1979

STAGED REDUCTION OF RATES OF DUTY ON CERTAIN PRODUCTS TO CARRY OUT A TRADE AGREEMENT WITH ARGENTINA

*By the President of the United States
of America*

A Proclamation

1. I have determined, pursuant to section 101(a) of the Trade Act of 1974 (the Trade Act) (19 U.S.C. 2111(a)), that certain existing duties of the United States are unduly burdening and restricting the foreign trade of the United States and that one or more of the purposes of the Trade Act would be promoted by entering into the trade agreement with Argentina identified in the third recital of this proclamation.

2. Sections 131(a), 132, and 133 of the Trade Act (19 U.S.C. 2151(a), 2153, and 2154) and section 4(c) of Executive Order No. 11846 of March 27, 1975, have been complied with.

3. Pursuant to Title I of the Trade Act (19 U.S.C. 2111 *et seq.*), I have, through my duly empowered representative, on August 10, 1979, entered into a trade agreement with Argentina, effective Octo-

ber 1, 1979, pursuant to which United States rates of duty on certain products would be modified as hereinafter proclaimed and as provided for in the annexes to this proclamation, in exchange for certain measures which will benefit United States interests.

4. In order to implement the trade agreement referred to in the third recital of this proclamation it is necessary to modify the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) as provided for in the annexes to this proclamation, attached hereto and made a part hereof.

5. Pursuant to the Trade Act, I determine that the modifications or continuance of existing duties hereinafter proclaimed are required or appropriate to carry out the trade agreement identified in the third recital of this proclamation.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes, including sections 101, 105, 109, and 604 of the Trade Act (19 U.S.C. 2111, 2115, 2119, and 2483), do proclaim that—

(1) Part 2B and part 5A of schedule 1 of the TSUS are modified as provided in Annexes I and II to this proclamation.

(2) Each of the modifications to the TSUS made by this proclamation shall be effective as to articles entered, or withdrawn from warehouse, for consumption on or after October 1, 1979.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of September, in the year of our Lord, nineteen hundred and seventy-nine and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 11:33 a.m., October 1, 1979]

NOTE: The annexes are printed in the FEDERAL REGISTER of October 2, 1979.

Administration of Foreign Assistance and Related Functions

Executive Order 12163. September 29, 1979

By virtue of the authority vested in me by the Foreign Assistance Act of 1961, Reorganization Plan No. 2 of 1979, the International Development Cooperation Act of 1979, and section 301 of title 3 of the United States Code, and as President of the United States, it is hereby ordered as follows:

1-1. *United States International Development Cooperation Agency*

1-101. Establishment of the United States International Development Cooperation Agency. Sections 1, 5, 6, and 8 of Reorganization Plan No. 2 of 1979 are declared effective and the United States International Development Cooperation Agency (hereinafter referred to as "IDCA") is hereby established.

1-102. Delegation of Functions. (a) Exclusive of the functions otherwise delegated, or reserved to the President, by this order, and subject to the provisions of this order, there are hereby delegated to the Director of IDCA (hereinafter referred to as the "Director") all functions conferred upon the President by:

(1) the Foreign Assistance Act of 1961 (22 U.S.C. 2151 *et seq.*); (hereinafter referred to as the "Act");

(2) the Latin American Development Act (22 U.S.C. 1942 *et seq.*);

(3) section 402 of the Mutual Security Act of 1954 (22 U.S.C. 1922);

(4) section 413(b) of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2431); and

(5) title IV of the International Development Cooperation Act of 1979 (22

U.S.C. 3501 *et seq.*) (hereinafter referred to as the "IDC Act of 1979").

(b) The functions under sections 116 (e), 491(b), 491(c), 607, 627, 628, 630 (3), and 666 of the Act, and section 403 (e) of the IDC Act of 1979, delegated to the Director shall be exercised in consultation with the Secretary of State.

(c) The functions under section 125 (b) of the Act delegated to the Director shall be exercised in consultation with the Secretary of the Treasury and, with regard to the United Nations Development Program, in consultation with the Secretary of State.

(d) The Director shall exercise the functions of the President under sections 301(a), 301(e) (1), 301(e) (3), and 305 of the Act only insofar as they pertain to the United Nations Development Program, UNICEF, the Organization of American States Technical Assistance Funds, the United Nations Capital Development Fund, the United Nations Educational and Training Program for Southern Africa, the United Nations/Food and Agriculture Organization World Food Program, the Food and Agriculture Organization Post-Harvest Losses Fund, the United Nations Disaster Relief Organization, and any other international programs whose purpose is primarily developmental.

(e) In carrying out the functions under section 653 of the Act that are delegated to the Director, the Director shall consult with the Director of the Office of Management and Budget.

(f) To the extent practicable, the Director will exercise functions relating to Foreign Service personnel in a manner that will assure maximum compatibility among agencies authorized by law to utilize the Foreign Service personnel system. To this end he shall consult regularly with the Secretary of State.

(g) In exercising functions under the Act arising from later-enacted amendments to any law specified in subsection (a) of this section that relate directly to matters of foreign policy, the Director shall consult with the Secretary of State to determine whether such function should more appropriately be exercised by the Secretary or reserved to the President.

1-103. Agency for International Development.

(a) The Director shall continue within IDCA the Agency for International Development, heretofore established in the Department of State.

(b) The Agency for International Development shall be headed by an Administrator appointed pursuant to section 624(a) of the Act.

(c) The officers provided for in section 624(a) of the Act shall serve in the Agency for International Development.

1-104. Office of Small Business. The Office of Small Business provided for in section 602(b) of the Act shall be in the Agency for International Development.

1-2. Department of State

1-201. Delegation of Functions. (a) Subject to the provisions of this order, there are hereby delegated to the Secretary of State (hereafter in this Part referred to as the "Secretary") all functions conferred upon the President by:

(1) sections 239(g), 301(a), 301(b), 301(c), 301(e) (1), 301(e) (3), 302 (a) (1) as it relates to the Presidential certification concerning the United Nations Relief and Works Agency, 302 (a) (3), 305, 481, and 502B of the Act;

(2) section 495F of the Act, insofar as they relate to policy decisions pertaining to refugee programs under such section;

(3) sections 504(a), 505(a) relating to other provisions required by the Presi-

dent, and 505 (d), (e), and (g) of the Act;

(4) sections 505(a) (1) and (4) of the Act relating to consent;

(5) section 505(b) of the Act to the extent that it pertains to countries that agree to the conditions set forth therein;

(6) chapter 4 of Part II of the Act, insofar as they relate to policy decisions and justifications for economic support programs under such chapter, including determinations of whether there will be an economic support program for a country and the amount of the program for each country. Such functions shall be exercised in cooperation with the Director.

(7) section 533(b) of the Act;

(8) chapter 6 of part II of the Act;

(9) section 601(b) (3), (4), and (6) of the Act;

(10) section 614(b) of the Act, except that the function of determining which provisions of law should be disregarded to achieve the purpose of the provision is reserved to the President;

(11) section 620 (b), (c), (e), (f), (g), (i), (j), (q), and (s) of the Act;

(12) section 620C(d) of the Act;

(13) section 625(d) of the Act, insofar as it relates to personnel in the Department of State;

(14) section 625(k) (1) of the Act;

(15) section 634B of the Act, insofar as it relates to functions delegated to the Secretary under this order;

(16) sections 617 and 653 of the Act, insofar as they relate to chapter 8 of part I and part II of the Act (other than chapter 4 thereof);

(17) sections 657 and 668 of the Act;

(18) other provisions of the Act that relate directly and necessarily to the conduct of programs and activities vested in or delegated to the Secretary;

(19) the Mutual Defense Assistance Control Act of 1951 (22 U.S.C. 1611 *et seq.*);

(20) section 8(d) of the Act of January 12, 1971 (22 U.S.C. 2321b(d)); and

(21) section 607 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2394a).

(b) The functions under sections 239 (g), 620(e), 620(g), 620(i), 620(j), 620(q), 620(s), and 625(k) (1) of the Act delegated to the Secretary shall be exercised in consultation with the Director.

(c) The functions under section 653 of the Act delegated to the Secretary shall be exercised in consultation with the Secretary of Defense, insofar as they relate to functions under the Act administered by the Department of Defense, and the Director of the Office of Management and Budget.

(d) The Secretary may redelegate to the Director or to any other officer or agency of the Executive branch functions delegated to the Secretary by this order.

1-3. *Department of Defense*

1-301. Delegation of Functions. Subject to the provisions of this order, there are hereby delegated to the Secretary of Defense:

(a) The functions conferred upon the President by Part II (except chapters 4 and 6 thereof) of the Act not otherwise delegated or reserved to the President.

(b) To the extent that they relate to other functions under the Act administered by the Department of Defense, the functions conferred upon the President by sections 602(a), 605(a), 625(a), 625(d) (1), 625(h), 627, 628, 630(3), 631(a), 634B, 635(b) (except with respect to

negotiation, conclusion, and termination of international agreements), 635(d), and 635(g) of the Act.

(c) Those functions under section 634A of the Act, to the extent they relate to notifications to the Congress concerning changes in programs under part II of the Act (except chapters 4 and 6 thereof), subject to prior consultation with the Secretary of State.

(d) The functions under sections 627, 628, and 630(3) of the Act delegated to the Secretary of Defense shall be exercised in consultation with the Secretary of State.

1-302. Reports and Information. In carrying out the functions under section 514 of the Act delegated to him by section 301 of this order, the Secretary of Defense shall consult with the Secretary of State.

1-4. *Institute for Scientific and Technological Cooperation*

1-401. Establishment of Institute for Scientific and Technological Cooperation. There is established within IDCA the Institute for Scientific and Technological Cooperation (hereinafter referred to as the Institute).

1-402. Establishment of the Council on International Scientific and Technological Cooperation. There is established the Council on International Scientific and Technological Cooperation pursuant to section 407(a) of the IDC Act of 1979.

1-403. There are hereby established two additional positions in the Institute pursuant to section 406(c) of the IDC Act of 1979. The officers appointed to these positions shall perform such duties and exercise such powers as the Director of the Institute may prescribe.

1-5. *Other Agencies*

1-501. Department of the Treasury. (a) There are delegated to the Secretary of the Treasury the functions conferred upon the President by:

(1) section 301(e) (3) of the Act as it relates to organizations referred to in section 301(e) (2) of the Act;

(2) section 305, insofar as it relates to the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the Asian Development Fund, and the International Monetary Fund;

(3) the second sentence of section 612 (a) of the Act; and

(4) section 502 of the Mutual Security Act of 1954 (22 U.S.C. 1754).

(b) The Secretary of the Treasury shall continue to administer any open special foreign country accounts established pursuant to former section 514 of the Act as enacted by section 201(f) of Public Law 92-226 (86 Stat. 25) and repealed by Section 12(b) (5) of Public Law 93-189 (87 Stat. 722).

(c) The functions under section 305 of the Act delegated to the Secretary of the Treasury shall be exercised in consultation with the Director, as provided in Executive Order No. 11269 of February 14, 1966, as amended.

1-502. Department of Commerce. There is hereby delegated to the Secretary of Commerce so much of the functions conferred upon the President by section 601(b) (1) of the Act as consists of drawing the attention of private enterprise to opportunities for investment and development in less developed friendly countries and areas.

1-503. Office of Personnel Management. There is hereby delegated to the Director of the Office of Personnel Management the function of prescribing regulations conferred upon the President by the proviso contained in section 625(b) of the Act.

1-504. International Communication Agency. The International Communication Agency shall perform all public information functions abroad with respect to the foreign assistance, aid, and development programs of the United States Government.

1-505. Development Loan Committee. There is hereby established a Development Loan Committee in accordance with section 122(e) of the Act which shall consist of the Director of IDCA, who shall be Chair, the Administrator of the Agency for International Development, the Chairman of the Board of Directors of the the Export-Import Bank of the United States, the Assistant Secretary of State for Economic Affairs, the Assistant Secretary of the Treasury dealing with international finance, the Assistant Secretary of Commerce for Industry and Trade, and the officer of the Agency for International Development dealing with development financing.

1-506. Development Coordination Committee. (a) In accordance with section 640B of the Act, there is hereby established a Development Coordination Committee (hereinafter referred to as the Committee). The Committee shall consist of the Director of IDCA, who shall be Chair; the Administrator of the Agency for International Development, the Director of the Institute for Scientific and Technological Cooperation; the Under Secretary of State for Economic Af-

fairs; the Under Secretary of the Treasury for Monetary Affairs; the Under Secretary of Commerce; the Under Secretary of Agriculture; the Under Secretary of Labor; the Under Secretary of Energy; a Deputy Special Representative for Trade Negotiations; an Associate Director of the Office of Management and Budget; a representative of the Assistant to the President for National Security Affairs; the President of the Export-Import Bank of the United States; and the President of the Overseas Private Investment Corporation.

(b) Whenever matters within the jurisdiction of the Committee may be of interest to Federal agencies not represented on the Committee under subsection (a) of this section, the Chair of the Committee may consult with such agencies and may invite them to designate representatives to participate in meetings and deliberations of the Committee.

(c) The Chair of the Committee may establish subcommittees of the Committee and designate the chairs thereof.

(d) Subject to the foreign policy guidance of the Secretary of State, the Committee shall advise the President with respect to coordination of United States policy and programs affecting the development of developing countries, including programs of bilateral and multilateral development assistance.

(e) All agencies and officers of the Government shall keep the Committee informed in necessary detail as to the policies, programs and activities referred to in subsection (d) of this section.

(f) Nothing herein shall be deemed to derogate from the responsibilities of the Secretary of State or the Secretary of the Treasury, or from responsibilities vested

elsewhere by law or other Executive orders.

1-6. Additional Delegations and Limitations of Authority; Consultation

1-601. General Delegation of Functions. There are hereby delegated to the heads of agencies having responsibilities for carrying out the provisions of the Act all functions conferred upon the President by:

- (a) section 654 (except as reserved to the President); and
- (b) those provisions of acts appropriating funds under the authority of the Act that relate to the Act, or other acts authorizing such funds, insofar as they relate to the functions delegated by this order.

1-602. Personnel. (a) In carrying out the functions conferred upon the President by the provisions of section 625(d) (1) of the Act, and by this order delegated to the Director of IDCA, the Director shall authorize such of the agencies that administer programs under the Act as he may deem appropriate to perform any of the functions under section 625 (d) (1) of the Act to the extent that the said functions relate to the programs administered by the respective agencies.

(b) Persons appointed, employed, or assigned after May 19, 1959, under section 527(c) of the Mutual Security Act of 1954 or section 625(d) of the Act for the purpose of performing functions under such Acts outside the United States shall not, unless otherwise agreed by the agency in which such benefits may be exercised, be entitled to the benefits provided by section 528 of the Foreign Service Act of 1946 in cases in which their service under the appointment, employ-

ment, or assignment exceeds thirty months.

1-603. Special Missions and Staffs Abroad. The maintenance of special missions or staffs abroad, the fixing of the ranks of the chiefs thereof after the chiefs of the United States diplomatic missions, and the authorization of the same compensation and allowances as the chief of mission, class 3 and class 4, within the meaning of the Foreign Service Act of 1946 (22 U.S.C. 801 *et seq.*), all under section 631 of the Act, shall be subject to the approval of the Secretary of State.

1-604. International Agreements. The negotiation, conclusion, and termination of international agreements pursuant to the Act, title IV of the IDC Act of 1979, or section 402 of the Mutual Security Act of 1954 shall be subject to the requirements of 1 U.S.C. 112b and to applicable regulations and procedures.

1-605. Interagency Consultation. Each officer to whom functions are delegated by this order, shall, in carrying out such functions, consult with the heads of other departments and agencies, including the Director of the Office of Management and Budget, on matters pertaining to the responsibilities of departments and agencies other than his or her own.

1-7. Reserved Functions

1-701. Reservation of Functions to the President. There are hereby excluded from the functions delegated by the foregoing provisions of this order:

(a) The functions conferred upon the President by sections 122(e), 298(a), 451, 504(b), 613(a), 614(a), 620(a), 620(d), 620(x), 620A, 620C(c), 621(a), 622(b), 622(c), 633(a), 633(b), 640B, 662(a), and 663(b) of the Act.

(b) The functions conferred upon the President by sections 402, 405(a), 406 and 407 of the IDC Act of 1979.

(c) The functions conferred upon the President by the Act and section 408(b) of the Mutual Security Act of 1954 with respect to the appointment of officers required to be appointed by and with the advice and consent of the Senate and with respect to the appointment of officers pursuant to sections 233(b) and 624(c) of the Act.

(d) The functions conferred upon the President with respect to determinations, certifications, directives, or transfers of funds, as the case may be, by sections 303, 481(a), 505(d)(2)(A), 505(d)(3), 506(a), 515(f), 604(a), 610, 614(c), 632(b), 633A, 659, 663(a), 669(b)(1) and 670(b)(1) of the Act.

(e) The following-described functions conferred upon the President:

(1) Those under section 503(a) that relate to findings: *Provided*, that the Secretary of State, in the implementation of the functions delegated to him under section 505(a)(1), (a)(4), and (e) of the Act, is authorized to find, in the case of a proposed transfer of a defense article or related training or a related defense service by a foreign country or international organization to a foreign country or international organization not otherwise eligible under section 503(a) of the Act, whether the proposed transfer will strengthen the security of the United States and promote world peace.

(2) Those under section 505(b) in respect of countries that do not agree to the conditions set forth therein.

(3) That under section 614(b) with respect to determining any provisions of law to be disregarded to achieve the purpose of that section.

(4) That under the second sentence of section 654(c) with respect to the publication in the *FEDERAL REGISTER* of any findings or determination reserved to the President: *Provided*, that any officer to whom there is delegated the function of making any finding or determination within the purview of section 654(a) is also authorized to reach the conclusion specified in performance of the function delegated to him.

(f) Those with respect to determinations under sections 103(b) (first proviso), 104, and 203 of the Mutual Defense Assistance Control Act of 1951 (22 U.S.C. 1611b(b), 1611c, and 1612b).

(g) That under section 523(d) of the Mutual Security Act of 1954 (22 U.S.C. 1783(d)).

(h) Those under section 607 of the Foreign Assistance and Related Programs Appropriations Act, 1979 (92 Stat. 1591, 1601), with respect to findings.

1-702. Subsequent Amendments. Functions conferred upon the President by subsequent amendments to the Act are delegated to the Director only insofar as they do not relate directly and necessarily to the conduct of programs and activities that either the President or an agency other than IDCA is authorized to administer pursuant to express reservation or delegation of authorities in a statute or in this or another Executive order.

1-8. Funds

1-801. Allocation of Funds. Funds appropriated or otherwise made available to the President for carrying out the Act shall be deemed to be allocated without any further action of the President, as follows:

(a) There are allocated to the Director (1) all funds made available for carrying out the Act except those made

available for carrying out Part II of the Act (other than chapter 4 thereof), section 481 of the Act, and section 637(b) of the Act, and (2) all funds made available for carrying out title IV of the IDC Act of 1979.

(b) There are allocated to the Secretary of Defense funds made available for carrying out Part II of the Act (except chapters 4 and 6 thereof).

(c) There are allocated to the Secretary of State funds made available for carrying out sections 481 and 637(b) and chapter 6 of Part II of the Act.

1-802. Reallocation of Funds. The Director of IDCA, the Secretary of Defense, and the Secretary of State may allocate or transfer as appropriate any funds received under subsections (a), (b), and (c), respectively of section 1-801 of this order, to any agency or part thereof for obligation or expenditure thereby consistent with applicable law.

1-9. General Provisions

1-901. Definition. As used in this order, the word "function" includes any duty, obligation, power, authority, responsibility, right, privilege, discretion, or activity.

1-902. References to Orders and Acts. Except as may for any reason be inappropriate:

(a) References in this order or in any other Executive order to (1) the Foreign Assistance Act of 1961 (including references herein to "the Act"), (2) un-repealed provisions of the Mutual Security Act of 1954, or (3) any other act that relates to the subject of this order shall be deemed to include references to any subsequent amendments thereto.

(b) References in any prior Executive order to the Mutual Security Act of 1954 or any provisions thereof shall be deemed

to be references to the Act or the corresponding provision, if any, thereof.

(c) References in this order to provisions of any appropriation Act, and references in any other Executive order to provisions of any appropriation Act related to the subject of this order shall be deemed to include references to any hereafter-enacted provisions of law that are the same or substantially the same as such appropriation Act provisions, respectively.

(d) References in this order or in any other Executive order to this order or to any provision thereof shall be deemed to include references thereto, respectively, as amended from time to time.

(e) References in any prior Executive order not superseded by this order to any provisions of any Executive order so superseded shall hereafter be deemed to be references to the corresponding provisions, if any, of this order.

1-903. Prior Executive Orders. (a) The following are revoked:

(1) Executive Order No. 10973 of November 3, 1961, as amended;

(2) section 2(a) of Executive Order No. 11579 of January 19, 1971; and

(3) Executive Order No. 10893 of November 8, 1960.

(b) The following are amended:

(1) section 3(a) of Executive Order No. 11846 of March 27, 1975, as amended, by adding the following new paragraph (12) after paragraph (11):

"(12) The Director of the United States International Development Cooperation Agency";

(2) section 1-202 of Executive Order 12065 of June 28, 1978, by striking out "The Administrator, Agency for International Development" and inserting in lieu thereof "The Director of the United

States International Development Cooperation Agency”;

(3) section 2(a) of Executive Order No. 11958 of January 18, 1977, by striking out “the Administrator of the Agency for International Development” and inserting in lieu thereof “the Director of the United States International Development Cooperation Agency”;

(4) section 3 of Executive Order 10900 of January 5, 1961, by adding thereto the following new subsection:

“(d) The Secretary of State may redelegate to the Director of the United States International Development Cooperation Agency, or to any other officer or agency of the Executive branch, functions delegated to such Secretary by this order.”;

(5) section 4 of Executive Order 11223 of May 12, 1965, by inserting immediately following “the Secretary of State” the words “or the Director of the United States International Development Cooperation Agency (with respect to functions vested in or delegated to the Director)”;

and
(6) the President’s memorandum of October 18, 1961, entitled “Determination Under Section 604(a) of the Foreign Assistance Act of 1961” (26 FR 10543) is amended by inserting after “the Secretary of State” each time it appears in such memorandum the words “or the Director of the United States International Development Cooperation Agency (with respect to non-military programs administered by such Agency)”.

(c) Any reference in any other Executive order to the Agency for International Development or the Administrator thereof shall be deemed to refer also to the International Development Coop-

eration Agency or the Director thereof, respectively.

(d) As authorized by section 403(c) of the IDC Act of 1979, the reference in Executive Order No. 11223 of May 12, 1965 to “the performance of functions authorized by this Act” shall be deemed to include the performance of functions authorized by section 403 of the IDC Act of 1979.

1-904. Saving Provisions. Except to the extent inconsistent with this order, all delegations of authority, determinations, authorizations, regulations, rulings, certificates, orders, directives, contracts, agreements, and other actions made, issued, or entered into with respect to any function affected by this order and not revoked, superseded, or otherwise made inapplicable before the date of this order, shall continue in full force and effect until amended, modified, or terminated by appropriate authority.

1-905. Effective Date. The provisions of this order shall become effective as of October 1, 1979.

Multilateral Development Institutions

Executive Order 12164. September 29, 1979

By the authority vested in me as President of the United States of America by the Bretton Woods Agreements Act, the International Finance Corporation Act, the Inter-American Development Bank

Act, the International Development Association Act, the Asian Development Bank Act, Public Law 95-118, Reorganization Plan No. 2 of 1979, and Section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

1-101. Executive Order No. 11269, as amended, is further amended in Section 1(b) by adding "the Director of the International Development Cooperation Agency," after "the Chairman of the Board of Governors of the Federal Reserve System,".

1-102. Executive Order No. 11269, as amended, is further amended as follows:

(a) In Section 3(a)(1) insert ", subject to the provisions of Section 7 of this Order," after "Authority".

(b) Add at the end of Section 3(a)(2) the following new sentence: "Such authority, insofar as it relates to the development aspects of the policies, programs, or projects of the International Bank for Reconstruction and Development shall be exercised subject to the provisions of Section 7 of this Order."

(c) In Section 3(e), add ", subject to the provisions of Section 7 of this Order" before the period.

1-103. Executive Order No. 11269, as amended, is further amended in Section 4(a)(2) by adding: ", the Director of the International Development Cooperation Agency," after "the Council" each time it appears.

1-104. Executive Order No. 11269, as amended, is further amended by adding the following new Section 7:

"Section 7. Functions of the Director of the International Development Cooperation Agency. As the principal international development advisor to the President, the Director of the Interna-

tional Development Cooperation Agency shall advise both the Secretary of the Treasury and the appropriate United States representatives to the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the Asian Development Bank, and the African Development Fund on the development aspects of matters relating to those institutions and their activities."

1-105. This Order shall be effective as of October 1, 1979.

Budget Rescission and Deferrals

Message to the Congress. October 1, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose rescission of \$113,673 in unneeded funds appropriated to the International Communication Agency, and report 31 deferrals of fiscal year 1980 funds totalling \$1,003.2 million. The deferrals are primarily routine in nature and do not, in most cases, affect program levels.

The details of the rescission proposal and each deferral are contained in the attached reports.

JIMMY CARTER

The White House,
October 1, 1979.

NOTE: The attachments detailing the rescission and deferrals are printed in the **FEDERAL REGISTER** of October 5, 1979.

Peace and National Security

Address to the Nation on Soviet Combat Troops in Cuba and the Strategic Arms Limitation Treaty. October 1, 1979

Good evening.

I want to talk with you about the subject that is my highest concern, as it has been for every President. That subject is peace and the security of the United States.

We are at peace tonight, as we have been at peace throughout the time of my service in this office. The peace we enjoy is the peace of the strong. Our national defenses are unsurpassed in the world. Those defenses are stronger tonight than they were 2 years ago, and they will be stronger 2 years from now than they are tonight, because of carefully planned improvements that are going forward with your support and with the support of the Congress.

Our program for modernizing and strengthening the military forces of the NATO Alliance is on track, with the full cooperation and participation of our European Allies. Our strategic nuclear forces are powerful enough to destroy any potential adversary many times over, and the invulnerability of those forces will soon be further assured by a new system of powerful mobile missiles. These systems are designed for stability and defense.

Beyond these military defenses, we are on the threshold of a great advance in the control of nuclear weapons—the adoption of the second strategic arms limitation treaty, SALT II.

This evening, I also want to report to you about the highly publicized Soviet brigade in Cuba and about its bearing on

the important relationship between our Nation and the Soviet Union.

This is not a simple or easy subject. The United States and the Soviet Union are the two most powerful nations on Earth, and the relationship between us is complex, because it involves strong elements of both competition and cooperation.

Our fundamental philosophies conflict; quite often, our national interests conflict as well. As two great nations, we do have common interests, and we share an overwhelming mutual concern in preventing a nuclear war. We must recognize therefore that nuclear arms control agreements are vital to both our countries and that we must also exercise self-restraint in our relations and be sensitive to each other's concerns.

Recently, we obtained evidence that a Soviet combat brigade has been in Cuba for several years. The presence of Soviet combat troops in Cuba is of serious concern to us.

I want to reassure you at the outset that we do not face any immediate, concrete threat that could escalate into war or a major confrontation—but we do face a challenge. It is a challenge to our wisdom, a challenge to our ability to act in a firm, decisive way without destroying the basis for cooperation that helps to maintain world peace and control nuclear weapons. It's a challenge to our determination to give a measured and effective response to Soviet competition and to Cuban military activities around the world.

Now let me explain the specific problem of the Soviet brigade and describe the more general problem of Soviet-Cuban military activism in the Third World.

Here is the background on Soviet forces in Cuba: As most of you know, 17 years ago in the era of the cold war, the Soviet Union suddenly attempted to introduce offensive nuclear missiles and bombers into Cuba. This direct threat to the United States ended with the Soviet agreement to withdraw those nuclear weapons and a commitment not to introduce offensive weapons into Cuba thereafter.

At the time of that 1962 missile crisis, there were more than 20,000 Soviet military personnel in Cuba. Most of them were withdrawn, and we monitored their departure. It was believed that those who stayed behind were not combat forces, but were there to advise and train Cubans and to perform intelligence functions.

Just recently, American intelligence obtained persuasive evidence that some of these Soviet forces had been organized into a combat unit. When attention was then focused on a careful review of past intelligence data, it was possible for our experts to conclude that this unit had existed for several years, probably since the mid-1970's, and possibly even longer.

This unit appears to be a brigade of two or three thousand men. It is armed with about 40 tanks and other modern military equipment. It's been organized as a combat unit. Its training exercises have been those of a combat unit.

This is not a large force, nor an assault force. It presents no direct threat to us. It has no airborne or seaborne capability. In contrast to the 1962 crisis, no nuclear threat to the United States is involved.

Nevertheless, this Soviet brigade in Cuba is a serious matter. It contributes to tension in the Caribbean and the Central

American region. The delivery of modern arms to Cuba and the presence of Soviet naval forces in Cuban waters have strengthened the Soviet-Cuban military relationship. They've added to the fears of some countries that they may come under Soviet or Cuban pressure.

During the last few years, the Soviets have been increasing the delivery of military supplies to Cuba. The result is that Cuba now has one of the largest, best equipped armed forces in this region. These military forces are used to intrude into other countries in Africa and the Middle East.

There's a special relationship between Cuba and the Soviet Union. The Cubans get their weapons free; other Soviet satellite countries have to pay for their military supplies. The Communist regime in Cuba is an economic failure that cannot sustain itself. The Soviet Union must send to Cuba about \$8 million in economic aid every day.

Fidel Castro does not pay money for Soviet arms; the Cuban people pay a much higher price. In every international dispute, on every international issue, the Cuban regime automatically follows the Soviet line. The Soviet brigade is a manifestation of Moscow's dominance of Cuba. It raises the level of that dominance, and it raises the level of responsibility that the Soviet Union must take for escalating Cuban military actions abroad.

Now I want to report further on what we are doing to resolve these problems and to counter these activities.

Over the past 3 weeks, we've discussed this issue at great length with top Soviet officials. We've made it clear that the presence of a Soviet combat unit in Cuba is a matter of serious concern to us.

The Soviet Union does not admit that the unit in question is a combat unit. However, the Soviets have made certain statements to us with respect to our concern: that the unit in question is a training center, that it does nothing more than training and can do nothing more; that they will not change its function or status as a training center. We understand this to mean that they do not intend to enlarge the unit or to give it additional capabilities.

They have said that the Soviet personnel in Cuba are not and will not be a threat to the United States or to any other nation; that they reaffirm the 1962 understanding and the mutually agreed upon confirmation in 1970 and will abide by it in the future. We, for our part, reconfirm this understanding.

These assurances have been given to me from the highest level of the Soviet Government.

Although we have persuasive evidence that the unit has been a combat brigade, the Soviet statements about the future noncombat status of the unit are significant. However, we shall not rest on these Soviet statements alone.

First, we will monitor the status of the Soviet forces by increased surveillance of Cuba.

Second, we will assure that no Soviet unit in Cuba can be used as a combat force to threaten the security of the United States or any other nation in this hemisphere. Those nations can be confident that the United States will act in response to a request for assistance to meet any such threat from Soviet or Cuban forces.

This policy is consistent with our responsibilities as a member of the Orga-

nization of American States and a party to the Rio Treaty. It's a reaffirmation in new circumstances of John F. Kennedy's declaration in 1963 "that we would not permit any troops from Cuba to move off the island of Cuba in an offensive action against any neighboring countries."

Third, I'm establishing a permanent, full-time Caribbean joint task force headquarters at Key West, Florida. I will assign to this headquarters forces from all the military services responsible for expanded planning and for conducting exercises. This headquarters unit will employ designated forces for action if required. This will substantially improve our capability to monitor and to respond rapidly to any attempted military encroachment in this region.

Fourth, we will expand military maneuvers in the region. We will conduct these exercises regularly from now on. In accordance with existing treaty rights, the United States will, of course, keep our forces in Guantanamo.

Fifth, we will increase our economic assistance to alleviate the unmet economic and human needs in the Caribbean region and further to ensure the ability of troubled peoples to resist social turmoil and possible Communist domination.

The United States has a worldwide interest in peace and stability. Accordingly, I have directed the Secretary of Defense to further enhance the capacity of our rapid deployment forces to protect our own interests and to act in response to requests for help from our allies and friends. We must be able to move our ground, sea, and air units to distant areas, rapidly and with adequate supplies.

We have reinforced our naval presence in the Indian Ocean.

We are enhancing our intelligence capability in order to monitor Soviet and Cuban military activities—both in Cuba and throughout the world. We will increase our efforts to guard against damage to our crucial intelligence sources and our methods of collection, without impairing civil and constitutional rights.

These steps reflect my determination to preserve peace, to strengthen our alliances, and to defend the interests of the United States. In developing them, I've consulted not only with my own advisers but with congressional leaders and with a bipartisan group of distinguished American citizens as well. The decisions are my own, and I take full responsibility for them as President and as Commander in Chief.

I have concluded that the brigade issue is certainly no reason for a return to the cold war. A confrontation might be emotionally satisfying for a few days or weeks for some people, but it would be destructive to the national interest and to the security of the United States.

We must continue the basic policy that the United States has followed for 20 years, under six administrations of both parties, a policy that recognizes that we are in competition with the Soviet Union in some fields and that we seek cooperation in others—notably maintaining the peace and controlling nuclear arms.

My fellow Americans, the greatest danger to American security tonight is certainly not the two or three thousand Soviet troops in Cuba. The greatest danger to all the nations of the world—including the United States and the Soviet Union—is the breakdown of a common effort to preserve the peace and the ultimate threat of a nuclear war.

I renew my call to the Senate of the

United States to ratify the SALT II treaty.

SALT II is a solid treaty. Ensuring compliance with its terms will not be a matter of trust. We have highly sophisticated, national technical means carefully focused on the Soviet Union to ensure that the treaty is verifiable.

This treaty is the most important step ever taken to control strategic nuclear arms. It permits us to strengthen our defense and to preserve the strategic balance at lower risk and lower cost. During the past few years, we have made real increases in our defense expenditures to fulfill the goals of our 5-year defense plan. With SALT II, we can concentrate these increases in areas where our interests are most threatened and where direct military challenge is most likely.

The rejection of SALT would seriously compromise our Nation's peace and security.

Of course we have disagreements with the Soviets. Of course we have conflicts with them. If we did not have these disagreements and conflicts, we would not need a treaty to reduce the possibility of nuclear war between us.

If SALT II is rejected, these disagreements and conflicts could take on a new and ominous dimension. Against the background of an uncontrolled nuclear arms race, every confrontation or dispute would carry the seeds of a nuclear confrontation.

In addition, SALT II is crucial to American leadership and to the further strengthening of the Western Alliance. Obviously, a secure Europe is vital to our own security. The leaders of our European Allies support SALT II—unanimously. We've talked to a number of those leaders in the last few days. I must

tell you tonight that if the Senate fails to approve the SALT treaty, these leaders and their countries would be confused and deeply alarmed. If our allies should lose confidence in our ability to negotiate successfully for the control of nuclear weapons, then our effort to build a stronger and more united NATO could fail.

I know that for Members of Congress this is a troubling and a difficult issue, in a troubling and difficult time. But the Senate has a tradition of being the greatest deliberative body in the world, and the whole world is watching the Senate today. I'm confident that all Senators will perform their high responsibilities as the national interest requires.

Politics and nuclear arsenals do not mix. We must not play politics with the security of the United States. We must not play politics with the survival of the human race. We must not play politics with SALT II. It is much too important for that—too vital to our country, to our allies, and to the cause of peace.

The purpose of the SALT II treaty and the purpose of my actions in dealing with Soviet and Cuban military relationship are exactly the same—to keep our Nation secure and to maintain a world at peace.

As a powerful nation, as a super power, we have special responsibilities to maintain stability even when there are serious disagreements among nations. We've had fundamental differences with the Soviet Union since 1917. I have no illusions about these differences. The best way to deal with them successfully is to maintain American unity, American will, and American strength. That is what I am determined to do.

The struggle for peace—the long, hard struggle to make weapons of mass destruction under control of human reason and human law—is a central drama of our age.

At another time of challenge in our Nation's history, President Abraham Lincoln told the American people: "We shall nobly save, or meanly lose, the last best hope of earth."

We acted wisely then and preserved the Nation. Let us act wisely now and preserve the world.

NOTE: The President spoke at 9 p.m. from the Oval Office at the White House. His remarks were broadcast live on radio and television.

Meeting With President William R. Tolbert, Jr., of Liberia

White House Statement. October 2, 1979

President Carter met this morning for an hour in the Cabinet Room with President William R. Tolbert, Jr., of Liberia. They had a warm and comprehensive exchange of views on bilateral and regional issues.

President Carter expressed the importance of the United States special relationship with Liberia and our desire to enhance and promote it. The two Presidents agreed to consider the visit of a group of distinguished Americans to Liberia in the near future. The group will work towards strengthening U.S. ties with Liberia and focus on economic and development cooperation in the public and private sectors.

The two Presidents had an extensive discussion of President Tolbert's role as Chairman of the Organization of African

Unity (OAU) and the OAU meeting last July. President Carter complimented President Tolbert on his leadership as head of the OAU and praised President Tolbert's efforts to resolve outstanding problems in the region.

Those attending the meeting were:

U.S. Side

The President

Deputy Secretary of State Warren Christopher

David Aaron, Deputy Assistant to the President for National Security Affairs

Richard Moose, Assistant Secretary of State for African Affairs

Ambassador Robert Smith, U.S. Ambassador to Liberia

Parker Borg, Director of West African Affairs, Department of State

Jerry Funk, National Security Council staff member

Liberian Side

President William R. Tolbert, Jr.

Foreign Minister Cecil Dennis

Ambassador Francis Dennis, Liberian Ambassador to the United States

J. Bernard Blamo, Minister of Education

D. Franklin Neal, Minister of Planning and Economic Affairs

William Bull, Counselor, Embassy of Liberia

ing profession. You bear a great responsibility in a free society. Our people depend on you to bring them the facts on issues and problems that affect their lives and the future of our nation. Their opinions are often based as much on your interpretation of events, what you point out as important and relevant, as on the events themselves. The pressure of deadlines is compounded by your desire to get all the facts. I am sure the satisfaction you derive from doing a good job and meeting those constant challenges is in proportion to the obstacles.

The variety of your concerns, the breadth of your knowledge, the quality of understanding that you bring to the task of finding out what is happening is important to our nation. Just as we in government have a sworn duty to serve the people, you have a professional duty to uphold their right to know. Our Founding Fathers considered that duty as basic to our freedom as the structure of government. We share a duty to serve and be accountable to the people, just as we share a need to retain our humility and compassion in the face of heavy responsibility and great power.

I commend you for your commitment to a proud tradition which has served our nation with honor and distinction. Each of you has my best wishes for continuing success.

JIMMY CARTER

National Newspaper Week,
October 7-13, 1979

Message of the President. October 2, 1979

On the occasion of National Newspaper Week, I am pleased to greet the men and women who gather and report the news.

Yours is indeed a noble and challeng-

Special Representative for Trade
Negotiations

Remarks at the Swearing In of Reubin O'D. Askew. October 2, 1979

THE PRESIDENT. Well, after 3 years of effort, I have finally gotten Reubin Askew

to join my Cabinet. Immediately after the election, almost 3 years ago, Governor Askew was one of the first people I called, to ask if he would join my Cabinet in almost any capacity. He said he had an obligation to the people of Florida, and he would finish out his term of office. But I've called on him many times in the meantime to help me with difficult assignments, and he's always responded enthusiastically and well.

There are great men and women who have served as Governors and who still serve in those capacities, but I think it's generally accepted among those who have known Reubin Askew that he is one of the leaders among those leaders. He was the chairman of the National Governors' Conference, as it was known then, and set a standard of achievement and leadership and inspiration which was an example to us all, a degree of quietness, modesty, personal integrity that provided a basis for others to trust him and to give him a deserved degree of high admiration. He comes to take on a very important responsibility.

When I became President and first met with the leaders of the other Western nations, they immediately told me that the Tokyo Round of the Multilateral Trade Negotiations was dead and it was beyond resurrection. I thought for a while, and then I finally thought of Bob Strauss, because I knew that he could bring something back to life. And he undertook that responsibility and resurrected this tremendous effort successfully and concluded it.

And then the Congress passed this year the Trade Agreements Act, which is the most far-reaching and comprehensive trade act ever passed in this country. I thank both Bob Strauss and Al McDonald

and Alan Wolff ¹ and others who worked with him to bring that about. I thank the Members of Congress, represented by Al Ullman, chairman of the Ways and Means Committee, who were responsible, in face of great difficulty, in getting this bill passed almost unanimously. It was a tremendous demonstration of harmony and cooperation and a searching for a noble goal, in spite of the most extreme difficulties.

Now, to administer this act will require somebody with a knowledge of statesmanship and experience and superb leadership qualities, and that's why I've asked Reubin Askew to take on this job. I think he has the background for it.

As a Governor, in addition to the achievements which I've already outlined so briefly, he made trade missions to Europe, to the Far East, and to South America to bring into his own State the benefits to be derived from international trade. He did this successfully.

He's a man who has headed up the selection committee to help me choose every Ambassador whom I've appointed since I've been President. In doing this, he had not only to study the character and the qualifications of all those who sought to be or were willing to be Ambassadors, but he also had to learn the needs of individual countries. He became an avid student of even the most remote part of the world. So, he's learned through that process, long months of unpublicized hard work, about the world and what it is

¹ Alonzo L. McDonald, Jr., Assistant to the President and former Deputy Special Representative for Trade Negotiations, and Alan W. Wolff, Deputy Special Representative for Trade Negotiations.

now, an awareness of what it can be in the future.

He's able to span chasms that sometimes exist between people, and his intense devotion to duty and his superb knowledge of our country and his ability to bring disparate groups together in a spirit of common purpose will stand our Nation in good stead. I'm very grateful to Reubin for being willing to do this.

One of his first assignments will be to alleviate the problem of Mexican tomatoes—[laughter]—competing with Florida tomatoes. [Laughter] I see Bob Strauss smiling broadly, and we've almost taken the smile off Reubin Askew's face. But this is one among many very detailed but very important issues which can serve to bind our Nation together very closely with other nations, and I'm deeply grateful for Reubin Askew's willingness to take on this assignment.

And now Judge Joseph Hatchett, newly appointed to the Court of Appeals, Federal Court of Appeals, will administer the oath of office, while my friend, Donna Lou, holds the Bible for Reubin Askew.

Judge Hatchett.

[At this point, Judge Joseph W. Hatchett of the Fifth Circuit administered the oath of office.]

AMBASSADOR ASKEW. *Mr. President, Mrs. Carter, distinguished guests, my family, and friends:*

This is a happy day for me, to say the least. Public service is a high calling, and I'm truly happy that I've been called once again.

I want to begin my brief remarks by thanking President Carter for giving me this opportunity to serve the people of the United States of America in this challeng-

ing assignment and to the United States Senate for its confirmation.

I want to thank my predecessor, my very dear friend, Ambassador Robert Strauss, for all that he's meant to me over these years and for all he's done and continues to do for our country. I think the Almighty made only one Bob Strauss, and I'm sure that makes some people glad and other people sad. [Laughter]

In addition, I want to thank all the members of the STR staff for their capable assistance during these past several weeks in what promises, I believe, to be a smooth and successful transition; to the Members of the Congress and their staffs for their continued counsel and encouragement and support, for I am not unmindful that I also work for them as well; to the Governors of this Nation—two of my very closest friends, Governor Busbee, who rearranged his schedule from the Southern Governors' Conference to come up here, to Governor Milliken, who has been one of my very closest friends for many years—and for the role that the national Governors are playing and continue to play in this vital area; and also again to the President for the privilege of working with the other members of his Cabinet, almost all of whom I know very well and look forward very much to working with, and their staffs.

I'm grateful, too, for the support I've received and the experiences I've shared with many of you here today, for, Mr. President, I stand here with a great deal of emotion, because I see so many good friends in this audience, for some of you have traveled long distances at some sacrifice just to be with me and my family. I know that you know that I appreciate it. Seeing your faces once again inspires

many fond memories. Your friendship and support through the years has made it possible for me to stand here today. More important, your hard work and your loyalty to the dreams we've shared together have led to many accomplishments and have made it possible for me to dream now of still greater accomplishments in the service of this Nation we all love so much.

I'm grateful also to my family—to my mother and mother-in-law, who were not able to be here today, to my brother and sisters, to my children, Angela and Kevin, but most of all to my wife, Donna Lou, who knows only too well the many sacrifices that a life of public service demands, for this is an area that I have in common with you, Mr. President, for we're both indeed fortunate to be given the privilege to share our lives with two people like Rosalynn and Donna Lou.

And above all I'm grateful to my Creator for favoring me with such friends and such a family, and the privilege to live in such a nation, and with this and all the many opportunities I've had to help my fellow man. And I pray for His continued guidance in fulfilling the responsibilities I assume today.

Those responsibilities are not small by any means. More and more we are coming to realize the crucial importance of international trade to the economy and to the future of the United States and, yes, to the world.

With the personal leadership of President Carter and despite imposing obstacles—for when he says that the MTN was all but considered dead when he took over as President, I'm telling you he is exactly right. Bob Strauss knows he's right. Bob Strauss and his group visited seven capi-

tals in 2 days, even to the point of getting Prime Ministers to come to airports, trying to emphasize the importance of doing this, and doing this in a meaningful way, and of the personal commitment of the President of the United States.

And when he talked to me about assuming this responsibility, it was a high priority that he placed in this area, for he stated time and time again that one of his highest legislative priorities was the passage of the trade agreements. And frankly, it was a foresight initiative of the Congress of the United States and preparing it in such a way that it could take place like it did.

So, I feel that I have the privilege to come here in a success story. And I really do, frankly, get a little disturbed that it's not better understood of what exactly this success story can mean and will mean to the United States. And without the tenacity of Jimmy Carter and Robert Strauss it simply would not have happened.

This accomplishment is a tribute to this country, for what you have seen—you have seen a Congress that, over the years, has worked so hard in this area. You saw a legislative branch of government and an executive branch of government come together, joining the private sector in what I believe is really an example of how this country should and can work. For as I told the Trade Advisory Committee a few moments ago, the single biggest thing that sticks out in my mind, over this whole effort, has been the meaningful input of the private sector of this country. And so, I want to commit myself, not only to the Congress but to the private sector of this country, that we're going to continue this relationship. And as the President's Trade

Representative, we're going to do our very best to keep faith with those who labored so hard to make it possible.

But for all that we know of these recent accomplishments, however impressive, we know that they're only the beginning, they're only the prelude to the challenges which await—challenges which compel an enlightened policy, dedicated to fair trade in every expanding global marketplace. We have such a policy in this administration.

That policy may be summarized as follows: The United States must be more ambitious, more aggressive, more assertive, more imaginative, and more resourceful in matters related to international trade. We must win for the people of this Nation a larger share of the overall world marketplace for goods and services, even as we retain our commitment to fostering increased trading opportunities for all the nations.

Stop and think of history, my friends. Where at any point in history has a nation done a better job of helping others than what this country did in the Marshall plan for the European Community and what it did for Japan? And yet for all that it's done to them in improving their situation to the point of making it difficult, sometimes, competitively on the marketplace, the fact of the matter is, had we not done it, do you realize where we would be?

And so, we have seen over this history of time the leadership of the United States of America. And when you hear people talking about problems—while every person, I'm sure, is proud of their country—what other place in the world would you rather live, and what other person has tried harder to do right by this world and

by its own people than has the United States of America? For it's been Jimmy Carter who has understood what these agreements will mean in terms of jobs for our people, in terms of a standard of living, yes, in terms of competition.

This country should not ever fear fair competition, because we also want to be fair to the consumers in order to promote the best possible price for our people. It will lead to broader choices for them. It will lead to an easing of inflation, through a more favorable balance of trade. It could lead as well to a lessening of tensions among nations, as we come to depend more and more on one another in a very interdependent world.

And so here again, we must learn in this area, when people expect us as the United States of America, as one country, to so manipulate our own economy that we have no problems, they do not understand the free enterprise system. The free enterprise system anticipates there would be good times and bad times. If government tries to make every bad time a good time, the system breaks down. And yet, it has been this system of free enterprise, through private ownership of property, that has brought the Western World to the standard of living that it now enjoys. And that's what we're recommitting ourselves, under the President of the United States, in this whole area of trade.

This policy requires fair international trading rules, rules which can be assured through timely implementation, a scrupulous enforcement of the new agreements of the Tokyo Round. And I want to tell you, the day is past when we can afford to make sure that we always assume our obligations without asserting our rights. And I want to tell you, one of the

first things the President of the United States told me is that whatever we told the people of this country that was in it for them, to the extent that it presented balanced trade throughout the world, that's what my job was. And that's what I'm committed to do.

And one of the unique things about this area that has pleased me so much has been the very nonpartisan approach of this whole issue. I want to tell you, if there's one area that must remain nonpartisan, it's this area. And I want to give tribute to the minority in both Houses of this Congress for the role that they have played in making it possible, because sometimes they themselves have set a standard for us to try to follow. So, it's important not only that the Congress and the Executive work together; it's important also that we continue a nonpartisan effort together with the private sector.

The policy of which I speak requires an institutional response in furthering the trade interests of our country, a goal which can be attained by the approval of the trade reorganization plan submitted to the Congress by the President. This policy requires continued cooperation among the agencies and branches of government and, in addition, continued cooperation between government, business, and agriculture and labor in fashioning a coherent and creative presence for the United States in the world marketplace. And this policy requires, as well, the avoidance of unnecessary impediments to increased exportation of American goods and services to other nations of the world.

In closing, let me say, crucial to this achievement of the important ends of our trade policy is a substantial increase in American exports. We must encourage ex-

ports in every appropriate way, and this administration is committed to a continuing review in all of those that some might classify as export disincentives. To the extent possible, we have to free up the American business man and woman to compete in the foreign marketplace. We must marshal every ounce of American ingenuity, every device of American technology, and every reserve of American enterprise in a renewed effort to sell American skills, American products around this world. We must make America the forceful competitor it should be in the world marketplace.

As I assume this responsibility, I'm reassured, particularly by the key leadership in both the majority and the minority in the Congress and key positions, as well as the key Cabinet members, for I've come to know them, in particular to know Cy Vance and Warren Christopher, who's acting in his place now as the acting Secretary of State. There's no finer person in American Government than Cyrus Vance. I've worked closely with him, and worked with him in the dedication of the people in that Department, with the people in Treasury, the people in Commerce, as you move to every facet of American Government.

But I want to tell them, parenthetically, that I come as a trade advocate—and which I intend to assert fully to every extent possible, the trade interest of the United States as contained in that legislation—but will work with them to make sure that all that we do has a constructive result and effect upon this country.

I believe in the policy of this administration. I believe in the better life and the lasting prosperity this Nation can get

under it. I look forward to the months ahead.

I thank you again, Mr. President. I value our continued personal relationship, because I think you know that I feel that you've done an outstanding job, Mr. President. And I am proud to become part of your Cabinet and to join you as you continue to make this Nation secure and an even better place for us to live and our children's children.

Thank you.

The President has a pressing commitment that he has to immediately return to his office. But I would like the privilege, since so many of you have come from so far away, for Donna Lou and I to stand down the halls, so I might personally have a chance to say hello to each one of you.

NOTE: The President spoke at 2:35 p.m. in the East Room at the White House.

National Wild and Scenic Rivers and National Trails Systems

Message to the Congress Transmitting Reports and Proposed Legislation. October 2, 1979

To the Congress of the United States:

In my Environmental Message of August 2, 1979, I proposed legislation to add a number of rivers and trails to the National Wild and Scenic Rivers and National Trails Systems.

Enclosed are reports and draft legislation that would add the following three river segments to the National Wild and Scenic Rivers System as federally administered components:

—Gunnison River, Colorado

—Encampment River, Colorado

—Priest River, Idaho

I am reaffirming my support for designation of a segment of the Illinois River in Oregon for which legislation was submitted to the Congress last year. I am also reaffirming my support for the following four river segments proposed in my last Environmental Message for inclusion in the System:

—Bruneau River, Idaho

—Dolores River, Colorado

—Upper Mississippi River, Minnesota

—Salmon River, Idaho

In addition, I am transmitting to you new study reports on eight rivers which have been found to qualify for inclusion in the National Wild and Scenic Rivers System as State-administered components. Each of the States in which the rivers are located has expressed an interest in administering these rivers as components of the national system. The rivers are:

—Pine Creek, Pennsylvania

—Buffalo River, Tennessee

—Youghiogheny River, Pennsylvania-Maryland

—Shepaug River, Connecticut

—Kettle River, Minnesota

—Lower Wisconsin River, Wisconsin

—Housatonic River, Connecticut

—Illinois River, Oklahoma

In my 1977 Environmental Message, I proposed 20 additional river segments for study as potential additions to the National Wild and Scenic Rivers System. Several of those rivers have already been designated. Except for rivers where subsequent development has affected the river's qualification for designation, I continue to support legislation authorizing the study of these rivers. Moreover, I am

submitting legislation to add the North Umpqua River in Oregon to the list of those rivers to be studied.

In order to assist full congressional deliberation on the proposed Upper Mississippi Wild and Scenic River, I have directed the Secretary of the Interior to complete, with full public participation, a conceptual master plan for the river which will set forth the specific requirements for lands or interests in lands to protect the river corridor and provide public access, campgrounds and other recreational facilities. This is to be completed by April 1980.

My recent Environmental Message also contained a number of proposals relating to the National Trails System. The system is still in its fledgling stage and should be expanded to meet widespread public interest. With this objective in mind, I have directed the Federal land managing agencies to enlarge the National Recreation Trails System. In addition, I am transmitting the study report and legislation to designate the 513-mile Natchez Trace National Scenic Trail through Tennessee, Alabama and Mississippi. I am also resubmitting proposed legislation to establish the Potomac Heritage Trail through Pennsylvania, Maryland, West Virginia, Virginia and the District of Columbia. Furthermore, I am reaffirming my support for the enactment of legislation to create the North Country Trail from the State of New York to North Dakota. Legislation to create this 3,200-mile trail has already passed the House of Representatives in the form of H.R. 3757.

Finally, I am transmitting a report from the Secretary of the Interior recommending that a 13.6-mile segment of the Big

Thompson River in Colorado not be added to the National Wild and Scenic Rivers System. This river segment is located entirely within the Rocky Mountain National Park and is managed and protected by the National Park Service. Further, approximately 80% of this 13.6-mile river segment is in a wilderness proposal now before the Congress. Therefore, I believe that the protection afforded by the National Wild and Scenic Rivers Act is unnecessary.

I urge that the Congress promptly act on my recommendations in order to protect these rivers and trails for the recreational and aesthetic enjoyment of all Americans.

JIMMY CARTER

The White House,
October 2, 1979.

Owyhee River in Idaho and Oregon

Message to the Congress Transmitting a Report and Proposed Legislation.
October 2, 1979

To the Congress of the United States:

I am transmitting herewith draft legislation to add two segments of the Owyhee River in Idaho and Oregon totalling 178 miles to the National Wild and Scenic Rivers system. These segments would be administered by the Secretary of the Interior as units of the national system.

I also recommend that an additional 14-mile segment of the river be administered by the State of Oregon under its Scenic Waterways program.

These recommendations are based on the accompanying report prepared by the

Secretary of the Interior under section 5(a) of the Wild and Scenic Rivers Act.

JIMMY CARTER

The White House,
October 2, 1979.

NOTE: The 175-page report is entitled "Owyhee Wild & Scenic River Study—Final Report/Environmental Statement."

The text of the proposed legislation is included in the press release.

Tuolumne River in California

*Message to Congress Transmitting
Proposed Legislation. October 2, 1979*

To the Congress of the United States:

Pursuant to Section 4(a) of the Wild and Scenic Rivers Act (P.L. 90-542), I am transmitting to the Congress my recommendations and proposals with respect to the designation of the Tuolumne River in California.

The Tuolumne River has been jointly studied by the Departments of Agriculture and Interior. Of the 92 miles which were studied, 82 miles have been found eligible to be added to the national system of Wild and Scenic Rivers. The study proposes that if added to the national system, the river would be jointly managed by the Departments of Interior and Agriculture.

On the basis of information now available, I concur with the findings of the study and recommend that the mileage found to be eligible to be added to the system should be designated as a Wild and Scenic River as part of the national system. A draft bill to accomplish this is attached.

The final printed version of the study has not yet been prepared. In order to meet the statutory deadline of October 2, 1979, however, I am transmitting this rec-

ommendation. I intend that the study of the river be finalized and I shall have it transmitted to you when it is complete. Should any other pertinent information become available however, which would call for a different recommendation, I shall transmit a revised proposal to you along with the completed study.

JIMMY CARTER

The White House,
October 2, 1979.

NOTE: The text of the proposed legislation is included in the press release.

National Advisory Community Investment Board

*Appointment of Clanzel Thornton Brown as
a Member. October 2, 1979*

The President today announced that he will appoint Clanzel Thornton Brown, of Jacksonville, Fla., as a member of the National Advisory Community Investment Board.

Brown, 47, is president of the Jacksonville Urban League. He serves on the Downtown Development Authority of Jacksonville, the Private Industrial Council, and the University of North Florida Affirmative Action Committee.

President's Council on Physical Fitness and Sports

*Appointment of Alton M. White as a
Member. October 2, 1979*

The President today announced that he will appoint Alton M. White, of Tampa, Fla., to be a member of the President's Council on Physical Fitness and Sports.

White, 39, is executive director of public housing in Tampa and a former administrative assistant to the mayor. He is a former high school health and physical education teacher and is active in sports. He is a member of the board of directors of the Boy Scouts of America in Tampa and a former member of the Florida Committee on Athletics.

Country Music Gala

Remarks at the Fundraising Performance for Ford's Theatre. October 2, 1979

I am really glad to be here tonight to enjoy with you and to celebrate country music. Some people call it, some experts call it indigenous American music, but when I grew up in Plains, Georgia, when we asked for music, we got country music.

Musicians coming out of the South, like the late Mother Maybelle Carter, brought with them songs that had been sung and played for centuries. These were songs that were played for entertainment by people who had to sing them themselves. They were songs that came out of the people's own hearts. Some of those tunes, even some of the words, had been with them since medieval times; others were composed in this country as people walked through the southern mountains or rode a horse or in the back of a mulewagon or sat beside a campfire in the western plains.

The good songs were passed down from generation to generation, because they told stories of how ordinary people lived and felt and loved. As people moved to the cities, they wrote different songs about their own new feelings and new experiences, but even in our day country music has remained people music. Now it's sometimes composed on kitchen tables or in a hotel room or even riding along in a

pickup truck or on Greyhound buses or in an 18-wheeler.

Today all kinds of people listen and love country music. Country music is about all kinds of experiences—sad times and bad times, wasted lives, dashed dreams, the dirty dog that took advantage of you. But it also celebrates the good and the permanent times, home and family, faith and trust, love that lasts for a lifetime and sometimes, I admit, love that lasts just for one good time. *[Laughter]* It's as universal as tears and as personal as a baby's smile.

The country in country music is America. Like jazz and the blues, country music has become a bridge of understanding and good will and friendship from our country to other nations, and so have many of its top talent and top artists.

I want to thank the great performers who've come here tonight to benefit Ford's Theatre. Many of these performers come from cities and towns that are large and as cosmopolitan as Plains, Georgia. *[Laughter]* And right now I'm going to turn over the program to one of those—from Sevierville, Tennessee, Miss Dorothy Parton.¹

NOTE: The President spoke at 7:21 p.m. at Ford's Theatre.

15th Anniversary of the Service Corps of Retired Executives

Message of the President. October 2, 1979

On the fifteenth anniversary of the Service Corps of Retired Executives, I want to congratulate the 8,000 SCORE volunteers who provide valuable assistance to small businesses all over the country.

As a former small businessman, I know

¹ Popularly known as Dolly Parton.

from first-hand experience how important this SBA program really is.

SCORE volunteers have guided and counseled hundreds of thousands of small businesses over the past fifteen years. Their efforts have helped our nation maintain the healthy small business community that is the backbone of national stability and confidence.

On this occasion I salute SCORE volunteers and their associates at the Small Business Administration who have helped SCORE grow in numbers, spirit and accomplishment. All Americans can be proud of what this milestone represents.

JIMMY CARTER

NOTE: The text of the message was released on October 3.

Urban Park and Recreation Recovery Program

Announcement of Grants to 44 Cities and Counties. October 4, 1979

The White House today announced grants to 44 cities and counties, totaling \$17.1 million, under the Urban Park and Recreation Recovery (UPARR) program. The program is part of the President's urban policy legislative program and offers direct matching grants to eligible local governments to rehabilitate urban park and recreation systems.

The UPARR program is a key element in the administration's plan to revitalize American cities. The program is designed to revitalize neighborhood recreation opportunities in the Nation's most distressed cities, while encouraging local and State governments to make greater use of their own resources for urban recreation.

The grants announced today are the first in a series to be awarded over a 5-year period. The 44 jurisdictions announced

today were selected from over 200 applications, whose proposals totaled more than \$90 million. Cities and counties whose applications were not selected for funding this time will automatically be held over for consideration in the next funding cycle.

Factors considered in the selection of projects were: the expansion of neighborhood recreation opportunities and the extent to which a project would provide jobs for minorities, youth, and low- and moderate-income neighborhood residents. Other factors were the quality of local recreation system planning, the degree of need, and the applicant's ability to match Federal funds with private and local contributions.

The program was approved by the 95th Congress as title X of the National Parks and Recreation Act of 1978 (Public Law 95-625). It is administered by the Interior Department's Heritage Conservation and Recreation Service.

The 44 cities and counties whose grants are being announced today are Birmingham, Ala., Tucson, Ariz., San Francisco, Calif., San Jose, Calif., Bradenton, Fla., Dade County, Fla., Savannah, Ga., Chicago, Ill., Bloomington, Ind., Alexandria, La., New Orleans, La., Boston, Mass., Cambridge, Mass., Lowell, Mass., Detroit, Mich., Minneapolis, Minn., Pascagoula, Miss., St. Joseph, Mo., Camden County, N.J., Essex County, N.J., Hoboken, N.J., Irvington, N.J., Perth Amboy, N.J., Plainfield, N.J., Bernalillo County, N. Mex., New York, N.Y., Syracuse, N.Y., Utica, N.Y., Cincinnati, Ohio, Cleveland, Ohio, Cuyahoga County, Ohio, Lincoln Heights, Ohio, Steubenville, Ohio, Warren, Ohio, Lawton, Okla., Portland, Oreg., Memphis/Shelby County, Tenn., Galveston, Tex., Laredo, Tex., Portsmouth, Va., Richmond, Va., Seattle, Wash., Tacoma, Wash.

Department of Commerce

*Exchange of Letters on the Resignation of
Juanita M. Kreps as Secretary.
October 4, 1979*

To Secretary Juanita Kreps

With the greatest reluctance and regret, I accept your resignation. I wish it were possible for you to remain, for your absence will be a great loss for our administration.

Not only have I valued your advice on a broad range of economic matters but under your leadership your department has built an impressive record.

Also, in the growing area of international trade, your accomplishments have earned the department the major new role it will soon begin to play. You have begun the essential process of increasing the awareness of our country of the advantages of increased trade and exports. The Trade Agreement you negotiated during your visit to the People's Republic of China marks an historic step in establishing normal relations with one-quarter of the people who live on earth. In Europe, the Middle East, in the Soviet Union and other countries you have been a splendid emissary for the United States.

Finally, with love and genuine friendship I wish you well. We shall miss you. It is my hope that we shall have the continuing benefit of your advice and counsel in the future.

Sincerely,

JIMMY CARTER

October 3, 1979

Dear Mr. President:

It is with deep regret that I offer my resignation as the Secretary of Commerce. My reasons are altogether personal.

Nearly three years ago, when we first met to discuss the economic issues that

would face you as President, we were acutely aware of the problems before the Nation. Unemployment was high, the recession dragged on, and business confidence lagged. Threats of protectionism were widespread. Under your leadership, jobs have been created and the unemployment rate lowered significantly; businesses have prospered; new trade agreements promise larger markets for our producers and higher levels of living for the American people.

We now face the critical issues of rapidly rising energy costs and the inflation they generate. We must implement the trade agreements. In order to take advantage of widening world markets, we must find ways to increase our productivity and competitive strength. For the resolution of these longrun problems we shall need the most imaginative approaches, the most realistic assessment of alternatives.

While I am pleased with the progress we have made, I should have liked to continue with the work we have begun. You have my wholehearted support and my great admiration.

Sincerely,

JUANITA

[The President, The White House, Washington, D.C. 20500]

Health Planning and Resources Development Amendments of 1979

*Statement on Signing S. 544 Into Law.
October 4, 1979*

I am pleased to sign S. 544, the Health Planning and Resources Development Amendments of 1979.

This legislation extends the health

planning program which has become a crucial element of our national effort to reduce wasteful health care spending. It complements my proposed hospital cost containment legislation.

The success of health planning has depended upon the voluntary participation of over 50,000 citizens in all parts of the country. A renewed health planning program will enable these and other citizens to more effectively and efficiently allocate resources to meet the health needs in their own communities. This bill also recognizes the critical role that States must play in the planning process. An important new authority will provide Federal assistance to permit closure of excess hospital beds or their conversion to more appropriate and needed uses.

This legislation was enacted after a long and difficult passage through the Congress. I am disappointed that the bill contains amendments which may weaken the authority of planning agencies to control unnecessary spending and continues unneeded construction authorities. Yet the health planning structure remains intact and, with enactment of this legislation, has been given new life. I now look forward to a period of solid accomplishment as we move toward the goal of assuring all Americans equal access to quality health care at reasonable cost.

NOTE: As enacted, S. 544 is Public Law 96-79, approved October 4.

Energy Mobilization Board Legislation

Statement on Senate Approval of the Legislation. October 4, 1979

I want to commend the Senate for its overwhelming vote today approving an

energy mobilization board. That vote represents a major step forward in the joint effort of the Congress and my administration to achieve energy security for our Nation.

The bill that passed today substantially reflects the proposal I made to the Congress in July. This board will have the power to cut through unnecessary procedural delays in order to ensure that priority energy projects will be expeditiously considered and constructed, while environmental values and State and local decisionmaking are preserved.

I want to express my appreciation for the diligent bipartisan efforts of Senators Jackson, Johnston, Hatfield, and Domenici. I call upon the House to follow the Senate's actions promptly, so the board can soon begin its important tasks.

United Nations Educational, Scientific and Cultural Organization

Nomination of Barbara W. Newell for the Rank of Ambassador While Serving as U.S. Permanent Representative. October 4, 1979

The President today announced that he will nominate Barbara W. Newell for the rank of Ambassador during her service as U.S. Permanent Representative to the United Nations Educational, Scientific and Cultural Organization (UNESCO) in Paris. She replaces Esteban Torres, who has been appointed Special Assistant to the President.

Newell has been serving as Representative to UNESCO in a consultant capacity since earlier this year. She was previously president of Wellesley College and a professor of economics there.

She was born August 19, 1929, in Pittsburgh, Pa. She received a B.A. from Vassar College in 1951 and an M.A. (1953) and Ph. D. (1958) from the University of Wisconsin.

From 1951 to 1959, Newell was a research assistant, then teaching assistant, at the University of Wisconsin, then the University of Illinois. She was an assistant and associate professor of economics at Purdue University from 1959 to 1965 and served as assistant to the chancellor of the University of Wisconsin from 1965 to 1967.

From 1967 to 1971, Newell was at the University of Michigan, where she served as assistant to the president, acting vice president for student affairs, special assistant to the president, and then associate professor of economics. She was associate provost for graduate study and research and professor of economics at the University of Pittsburgh in 1971-72. She was at Wellesley from 1972 to 1979.

Newell is a member of the Institute of International Education and was U.S. delegate to the OAS Conference on Women's Education in Buenos Aires. She is the author of several books and numerous articles.

United States Arms Control and Disarmament Agency

Designation of McGeorge Bundy as Chairman of the General Advisory Committee.
October 4, 1979

The President today announced that he has designated McGeorge Bundy as Chairman of the General Advisory Committee to the Arms Control and Disarmament Agency.

Bundy has been a member of the Com-

mittee since 1978. He is president of the Ford Foundation and served as Special Assistant for National Security Affairs to Presidents Kennedy and Johnson.

National Council on Educational Research

Designation of Harold Howe as Chairman.
October 4, 1979

The President today announced that he has designated Harold Howe as Chairman of the National Council on Educational Research.

Howe has been a member of the Council since 1978. He is vice president for education and research of the Ford Foundation and served as United States Commissioner of Education from 1965 to 1968.

Department of Health, Education, and Welfare

Nomination of Billy M. Wise To Be an Assistant Secretary.
October 5, 1979

The President today announced that he will nominate Billy M. Wise, of Vienna, Va., to be an Assistant Secretary of Health, Education, and Welfare. He would replace Eileen Shanahan, resigned, and his area of responsibility would be public affairs. Wise has been Assistant to the Secretary of Housing and Urban Development for Public Affairs since 1977.

He was born November 1, 1936, in Shawnee, Okla. He received a B.A. in journalism from the University of Oklahoma in 1958. He served in the U.S. Air Force from 1958 to 1960.

From 1960 to 1961, Wise was a reporter for the Tulsa Tribune. He was with Life magazine from 1961 to 1969, serving as a reporter in New York, a correspondent in the Washington and Paris bureaus, and Mideast bureau chief in Beirut, Lebanon. From 1969 to 1977, Wise was press secretary to Senator Birch Bayh.

European Communities

Nomination of Thomas O. Enders To Be U.S. Representative. October 5, 1979

The President today announced that he will nominate Thomas O. Enders, of Waterford, Conn., to be the Representative of the United States to the European Communities, with the rank of Ambassador Extraordinary and Plenipotentiary. Enders has been Ambassador to Canada since 1976.

He was born November 28, 1931, in Hartford, Conn. He received a B.A. from Yale University in 1953, an M.A. from the University of Paris in 1955, and an M.A. from Harvard University in 1957.

From 1958 to 1960, Enders was an intelligence research specialist at the State Department, and from 1960 to 1963, he was visa officer, then economic officer, in Stockholm. He was a supervisory international economist in the Bureau of European Affairs from 1963 to 1966.

From 1966 to 1968, Enders was special assistant in the office of the Under Secretary for Political Affairs. He was Deputy Assistant Secretary for International Monetary Affairs from 1968 to 1969 and Deputy Chief of Mission in Belgrade from 1969 to 1971.

From 1971 to 1974, Enders was Deputy Chief of Mission in Phnom Penh. From 1974 to 1976, he was Assistant Secretary

of State for Economic and Business Affairs.

United States Sinai Support Mission

Message to the Congress Transmitting a Report. October 5, 1979

To the Congress of the United States:

I am pleased to transmit herewith the Eighth Report of the United States Sinai Support Mission. It covers the Mission's activities during the six-month period ending October 1, 1979. This Report is provided to the Congress in conformity with Section 4 of the Public Law 94-110 of October 13, 1975.

The Peace Treaty which Egypt and Israel signed in Washington on March 26, 1979 calls for the United States to continue monitoring responsibilities in the Sinai until January 25, 1980, when Israeli armed forces withdraw from areas east of the Giddi and Mitla Passes. This mission will be completed on schedule.

Trilateral talks in Washington on September 18 and 19 resulted in tentative agreement for the United States, using the Sinai Field Mission, to verify force levels specified in Annex I of the Treaty, in the area of the Sinai west of the Interim Buffer Zone. Administration officials have been in touch with appropriate Congressional committees on various aspects of the U.S. undertaking and will provide Congress with all agreements and understandings to which the United States is a party.

This year's funding of the Sinai Support Mission is authorized under Chapter 6, Part II of the Foreign Assistance Act, "Peacekeeping Operations." A request

has been made to Congress to restore \$6.1 million of the Sinai Support Mission funds for FY 1980, to cover anticipated outlays associated with the new U.S. undertaking in the Sinai.

The American peacekeeping initiative in the Sinai has been highly successful. I know the Congress will continue its support of the Mission, as part of United States efforts to meet our goal of permanent peace in the Middle East.

JIMMY CARTER

The White House,
October 5, 1979.

NOTE: The report is entitled "Report to the Congress—SSM: United States Sinai Support Mission" (19 pages plus annexes).

Uranium Enrichment Capacity

Message to the Congress Transmitting a Report. October 5, 1979

To the Congress of the United States:

In accordance with Sections 103 and 104(c) of the Nuclear Non-Proliferation Act of 1978, I hereby transmit to Congress the U.S. Uranium Enrichment Capacity Annual Report.

This Report has been prepared by the Department of Energy in conjunction with the Department of State, the Arms Control and Disarmament Agency and the Office of Management and Budget and submitted to me as required by law. The Report discusses the need for additional U.S. uranium enrichment capacity and addresses the desirability of and options for foreign participation in new U.S. uranium enrichment facilities.

JIMMY CARTER

The White House,
October 5, 1979.

NOTE: The 11-page report is entitled "Need for Additional U.S. Uranium Enrichment Capacity and Desirability of and Options for Foreign Participation in New U.S. Uranium Enrichment Facilities."

Treaty on the Limitation of Strategic Offensive Arms

White House Statement on a Senate Select Committee on Intelligence Report. October 5, 1979

The principal findings of the Senate Select Committee on Intelligence speak for themselves. They confirm that the SALT II treaty can be monitored to a degree that justifies the administration's conclusion that the treaty is adequately verifiable.

The committee expressly finds that the SALT II treaty enhances the ability of the United States to monitor those components of Soviet strategic weapons forces which are subject to the limitations of the treaty. Additionally, the committee has found that in the absence of the SALT II treaty, the Soviets would be free to take more sweeping concealment and deception measures, which could make monitoring of Soviet strategic forces even more difficult.

Thus, we believe the Senate can proceed to vote on the SALT II treaty with the full confidence that the issue of verification has been satisfactorily resolved.

We welcome this Intelligence Committee report and look forward to the Senate Foreign Relations Committee testimony of Chairman Bayh and Senator Goldwater next week. In addition, the President intends to meet personally with both Senators Bayh and Goldwater to discuss the report in more detail.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

September 29

The President met at the White House with Zbigniew Brzezinski, Assistant to the President for National Security Affairs.

The President met in the Roosevelt Room with members of his advisory panel on the Soviet troops in Cuba, including George Ball, Roswell Gilpatric, Henry Kissinger, John McCone, Dean Rusk, Brent Scowcroft, McGeorge Bundy, Averell Harriman, Sol Linowitz, David Packard, James Schlesinger, Clark Clifford, Nicholas Katzenbach, John McCloy, and William Rogers.

The President declared a major disaster for the State of Florida as a result of severe storms and flooding, beginning on or about September 14, which caused extensive property damage.

The President declared a major disaster for the State of North Carolina as a result of severe storms and flooding, beginning on September 21, which caused extensive property damage.

The President declared a major disaster for the Commonwealth of Virginia as a result of severe storms and flooding, beginning on September 21, which caused extensive private property damage.

The White House announced that Robert J. Lipshutz, Counsel to the President since his inauguration, formally submitted his resignation to President Carter and announced that he is returning to Atlanta to join the law firm of Haas, Holland, Levison and Gibert on November

1. In his new private practice, Mr. Lipshutz will be President Carter's personal attorney and cotrustee of his personal trust, as well as chairman of the proposed Carter Presidential Library commission.

The White House announced that the President has signed a determination that withdraws the designation of Ethiopia as a beneficiary developing country for purposes of the Generalized System of Preferences.

The President left the White House for a weekend stay at Camp David, Md.

October 1

The President returned to the White House from Camp David.

October 2

The President met at the White House with:

—Dr. Brzezinski;

—Frank B. Moore, Assistant to the President for Congressional Liaison.

The President attended a luncheon for country music performers, held in the State Dining Room at the White House.

October 3

The President met at the White House with:

—Dr. Brzezinski;

—Vice President Walter F. Mondale, Secretary of Health, Education, and Welfare Patricia R. Harris, Secretary of Transportation Neil Goldschmidt, Secretary of Labor Ray Marshall, Secretary of Housing and Urban Development Moon Landrieu, Alonzo L. McDonald, Jr., Assistant to the President, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, to discuss domestic policies;

Administration of Jimmy Carter, 1979

- Secretary of Commerce Juanita M. Kreps;
- Mr. Moore;
- State Democratic Party chairmen and cochairmen;
- Stansfield Turner, Director of Central Intelligence, and Dr. Brzezinski;
- Mrs. Carter, for lunch.

October 4

The President met at the White House with:

- Dr. Brzezinski;
- Mr. Moore;
- representatives of the Rural Coalition;
- Vice President Mondale;
- U.S. Ambassador to the Soviet Union Thomas J. Watson, Jr., and Mrs. Watson.

The President participated in a briefing by administration officials on the strategic arms limitation treaty given for community leaders in the East Room at the White House.

The President declared a major disaster for the State of Connecticut as a result of a tornado and severe storms, beginning on October 3, which caused extensive property damage.

October 5

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of Defense Harold Brown, Deputy Secretary of State Warren M. Christopher, Hedley W. Donovan, Senior Adviser to the President, Hamilton Jordan, Assistant to the President, Lloyd N. Cutler, Counsel to the President, and Dr. Brzezinski;
- Mr. Moore;

- officers of the Leif Ericson Society International;
- Frank I. Hamilton, commander of the American Legion;
- Charles L. Schultze, Chairman of the Council of Economic Advisers.

The President met in the Oval Office with Carl Yastrzemski, an outfielder for the Boston Red Sox professional baseball team, to congratulate him on achieving his 3,000th career hit. Other participants included Mr. Yastrzemski's family and friends.

NOMINATIONS SUBMITTED TO THE SENATE

The following listing does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted October 1, 1979

JAMES C. WEBSTER, of South Dakota, to be an Assistant Secretary of Agriculture, vice Dale Ernest Hathaway, elevated.

Submitted October 5, 1979

THOMAS O. ENDERS, of Connecticut, a Foreign Service officer of the Class of Career Minister, to be the Representative of the United States of America to the European Communities, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

BARBARA W. NEWELL, of Massachusetts, for the rank of Ambassador during the tenure of her service as the United States Permanent Representative to the United Nations Educational, Scientific, and Cultural Organization at Paris, France.

BILLY M. WISE, of Virginia, to be an Assistant Secretary of Health, Education, and Welfare, vice Eileen Shanahan, resigned.

CHECKLIST OF WHITE HOUSE PRESS RELEASES

The following listing contains releases of the White House Press Office which are not included in this issue.

Administration of Jimmy Carter, 1979

CHECKLIST—Continued

Released September 29, 1979

News conference: on the administration's recent accomplishments on domestic issues—by Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Frank B. Moore, Assistant to the President for Congressional Liaison

Announcement: resignation of Robert J. Lipshutz as Counsel to the President

Released October 1, 1979

ACTS APPROVED BY THE PRESIDENT

Approved September 29, 1979

S. 737----- Public Law 96-72
Export Administration Act of 1979.

H.R. 3996----- Public Law 96-73
An act to amend the Rail Passenger Service Act to extend the authorization of appropriations for Amtrak for 2 additional years, and for other purposes.

H.R. 4393----- Public Law 96-74
Treasury, Postal Service, and General Government Appropriations Act, 1980.

ACTS APPROVED—Continued

Approved September 29—Continued

H.R. 5380----- Public Law 96-75
An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1979, for a certain period.

S. 230----- Public Law 96-76
An act to amend title VIII of the Public Health Service Act to extend through fiscal year 1980 the program of assistance for nurse training, and for other purposes.

H.J. Res. 406----- Public Law 96-77
A joint resolution to extend by one hundred and twenty days the expiration date of the Defense Production Act of 1950.

H.R. 5369----- Public Law 96-78
An act to provide for a temporary increase in the public debt limit, and to amend the Rules of the House of Representatives to make possible the establishment of the public debt limit in the future as a part of the congressional budget process.

Approved October 4, 1979

S. 544----- Public Law 96-79
Health Planning and Resources Development Amendments of 1979.

S. 275----- Private Law 96-5
An act for the relief of Leah Mi Cohen.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, October 12, 1979

Visit of Pope John Paul II

*Remarks at the Welcoming Ceremony.
October 6, 1979*

THE PRESIDENT. *Members of Congress, members of the Supreme Court, members of the Cabinet, ladies and gentlemen:*

Niech będzie Bóg pochwalony!—which, for those of you who do not speak Polish, means “May God be praised!”

This is a day for praising God. On behalf of every American of every faith, I’m pleased and honored to welcome you, Pope John Paul, to the Capital City of the United States of America. Welcome.

In our souls, there is a special feeling which we may call solemn joy. This historic day brings forth such a feeling as we mark another milestone in the long, intertwined history of our country and its faith in God.

But the moment is also historic because the currents that flow below this brief ceremony reach into the very depths of individual lives and even to the breadth of the relationship among sovereign nations. Your journey among us has helped us to see those currents as part of one great river of effort to alleviate human needs and to realize the hunger for spiritual aspirations.

You’ve moved among us as a champion of dignity and decency for every human being and as a pilgrim for peace among nations. You’ve offered us your love, and we as individuals are heartened by it. You can be sure, Pope John Paul, that the people of America return your love.

As you’ve traveled our city streets and our country roads, you’ve met and touched the vast and rich diversity of America. We cherish our independence of religious thought and our tradition of the separation of church and state, but we are all grateful that we can stand together upon the common ground of shared beliefs.

Sustained by a broad base of mutual understanding, we must seize four unique opportunities which have been dramatized by your visit.

As the first opportunity, we can renew our spiritual lives—in our individual lives, in our families, in our Nation, in our world. During the past few days, you’ve made us reexamine ourselves. For all the attraction and the sometimes necessity of material things, you’ve reminded us of the value of human life, and that spiritual strength is the most vital resource of people and of nations. Caring for others makes us strong and gives us courage, while blind pursuit of selfish purposes—of

having more instead of *being* more—only leaves us empty and depressed, lonely and fearful.

We often see tragic results among those we love—disillusionment, cynicism, alienation—sometimes leading to self-debasement, crime, and violence. This does not have to be. These times of rapid and complex change demand that we turn to that which does not ever change—the spiritual strength to grow together; to find unity as a nation, as a human family—and I believe we will.

Our second opportunity is to recognize that our values, our beliefs, our faith are forged and made meaningful only through action. We must be prepared—both as individuals and as a society—not only to deplore poverty, injustice, and the smothering of human aspirations, but to end them.

We know that material values and spiritual values are interrelated and that inequality of opportunity in life breeds disillusionment and sometimes even strife among human beings. We Americans can act on that knowledge both within our country and beyond our borders—and I believe that we will.

Our third opportunity is to remember that the enhancement of human rights is the compelling idea and goal of our time. Through your own example, you've shown the world that the power of the human spirit cannot be subdued by the power of the state. Your courage inspired your native land, and it now inspires the world.

You've shown how we can find meaning within ourselves by reaching out to others in a shared humanity. We believe that the worthy goals of a society call upon us to help others in a common pursuit of freedom and human rights.

This, for us, has been the meaning of America for more than two centuries. The Pilgrims of New England, the Quakers of

Pennsylvania, the Catholics of Maryland, the Jews, and many members of other faiths and denominations who've found safety in America have all been witnesses to a fundamental fact—that where religious faith is free, human liberty, equality, and justice may grow. This is a message which is as vital today as it was 200 years ago when our Nation was founded.

As a nation of faith and vigor, we are committed to deliver the message of human freedom throughout the world—and, Your Holiness, that we will.

Our fourth opportunity is peace. We are dedicated to the belief that the natural and proper desire of all human beings is peace.

We seek a peace in Rhodesia, in Nicaragua, in Northern Ireland, in the Middle East. We are committed to peace in every part of the world. We are a great nation that through self-confidence and faith must share with others the security and the beneficial influence which God's blessings have offered to us.

We have the will to limit the growth and spread of nuclear arms. We can bury hatreds and heal political divisions and control the terrible instruments of mass destruction on behalf of humanity. It is our duty and our destiny to walk with those others like yourself who would guide the world in the ways of peace—and we will, because this Nation is not and never can be afraid of peace.

Your Holiness, this is what your historic journey has meant to us. It's fitting that your path through America has brought you at last to our Nation's Capital.

I welcome you to the White House, the symbolic home of all our people. And on behalf of every American of every faith, I also welcome you into our Nation's heart. God bless you for coming to our country. We are proud to have you here.

THE POPE. Mr. President, I wish to express my most sincere thanks for your

kind words of welcome to the White House. And also, if I could say, my congratulations for your Polish language.

It is indeed a great honor for me to meet with the President of the United States during a visit of which the aims are spiritual and religious in nature. May I convey at the same time to you, and through you to all your fellow Americans, my profound respect for all the Federal and State authorities of this Nation, for its beloved people.

In the course of the last few days, I have had the opportunity to see some of your cities and rural areas. My only regret is that the time is too short to bring my greetings personally to all parts of this country, but I want to assure you that my esteem and affection go out to every man, woman, and child without distinction.

Divine Providence in its own designs has called me from my native Poland to be the successor of Peter in the See of Rome and the leader of the Catholic Church. It gives me great joy to be the first Pope in history to come to the Capital of this Nation, and I thank Almighty God for this blessing.

In accepting your courteous invitation, Mr. President, I have also hoped that our meeting today would serve the cause of world peace, international understanding, and the promotion of full respect for human rights everywhere.

Mr. Speaker and honorable Members of Congress, distinguished members of the Cabinet and of the judiciary, ladies and gentlemen:

Your presence here honors me greatly, and I deeply appreciate the expression of respect which you thus extended to me. My gratitude goes to each one of you personally for your kind welcome, and to all I wish to say how profoundly I esteem your mission as stewards of the common good of all the people of America.

I come from a nation with a long tradition of deep Christian faith and with a national history marked by many upheavals; for more than a hundred years Poland was even erased from the political map of Europe. But it is also a country marked by a deep veneration for those values without which no society can prosper—love of freedom, cultural creativity, and the conviction that common endeavors for the good of society must be guided by a true moral sense.

My own spiritual and religious mission impels me to be the messenger of peace and brotherhood and to witness to the true greatness of every human person. This greatness derives from the love of God, who created us in His own likeness and gave us an eternal destiny. It is in this dignity of the human person that I see the meaning of history and that I find the principle that gives sense to the role which every human being has to assume for his or her own advancement and for the well-being of the society to which he or she belongs.

It is with these sentiments that I greet in you the whole American people, a people that bases its concept of life on spiritual and moral values, on a deep religious sense, on respect for duty, and on generosity in the service of humanity—noble traits which are embodied in a particular way in the Nation's Capital, with its monuments dedicated to such outstanding national figures as George Washington, Abraham Lincoln, and Thomas Jefferson.

I greet the American people in their elected representatives, all of you who serve in Congress to chart, through legislation, the path that will lead every citizen of this country towards the fullest development of his or her potential, and the Nation as a whole towards assuming its share of the responsibility for building a world of true freedom and justice. I greet America in all who are vested with au-

thority, which can only be seen as an opportunity for serving your fellow citizens and in the overall development of their true humanity and in the full and unimpeded enjoyment of all their fundamental rights.

I salute the people of this land also in the members of the judiciary, who are servants of humanity in the application of justice and who thus hold in their hands the awesome power of profoundly affecting, by their decisions, the lives of every individual.

For all of you I pray to Almighty God that He may grant you the gift of wisdom in your decisions, prudence in your words and actions, and compassion in the exercise of the authority that is yours, so that in your noble office you will always render true service to the people.

God bless America.

NOTE: The President spoke at 1:57 p.m. on the North Lawn of the White House.

Following the ceremony, the President hosted a private reception for the Pope in the Blue Room at the White House. They then met in the Oval Office.

Visit of Pope John Paul II

*Remarks at a White House Reception.
October 6, 1979*

THE PRESIDENT. My friends, fellow Americans of every faith, I greet you here with a mixture of both pride and pleasure. We've been privileged to meet today at the White House with a truly extraordinary man—John Paul—one who will mean even more to us in the future as we in this world move in this century to meet the complex challenges which inevitably will confront us and all others who live on Earth.

Our Nation was not founded to deny human beings a life of the spirit, but to welcome the spiritual into our lives, and I

join all Americans in welcoming Pope John Paul II with open hearts into the lives of our Nation. You are welcome with us, Your Holiness.

As you know, he comes to us as a pastor, as a scholar, as a poet, as a philosopher, but I think primarily as a pastor. [*To the Pope*] Do you agree? As a pastor?

THE POPE. You are right.

THE PRESIDENT. He has decided not to dispute the word of the President. [*Laughter*]

Regardless of our faith, we look on him as a pastor, and he's come to know us and to talk to us about gentleness, about humility, about forgiveness, and about love. You've taught us, our beloved guest, that we in the United States are not perfect, that we in the United States are responsible for our own behavior. You show in your life and in your teachings a particular concern for human dignity. You know that many people are fearful, but that a person with faith need not be afraid. Our religious faith is, indeed, relevant to a modern world.

We've been greatly blessed in this country. We know from the holy word that to whom much has been given, much will be required. You've reminded us, indeed, of our own responsibilities.

Our America was founded to give a home to all those who sought religious freedom. For us today, religious freedom is not just a valued relic of a bygone age or a source of national pride. It's a practical necessity for our Nation's forward course into the future, for as we face difficult, painful, often disheartening changes and transformations in our own lives, now as never before, our Nation needs all the spiritual strength that has been gained and nurtured through the long history of a nation of freedom.

Long before he became Pope, Karol Wojtyla, as a priest in his native Poland, wrote these words of poetry: "We stand

in front of our future . . . which opens and closes at the same time."

This afternoon Pope John Paul and I met alone in the Oval Office and discussed the future—the future of faith, the future of people, the future prospects for peace. We share a belief that "the Church must in no way be confused with the political community, nor bound to any political system." But we also spoke of opportunities we might pursue together.

We will work to renew our spiritual strength that can bear us beyond the blind materialism which brings no joy and change that into true caring for one another—in our families, in our communities, in our nations, in our common world. We will pursue this goal through action, not just through words.

I join His Holiness in urging all individuals and nations of the world to alleviate the hunger of people and the homelessness of refugees—not as political acts, but as acts of humanitarian concern. We cannot profess to love humanity and watch hundreds of thousands of men, women, and children die in human tragedy, which we ourselves can help, as a nation and as people, to prevent. It's our responsibility to provide prompt and generous aid to them through action of our own.

In another area of opportunity—concern and action on behalf of human rights—we have long shared a common purpose. As His Holiness has written, "The essential sense of the State, as a political community, consists in that the society and the people composing it are master and sovereign of their own destiny."

We call on all people and all nations to look beyond ancient hatreds, beyond differences in race and customs, traditions and beliefs, to see the shared humanity of every other human life on Earth. Whenever state and religion can do that to-

gether, then violations of the human rights of any person anywhere in the world—whatever cause may be claimed in justification of those deprivations—will be seen to be, as Your Holiness has so accurately described them, "warfare on humanity" itself.

It's abhorrent in our time to allow differences in the way God's children worship the same Father to wound each other, when our common faith could do so much to heal each other.

All of us share full responsibility for seizing another opportunity: In a world filled with weapons there can be no more urgent human passion than to wage and to win the struggle for peace—for the sake of every living thing on Earth.

We must, above all, wrest the fateful lightning of nuclear destruction from the hands of man. We must successfully conclude our nuclear arms agreements, and in this continuing effort we must find a way to end the threat of nuclear annihilation in every nation on Earth. The age of nuclear weaponry can either be long or short, as we choose.

We must continue the common struggle—the church and governments—for peace.

In closing, let me repeat the phrase from your poem: "We stand in front of our future."

Fellow Americans, in the presence of this good man, as we pause quietly for these few moments in our sometimes frantic pace, we ask ourselves: What is important? What is progress? What are we creating which we need fear? In his last words [hours] Jesus prayed for his disciples, "Holy Father, keep them in Thy name, which Thou hast given me, that they may be one, even as we are one." And we are also reminded: "God is love."

Let all of us here of every faith stand as one—under God—for peace and justice and for love.

Let us vow that what our Creator has made—human life and human spirit—that we ourselves shall not destroy.

Let us simply choose to change the world as best we can, each one of us in our own particular place, but towards the common purposes of just societies on a peaceful planet.

Our new friend, the people of my country have waited a long time for this meeting. As human beings, each acting for justice in the present and striving together for a common future of peace and love, let us not wait so long for ourselves and for you to meet again.

Welcome to our country, our new friend.

THE POPE. Mr. President, I am honored to have had, at your kind invitation, the opportunity for a meeting with you; for by your office as President of the United States of America, you represent before the world the whole American nation, and you hold the immense responsibility of leading this nation in the path of justice and peace. I thank you publicly for this meeting, and I thank all those who have contributed to its success. I wish also to reiterate here my deep gratitude for the warm welcome and the many kindnesses which I have received from the American people on my pastoral journey through your beautiful land.

Mr. President, in responding to the kind words which you have addressed to me, I take the liberty of beginning with the passage from the Prophet Micah that you quoted at your inauguration: "You have been told, O man, what is good; and what the Lord requires of you, only to do right, and to love goodness, and to walk humbly with your God." In recalling these words, I wish to greet you and all the authorities in the individual States and the Nation who are committed to the good of the citizens.

There is indeed no other way to put

oneself at the service of the whole human person except by seeking the good of every man and woman in all their commitments and activities. Authority in the political community is based on the objective ethical principle that the basic duty of power is the solicitude of the common good of society and that it serves the inviolable rights of the human person. The individuals, families, and various groups which compose the civic community are aware that by themselves they are unable to realize their human potential to the full, and therefore they recognize in a wider community the necessary condition for the ever better attainment of the common good.

I wish to commend those in public authority and all the people of the United States for having given, from the very beginning of the existence of this Nation, a special place to some of the most important concerns of the common good. Three years ago, during the Bicentennial celebration, which I was fortunate to participate in as the Archbishop of Kraków—as you say it, as a pastor, with many implications—several implications—it was obvious to everyone that concern for what is human and spiritual is one of the basic principles governing the life of this community. It is superfluous to add that respect for the freedom and the dignity of every individual, whatever his origin, race, sex, or creed, has been a cherished tenet of the civil creed of America, and that it has been backed up by courageous decisions and actions.

Mr. President, ladies and gentlemen, I know and appreciate this country's efforts for arms limitation, especially of nuclear weapons. Everyone is aware of the terrible risk that the stockpiling of such weapons brings upon humanity. Since it is one of the greatest nations on Earth, the United States plays a particularly important part in the quest for greater security

in the world and for closer international collaboration. With all my heart I hope that there will be no relaxing of its efforts, both to reduce the risk of a fatal and disastrous worldwide conflagration and to secure a prudent and progressive reduction of the destructive capacity of military arsenals.

At the same time, by reason of its special position, may the United States succeed in influencing the other nations to join in a continuing commitment for disarmament. Without wholeheartedly accepting such a commitment, how can any nation effectively serve humanity, whose deepest desire is true peace?

Attachment to human values and to ethical concerns, which have been a hallmark of the American people, must be situated, especially in the present context of the growing interdependence of peoples across the globe, within the framework of the view that the common good of society embraces not just the individual nation to which one belongs but the citizens of the whole world. I would encourage every action for the reinforcement of peace in the world, a peace based on liberty and justice, on charity and truth.

The present-day relationships between peoples and between nations demand the establishment of greater international cooperation also in the economic field. The more powerful a nation is, the greater becomes its international responsibility; the greater also must be its commitment to the betterment of the lot of those whose very humanity is constantly being threatened by want and need. It is my fervent hope that all the powerful nations in the world will deepen their awareness of the principle of human solidarity within the one great human family.

America, which in the past decades has demonstrated goodness and generosity in providing food for the hungry of the

world, will, I am sure, be able to match this generosity with an equally convincing contribution to the establishing of a world order that will create the necessary economic and trade conditions for a more just relationship between all the nations of the world, in respect for their dignity and their own personality. Since people are suffering under international inequality, there can be no question of giving up the pursuit of international solidarity, even if it involves a notable change in the attitudes and lifestyles of those blessed with a larger share of the world's goods.

Mr. President, ladies and gentlemen, in touching upon the common good, which embodies the aspiration of all human beings to the full development of their capacities and the proper protection of their rights, I have dealt with areas where the church that I represent and the political community that is the state share a common concern: the safeguarding of the dignity of the human person and the search for justice and peace. In their own proper spheres, the political community and the church are mutually independent and self-governing. Yet, by a different title, each serves the personal and social vocation of the same human beings.

For her part, the Catholic Church will continue her efforts to cooperate in promoting justice, peace, and dignity through the commitment of her leaders and the members of her communities and through her incessant proclamation that all human beings are created to the image and likeness of God and that they are brothers and sisters, children of one Heavenly Father.

May Almighty God bless and sustain America in her quest for the fullness of liberty, of justice, and peace.

NOTE: The President spoke at 4 p.m. on the South Lawn of the White House.

Visit of Pope John Paul II

White House Statement. October 6, 1979

President Carter welcomed His Holiness Pope John Paul II to the White House October 6, 1979. The Pope's visit to Washington concluded an historic week-long papal journey to six American cities.

In their private talks, the President and the Pope discussed, in particular, situations of concern to world peace and justice. They also reviewed ways of best serving the cause of peace, freedom, and justice in the world.

Sharing the belief that respect for human rights and the dignity of the individual must be the cornerstone of the domestic and international policies of nations, the Pope and the President underlined their support for international covenants on human rights and for international organizations and entities which serve the cause of human rights. They agreed that the international community must mobilize its concern and resources to deal with the problems of refugees, to protect human rights, and to prevent hunger and famine.

The President and the Pope urged all states to support humanitarian efforts to deal with the plight of starving people and refugees.

The Pope and the President agreed that the cause of peace in the world is served by international efforts to halt the proliferation of armaments and to eliminate the weapons of war.

The President discussed the importance of the Camp David accords and his efforts to end the bitter conflict in the Middle East. He emphasized the determination of the United States to seek a comprehensive peace, including resolution of the Palestinian and Jerusalem questions, the

establishment of peace and stability in Lebanon, and genuine security for all countries in the Middle East. The Pope reiterated the special interest which the Holy See attaches to the Middle East peace process and to the need for an internationally acceptable solution to these grave problems.

The Pope and the President discussed the tragic situation in Northern Ireland. They jointly condemned resort to violence, by any party for any reason, and recalled the appeals which both have recently made for a peaceful solution.

The Pope reviewed his trips to Poland and to Mexico and stressed the universal longing for human dignity and freedom, which he had encountered during his pilgrimage.

The President and the Pope also discussed recent developments in southern Africa, Asia, and Latin America. The President noted that the United States seeks conditions of stability, prosperity, and peace in all these areas in the belief that these will promote human rights. The President emphasized that the international community, and especially the industrial nations, must undertake a greater effort to assist less developed countries to achieve a better way of life for their peoples. The Pope and the President agreed that efforts to advance human rights constitute the compelling idea of our times.

During the Pope's private talks with the President, Vice President Walter Mondale chaired a meeting of principal papal and U.S. advisers. On the Vatican side there were present: His Eminence Agostino Cardinal Casaroli, the Papal Secretary of State, His Excellency Archbishop Eduardo Martinez Somalo, the substitute Secretary of State, His Excellency Archbishop Jean Jadot, Apostolic Delegate in

the United States, Monsignor Audrys Backis, the Undersecretary of the Council for Public Affairs of the Church, and others.

On the United States side there were present: Secretary of State Cyrus Vance, the President's National Security Adviser, Dr. Zbigniew Brzezinski, Deputy National Security Adviser David Aaron, Anne Wexler, Assistant to the President, the President's personal envoy to the Vatican, Ambassador Robert F. Wagner, Assistant Secretary of State for European Affairs George Vest, and others.

In addition to the topics discussed in the Oval Office, this meeting in the Cabinet Room reviewed the status of the SALT II treaty and the implementation of the Helsinki Final Act, to which both the Holy See and the United States are signatories. They viewed compliance with the provisions of the Final Act, to be examined at the 1980 Review Conference in Madrid, as essential for enlarging human rights and, in particular, freedom of conscience throughout the world.

The Nation's Economy

White House Statement on Actions by the Board of Governors of the Federal Reserve System. October 6, 1979

The administration believes that the actions decided upon today by the Federal Reserve Board will help reduce inflationary expectations, contribute to a stronger U.S. dollar abroad, and curb unhealthy speculations in commodity markets.

Recent high rates of inflation, led by surging oil prices, other economic data, as well as developments in commodity and foreign exchange markets, have rein-

forced the administration's conviction that fighting inflation remains the Nation's number one economic priority.

The administration will continue to emphasize a policy of budgetary restraint. Enactment of effective national energy legislation to reduce dependence on foreign oil is vital to long-term success in this effort.

The administration believes that success in reducing inflationary pressures will lead in due course both to lower rates of price increases and to lower interest rates.

NOTE: Earlier in the day, the Board of Governors had announced that measures would be taken to increase the discount rate, the interest rate the Federal Reserve charges member banks when lending them money, from 11 percent to 12 percent; to require that banks set aside an 8-percent reserve of moneys received from foreign and other sources; and to take greater direct control over the supply of the Nation's money.

National Port Week, 1979

Proclamation 4695. October 6, 1979

*By the President of the United States
of America*

A Proclamation

Virtually every major metropolitan region of the United States centers around a port, or is closely linked by rail or highway to a port. As waterborne trade in the United States approaches 2 billion tons of cargo per year, the rippling economic effects of expanding port activities will continue to generate employment, revenues, and community development.

Local control and administration of our Nation's port system has fostered the development of some 170 commercial seaports and numerous inland ports on our

navigable inland waterways. As the world's leading trading country, the United States depends upon local port expenditures, modernizations and expansions to accommodate expected growth in trade and improvements in transportation technology. But the benefits extend to the national economy, as well as to local communities.

Since 1946, local port agencies have invested more than \$5 billion to construct and modernize our pier and wharf facilities. These local public expenditures have essentially been matched by the investments of private marine terminal owners, while the Federal Government helps provide channel and navigation improvements. For the years 1973-1978, these local port expenditures reached \$1.8 billion. Projections for the next five years total an estimated \$3 billion. These local investments are the vital streams of our foreign and domestic waterborne commerce.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, in order to remind Americans of the importance of the port industry of the United States to our national life, do hereby designate the seven calendar days beginning October 7, 1979, as National Port Week. I invite the Governors of the several states, the chief officials of local governments, and the people of the United States to observe such week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of October, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

Department of Labor

Nomination of John N. Gentry To Be Under Secretary. October 9, 1979

The President today announced that he will nominate John N. Gentry, of Reston, Va., to be Under Secretary of Labor. He would replace Robert Brown, resigned.

Gentry is the principal labor-management relations adviser to Alfred Kahn, the President's Advisor on Inflation and Chairman of the Council on Wage and Price Stability.

Gentry was born May 16, 1930, in Williamsport, Pa. He holds an undergraduate degree in economics from the University of Maryland and a J.D. from Georgetown University Law Center.

He served in a number of positions at the Labor Department, including Deputy Assistant Secretary for Labor-Management Relations and executive assistant to the Under Secretary of Labor.

In 1970 he entered private practice as a member of the Washington firm of Wirtz & Gentry, a law and public interest consulting firm. Gentry also served as president of the National Manpower Institute. In 1978 he served as Chairman of President Carter's board of inquiry under Taft-Hartley to investigate issues in the bituminous coal strike.

THE PRESIDENT'S NEWS CONFERENCE OF OCTOBER 9, 1979

THE PRESIDENT. Good afternoon.

Ms. Thomas [Helen Thomas, United Press International].

STRATEGIC ARMS LIMITATION; SOVIET
TROOPS IN CUBA

Q. Mr. President, do you think that you

have diffused the problem or issue of the Soviet brigade in Cuba and satisfied those who seek a bigger defense budget enough now to win SALT ratification this year, and if so, how?

THE PRESIDENT. I believe SALT will be ratified this year basically on its own merits. It's obvious to me that the SALT treaty is in the best interest of our country. It enhances the security of the United States; it contributes to world peace; it will strengthen our own alliances; it will preserve our place as a leader of the Western World; it will let it be more easy for us to control the spread of nuclear explosives all over the world.

In my opinion, we have answered the question of the Soviet combat unit in Cuba adequately. I think we've isolated any threat from that unit. We'll increase our surveillance there, and I believe that this obviously has been an important issue for us to address. I believe it's been addressed adequately.

As far as the defense budget is concerned, that still must be resolved. I'm committed to a 3-percent real growth in our defense. I've maintained that position for the last 3 years. It's important to us, to our allies, to American strength. If I see a need for increased defense programs, I would not hesitate to recommend them to the Congress.

THE NATION'S ECONOMY

Q. Mr. President, are you prepared to persevere in your support of tight money policies even if it begins to hurt you politically during the primaries?

THE PRESIDENT. Yes. It's obvious that there are three entities in our Government which have been meticulously isolated either under the Constitution or the law and made independent. One is the Federal Reserve Board, which has a right, through various means, to determine the supply of money by changing interest

rates, the reserve moneys that have to be retained by banks that cannot be lent, and so forth. The Congress has the ultimate responsibility on taxation, and the President has the best responsibility on preparing and submitting the budget to the Congress.

There's no doubt in my mind—and this is corroborated by my long discussions the last few weeks with labor, in reaching a labor accord—that I and labor and business and all those who are interested, including the Congress, agree that the number one threat to our national economy is inflation. And I intend to maintain it as a top priority and continue to work against inflation. So, whatever it takes to control inflation, that's what I will do.

I recognize that the inflationary impact falls much more heavily on those who are least able to afford the basic necessities of life. And I also recognize that there are some elements of inflation over which I have no control. The price of energy levied on the world by OPEC in the last 10 months has been an increase of 60 percent. Had it not been for energy price increases, for instance, the inflation rate during this summer would have been the same as it was in 1978 and 1977. So, I can't control energy prices levied on the world by OPEC.

But we'll continue to fight against inflation as a top economic priority.

U.S.-SOVIET RELATIONS

Q. Mr. President, what is your reaction to Dr. Kissinger's statement that the Soviet troops in Cuba are the first organized hostile force in this hemisphere since the Monroe Doctrine that we've accepted? And also, Mr. President, do you feel that the Soviet troops in Cuba symbolize the growing expansionism of the Russians, the Soviet Union?

THE PRESIDENT. The troops in Cuba have been there for a long time. I've not read Secretary Kissinger's speech; I've read news reports of it. Its basic premises are compatible with my own: that the presence of a Soviet combat unit there is a serious matter, which I think we have addressed as best we could; secondly, that this is not the most important matter of all, that above and beyond that, it's important to recognize and to do what we can to contain Cuban interventionism or adventurism around the world. As you know, this began primarily with the entrance of more than a 10,000 body of troops from Cuba into Angola in 1975, before I was President.

We do look upon this as a major threat. I have not seen any reports that Secretary Kissinger recommended different moves from the ones that I outlined to the Nation on the evening of October 1. So, we do share a common concern. I think that our response was measured and appropriate. I do not favor the Soviets extending their arm of influence to the Cubans or anyone else around the world.

This has been part of the history of the Soviet Union. We attempt to meet them and compete with them adequately, in my opinion, on a peaceful basis. And in my judgment, if we can control the military expenditures and have equality, have arms control, in my judgment, we can compete with the Soviets on a peaceful basis with an excellent prospect for victory.

The Soviets represent a totalitarian nation; we are committed to peace and freedom and democracy. The Soviets subjugate the rights of an individual human being to the rights of the state; we do just the opposite. The Soviets are an atheistic nation; we have deep and fundamental religious beliefs. The Soviets

have a primary emphasis on the military aspect of their economy; ours is much more broadly based to give the benefits of economic growth to individual human beings. So, I believe that in addition to that, our raising a standard of human rights and the honoring of national aspirations, not trying to interfere in the internal affairs of other countries, gives us an additional advantage in a peaceful competition with the Soviets.

So, I don't have any fear of or any trepidation about that intense competition with the Soviets on a peaceful basis. I obviously want the same thing that President Brezhnev wants, that is, the avoidance of a nuclear war. So, we have some things in common, the avoidance of war. We have other things in common, a willingness to compete.

We've got advantages over them that I hope to utilize in the future as we have in the past.

JESSE JACKSON; FLORIDA CAUCUSES

Q. Mr. President, how do you think you'll fare in Florida? And also a second question—

THE PRESIDENT. I didn't hear the first one.

Q. How do you think you will fare in Florida for the Florida caucus poll? And also, will you plan on talking to Reverend Jesse Jackson in response to his meetings with Yasser Arafat?

THE PRESIDENT. Do I have my choice between those two questions? [*Laughter*]

Q. I'd like you to answer both, if you would, sir.

THE PRESIDENT. I have no plans to talk to Reverend Jackson—I presume you mean about his recent trips to the Middle East. He has, or will make a report to Ambassador Strauss, who is our Mideast negotiator.

In Florida, I don't know how the caucus results will come out. This is one of the evidences of an increasingly early attention focused on a Presidential race. I don't think it is in the best interests of our country to start so early. The importance of the Florida caucuses, I think, will be assigned by the press, not by anything that I do. I don't intend to go down there to campaign. We do have people working for me in Florida, which I appreciate. And I think that since this is a first test between myself and other candidates who also are mounting an effort among their supporters, it will be significant.

But I cannot predict the outcome of the caucuses. I've seen no polls, have no indication about what the outcome might be.

VISIT OF THE POPE

Q. Mr. President, clearly the Pope on his visit to the United States and in Washington left an extraordinary impression beyond simply the religious.

THE PRESIDENT. Yes.

Q. Have you reflected on the meaning of the Pope's visit to the United States?

THE PRESIDENT. Yes.

Q. Could you discuss that?

THE PRESIDENT. In addition to being with him in public and when we met with the members of my family in the White House, I had an extensive private conversation with the Pope, and we discussed this particular question. We were both surprised at the degree of warmth and enthusiasm among American people in welcoming the Pope. I expected the welcome to be warm and friendly, but I had no idea that it would be that enthusiastic and that large a number of people, and neither did he.

I think there's an innate hunger in our country for moral and ethical and religious principles, things that do not change

during a time of rapid change brought about by a technological revolution throughout the world. I believe there's a hunger for things that are decent and honest, for principles of which we can be proud. I think the Pope as a religious leader accurately mirrors for many people those aspirations and hopes.

I think it shows that this hemisphere is the most deeply religious, perhaps, in the world, certainly the most deeply religious Christian population in the world. We had long discussions about what this meant in other nations, the threat of atheism as espoused and enforced by the state against the inherent desire of people for religious belief.

But I believe this was one of the most dramatic and, I think, potentially the most beneficial visits we've ever had from a leader in the world. I was very thrilled to meet him and believe that his visit will have benefits for our country.

DEPLOYMENT OF U.S. FORCES

Q. Mr. President, in your speech on Cuba the other night, you spoke about wanting to increase the capabilities of our rapid deployment force.

THE PRESIDENT. Forces.

Q. Forces. I wondered if you could say under what circumstances you would be willing to intervene militarily in the Middle East.

THE PRESIDENT. I see no prospect at this point for our intervention militarily in any place in the world. That would be a judgment that I would only make if I thought the security of our country was directly threatened.

SENATOR EDWARD M. KENNEDY

Q. Mr. President, the other night in Queens, in the context of answering the question about your leadership and Sen-

ator Kennedy, you said you had never panicked in a crisis. Now, there was some interpretation that this was a reference to Senator Kennedy's behavior at Chappaquiddick. And you subsequently, or Jody subsequently denied it.

Let me ask you specifically, do you think Chappaquiddick indicates that President Kennedy's character is somewhat flawed, and will this be a continued issue in the primaries if he enters?

THE PRESIDENT. I think it was Senator Kennedy to whom you refer. *[Laughter]*

I did not refer to Senator Kennedy's experience at Chappaquiddick in Queens, and I have no desire to comment on it now.

INTERNATIONAL MONETARY POLICY

Q. Mr. President, further on the Fed tight money policy, figures such as the West German Finance Minister Emminger¹ and Democratic Party Presidential candidate Lyndon LaRouche have charged that this is leading us rapidly towards the Crash of '79. Will you move to stabilize the dollar in the economy by collaborating with Europe on their moves to demonetize gold as LaRouche and others have suggested?

THE PRESIDENT. I doubt that that's in prospect, certainly not for this year. We do cooperate with our allies and friends and trade partners in order to stabilize the worldwide monetary system, including at times the interrelationship between currencies from one country and another and sometimes the basic metals. I don't see any threat to the well-being of any

¹ Otmar Emminger is president of the Deutsche Bundesbank, the Federal Republic of Germany's equivalent of the U.S. Federal Reserve System.

American because of a rapidly increasing price of gold, except those who have sold early or bought late. But as far as the average citizen's concerned, the price of gold, whether it's \$200 an ounce or \$400, has very little impact.

Recently, the Federal Reserve Board has decided to raise interest rates and take other steps concerning the reserve supply of money to be kept on hand by banks. This has resulted in a strengthening of the dollar, which had already begun to strengthen. And I believe that it's well within the bounds of management; it's stable. I noticed an analysis that showed that in the last year the price of the dollar, the value of the dollar, as compared to currencies of all our trade partners, has increased substantially. Among the OPEC nations and their trade partners the value of the dollar, even before we made this recent move, had increased 8 percent over the last year.

So, I believe the dollar is stable, I believe the world economy is stable, and I see no prospect of shifting to a rigid price of gold and a gold standard.

1980 PRESIDENTIAL CAMPAIGN

Q. Sir, two more political questions in light of Senator Kennedy's prospective challenge of you. One, as you did in 1976, would you be willing to debate the Senator and other candidates in the primaries? And two, if you lost, would you support the Democratic nominee actively? And if you won, would you expect your opponents to do the same for you?

THE PRESIDENT. That's a lot of conjecture. We don't have any candidates yet who have declared. I look forward to the campaign with a great deal of anticipation and confidence. And I think the normal routine interrelationships among

candidates would probably prevail in 1980, as they did in 1976.

There were no official debates, as such, until the general election in 1976, when President Ford and I, as a nominee, were given that opportunity. But I feel at ease about it. I will protect my record, which I think is a good one. And as I say, I look forward to the campaign with anticipation and confidence.

Q. Mr. President, may I follow up? Will you support the winner of the convention?

THE PRESIDENT. Yes. My presumption is—

Q. And second, your opponents support you if you win?

THE PRESIDENT. My presumption is that I would support whatever Democrat gets the nomination. I have always voted Democratic.

ECONOMIC POLICY

Q. Mr. President, wholesale prices continue to increase, indicating that there will be further inflation at the retail level throughout the rest of this year and perhaps longer. Most of the predictions that you've made and your economic advisers have made about the economy have proved to be on the low side and are constantly being revised upward, especially with regard to inflation.

Don't you think it's about time for some kind of reevaluation of your economic programs and policies? Are you going to just continue to go along on the same course, or do you think any kind of reexamination of your policy is indicated?

THE PRESIDENT. I think so far the program has been well conceived, and I think it has some very beneficial results. We are all surprised at the rate of inflation, brought about primarily, as I said, by an annual rate of increase of energy prices

the last few months of more than 100 percent per year. Also, as I said earlier, if you could discount those energy increases, the rate of inflation would be the same this year as it was the preceding 2 years.

We have cut the budget deficit by \$36 billion since I've been elected. We have reduced the total number of employees in the Federal Government. We've reduced the percentage of the gross national product being spent by the Government by 2 full percent, from 23½ down to 21½. We've cut paperwork by 15 percent. We've begun a strong move to deregulate, that is, to get the Government's nose out of the private business sector and the lives of private people. We've had a very stringent effort made to eliminate unwarranted spending, and we've moved when necessary to stabilize the value of the dollar.

We've also proposed to the Congress for the first time a means by which we could reduce the inflationary impact of importing 50 percent of our oil. This has been a long, slow, tedious process, but I think when the Congress does complete its work this year on an energy package, this will remove the single major factor that has been causing excessive inflation.

I don't intend to change our basic policy, and I believe that we've had maybe inadequately assessed results even from the wage-price guidelines.

The wage increases, for instance, this year, the first 9 months of this year, have been lower than they were in 1978. We've had more than a million union workers who have signed contracts within the wage guidelines. And the price standards have also been very effective. For instance, the items that come under price standards have been increasing at only one-half the rate of those that cannot be controlled, like OPEC oil prices.

So, I think in general our policy is an adequate and a good one, and I intend to maintain the thrust of it.

MINORITY EMPLOYMENT

Q. Mr. President, I think earlier this year, you had a memo to the agencies and departments which discussed black institutions and contracts and awards. It seems as though that memo has lost some of its teeth in the process. Is there any way that that could be regenerated so that the employment of minorities in the country and through the colleges can increase?

THE PRESIDENT. We've had some success with the unemployment rate among minorities. Even this past month, as you know, the unemployment rate among women, teenagers, and minorities dropped. And we've been pleased at the average rate of unemployment throughout the country. It's still extremely high, however, comparatively speaking, among, say, black teenagers or other minority teenagers.

In addition to that, we have helped the Congress write a law so that public works projects, when assigned to individual communities, would include at least 10 percent of the total money going into contracts with minority-owned businesses. I set as a goal for our administration a tripling in 1 year of the portion of Federal purchases from minority businesses. It was a billion dollars. I set as a goal for the end of this year \$3 billion. I think we'll hit a little below my goal, about \$2½ billion.

Also, I think in other ways, like the hiring of black employees or the minority employees, we've done a good job. I think I've appointed more judges, for instance, who are black than all the other Presidents in the history of our country

combined. It's not been adequate, but we've made a major step forward. And we are assessing any failures that we've experienced—for instance, in purchasing, where I wanted to reach \$3 billion, and we will only reach \$2½ billion. I have gotten identified now those agencies that did not meet the tripling goal that I set for them, and they are being especially encouraged by me to meet their goals next year.

We are making progress—not enough.
Judy [Judy Woodruff, NBC News].

THE NATIONAL SPIRIT

Q. Mr. President, Senator Kennedy has suggested that instead of complaining about, I believe, what you call the malaise that the country is experiencing, that what the President should do now is ask the people to roll up their sleeves to try to pull the country out of its problem. And in effect, he spoke of a can-do spirit that harkens back to the 1960's.

THE PRESIDENT. Is this a campaign speech for him or—[laughter].

Q. No, sir.

THE PRESIDENT. Okay.

Q. What merit, if any, do you see in that suggestion that he made, and also, how vulnerable do you think you are on the issue of leadership?

THE PRESIDENT. Obviously there is a degree of malaise in the country. People are discouraged about the current situation. They are doubtful about the future; they are saving less than they ever have been in the past; and they have a serious concern about confidence in one another and sometimes about the Government itself.

When I made my speech to the Nation, I think, on July 15, on a Sunday evening, I pointed this out. But I said that our country is inherently strong, capable, and

able, that there is no need for us to be discouraged or disillusioned or divided or doubtful about one another or about our Government processes. We're the strongest nation on Earth—economically, politically, and militarily. We're going to stay that way.

And what I prescribed as a major test of American will and confidence was the evolution of and the passage of an energy program, which had never been done in the history of our country, that would be adequate to meet the challenge before us. I think the Congress has made good progress so far. I predict that before they adjourn this year, that we will have this test of our Nation's will successfully achieved.

So, I believe that through the process of helping one another, having confidence, working on major projects, and letting the Government show that it can be competent to deal with a major problem like this, we can resolve the malaise that has existed in our country. I'm not discouraged. I believe that we can succeed.

1980 PRESIDENTIAL CAMPAIGN

Q. Mr. Carter, a few moments ago you said that you thought you probably would like to be the Democratic nominee, in reference to the question on debating. Why are you waiting until December to announce, in view of the fact that Senator Kennedy is probably about to run? Why don't you tell us now that you're going to run?

THE PRESIDENT. I said I was going to make an announcement December 4. I didn't say what it would be yet.

I think that that's not too late. I want to do all I can without being an announced candidate to work with the Congress to get controversial issues decided

and also to make plans for the initiation of a campaign year.

There's a tendency in our country to want to move that campaign date earlier and earlier. I believe that what I have decided on a date is compatible with past history. Also, of course, there is a limit to how late one can wait. There are some States that require filing, I believe, around the middle of December.

And so, I think that's late enough to give me a chance to do what I can with this year's Congress; not too late to miss any filing dates if I decide to meet them.

ROSALYNN CARTER

Q. Mr. President, fairly or unfairly, the polls suggest that one of your major political problems is a perceived lack of leadership. At the same time, Mrs. Carter is very visible these days. She's traveling and speaking on your behalf. She's almost on television as much as you are these days.

Do you think it's possible that her high profile in some strange way might ironically exacerbate your political problem? And secondly, is it true that some of your advisers believe that she has too high a public profile and would like her to be a little less visible?

THE PRESIDENT. I believe that if you would compare my wife's schedule now with what it was, say, a year ago, it wouldn't be materially different. The difference is that now the press is paying attention to where my wife goes and what she says.

Rosalynn has always been very close to me personally as well as to consult with me on matters of interest to me and to her. In some areas of public life, she plays a very strong role. She's interested in mental health, which he has been since even before I became Governor of Georgia.

She's always been extremely interested in the problems of older Americans, and this has been a historic interest for her. And I think since this last year, perhaps, she's especially been encouraging people within communities to act on their own initiative to work together to correct local problems, not to wait for the Federal Government or the State or local government to do everything for them. And those things are not incompatible.

In addition, she is a very effective political campaigner. In 1976 and also in 1970, 1966, 1962, when I've had my other campaigns, Rosalynn has always played a substantial role. And I would imagine that she would continue that as long as she and I share a partnership and I'm in politics.

But I don't think her profile is too high. She's very knowledgeable; she is sensitive about American people's beliefs and feelings. She would never abuse her role as a wife or even the wife of a President. I have confidence that she will do the right thing.

KAMPUCHEA

Q. Mr. President, by all accounts, it appears that in the coming months, a million or more people could die in Cambodia of starvation. I know that you talked about this with the Pope the other day. What, if anything, can this Government do in combination with other groups?

THE PRESIDENT. We've been encouraging the humanitarian granting of aid, particularly food aid, to the people of Cambodia, hundreds of thousands of whom, maybe millions of whom are starving. We are trying to work out with the uncertain leaders of that country—uncertain because it's contested through war—a mechanism by which the United Nations primarily, the Red Cross, and UNICEF

could get food into those people who are within Cambodia.

There's also a legal problem in refugee funds, because it hasn't yet been determined legally if a person who hasn't left the country is still identifiable as a refugee. The fact that the country's divided by war creates a complication.

But we are ready and eager to join in with other countries to provide humanitarian aid to all the people of Cambodia who are starving, and we will move on that without any further delay as soon as it's possible to join other countries in this effort.

VICE PRESIDENT MONDALE

Q. Mr. President, have you had any second thoughts as to who your running mate would be? Will it definitely be Walter Mondale?

THE PRESIDENT. Fritz Mondale and I have a very good partnership, and I have no plans whatsoever to change it.

ARMS LEVELS IN EUROPE

Q. Mr. President, going back to your comments about competition with the Soviet Union with regard to arms, would you support NATO deployment of the Pershing missile to counter the SS-20? And if I could add another question there, do you have any reaction to President Brezhnev's conditional offer, too, on arms reduction in Central Europe?

THE PRESIDENT. Our allies and we are carefully assessing the significance of President Brezhnev's statement. However, I'd like to point out that what he's offering in effect is to continue their own rate of modernization as it has been, provided we don't modernize at all.

They have had an actual reduction in launchers the last few years. They've been replacing the old SS-4's and SS-5's with

the SS-20, not on a one-for-one basis, but the SS-20 has three warheads, the old missiles only had one warhead. The SS-20 has a much greater range. It can reach our Western Allies' countries as a target even if it's located in the central part of Russia. It's three to six times as accurate as the old missiles which it replaced. And in addition to that, it's mobile; that is, it can't be located specifically and destroyed with a preemptive strike if that should become a desire on the part of allies. They also have replaced older airplanes with the Backfire bomber.

So, it's not quite as constructive a proposal as at first blush it seems to be. I think it's an effort designed to disarm the willingness or eagerness of our allies adequately to defend themselves.

In my judgment, the decision ought to be made to modernize the Western Allies' military strength and then negotiate with full commitment and determination mutually to lower armaments on both sides—the Warsaw Pact and the NATO countries—so that we can retain equivalency of military strength, equity of military strength, and have a lower overall level of armaments. This is what we hope to achieve.

I might point out that Chancellor Schmidt said, I believe yesterday or day before, that a prerequisite to a decision by our NATO Allies to take these steps, which he considers to be vital for the security of NATO, is the passage of SALT II.

So, if we can be successful in controlling existing strategic Soviet and United States atomic weapons through SALT II, then we'll move in the next step to reducing the nuclear weapons which don't have intercontinental range. And along with that, we'll continue with our mutual and balanced force reduction effort to reduce conventional arms.

It's an interesting proposal; it's one that might show promise. We're assessing it carefully, but it's not as great a step as would ordinarily be judged at first.

HAMILTON JORDAN

Q. Mr. President, do you have any intention at all of asking Hamilton Jordan to step down as Chief of Staff if a special prosecutor is named? And secondly, is there any thought in your mind, sir, that his departure might at all benefit your Presidency and your chances for reelection, or would they hurt them?

THE PRESIDENT. I'd like to remind you, first of all, that the President is the chief law enforcement officer of the land. And I don't think it would be appropriate for me to comment on guilt or innocence of anyone. Secondly, I'd like to point out that the appointment of a special prosecutor has no insinuation in it at all that the person investigated is guilty.

I believe it would be better for me not to go further than that, because I would ordinarily wait until the Attorney General made a report to me and then seek his advice on what the proprieties would be about my own public statements. I think, though, I've described my position adequately to answer your question.

PALESTINE LIBERATION ORGANIZATION

Q. Mr. President, a question on the Middle East. Do you agree with those such as former Ambassador Andrew Young and George Ball and others who say that it is now time to do away with the restrictions put on our foreign policy by Henry Kissinger and open up a dialog with the Palestinians and the PLO?

THE PRESIDENT. No, I do not. We will not negotiate with the PLO. We will not recognize the PLO until after the PLO

recognizes Israel's right to exist and endorses United Nations Resolution 242 as a basis for Middle East peace.

FRANK CORMIER [Associated Press]. Thank you, Mr. President.

NOTE: President Carter's fifty-second news conference began at 3:30 p.m. in Room 450 of the Old Executive Office Building. It was broadcast live on radio and television.

you and in wishing you all success as you return to Wisconsin.

Rosalynn and I especially appreciate the advocacy of efficient and humane government that we know we can count on from Pat and Jean Lucey.

Sincerely,

JIMMY CARTER

[The Honorable Patrick J. Lucey, American Ambassador, Mexico City]

United States Ambassador to Mexico

*Exchange of Letters on the Resignation of
Patrick J. Lucey. October 9, 1979*

Dear Pat,

With deep regret I accept your resignation as Ambassador to Mexico as of November 1, 1979.

During your years in Mexico you brought political skills and personal stature to one of America's most important and difficult diplomatic assignments. These years were but the latest example of your dedication and commitment to public service.

Your leadership has contributed significantly to a new frankness and balance in our cooperation with Mexico. The recently concluded visit of President López Portillo was a reminder of how much we have accomplished. Formal agreements on natural gas sales, prisoner exchanges, civil aviation, and improvements in the mechanisms through which we manage major United States-Mexican issues have advanced the vision of our relationship with Mexico that you and I have shared since the outset of my Administration.

Since the time that we began our service as Governors together, I have valued the courage, effectiveness, and good judgment that you bring to public policy. The Secretary of State joins me in thanking

October 8, 1979

Dear Mr. President:

For almost two and a half years now, I have served as this country's ambassador to Mexico. It has been a stimulating experience for me, and I hope it has been constructive for the policies and the peoples of both countries. I have enjoyed my work here and my working relationship with you and Secretary of State Vance. However, I now have decided to resign from this position, effective November 1, 1979, and to return to Wisconsin.

I leave not with regret but with a sense of satisfaction because it is clear that Mexico and the United States have accomplished a great deal together since your Administration took office. The strength and the importance of the relationship between the two countries has perhaps never been more apparent than over the last month. As the successful meetings between you and President López Portillo just a few days ago demonstrated, it is a relationship based on mutual respect and appreciation. In addition, the new intergovernmental agreement on the guidelines for a natural gas contract has been well received in both countries. That agreement has more than symbolic importance—it offers real potential for helping us solve our energy problems. But these are only the most recent achievements.

In 1977, Mexico and the United States entered into the Prisoner Transfer Treaty that, since its ratification, has permitted more than 400 young Americans to complete prison sentences in their own country. While Vice-President Mondale was in Mexico last year, he signed the most comprehensive commercial aviation agreement ever negotiated between any two countries, and the impact of this agreement on tourism in the United States as well as in Mexico has been dramatic. Moreover, the joint decision to expand and strengthen the Consultative Mechanism, announced on your trip to Mexico City earlier this year, has generated negotiations that promise major bilateral agreements in many other areas.

There have been significant, if less obvious, improvements in this country's perception of Mexico and in this government's ability to help shape a relationship that is productive for both countries. Through the presidential policy review process, the efforts of the Department of State, and our emphasis on working with the Congress, there is a greater public and governmental awareness of our relationship with Mexico and the impact that seemingly unrelated domestic and foreign policies can have here. Bob Krueger in the new position of Ambassador-at-Large will provide a great service to both countries as he continues to expand the interdepartmental coordination and cooperation that already have begun.

In Mexico City, the U.S. Embassy itself, the nation's largest diplomatic mission, has played an increasing role in the formation and conduct of our policies. For example, the Embassy was directly involved in the formation and early deliberations of the Askew Committee. While massive undocumented immigration will confront our two countries for

many years, that committee will provide constructive new proposals in this difficult area. With the State Department's encouragement and cooperation and the creative application of zero based budgeting, we now have a lean, more efficient and highly professional staff at the Embassy and its constituent posts. I will miss working with the people here, but my successor will find his or her job less difficult because of their presence and their dedication.

There is a common theme in much of what has happened over the last few years, Mr. President. It is the gradual recognition that Mexico seeks no favors from us, no "special" relationship, but that, instead, Mexico seeks our friendship as the mature, responsible, independent, and rapidly-developing nation that it has become. That friendship will continue to reward both countries in the years ahead. And it is that friendship that will enable Mexico and the United States to resolve the difficult, persistent and shared problems that remain.

I submit my resignation to you only after a great deal of deliberation. I do believe, however, that after two and a half years in Mexico City, it is time to return to Wisconsin where I began my public service more than 30 years ago, and I believe that this is a logical and appropriate time to do so. Jean and I very much appreciate the personal kindness that you and Rosalynn have shown us and the public trust that you have placed in us. Thank you.

With warm regards,

PATRICK J. LUCEY

Patrick J. Lucey

United States Ambassador

[Hon. Jimmy Carter, The White House, 1600 Pennsylvania Avenue, Washington, D.C.]

Federal Civilian and Military Pay Increases

Executive Order 12165. October 9, 1979

ADJUSTMENTS OF CERTAIN RATES OF PAY AND ALLOWANCES

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

1-1. *Adjusted Rates of Pay and Allowances.*

1-101. *Statutory Pay Systems.* Pursuant to the provisions of subchapter I of Chapter 53 of Title 5 of the United States Code, the rates of basic pay and salaries are adjusted, as set forth at the schedules attached hereto and made a part hereof, for the following statutory pay systems:

(a) The General Schedule (5 U.S.C. 5332(a)) at Schedule 1;

(b) the schedules for the Foreign Service (22 U.S.C. 867 and 870(a)) at Schedule 2;

(c) the schedules for the Department of Medicine and Surgery, Veterans Administration (38 U.S.C. 4107) at Schedule 3; and

(d) the rates of basic pay for the Senior Executive Service (5 U.S.C. 5382) at Schedule 4.

1-102. *Pay and Allowances for Members of the Uniformed Services.* Pursuant to the provisions of Section 1009 of Title 37 of the United States Code, the rates of monthly basic pay (37 U.S.C. 203(a) and (c)), the rates of basic allowances for subsistence (37 U.S.C. 402), and the rates of basic allowances for quarters (37 U.S.C. 403(a)) are adjusted, as set forth at Schedule 5 attached hereto and made a part hereof, for members of the uniformed services.

1-103. *Executive Salaries.* The Executive Salary Cost of Living Adjustment Act (89 Stat. 419, 28 U.S.C. 461) provides for adjustments in the rates of pay and salaries as set forth at the schedules attached hereto and made a part hereof, for the following:

(a) The Vice President (3 U.S.C. 104) and the Executive Schedule (5 U.S.C. 5312-5316) at Schedule 6; and

(b) Congressional Salaries (2 U.S.C. 31) at Schedule 7.

1-2. *General Provisions*

1-201. *Effective Date.* The adjustments in rates of monthly basic pay and allowances for subsistence and quarters for members of the uniformed services shall be effective on October 1, 1979. All other adjustments of salary or pay shall be effective on the first day of the first applicable pay period beginning on or after October 1, 1979.

1-202. *Superseded Orders.* Executive Order No. 12087 of October 7, 1978, is superseded.

JIMMY CARTER

The White House,
October 9, 1979.

[Filed with the Office of the Federal Register,
10:33 a.m., October 10, 1979]

NOTE: The schedules are printed in the FEDERAL REGISTER of October 11, 1979.

The Executive order was announced on October 10.

United States Ambassador to Zaire

**Nomination of Robert B. Oakley.
October 10, 1979**

The President today announced that he will nominate Robert B. Oakley, of Shreveport, La., to be Ambassador Ex-

traordinary and Plenipotentiary of the United States to the Republic of Zaire. He would replace Walter Cutler, who is being reassigned.

Oakley has been Deputy Assistant Secretary of State for East Asian and Pacific Affairs since 1977.

He was born March 12, 1931, in Dallas, Tex. He received a B.A. from Princeton University in 1952. He served in the U.S. Navy from 1952 to 1955.

Oakley joined the Foreign Service in 1957 and was posted in Khartoum, Abidjan, Saigon, Paris, at the United Nations, and at the State Department. From 1971 to 1974, he was political officer in Beirut, and in 1974 he was an international relations officer at the State Department.

From 1974 to 1977, Oakley was assigned to the National Security Council.

United States Ambassador to Mali

*Nomination of Anne Forrester Holloway.
October 10, 1979*

The President today announced that he will nominate Anne Forrester Holloway, of Washington, D.C., to be Ambassador Extraordinary and Plenipotentiary of the United States to the Republic of Mali. She would replace Patricia M. Byrne, who is being transferred to another post.

Holloway has been special assistant and director of the office of the Ambassador to the United Nations since 1977.

She was born June 2, 1941, in Philadelphia, Pa. She received a B.A. from Bennington College in 1963, an M.A. from Howard University in 1968, and a Ph. D. from Antioch/Union Graduate School in 1975.

From 1963 to 1966, she was a history teacher at Northfield School, East Northfield, Mass. She was a lecturer at Howard University in the African studies program in 1968-69 and was director of Drum and Spear Press, a publishing house, from 1969 to 1970.

In 1970-71 Holloway was visiting assistant professor in the black and African studies program at the State University of New York at Buffalo. From 1971 to 1972, she was associate director for legislative affairs of the Southern Christian Leadership Conference.

From 1972 to 1975, Holloway was executive director of the Black Student Fund. From 1975 to 1977, she was legislative assistant for foreign affairs to then-Congressman Andrew Young.

Federal Magistrate Act of 1979

*Statement on Signing S. 237 Into Law.
October 10, 1979*

I have today signed the Federal Magistrate Act of 1979. This act will expand the jurisdiction of United States magistrates in both civil and criminal cases, and will ensure that magistrates are appointed on merit. It will also improve the capabilities and efficiency of the Federal court system, while at the same time preserving parties' rights and reducing the expense of litigation.

I congratulate Congressmen Kastensmeier, Rodino, and Railsback, and Senators DeConcini, Kennedy, and Thurmond for their leadership on this bill. Without their able efforts its passage would not have been possible.

On February 27 of this year, I sent a message to Congress in which I supported six judicial reform measures to increase the efficiency, cut the cost, and maintain

the integrity of the Federal court system. The Federal Magistrate Act of 1979 is the first of these six measures to have passed Congress. I ask the Congress to act promptly on the remaining measures, which will benefit our Federal court system and the public.

NOTE: As enacted, S. 237 is Public Law 96-82, approved October 10.

Office of Federal Procurement Policy Act Amendments of 1979

Statement on Signing S. 756 Into Law.
October 10, 1979

I have this day signed S. 756, a bill which authorizes appropriations for the Office of Federal Procurement Policy for fiscal years 1980 through 1983.

In addition to its other provisions, the legislation clarifies the authority of the Administrator for Federal Procurement Policy to issue policy directives for improving the supply systems and processes of the executive branch. The legislation also calls for the development of a proposal for a Uniform Procurement System to be submitted to the Congress within 1 year. This will serve as successor to the National Supply System project, which I approved August 9, 1979.

NOTE: As enacted, S. 756 is Public Law 96-83, approved October 10.

United States-Denmark Fishery Agreement

Message to the Congress Transmitting the Agreement. October 10, 1979

To the Congress of the United States:

In accordance with the Fishery Con-

servation and Management Act of 1976 (Public Law 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and Denmark and the Faroe Islands, signed at Washington on September 5, 1979.

This agreement is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this agreement at an early date. Since 60 calendar days of continuous session, as required by the legislation, may not be available, I recommend that the Congress consider issuance of a joint resolution to bring this agreement into force.

JIMMY CARTER

The White House,
October 10, 1979.

United States Travel Service Appropriations Bill

Statement on Signing S. 233 Into Law.
October 10, 1979

I have decided to sign S. 233, which authorizes appropriations for the United States Travel Service.

At the beginning of the year I recommended that the Service be eliminated, for its function can and should be performed by the private sector. I have not changed my view.

I have signed S. 233, however, because the appropriations for the Travel Service have already been enacted as part of a separate bill. I will work to restructure the Federal Government's travel program in order to conform its operation with what I believe to be an appropriate Federal role in tourism promotion.

NOTE: As enacted, S. 233 is Public Law 96-85, approved October 10.

Department of Health, Education, and Welfare

*Nomination of Nathan J. Stark To Be
Under Secretary. October 10, 1979*

The President today announced that he will nominate Nathan J. Stark, of Pittsburgh, Pa., to be Under Secretary of Health, Education, and Welfare. He would replace Hale Champion, resigned.

Stark is vice chancellor for health professions at the University of Pittsburgh and president of the University Health Center of Pittsburgh.

He was born November 9, 1920, in Minneapolis, Minn. He received a B.S. from the U.S. Merchant Marine Academy in 1943 and a J.D. from Chicago Kent College of Law in 1947. He served in the U.S. Merchant Marine from 1942 to 1945.

From 1953 to 1954, Stark practiced law, and from 1954 to 1959, he was vice president of the Rival Manufacturing Co. From 1959 to 1974, he was senior vice president of Hallmark Cards, Inc. From 1971 to 1974, he was chairman of the board and chief executive of Crown Center Redevelopment Corp. He has been at the University of Pittsburgh since 1974.

Stark was treasurer of the Kansas City Area Hospital Association from 1950 to 1967 and chairman of the Kansas City Metropolitan Hospital Planning Council from 1957 to 1967.

Stark has served on a number of national panels concerned with health services, including the Secretary of HEW's Task Force on Medicaid and Related Programs. He has been a consultant to several university medical schools and other organizations.

Kirtland Air Force Base, New Mexico

Remarks on Arrival. October 10, 1979

New Mexico is indeed one of the most beautiful places on Earth, and I am very glad to be back here with you.

New Mexico is not only beautiful, but you have superb leaders in Bruce King, Mayor David Rusk, and others who have served and are serving with them, among people who are also so friendly that I'll never forget the first time I came here.

Bruce was talking about the 3 inches of snow that I just left in Washington. The first time I came to Albuquerque, I was going with Alice King to the State Fair, and it rained 3 inches on us and she and I had to swim out of the State Fairgrounds' gates. That was all the rain you got that year in 1974. It came on me in one afternoon.

This is an airport full of New Mexico hospitality. And I'm here to meet with the Governors of the Western States, with Bruce King as the host, to talk about some issues that are very important to everyone here. We're going to talk about a way to preserve the quality of life of the people who live in this beautiful State, not only now but throughout eternity.

I believe in the preservation of the beauty of your State, and I believe in the purity of air and the quality of water. And I'm convinced that this Nation, working with you here, can have prosperity, stable but steady economic growth, a cooperation between local and State and Federal employees and leaders and people and, at the same time, tap the tremendous offerings that you have for yourselves and for the rest of the country.

This is the land of opportunity. You've

been blessed by God not only with beauty but with great human and natural resources, with oil, with coal, with gas, with uranium, and with the greatest of all, the Sun. And how this great treasure is utilized by people now and in the future will be primarily up to you.

Your choice of wise leaders, your working closely with them, your demand that we maintain the highest possible standards of service and accountability to you will determine whether our decisions are wise or ill-considered. We're determined to make the wise decisions. And I'm glad that you've got forceful leaders like Bruce King that will speak up when there is a danger to what you hold to be so precious.

Our country faces difficult challenges, tough problems, confusing issues, hard questions to answer—but we've always had within us a strength and the courage and the unity when it was needed to meet any challenge, any threat to our country successfully.

We now face a threat to our own Nation's security that's very serious and about which all of you should be aware, and that is the threat of overdependence on imported oil for our country. We now import half the oil we use, and along with all that oil that we import, we also import inflation and we import unemployment.

Next year we expect to spend on foreign oil \$70 billion—money that we could use here in our own country to give us a better life, to correct the defects in our society, and to let us have confidence and vision for the future. We must finally address this difficult issue, and that will be the main subject of discussion tonight when I meet for 2 or 3 hours with the Governors representing the Western States.

I have no doubt that we can meet this challenge successfully if our country is united and if we don't forget our great heritage and the great promise of the future.

I'm very proud also that we have common goals and common purposes and common standards, ethics, morality, religious beliefs, of which we can be truly proud.

Many things change in a modern technological world. Sometimes those changes are so fast, so rapid that it disturbs our lives. But this past week with the visit of Pope John Paul, we were reminded vividly of things that don't change—love, honesty, families caring for one another—these things don't change. And I think the tremendous reception that we gave to this distinguished and beloved visitor is a true picture of the character of the American people.

We've got a wonderful country because of you, because of our people, and because of the character that we have always exhibited in a moment of test or trial. And I hope that you will stand united and never lower your standards and never forget that our Nation is, our governments are what you are and what you demand. Together, all of us, we can make the greatest nation on Earth even greater of the character that we've always exhibited I pray for. And I know you join with me in this hope and this dream and this expectation.

Thank you very much. God bless you all.

NOTE: The President spoke at 6:23 p.m.

Following his remarks, the President went to the Four Seasons Hotel in Albuquerque to attend a meeting of the Western Governors' Policy Office.

Albuquerque, New Mexico

*Remarks at the National Association of Development Organizations' Dinner.
October 10, 1979*

Jack Watson just came up and gave me some advice about my opening statement. He suggested that I apologize for substituting for him as your speaker this evening. *[Laughter]* As a matter of fact, if there's one group with whom I feel at home, it would be those of you who've been involved in economic development throughout our country in the last number of years.

One of the first things I did as a young man involved in public service was to organize an eight-county area planning and development commission. I did not have an executive director. I had to act as that myself. *[Laughter]* My eight counties suffered severely from it until I finally got a professional. But it was a turning point in my life.

We had 30 towns and small villages that I served, and we began to bridge the chasm that existed even in front of the county line, and to let people who were competent and eager and filled with the true spirit of America begin to assess the advantages that God had given them, and to make plans for the future that would give their children and grandchildren a better life.

I felt that I was a part of the growth of America. And I felt responsible for the retention of its qualities, and I recognized the rapid changes that took place in the lives of the people that I was trying to serve, and I felt responsible for them, and vice versa. And to lead the life which many of you do as professionals in serving others in this way is a characteristic and a commitment which I admire very deeply.

I graduated from the area planning

and development commission to the President of the United States. But I haven't forgotten what I've learned, and as Vernon would know—Vernon Martin was a good friend of mine, even in those days—as he would know, the responsibilities which fall on the shoulders of a Governor or a President are very similar to the responsibilities that fall on the shoulders of those assembled here in this meeting and those whom you represent throughout the country: how to correlate conflicting interests; how to preserve environmental quality and at the same time take advantages of economic growth; how to make sure that each person, no matter how large or small a status in life is occupied, can feel part of a community and not estranged from it; how government can be made effective; how the delivery of services to a human being in need can be as effective as the original vision was at the inception of a law; how to deal with rapidly changing, sociological interrelationships to let people who are different live in harmony with one another; how to realize limitations on our lives, limitations of energy, limitations of wealth, limitations of health care, limitations of housing, transportation—all those limits that they have—how to either accommodate them and make the best of them if they're inevitable or to eliminate them or minimize them if something can be done about them.

You live truly challenging lives, and as we evolve programs for economic development or local public works for dealing with housing, transportation, education, welfare, health, I need your partnership in making our great country even greater.

I met your newly elected president, President Kuhn, who will take office, I think, in January. He'll have another exciting challenge before him, and I wish him well. And I hope that in the next

number of months, as we deal with the problems that confront us all, particularly in evolving an energy policy for our Nation, that we will keep in mind the common goals and the common purposes that bind us together.

I just spent a little more than 2 hours with the Governors of the Western States trying to study the special problems of this beautiful part of the Earth and how many of our energy needs can be met from the oil and natural gas and uranium and coal and solar, opportunities that exist here, and how on a permanent basis we can meet the needs of our country in the future.

Each region is different, each county is different, each tiny part of the Earth is different from the others, and I think you have a special insight into how these tiny portions of America can be combined together to make the greatest nation on Earth even greater in the future.

I'm pleased to be with you and I'm honored. I met Aliceann Fritchler Wholberuck earlier tonight. You have an excellent executive secretary. She's worked, as you know, with the county organizations in the past, and I think that she will be a good one to bridge whatever gap might still remain between those of you who are responsible for development of the finest things of life and those who've been elected to serve at the local level of government, which by far is the most important level.

I hope that you will not ever be timid in letting your views be known to me and to the members of my administration with whom you work, who want to do a good job for you, and I know you want to do a good job for the same nation that I serve.

Thank you for letting me interrupt your meeting. God bless you, everyone.

NOTE: The President spoke at 9:30 p.m. in the International Ballroom at the Albuquerque Hilton Inn.

Water Resources

Statement by the President. October 10, 1979

State systems for allocating and managing water resources have evolved over decades in the Western United States. These systems recognize the high value and relative scarcity of water. Their continuation is essential to stability and equity in the West. With the exception of unique Federal and Indian water rights, the States must allocate their water resources in the manner best suited to themselves.

I have proposed a major domestic energy production effort which we as a nation must undertake to reduce our reliance on imported oil. We hope to establish an energy mobilization board to ensure that decisionmaking on energy projects does not get tied up in redtape. At the same time, I strongly believe that we must preserve the essential and historic role of the States in the process of allocating water among competing needs. I have and will continue to support legislative language to make it clear that federally supported energy development should be accomplished without preemption or change of State water laws, rights, or responsibilities.

With proper planning and sensitivity to all of the human and natural resource problems associated with energy projects, we can produce the energy we need without jeopardizing agricultural and community water use. We can also maintain, as we must, the high quality of the Western environment.

We must respect the rights and responsibilities of our State governments—and when the issue is priorities of water use in a State, the State must and does have the ability to say no through existing State water allocation systems. This right must

and will be protected in the energy proposals now pending before the Congress.

NOTE: The statement was released at Albuquerque, N. Mex.

Interview With the President

*Remarks and a Question-and-Answer Session With Editors and Broadcasters.
October 10, 1979*

THE PRESIDENT. We've had more than [almost]¹ 50 sessions with leading news executives and news men and women from outside Washington since I've been President, an average of every 2 weeks. I think between 1,500 and 2,000 have come here for private meetings with my staff and with me and, on occasion, with my wife and some members of the Cabinet.

It's been very helpful to us, and what I ordinarily do is just outline some of the important concerns or projects that are ongoing that are my direct responsibility and then spend the time we have together answering your questions.

ADMINISTRATION POLICIES

We had a leadership breakfast this morning with the Democrats from the House and Senate. I do this twice a month. Once a month I have a leadership breakfast with the Republican leaders of the House and Senate. This morning we discussed the top priority of the year, which is to get SALT II ratified; secondly, to get the energy package completed. We got about 65 or 70 percent of it last year. This year we're dealing with the subject of oil. And then the third thing is to deal directly with inflation, primarily the hospital cost containment.

There are obviously many other pieces of legislation that are important, concern-

ing appropriations, budget, and reduction of regulations, and so forth. But those are the three top priorities—SALT, energy, and hospital cost containment.

We've had a good record with the Congress since I've been in office. The percentage of important proposals that I've made to the Congress which has been passed has been as high as any recent administration in the first 3 years. President Johnson's term is probably the only time that there was a better percentage of success. And some of the things we haven't passed in the years gone by, months gone by, like the portions of the energy bill, we're coming back again and again until we get them passed by the Congress.

I have in addition to legislative responsibilities those of foreign policy and defense, and I believe we've had a good session so far in the General Assembly of the United Nations.

Secretary Vance has been up there almost 2 full weeks, which gives him the chance to participate in the debates, emphasize particular aspects of foreign policy, like peace in Lebanon, and to have literally dozens of private sessions with the heads of state or foreign ministers of countries around the world. The United Nations environment is a very good forum through which for 15 minutes or for several hours the Secretary of State can deal with foreign leaders in a convenient fashion and also a fairly private fashion.

I have been up there once for 2 or 3 days and, I think in those 2 or 3 days, met 24 heads of state who came there, some to meet with me, others on routine business.

We have, in addition, ongoing negotiations on Namibia, on Rhodesia, on the Middle East, and constant relations on a daily basis with our allies around the world—military, politics, economics—and are trying to alleviate suffering among refugees and starving people and in hu-

¹ Printed in the transcript.

manitarian things, which is part of the greatness of our country.

I would be glad to answer any questions that you might have on specific issues.

QUESTIONS

MEETINGS WITH THE PRESS

Q. Mr. President, I appreciate it—thank you.

Mr. President, while this type of format with visiting editors may be somewhat helpful to you and somewhat heady for the editors who are here, it does not allow for the aggressive interrogation that characterizes your press conferences with the reporters assigned to Washington.

THE PRESIDENT. Please be aggressive. *[Laughter]*

Q. Okay. Nor does it result in the widespread dissemination of your views such as the press conferences do. For instance, yesterday's press conference was at least two front-page stories on many of our national newspapers. Yet, your press conference yesterday was the first one since July 25, and there are indications that you have abandoned your campaign pledge to hold two per week—or two per month, I mean—sorry.

Do you consider this format to be an adequate substitution for those press conferences?

THE PRESIDENT. No. I've been in office now, I think 32 or 33 months. I've had over 100 [50]² press conferences—I think 52 of them with the White House press corps exclusively; the others on a regional basis, either in Atlanta or Miami or Des Moines or Hartford, Connecticut, or wherever. At those regional press conferences I ordinarily give the White House correspondents half the questions. If I'm in Seattle, Washington, I'll ask the Seattle newspeople, to give them a chance for one

question, then I give the White House correspondents who travel with me the second question, and alternate back and forth. So, this is an average of press conferences, more than three a month, about three a month.

In addition, I've had 12 or 14—I've forgotten the exact figure—townhall meetings, where I have anywhere from a thousand to 3,000 people and—just in arbitrary ways, without my having any knowledge or influence over the question—answer questions from the public. I'll have my second telephone call-in show this Saturday. And, as I said, this is, I think, my 51st or 52d meeting with out-of-town editors.* I would guess that in its totality, my relationship with the public has been more than any other previous President.

My own belief is that this mixture is better than to exclusively have just a relationship with the White House press corps, but that's a judgment that I myself make. And when I decided to cut down on the twice-per-month relationship with the White House press corps, that's when I decided to go out once a week or once every 2 weeks, either for a regional press conference or for a townhall meeting.

There's a much wider diversity of questions. I think they are much more substantive in nature on the average, and they also give me an insight into parochial questions, you know, what is important to the people of the Northwestern part of the United States or to the Northeast or the Deep South. And I don't think there's any robbing away of interest in even international affairs. If I go to a press conference in Iowa, I get about a third of the questions on international matters.

* The President has met with such editors' groups in Washington 49 times and in Florida once. *[Printed in the transcript.]*

² Printed in the transcript.

So, I think this is a good balance, and I've not tried to withdraw into a shell. I think I've been more open maybe the last few months than even before.

U.S. POLICY TOWARDS ISRAEL

Q. Mr. President, Simon Weber, Jewish Daily Forward, New York. As an ethnic newspaper, we have a special interest in Israel—

THE PRESIDENT. So do I.

Q. —and of course we are concerned with all the problems of the United States. But there is a feeling in the Jewish community your administration is kind of pressing hard on Israel, in the case of Lebanon, in the case of the Palestinians. Would you explain that?

THE PRESIDENT. Yes, I will. I think I would prefer to let Foreign Minister Dayan speak for me. I'm sure you're familiar with the comment that he made.

Q. Yes.

THE PRESIDENT. And he has a good clear insight into the relationships, both public and in the private negotiations between Israel and the United States. I could not have said it better. Neither could Jody Powell have said it better.

We have opened up public discussion and public debate and private negotiation on matters that were previously avoided because they are controversial. But I think it's well to remember that about a year ago, we had the Camp David accords signed, not just by me, not just by President Sadat, but by me, Begin, and Sadat. And then about 6 months ago, we had the Mideast peace treaty signed and approved by all three of us. The progress has been sometimes faltering, sometimes epitomized by dispute, sometimes by allegations that the United States has been unfair to Israel or unfair to the Arab countries or unfair to Egypt or unfair to the Palestinians or unfair to Lebanon.

I think we've had a well-balanced approach. We have, as a primary concern—primary concern—the security of Israel, the existence of Israel, leading toward peace for the people who live in Israel with not just Egypt but all their neighbors. That's our first concern. And along with that, of course, is to seek for a comprehensive agreement between Israel and all her neighbors. I think we've had good progress so far.

We believe that there can be no permanent peace without a resolution of the Palestinian question in all its aspects, to use the language that Prime Minister Begin himself adopted in the Camp David accords. And I think as far as Lebanon is concerned, we deplore violence in the northern part of Israel and the southern part of Lebanon, no matter where it originates. We abhor the use of terrorism by some of the Palestinians to effectuate their cause. We think this is a sad and deplorable mistake. And we hope to see a relationship between Israel and the people of Lebanon, including Palestinians, which would lead to a peaceful relationship.

But we don't put any pressure on Israel. It would be counterproductive if we did. And I believe that Prime Minister Begin would join in with Foreign Minister Dayan in certifying that our approach has been responsible and fair.

I can't deny that there have been occasions when the Israelis have felt that we took a biased position, and I can't deny either that there have been times when the Arab countries feel that our position is biased toward Israel. But I describe to you the same order of priorities that I would describe to Sadat: first of all, the existence and security of Israel; secondly, the effectuation of peace between Israel and her neighbors, all her neighbors; and third, a recognition that a resolution of the Pales-

tinian question has to be a prerequisite to a permanent peace in the Mideast.

FUEL SUPPLIES

Q. Mr. President, Doug Breisch from KDTH Radio in Dubuque. People out in the sticks are having a hard time believing anybody on this energy matter. We've heard that there's plenty of middle distillates available for the home heating season coming up and for the harvest season. And harvest season is upon us, and the Energy Department says we've got plenty of middle distillates; they're all at the refineries so that we can keep track of how much we've got. And the mechanism is ready to get that out to the farmer, but we want to keep it at the refinery as long as possible so we know how much we have.

What is going on? What is happening in order to get this fuel out to the farmer? Are they going to have enough for harvest season? Are we going to have enough to heat our homes for winter?

THE PRESIDENT. We lost about 100 million barrels of oil that we would ordinarily have acquired the first few months of this year because of the Iranian revolution and the cessation of Iranian shipments to us. Ordinarily they now produce about 4 million barrels a day, and that production was interrupted completely. Because of that, we had potential shortage of tractor fuel during the planting season, which we weathered successfully. We did have some shortages of gasoline on the highways in some areas of our country, as you well know, and we had the threat of a severe shortage of home heating fuel for the Northeast, the entire northern part of our country, during this fall.

We have replenished our stocks of home heating fuel. Our target was to reach 240 million barrels on hand in primary stocks

during October. We will meet that target. Some predicted at first that we would not. Now with that supply assured, we are shifting the emphasis on the middle distillates toward diesel fuel for both trucks and tractors, and my prediction is that we will have adequate supplies for the harvest season.

The sum total of all the discussion, however, is for us to have in place a comprehensive national energy policy that is predictable and where we are not so heavily dependent on imported oil, which can be interrupted, as you know, at any time and where the prices have increased inordinately, lately and as far back as 1973. Last year we got about 65 percent of the energy proposals that we put to the Congress. We didn't get anything on oil. This year, with the windfall profits tax, the security corporation, the production board, and with the rationing standby plan, we'll have a fairly good proposal.

The other thing that's important, though, is to meet the needs of the poor people, who are being so heavily impacted by the rapidly increasing prices of home heating oil, which is compatible with all the energy prices. And we have asked the Congress already for \$400 million to take care of those needs, plus \$1.2 million more that would be available, increasing to a total of 2.4 million in the next fiscal year. I hope the Congress will act expeditiously on this.

But I can predict to you that we'll have an adequate supply, barring some further interruption. But the key to it is conservation and an increase in the production in our own country of energy supplies. All of our thrust for the last 2½ years has been oriented toward that goal.

I think we had better move on just to give the other folks a chance.

WAGE AND PRICE GUIDELINES

Q. I'm Scott Goodfellow from WJZ, Baltimore. When might we anticipate some revision in the wage-price guideline? I'm especially interested in the upward revision of the wage structure, however slight, if at all.

THE PRESIDENT. We're setting up a pay board, pay advisory board, headed by John Dunlop, who's the chairman, and I have not yet appointed the other members of the board. We're consulting with both business and labor to get their advice to me before I make the final selections on the pay advisory board. We have not changed the standard established by the Council on Wage and Price Stability earlier this year. That's the basis for our present wage policy.

When the pay policy board, advisory board, goes into effect and begins to function, they have the directive or will have, from me, to make recommendations on how to administer pay policy or wage policy. The final judgment will be made by the Chairman of the Council on Wage and Price Stability. But the presumption would be that the advice of this pay board would have a heavy weight, both with me and with COWPS, Council on Wage and Price Stability.

The price standards have already been set, beginning on the 1st of October, because corporations cannot make their price changes retroactive. Once you've sold something, you can't go back and charge a higher price. It's very difficult to give refunds. And they wanted to have before this quarter again the price standards which have been stable and haven't changed.

I might point out that in spite of some degree of flexibility derived from the difference in the cost-of-living adjustment,

the pay standards will be maintained on an equitable and sustained basis without any abrupt changes. They've had excellent results. Among the wage earners, the wage increases have been less in 1979 in the first 9 months than they were in 1978, which is an accomplishment not yet recognized by the press.

Secondly, among items that have been under the price standards, the rate of increase of the prices for those items has been one-half the rate of inflation for other items that we cannot control.

So, we've had good results so far. The new national accord that has been worked out with labor and with the help of business, I think, will let us be much more effective in the future even than we have been in the past. So, I can't say that there won't be any modifications, but the modifications will be based on a careful analysis of how to change our present policy. There won't be any abrupt changes, and changes will be made reluctantly.

Labor, by the way, certifies with us—and you might want to read over the accord, which is brief and written in laymen's language—labor certifies with us that the prime responsibility is to control inflation, which I think is a major step forward. We're pleased with it, and I think it will have far-reaching, beneficial effects.

CRIME

Q. JoAnne Young from Casa Grande, Arizona. What does your administration plan to do about the rising crime rate in this Nation?

THE PRESIDENT. Well, the crime rate goes up and down. For a while, since I've been in office, it's gone downward, and lately, in some cities at least, it's gone upward. We have tried to work more

closely with the local and State officials. The primary responsibility for the enforcement of the law in a given community lies with local officials, first of all, State officials secondly, and with the Federal Government coming in to participate in some types of crime which involve interstate violations of the commerce laws or the violation of basic civil rights.

We've had remarkably good success, I think, in trying to interrupt and reduce the flow of illicit drugs coming into our country, particularly from Mexico. And now we're increasing our efforts to cooperate with Colombia, with Peru, and other Latin American countries, in addition to our good success with Mexico.

So, the effort to prevent white-collar crimes, to enforce the antitrust laws and others, I think, have been very successful. We've prosecuted and concluded long-standing cases involving illicit surveillance of citizens and other sensitive matters that were left over from previous administrations adequately. So, I think that's the best analysis I can give you.

We still have a serious problem with crime. One of the factors that's impossible to assess is how much a better reporting system affects the number of crimes reported. My guess is that there's a much more efficient way now to have an accurate count of the number of crimes committed. I say none of this with apology for the excessively high crime rate, but we're doing the best we can under difficult circumstances.

JEWISH AND BLACK AMERICANS

Q. Mr. President, I would like to ask you about the—my name is Gabriel Cohen. I'm with a national Jewish newspaper, the National Jewish Post and Opinion, which you do not read. [Laughter] I would like to ask you—

THE PRESIDENT. How do you know I don't read it?

Q. I already asked that question. [Laughter]

THE PRESIDENT. Oh, I see, but I didn't answer. Go on.

Q. I'd like to ask you about the rupture between the black and Jewish communities, but before that, I'd like to ask you a personal question.

THE PRESIDENT. All right.

Q. I understand you are from Georgia, and my wife and I met in Atlanta. And we now have eight children, and I thought maybe you know something that we don't know. [Laughter]

THE PRESIDENT. Well, I've only got four children, but I'm working on grandchildren now. [Laughter]

Q. The question I have about—there is a deep concern in the Jewish community, a very deep concern, and I don't know that it comes to you.

THE PRESIDENT. Yes, there's a concern in the White House, too, if I anticipate your question correctly. Go ahead.

Q. I know you have methods and people through whom you do consult. But the charge, for instance, that the Jews control the press, that has been made by Mr. Jackson—well, you probably know better than anybody that Jews do not control the press. Another charge is that dual loyalty, we call it dual loyalty, but it means that the Jews are more loyal to Israel than they would be to the United States. And the thought occurred to me, if you will forgive me, that perhaps—well, I know you've already spoken out on it, and I know that you have stated that the Jews were not responsible for the Young resignation.

THE PRESIDENT. That's correct.

Q. But perhaps you have in mind convening a group of Negro and—or black and Jewish leaders, and maybe not so much the leaders and trying to resolve this. It's a very dangerous situation, be-

cause Jews have never forgotten the Holocaust.

THE PRESIDENT. I know.

Q. And I can tell you of times when, on my honeymoon, I went to a country club and put down my golf clubs on the first hole and went in to register, and there was a sign that says, "No Jews allowed." And so the fellow said, "It's off season. You can go ahead and play." And I said, "Oh, no I can't," and I left. But that incident is not so much apparent today.

THE PRESIDENT. Well, as you know, blacks have suffered the same kind of discrimination and other minority groups have in our country.

I'm sure you realize I don't associate myself with the statements that you made earlier, that people allege that Jews control the press or this or that. I don't associate myself with that. And the dual loyalty, I have no question about the innate loyalty of American Jews for our country. I also have a deep commitment to Israel, which I hope accurately mirrors the deep feelings of the Jewish Americans who share the same concern. I've expressed that in answer to an earlier question.

I am concerned about the division between black and Jewish Americans. I might say that none of the blacks who travel to the Mideast do it as a representative of mine. We have myself, the Vice President, the Secretary of State, and Bob Strauss, who are authorized to negotiate from time to time, all under my direct supervision. And we don't call on private citizens to negotiate for us with other national leaders throughout the world.

Secondly, I don't have any authority, nor do I want to have any authority, to interrupt or to interfere with the right of American citizens to travel where they choose and to meet with whom they choose. I would not want that authority;

I think it would be a violation of the basic constitutional rights that are precious to our Nation.

We have talked—I have talked privately with people like Elie Wiesel and with Ed Sanders and with Ted Mann and others about the best way to bring about an understanding between black Americans and Jewish Americans concerning the complicated interrelationships and sensitive matters concerning the Mideast. Bob Strauss is the one on whom I depend primarily, not only for Mideast negotiations but for the alleviation of misunderstandings and tensions between blacks and American Jews. I and the Vice President also do what we can to alleviate these tensions.

My advice so far from American Jewish leaders is not to inject the White House into the dialog that ought to take place or is sometimes taking place between the two minority groups. But I would be willing to do that in the future if necessary. I believe a better understanding between the two would help to identify and to define common ground. And there may be some irresolvable differences because of points of view—that shouldn't create a schism between the two groups in our country who've suffered most from discrimination.

Ms. BARIO. Thank you, sir.

NATIONAL SPIRIT AND THE 1980
PRESIDENTIAL CAMPAIGN

Q. Mr. President, my name is Luke Feck from Cincinnati. When you were at Camp David you identified a malaise in the American countryside, and when Assistant Secretary of Treasury Brill resigned, he talked about America's interest in immediate self-gratification. The polls show a decline of confidence in all institutions. The American people, are they becoming more difficult to govern, and if

they are, what effect will that have in the campaign of 1980?

THE PRESIDENT. I've read a lot of history since I've been in this house. And when I compare the present difficulty of governing with what it was under previous administrations, I don't think there's a remarkable difference. Obviously, under President Hoover and Roosevelt and Kennedy and Truman and Johnson and Nixon and Ford, there were extreme difficulties, some the same that I have inherited; others change from one decade or generation to another.

The thing that does concern me, however, is the tendency among our people to alienate themselves, one from another: the evolution of special interest groups, with a narrowly focused grasping for advantage; the inability that our country has so far exhibited to deal with a major threat to our national security, that is, an overdependence on foreign oil; and a general lack of confidence in the future as revealed by public opinion polls and an absence of saving habits. And I described this as best I could in the speech in July on Sunday evening, after coming back from Camp David.

In spite of all that evidence, which is available to anyone, I have a firm and growing awareness of the basic strength of our country, which is unshaken. Militarily, politically, economically, morally, ethically, our country is still extremely strong, the strongest nation on Earth, in my opinion, in every one of those categories that I have just outlined. I think in any sort of peaceful competition we can prevail over any other power on Earth because of the qualities of American beliefs and principles.

I also believe that our system of government is admirable and worthy of emulation. Our belief in stability on Earth, the absence of war, the enhancement of peace, the independence of other nations,

their right to be free of foreign intrusion from us or anyone else, is appealing to other countries.

Militarily, I'm determined to keep our Nation as strong as any on Earth. I don't ever want to see our country be second to the Soviet Union or any other country in military strength.

I feel that our Nation can be unified if in a few test cases we can prevail and the Government can show its ability to deal with a controversial issue effectively. The ratification of SALT will be a major step forward. The passage this year of the energy package will show Americans that we have a clear vision of the future and that we can make sacrifices when necessary. We can accommodate changing times even though it's inconvenient and there is a possibility of triumph in a time of difficulty through national unity, even though the threat to our Nation's security is not so obvious as a war or a worldwide depression. I expressed all this as clearly as I could.

The campaign, to close my answer and refer to the last part of your question, I think is an excellent opportunity for candidates and for American people to assess and to debate these controversial issues. I will be trying to present to the American people as clearly as possible the achievements of our country during the last 3 years, the unmet needs, my own proposals for meeting those needs, and, in the give-and-take with other candidates and with the media and with private citizens, let these controversial issues be explored. And I think the American people will be educated in the process, which is always a case with the campaign.

So, I look forward to the 1980 campaign, not with trepidation or doubt, but with anticipation and pleasure—and, I might say, confidence—and believe that the American people will benefit from it.

I don't see any deleterious consequences of open debate and sharp expressions of opinion even when they differ. I think that the more American people are involved in the evolution of decisions and the establishment of policies for our country, domestically or foreign, the less likely we are to make a serious mistake.

We've made some serious mistakes in recent years with Vietnam and Watergate and CIA violations of the law and so forth, because the American people were excluded from the process or because they were told lies, even by people who worked in the Oval Office. And I want to make sure that never happens again. I think had the American people known the truth from the beginning, those deep embarrassments for our country, which shocked the consciousness of our Nation and contributed to the disunity and the doubt, would have been avoided.

So, I feel that that's part of my responsibility, to correct past mistakes, to deal fairly with the American people, and to prevent future mistakes. And I think the political campaign season is a good opportunity for that.

Let me say in closing that I've appreciated the chance to talk to you. By the way, we do get a very good coverage from these editors meetings in the national news media. There is hardly a Saturday evening or a Sunday that goes by that two or three items, sometimes front-page stories, don't come out of this session. We make a transcript of all my answers. The questions are quite often probing and different kinds of questions, and we give you—I think they explained the ground rules—we give you a chance to use the answers for a number of hours before they are made public. But there are a lot of good news stories that come out of these editorial sessions that I think are probably other than what I would get in a White House press conference.

Thank you again. If you don't mind, I'd like to get an individual photograph with each of you before you leave. And I'll stand right over here, and if you'll come by, we'll just take a handshake.

NOTE: The interview began at 11 a.m. in the Cabinet Room at the White House. Patricia Y. Barrio is a Deputy Press Secretary.

The transcript of the interview was released on October 11.

Albuquerque, New Mexico

Remarks at a Meeting With Civic and Community Leaders. October 11, 1979

Governor Bruce King, it's a great honor for me to come to meet with this distinguished bipartisan group this morning. [Laughter] The only thing I can say is that the people in Albuquerque get up pretty early. And I'm very proud to be with the most effective and distinguished mayors in the city, David Rusk. David celebrated his 39th birthday this week—yesterday? Yesterday. I've celebrated 16 of those 39th birthdays. [Laughter]

It's good for me to come back to be with you. As I walk down the rope—and I'll shake hands with everyone here before I leave—I was reminded of the times I've been to New Mexico before and the friendship that you've always extended to me, which is typical of the hospitality and the character of those of you who live in this beautiful State.

I do have a lot of responsibilities on my shoulders, but it's one of the most challenging and, certainly, the most exciting jobs on Earth. And it's one that I am thinking very seriously about keeping for a while if you'll help me. [Laughter]

This past week, we had an experience that I think will live in the history of our Nation and in the memories of all Americans—and I'm glad that Archbishop

Sanchez is here, because it has been a thrill for me as a Baptist, for others of all kinds of faiths, to see the tremendous outpouring of love and respect that was paid to Pope John Paul.

He came here not as a statesman, although he is; he came here as a man of God. And when I had a private conversation with him, he said that he was absolutely amazed at the tremendous reception that he got. I was, too. I knew that they would have tens of thousands of people, maybe hundreds of thousands of people who would come out to meet him, but to see literally millions of people assembled on the streets of Chicago and Boston and Philadelphia and New York and even in the rural area of Iowa and, of course, in Washington, was a pleasant surprise and an exciting surprise for me.

I think there's a hunger in our country for decency and commitment, for the binding of wounds, for unity, for mutual respect, for compassion, and for love; and this to me is heartening. And I think the reception that he got transcended any kind of minor religious differences we have, because we worship the same God. And this, I think, is a good solid base for Americans to meet any possible challenge to us.

We are so strong—our country is. Sometimes we get bogged down in the daily news programs—where we are reminded of the problems and the differences and the debates and the temporary failures and the inconveniences—and we forget to stand back for a moment and assess the blessings that we have.

We live in the greatest and the strongest nation on Earth. It's the strongest nation on Earth militarily. We need fear no one, and we will never be second to any other country in military strength. And, of course, we are the strongest nation on Earth economically, because God blessed

us with such great natural resources. In the past, we've not always handled them carefully. We've not been constant good stewards of what we've inherited. But I really believe that the recent reminder that there is a limit to how much waste Americans can accept in our society is healthy for us.

I met last night, 2 hours, with the Governors of the Western States. It was one of the most productive and exciting meetings I've ever had. And I told the Governors at the conclusion of the meeting that I wished that every person in America, with TV cameras or otherwise, could have seen what went on there, because it was a vivid demonstration of the system of federalism at work.

There was a frank exchange of ideas and a searching for common ground. And when we got through, I can tell you that the differences among us were almost nonexistent and we had been brought together. It would not have been that way a year ago or 2 years ago, but now we see common problems and we see common solutions. And we see a binding together of officials at the local, State, and Federal levels of government to deal with the particular problem of energy that, in my opinion, will be carried over in future years, to deal with other crises or challenges or problems that we've not yet had to address.

You in this part of the world live in a relatively untouched environment. You begin to see, though, an enormous explosion in population as people move from other parts of the country here. And how to deal effectively with the growth, both in population and economically, and the utilization of your natural resources, and at the same time keep the beauty of your place and the quality of your life, is indeed a challenge. And I think this new relationship between the State and Federal Gov-

ernment in dealing with the energy crisis is going to provide a basis of communication and consultation and partnership that will stand us in good stead in the future.

It's the way our Nation ought to work. And it's the way our Nation has always worked if we had a crisis or a challenge or a threat that we could see clearly. The threat of the First World War, the threat of the Second World War, even the threat of the Great Depression touched every American's life. And so, at that time we were unified; our families came together; our communities came together; people had more respect for public officials. We were like a team meeting the challenge. And it's not been possible for us in the past to marshal our great strength and to unify ourselves to meet a challenge that was not quite so easy to see—the threat to our security from the importation next year of \$70 billion worth of foreign oil. We're importing oil; we're importing unemployment; we're importing inflation.

The inflation rate now is boosted 4 percentage points just by energy increases foisted on us by OPEC. And if we can cut down the level of our imports through the prices of the energy program I've put to Congress, we can cut down severely on inflation. But that's hard to see, and we've got to unify our efforts to deal with it—that was the purpose of my visit out here. And we can do the same thing with inflation, and we can hold constantly those cherished personal values in America through that same process.

You've got such a great State. I've depended on New Mexicans to help me, on a per capita basis, in Washington perhaps more than any other State in the whole Nation. Graciela Olivarez came out with me on the plane. She handles the Community Services Administration, to deal

with people who are most deprived. And she does a superb job with tens of millions of dollars, carefully placed to alleviate the most severe hardships in our country. She's got a special sensitivity. She knows what it means to be from a community which is not only poor but also where the people don't speak English well. And I think that's a special insight that the Federal Government ought to have.

And Alex Mercure has been of great help to me. I happen to be a farmer, and to have him as Assistant Secretary of Agriculture gives a special insight into the problems of agriculture for your region.

Fabian Chavez, as you know, has helped me in the Department of Commerce. He's here among you again now. But these kinds of contributions are very good. And last and perhaps least—I won't mention everyone—Tim Kraft—[laughter]—and Chris Brown¹ helped me in special ways as well.

And you also have the greatest amount of solar energy, per capita. So, you've got a lot to be thankful for. But I think the main thing that I would like to say this morning in closing is that I appreciate your friendship and the strength and the pioneer spirit that still exemplifies the people who live in your beautiful part of the country. And I hope that we can form this closer relationship in the future to deal with challenges that will inevitably arise. And I have absolutely no doubt that we can meet any challenge or answer any question or resolve any problem if Americans have confidence in one another and confidence in our system and, also, if we can unify our efforts toward common goals. That's one of the responsibilities of

¹ Carter/Mondale Presidential Committee campaign manager and campaign manager for the New England area, respectively.

a President, and I feel a partnership with every one of you here.

Thank you for letting me be with you. God bless every one in this room.

NOTE: The President spoke at approximately 8 a.m. in the Rio Grande Room at the Sheraton Old Town Hotel.

San Diego, California

Remarks at the Annual Convention of the Building and Construction Trades Department, AFL-CIO. October 11, 1979

President Bob Georgine and my good friends in the building and construction trades:

It's good to be here with you, the men and women who are building America's future.

It's an honor and a pleasure, and I'm grateful that yesterday one of the finest Secretaries of Labor who ever served was able to address you. I understand he made my speech for me, and I wonder if he did all right. Did he do okay? *[Applause]* Thank you very much.

It must be very reassuring to you, as it is to me, to have a man as Secretary of Labor who understands what it means to work for a living. Yesterday, I understand Ray said it would make us feel more at home if you had sawdust on the floor—*[laughter]*—but we understand you and believe that our Nation will be better in the future because of you.

I'm going to violate protocol, too, and repeat something that my introducer has already said. I don't want to change the text of my speech. It shows that great minds move in the same direction. *[Laughter]* As a matter of fact, I want to tell you three brief stories.

Back in 1976, at the Democratic National Convention, as Bob Georgine said,

I had a long private talk with him, as the new Democratic nominee for President. As he said, I asked him, "What can I do, Bob, for the building trades?" And I never forgot his quick answer. He was clear, to the point; he didn't equivocate. He said, "Governor, my people need jobs." I've not forgotten it. We were in the midst of what was nothing less than a depression for the construction industry.

When I took office, unemployment among the building and construction trades was averaging 15 percent, in some areas 25 or 30 percent. It had been that way for a long time. I felt then and I feel now that we formed a partnership. With your help, I was elected President, and working with a Democratic Congress and with you, we have created, since January 1977, a net increase of 8½ million jobs in the United States, an unprecedented achievement in the history of our country. I thank you for it. That partnership has really paid off.

For all American workers, we've cut the unemployment rate about 25 percent, and I'm proud of that. But I'm even prouder of the remarkable achievement among those who look to you for leadership, for the total unemployment rate has dropped more than 40 percent. As a matter of fact, among those 8½ million jobs, 1 million—more than a million have been new construction jobs in just 30 months. There are more construction workers on the job today than ever before in history. Bob, we have delivered together, and we're not through yet.

In spite of some economic obstacles which you and I recognize together, I intend to preserve those construction jobs and to get some more. That's the first story I wanted to tell you about.

The second story involves another labor leader who also happens to be here with us today, and he was with me at

Camp David in July. While I was searching for a clear approach to the very complicated subject of energy, not knowing quite how to address a longstanding, unanswered question in our society, Lane Kirkland¹ called for boldness with a simple and startling answer about what to do concerning energy. "Mr. President," he said, "the issue is freedom."

Now, there's a third story with even deeper dimensions—about our Nation's basic values and how we can reassert those values and how I believe we've already begun to do so.

Last week, I watched the television arrival of His Holiness Pope John Paul II. When he came down from his plane, he knelt to kiss the earth of our country, and then my wife, Rosalynn, greeted him. And he made a brief but powerful and eloquent statement about America the beautiful.

He said essentially that he respects us individually as a nation and that we are good people and that he loves us. It was a rare moment in our lives, an emotional moment, a moment for history.

But immediately, the TV commentator turned to his colleagues and said, "It was a gracious speech, gentlemen, but there was nothing new in it. Did you think so?" And another one said that the Pope looked very tired, and then the third comment was, "I don't believe he can speak English well enough to carry on a conversation."

For television viewers, a beautiful and significant moment was kind of glossed over and made trivial. But that was a transient damage, because the character of John Paul and our Nation's hunger to restore the unchanging ethical and spiritual standards as a part of American life has made his visit to the United

States of America a triumph, not only for him as a great spiritual leader but also for us. It brought out for all the world to see the finer elements of our character as Americans.

These three episodes, one with Bob Georgine, one with Lane Kirkland, one with the Pope's visit to our country, contrast the powerful forces that face us in our day-by-day lives as Americans and the choices that we have to make, both as individuals and as a nation. These choices are between cynicism and faith, between despair and confidence, between weakness and courage.

These are basic choices in our personal lives. They're also basic choices in our economic and political lives as a nation. They are choices that I discussed with you and other Americans in my television address that Sunday evening in July when I came back from Camp David. In that speech, I outlined my vision of a rebirth in American values and American spirit.

As President, I have a chance to think a lot and to talk a lot and to listen a lot to people who understand our country. And I recognize the problems of America, but I also recognize our strength. I know that we can meet those challenges, I know that we can answer those difficult questions, and I know that we can solve those tough problems. But first we must restore our confidence in one another and our faith in the future. All else pales in importance when compared to this absolute necessity for us to have confidence in one another and confidence in the future of our Nation.

Second, we must revitalize our basic human values like freedom, patriotism, duty, trust, family, compassion, love. Our outpouring of affection for the Pope showed how deep and strong those values

¹ Secretary-treasurer of the AFL-CIO.

are within the souls and the hearts of Americans.

And third, we must regenerate our sense of unity. We must draw again from that deep reservoir of spirit that's always been available to us when our Nation was in danger or when we faced a serious challenge. And today we do face some of the most serious economic and international challenges in history. Energy, employment, inflation, world peace are of special concern to me as President.

In the last few months, I believe we have turned a corner. I see a growing willingness to pitch in, to recognize problems, to face them courageously, and to try to solve those problems together. The labor movement has helped to lead this change.

We are finally building up good momentum in the Congress after long years of delay in major energy legislation.

Last year, with your help, we passed part of an energy bill that can reduce imported oil by 2½ million barrels a day by the end of this coming decade. But even with those huge savings and the savings that we expect to get from increased conservation, if we do nothing more, we will be importing more oil by 1990 than we import today. We've still got a long way to go. And we will not accept this threat to our Nation's very security.

At Camp David, I also turned to Marty Ward, to Jack Lyons, and they told it to me straight: "This country needs a new energy base, Mr. President, and we've got to start right away." And I have a clear message from Bob Georgine, from Charlie Pillard, Bill Sidell, Jay Turner. They tell me that we must stop exporting American jobs and stop importing inflation. And they also tell me that there's some construction workers in this country ready to fill those new jobs when we create them.

Americans are ready and we will save much more energy in the future than we have ever tried to save in the past. But we also have got to build and produce more. We need more American oil, American gas, American coal, American solar power, American nuclear power, American synthetic fuels to run our homes and factories, and we're going to produce them without further delay—American energy for American people, for American jobs, and to cut inflation. If you'll help me, we will not fail.

I want to tell you this: This will not be an unpleasant sacrifice on the part of Americans. It will be and can be a pleasant thing, a notable achievement. We'll get from it a sense of patriotism.

We must have an energy security corporation financed by a windfall profits tax on the unearned profits of the oil companies. I'm determined to get it. If you'll help me, we will not fail on that.

This will finance—and this might be of interest to you—one of the biggest construction projects in the history of the world—a brand-new American industry—American industry—with American technology and American jobs on a scale which will even exceed the construction of our Interstate Highway System. Without even counting any indirect benefits, in construction alone, it will create more than 145,000 jobs.

But I need your help with the windfall profits tax in the Senate, because the oil companies are pushing for loopholes that could give them nearly \$100 billion of this proposed tax and which would only produce only a small increase in American oil and American gas. This would all be at the expense of programs to help the poor pay rapidly rising energy costs, to give us a better transportation system, to develop synthetic fuels. This we cannot

permit, and I want to know, would you help me stop this attempt by the oil companies to get this \$100 billion for themselves? Will you help me with that? *[Applause]* Right on.

I know you've helped me before, and I appreciate it, but now's the time to help again, without delay. Importing just 1 barrel of oil per day—1 barrel of oil per day—costs our country \$8,000 a year. This is more than many workers in our country make in an entire year. Next year, we will import not 1 barrel of oil, but 8½ million barrels of oil every day. We will send out of the United States next year \$70 billion. Just imagine how many American jobs could be created with \$70 billion. That's why we need the windfall profits tax, because we're going to build a new energy future for our country. And the building and construction workers are going to build it.

But we're not going to stop there. As Bob Georgine says, the unemployment rate is still too high. Our goal is full employment, and to me this means full employment for construction workers as well.

In fighting inflation, we do not sacrifice construction jobs. While interest rates have been rising, because of decisions made by the Federal Reserve Board, to high levels in order to cool inflation, we've taken special financial measures to sustain credit for construction.

In the past, as you well know, when interest rates went up, building dropped to practically zero. It was the first industry to suffer. This has not been the case. Interest rates are too high, inflation is too high, but we've tried to build into the system protection for construction workers and especially housing construction.

I reject the advice of those who think the only way to cure inflation is to throw millions of people out of work. This has

been done in the past by administrations before mine, but I guarantee you that I will not fight inflation with your jobs.

I've worked with President George Meany and Bob Georgine and others on this platform up here to make sure that American workers never again have to suffer such a loss because of a cruel and unnecessary policy.

Let me add that your strength today is a tribute to the dedication of President George Meany to a free, democratic, patriotic, and responsible labor movement, not just in the United States but all over the world. Every American owes President George Meany a debt of gratitude.

I told him last January that in fighting inflation, that we would make labor, probably for the first time, full partners. I assured him that labor would be at the table when my administration made any major decisions about economic matters. And I've delivered on that promise.

As you may know, we've just concluded, with your leadership, with the help of Lane Kirkland and others, the new economic pact between my administration and organized labor—the national accord is what it's called—the national accord—which amounts to an economic charter for the 1980's, a decade that can be a time of stable prices, steady expansion, and growing employment. Labor, business, and the public will all be represented on the pay committee which is envisioned in the national accord. The chairman will be a man who is a special friend of yours and in whom we all have confidence, John Dunlop.

For the first time—and this is very significant, in my opinion—the national accord makes full partners of those people whose well-being and standards of living are at stake in the fight against inflation—the working men and women of America.

The national accord commits us to protect jobs, it commits us to aid the poor as they struggle with inflation. The national accord also obligates us to continue what we begin—action to ensure capital for the housing industry, and especially to make available adequate financing for low- and middle-income families who are seeking homes.

Now, we all know that we must pursue a policy of fiscal discipline, with protection for the poor and the disadvantaged. We cannot spend our way out of this inflation. Austerity is unavoidable and inevitable. We all recognize that. Labor, business, and government leaders, we can no longer postpone it.

If we all continue shoving each other to get more, we will only get more inflation and, ultimately, less of everything. But if we respect each other's needs and capabilities and needs and if we restrain ourselves and cooperate with one another, we can have both less inflation, more jobs, and a steadily expanding economy.

Let me add that I count as an obligation something not written into the labor accord. That's my pledge to you to oppose in the Congress antilabor legislation and to support positive labor legislation, such as common situs picketing and labor law reform. My own experience is that you can't always get from the Congress everything you want the first year, but I've never been one to give up, and I don't intend to give up on this.

That's the positive action that we want from the Congress. But we've also seen this year seven different attempts in the Congress to gut the Davis-Bacon act. We've turned back all seven attempts, and I stand with you to turn back all such future attempts. And you can depend upon it.

It's clear that protecting the rights of

workers is essential to any sort of energy, economic plans or contracts. So, when somebody begins to complain about inflation, for instance in the Congress, and then attacks labor, I say that all they want to do is to put the sacrifice, all the sacrifice, on the shoulders of the working men and women of this country. And this we cannot and we will not permit. The sacrifice must be shared.

We've got some problems that are difficult to resolve. There's no question about that. As you know, I'm the fourth President to have to deal with the problem of continued high inflation. But missing from every previous approach to resolve the problem of inflation has been this voluntary compact, negotiated freely, with a broad consensus of support, including, as an essential element, labor. For the first time, we have such an accord now in the national accord. It's because of you that we have it, and I thank you deeply for it.

And I might add that within a few moments after the AFL-CIO executive council approved the national accord, President Frank Fitzsimmons sent me word that I could count on the Teamsters, and, President Fitzsimmons, I thank you for that.

In closing, let me point this out—it's important to you and me: Our energy and economic and other domestic efforts are closely tied to our international challenges, for it's our national strength and our national resolve and our world leadership that helps to promote peace.

We are at peace in the world. While I've been President, not one single American has lost a life in combat, and I thank God for it.

This is a peace based on strength, on determination, a peace based on vigilance. We've strengthened our NATO commitment, and it becomes stronger every day. We've reversed the long decline in

real spending for national defense. My number one responsibility, above everything else, is our Nation's security. And as long as I'm President of the United States, you can count on our Nation having military forces second to none.

I don't deny that we have challenges, but we face our challenges calmly because we have confidence in America. We've established an essential balance between security and peace.

While strong and at peace, we must never lose sight of the need to eliminate the threat which has hung over our heads for the last 30 years, the threat of nuclear annihilation. I say to you today what American labor has said for a long time: The Senate must ratify the SALT II treaty.

SALT II represents 7 years of detailed negotiations under three different Presidents, both parties. It's a fair treaty; it's a balanced treaty. It's a treaty that can be verified; it's a treaty that lets us monitor what the Soviets are doing. It's a treaty that maintains our role as a leader of the Western World. It's a treaty that exemplifies America's desire for peace through strength. It's a treaty which permits our Nation to put its precious financial resources where they pay the greatest dividend for American quality of life. It's a treaty that enhances world peace. This is a responsibility that we must fulfill for our own children and for future generations.

SALT II will lead to further arms reductions so that we can maintain equivalency of military strength and use the tremendous advantages that America has to compete with the Soviet Union all over the world.

We are a nation that believes in freedom, individuality, liberty, democracy; the Soviets don't believe in those things. We think a person should never be sub-

jugated to the state; the Soviets put the state first. We are a nation with deep ethical standards and religious beliefs; the Soviets are an atheistic nation. We believe in the rights of other countries; the Soviets inject themselves directly or through Cuban surrogates into the internal affairs of other countries and disrupt the societies there.

We have tremendous advantages that can be marshaled to prevail and to make friends and trade partners with nations throughout the world, provided the SALT II treaty is passed. We don't fear anyone, but we believe that we can prevail through peaceful competition. Our allies must have confidence in us. They look to us to negotiate successfully. They look to us to control the nuclear threat to themselves. We cannot betray this confidence of our allies.

And the SALT II treaty permits us as well to contribute to a world that will let us expand everywhere the scope of our belief in human rights. I'm proud that we've put this issue, including trade union rights, on the international agenda.

We in America will never lower the banner of human rights. We want the benefits of a peaceful world for ourselves and for others. We have worked hard for this.

We've made historic progress toward peace in the Middle East. A year ago, we had the Camp David accords. Six months ago, we had the Middle East peace treaty between Israel and Egypt. And now we hope to reach a permanent solution to the terrible conflict that has dominated the history of this troubled corner of the world. We are determined not to fail in bringing peace to Israel and to the Middle East.

At times, this has been a lonely struggle, but throughout this effort, I have

drawn strength and support and encouragement from the labor movement. You're always with me when peace or freedom are at stake. I know I can count on you; I have never been disappointed.

In wartime, during the struggle for civil rights in our own country, in meeting our economic challenges, no matter how severe they may have been, whenever our well-being or our basic values are at stake, labor is in the front line.

The visit of Pope John Paul has given us a chance to reflect on our basic values and the challenges to them. We cannot permit this chance to slip away. Let's seize this opportunity and make the most of it.

Perhaps the greatest gift the Pope gave us in his brief visit to our country was a chance to rethink what these four words mean, "One nation, under God." He lifted our eyes from petty concerns, sometimes selfish concerns, from the cynicism and the indifference that sometimes divides Americans one from another, to show us that we can unite for common purposes, as Americans, as children of God, or as citizens of a fragile world.

Now let us rededicate ourselves to a simple truth that together we can shape a bright future, together we can improve our own lives, that as a strong nation together, we can build a community of nations at peace.

We have within us the ability to make these dreams a reality. And I ask you, the building and construction workers of America, to help me make these wonderful dreams come true.

Thank you very much.

NOTE: The President spoke at 10:08 a.m. in the Convention Tent at the Islandia Hyatt House.

San Diego, California

*Remarks at a Reception Hosted by the San Diego County Board of Supervisors.
October 11, 1979*

Congressman Van Deerlin and his beautiful and very wise, dedicated, competent, friendly constituents:

I'm glad to be with you. As a matter of fact, it's nice for me to come back home. As some of you may know, during the time of the Korean war, my wife, Rosalynn, and I and my older son, Jack, and Chip lived here in San Diego. Coronado was looked on as the retired naval officers' heaven, and I never quite reached that high and exalted position. I had to take second best, President of the United States—[laughter]—but it's not too late. It's not too late.

I was serving on the U.S.S. *Pomfret*, Submarine SS 391, and we tied up not at a dock, but at a submarine tender. And the only bad thing about where I lived was that I had to get up at a quarter to four every morning to catch a ride down to the pier to get a boat that didn't travel on a regular schedule out to the Navy tender and then get on a submarine to be there on time. And that's almost my most vivid memory of San Diego. [Laughter] That's right.

And I understand that they put a *free-way* through the house where I used to live. I cannot believe—[laughter]. It must have been under a Republican administration. [Laughter]

We had a good life there. Most of our neighbors spoke Spanish, and it gave me and Rosalynn a chance to learn that language. And we had an overwhelming expression of friendship for me and my wife and my two little children.

I went from there to be the only officer, as a matter of fact, on the first ship that

the Navy built after the Second World War. And I went from that antisubmarine submarine to serve on one of the two nuclear-powered submarines, the first ones ever built. So, I had a good launching for my naval career from San Diego. I'm glad to be back.

This is a good trip for me also to express in the clearest possible ways to the Building and Construction Trade Union—they're having their annual convention here—some of the challenges, some of the problems, some of the opportunities which our Nation has to face together.

As I said in that talk, our Nation is strong. We need not fear the present or the future if we accurately assess the blessings which we've been given in this country, have confidence in one another, and have faith in the future. We can meet anything that arises. The rest of the world looks to us for leadership not only in material things—economic and military strength, political influence—but also, I hope and believe and pray, in ethical and moral standards, the things that have always been the core of American strength.

We've grown, I think, in the last 200 years. We've not gone backward. The vision that our Founding Fathers had in establishing this country are being realized more and more as each generation of Americans have a chance to serve our country together. We've opened up the processes of government to more and more people, to young people, to women and the others, which we didn't have before. Now Americans elect our U.S. Senators directly. Formerly, just State legislators made that choice. We've guaranteed rights to black citizens, to those who don't speak English well, to those recent newcomers to our country.

And I'm always reminded, as President,

trying to assess on a daily, sometimes an hourly basis, our strengths and our problems, that we are a nation of immigrants—we are really a nation of refugees. Our ancestors came here some 300 years ago, some, 3 years ago, to find a greater degree of freedom, a chance to be an individual, a chance to be different, a chance to assess our own God-given talents and to use them in the most productive and exciting way. And I hope we never dampen that sense of Americans being individuals when we choose, but also unifying in a time of challenge and testing.

It's obvious that we can unify ourselves and put aside petty differences and put aside unselfishness when we can see clearly that our Nation is threatened by a Great Depression of the thirties or by the First World War, the Second World War. Then families, communities become close to one another, and we honor our government, and we kind of minimize the mistakes that public officials make. And we say, "Our system is the best, I'm going to make it work," rather than withdrawing from it because of something we don't like on a transient basis.

And sometimes we forget, in the excitement of reading the news, where you only see the small failures and the transient inconveniences and the debates and the setbacks, we forget about the strengths and the blessings. And I believe that Americans are hungry now for a restoration and a reminder of those standards that never change, those commitments that never change, those human qualities that are always cherished in spite of temporary challenges.

We can overcome the energy challenge. It does threaten our security. I'm not exaggerating that. We buy now half the oil we use from foreign countries,

I went down there to be the only officer.
A number of days on the first ship that

the Navy built after the Second World War. And I went from that antisubmarine submarine to serve on one of the two nuclear-powered submarines, the first ones ever built. So, I had a good launching for my naval career from San Diego. I'm glad to be back.

This is a good trip for me also to express in the clearest possible ways to the Building and Construction Trade Union—they're having their annual convention here—some of the challenges, some of the problems, some of the opportunities which our Nation has to face together.

As I said in that talk, our Nation is strong. We need not fear the present or the future if we accurately assess the blessings which we've been given in this country, have confidence in one another, and have faith in the future. We can meet anything that arises. The rest of the world looks to us for leadership not only in material things—economic and military strength, political influence—but also, I hope and believe and pray, in ethical and moral standards, the things that have always been the core of American strength.

We've grown, I think, in the last 200 years. We've not gone backward. The vision that our Founding Fathers had in establishing this country are being realized more and more as each generation of Americans have a chance to serve our country together. We've opened up the processes of government to more and more people, to young people, to women and the others, which we didn't have before. Now Americans elect our U.S. Senators directly. Formerly, just State legislators made that choice. We've guaranteed rights to black citizens, to those who don't speak English well, to those recent newcomers to our country.

And I'm always reminded, as President,

trying to assess on a daily, sometimes an hourly basis, our strengths and our problems, that we are a nation of immigrants—we are really a nation of refugees. Our ancestors came here some 300 years ago, some, 3 years ago, to find a greater degree of freedom, a chance to be an individual, a chance to be different, a chance to assess our own God-given talents and to use them in the most productive and exciting way. And I hope we never dampen that sense of Americans being individuals when we choose, but also unifying in a time of challenge and testing.

It's obvious that we can unify ourselves and put aside petty differences and put aside unselfishness when we can see clearly that our Nation is threatened by a Great Depression of the thirties or by the First World War, the Second World War. Then families, communities become close to one another, and we honor our government, and we kind of minimize the mistakes that public officials make. And we say, "Our system is the best, I'm going to make it work," rather than withdrawing from it because of something we don't like on a transient basis.

And sometimes we forget, in the excitement of reading the news, where you only see the small failures and the transient inconveniences and the debates and the setbacks, we forget about the strengths and the blessings. And I believe that Americans are hungry now for a restoration and a reminder of those standards that never change, those commitments that never change, those human qualities that are always cherished in spite of temporary challenges.

We can overcome the energy challenge. It does threaten our security. I'm not exaggerating that. We buy now half the oil we use from foreign countries,

from an uncertain source, and they change the price, and we can't control it. Four percentage points of our inflation rate are due directly to the increase in the price of oil charged to us by OPEC because we buy so much of it.

Next year we will send \$70 billion of American money overseas—as I said in my speech earlier today—and not only does this make us dependent on foreign countries, but if that supply should be interrupted, it would cause severe problems for our economic structure.

You experienced that very slightly earlier this year with gasoline lines and temporary shortages of fuel for your automobiles, and it created semipanic in some communities. People spent half their time sitting in gasoline lines. Just with a slight interruption, we lost about 100 million barrels of oil because Iran had a revolution. They only produced about 3 million barrels a day out of over a hundred million in all in the world, but that little, slight interruption caused us to have severe problems.

What I'm trying to do now, with your help, is to get an energy program established for our Nation that will make us secure and to let us produce American oil and American gas and use American coal and depend on solar power and things that can be replenished and don't waste away. It's not easy. I'm the first President that ever tried it. After being bogged down in it for the last 2½ years, I can well understand why my predecessors did not do it. [*Laughter*]

As Congressman Van Deerlin would certainly certify, this is the most difficult and divisive issue perhaps that the Congress has ever addressed in the last 200 years of our existence. On every vote on natural gas or whatever, not only was the House and Senate exactly divided, but within the House and within the Senate

and within the conference committees, almost a precise 50-50 division. But now consumers' voices are being heard more clearly, and the oil companies and others are beginning to see that the Nation's well-being must be put first. And in doing that, everyone will be better off. It's not a time for selfishness, it's not a time to gouge others, it's not a time even to find scapegoats or to try to blame those who might be responsible. We ought not to forget about that.

Inflation has been with us 10 or 11 years. We're trying to address it calmly and persistently. I have a fairly conservative philosophy about economics. We have cut the Federal deficit by \$36 billion since I've been in office, more than 50 percent, almost 60 percent.

We have less Federal employees now than we had when I took office. We'll have less next year than we have now, in spite of tremendously increased government services available for our people because we are more efficient now than we used to be.

We're spending with the Federal Government a lower percentage of our gross national product than we did before. It was 23½ percent when I took office; now it's down to 21½ percent. We're trying to get government's nose out of the private and internal affairs of individual citizens and also out of the affairs of the free enterprise system.

When I got off the plane at the San Diego Airport, one of the first people that met me there was the president of a major airline that serves your State. He said, "Airline deregulation is the best thing that ever happened to the airline industry. We have not only reduced air fare sharply below what it formerly did, but we've got more paying passengers and our profits are higher." And when I met with the President of Mexico 2 weeks ago, he

pointed out to me that tourists now are able to travel so much more cheaply that the number of tourists traveling to and from Mexico on airplanes have gone up 60 percent. So, deregulation and getting the Government's nose out of our business has paid off, and eventually, those things will help us with inflation.

I just want to mention two other things briefly. As I said to the construction workers, it is absolutely necessary that the Senate ratify SALT II. I need every one of you to help me with this. Alan Cranston is really one of the leaders in fighting for SALT II. We need both Senate votes. And I hope you'll use your own influence. Whether you're Democrats or Republicans is of no concern of mine on this particular issue. It's a bipartisan issue.

This treaty has been negotiated by three Presidents over a period of 7 years. If SALT II should be rejected, the consequences would be a severe blow to our country. We would have no way to monitor what the Soviets are doing. They could do everything they wanted to secretly, and every time we got a rumor of a new weapon for the Soviet Union or a new breakthrough for the Soviet Union or additional weapons for the Soviet Union, we would have to suspect the worst. It would create an enormous nuclear arms race, exactly the opposite of what we want, and the balance between ourselves and the Soviet Union would not be changed. It would just greatly escalate both of us in the percentage of our resources spent on nuclear weapons. We don't need that.

And also our allies in Europe look upon us as being responsible for containing and reducing the nuclear threat to them. And if the Soviets have accepted the treaty, which they have, and then the United States rejects it, it would be a clear signal to our own allies that we can-

not be trusted anymore to represent the Western World in controlling these terribly devastating weapons.

We couldn't control proliferation of nuclear explosives in other countries, because it would be very embarrassing for me to go to the Prime Minister of, say, India, or Pakistan—the President of Pakistan—and say, "Don't build a single nuclear explosion," and they would look at me and say, "You've got thousands, and you cannot even agree to limit additional thousands." It would mean that many countries would probably shift toward more and more dependence on a nuclear world.

So, I ask you to help me with this, and of course, we'll keep a strong defense. It's important to San Diego and to California and the Nation that we have a strong defense, not only a strong defense in general but especially a strong navy. That's one of my prime interests.

Let me say in closing that Congressman Van Deerlin and the board of supervisors here have been very gracious to let me come. I do have a challenging job to represent 220 million people well and to lead the greatest country on Earth. But it's a job that's not only challenging and sobering but also exciting and gratifying, because the strength that comes not from the office itself but from the interrelationship with literally tens of thousands, hundreds of thousands, millions of Americans who share with me a dream of an even greater America, a more peaceful world, a place where the quality of life can be maintained, where people can live in closer harmony, one with another, and where we together, under a democratic system, believing in freedom, committed to human rights for everyone, can make the greatest nation on Earth, our Nation, even greater in the future.

That's what I want. With your help, we'll do it.

Thank you.

NOTE: The President spoke at 11:05 a.m. in the Hotel del Coronado ballroom.

San Diego, California

Exchange With Reporters on Departure From Lindbergh Field. October 11, 1979

Q. [*Inaudible*]

THE PRESIDENT. No one can control the stock market or predict what it's going to do.

Q. [*Inaudible*]

THE PRESIDENT. I hope not. We've done everything we could in spite of high interest rates to hold up employment in the construction industry. And as I told the construction workers, ordinarily the first part of our economy which feels adversely high interest rates has been the homebuilding industry.

Since I've been in office, we've had an average, I think, and still maintain of about 1.8 million homes being built every year. But we've changed economic policy to accommodate that problem. I think we'll minimize unemployment.

Q. [*Inaudible*—if the interest rate situation does begin to hit, can the construction industry be—*[inaudible]*.

THE PRESIDENT. Yes, we are assessing it constantly. But I think right now our economic policies are sound and well-advised.

Q. Are we headed for a deeper recession because of the higher interest rates?

THE PRESIDENT. I don't believe so—we've been—but I think the degree of

recession has been less than we had anticipated earlier this year.

Q. Why did the markets do what they have done for the past few days?

THE PRESIDENT. I can't comment on the market. I don't know anything about them.

Q. [*Inaudible*]

THE PRESIDENT. My first priority is to deal with inflation.

NOTE: The exchange began at approximately 12 noon.

Advisory Commission on Intergovernmental Relations

Appointment of Jason Boe as a Member. October 11, 1979

The President today announced the appointment of Jason Boe as a member of the Advisory Commission on Intergovernmental Relations for a 2-year term.

Boe is president of the Oregon State Senate. He replaces John Briscoe, whose term has expired.

Select Commission on Immigration and Refugee Policy

Appointment of Rev. Theodore Hesburgh as a Member and Chairman. October 11, 1979

The President today announced the appointment of Rev. Theodore Hesburgh as a member and Chairman of the Select Commission on Immigration and Refugee Policy. He replaces Reubin Askew, who has resigned from the Commission.

Father Hesburgh, 62, is Chairman of the U.S. Delegation to the United Nations Conference on Science and Technology for Development. He was president of the

University of Notre Dame from 1952 to 1977.

He was born May 25, 1917, in Syracuse, N.Y. He attended the University of Notre Dame from 1934 to 1937 and received a Ph. B. degree in 1940 from Gregorian University in Rome. He attended Holy Cross College from 1940 to 1943 and received an S.T.D. degree in 1945 from Catholic University. He was ordained to the priesthood in 1943.

From 1943 to 1944, he was chaplain for the National Training School for Boys in Washington, D.C. From 1945 to 1947, he was chaplain to veterans at the University of Notre Dame, and from 1948 to 1949, he was assistant professor of religion, then head of the department of religion. He was executive vice president of Notre Dame from 1949 to 1952.

The Select Commission on Immigration and Refugee Policy was created by law to "study and evaluate existing laws, policies and procedures governing the admission of immigrants and refugees to the United States and to make such administrative and legislative recommendations to the President and to the Congress as are appropriate." The Commission's final report is due on September 30, 1980.

The law creating the Commission was signed October 5, 1978. It is a 16-member commission. Four of the members are appointed by the President, four by the Speaker of the House from the membership of the House Judiciary Committee, and four by the President pro tem of the Senate from the membership of the Senate Judiciary Committee.

The other four members are the Secretary of State, the Attorney General, the Secretary of Labor, and the Secretary of Health, Education, and Welfare. The President appointed his four members March 22, 1979. They were Askew (Chairman), Rose Matsui Ochi (execu-

tive assistant to Mayor Tom Bradley, Los Angeles), Joaquin Francisco Otero (international vice president of the Brotherhood of Railway and Airline Clerks), and Cruz Reynoso (associate justice of the Third Appellate District in Sacramento, Calif.).

Energy Security Corporation

White House Statement on Senate Energy Committee Approval of the Legislation.
October 11, 1979

The President welcomes the overwhelmingly favorable action by the Senate Energy Committee in establishing an energy security corporation. The legislation embodies the three elements which the President has said are essential to a synthetic fuels program: a long-term commitment to a substantial synthetic fuels effort, an independent entity to carry out this commitment, and the authority and immediate funding for a strong start.

The President is grateful to Chairman Jackson and Senators Johnston and Domenici, as well as to the other committee members, for the dedication and effort that led to the Committee's favorable vote. The President hopes the Senate will promptly follow the Energy Committee's vote so the Nation can soon begin the important task of producing synthetic fuels and reducing our need for foreign oil.

Home Heating Oil Supplies

Remarks to Reporters. October 12, 1979

I am pleased to announce that our 7-month effort to build up adequate home

heating fuel oil stocks has succeeded. Figures released yesterday indicate that our stocks today are in the range of 235 million barrels. We are well ahead of last year at the same time, and it's clear that we're now at the point of achieving our goal of 240 million barrels in primary reserves.

This is a gratifying achievement which ensures that we will have enough home heating oil to meet our needs this winter. Having achieved this goal of primary heating oil stocks, our primary effort now will shift toward distributing these supplies as they are needed throughout the different regions of our country.

I've instructed Secretary Charlie Duncan of the Department of Energy to work with the major refiners and suppliers to assure proper distribution now as a first priority. The positive action already taken by the fuel distributors must be continued and expedited. No one needing fuel should be left unserved as the cold months approach. The Department of Energy will deal expeditiously when extraordinary circumstances might possibly cause temporary spot shortages.

Last April, our primary stocks were down to about 113 million barrels, which were 25 million barrels below the 1978 levels. At that time, I set as a goal the reaching of 240 million barrels in primary reserves. I want to commend the refiners for their cooperation and also applaud all Americans who've cut back on the waste of energy and increased their efforts to conserve energy to reduce overall demand for oil.

I urge continued restraint in energy consumption by all Americans, which will tend to hold down prices and also to prevent spot shortages. I'm also calling upon refiners to take the following steps: first, to maintain heating oil and diesel production at high levels to assure a continued

flow of adequate supplies throughout this winter; also to distribute as much heating oil as possible now to sections of the country which might be visited by early snow and heavy snows or also early freezing of waterways used to transport fuel oil to the places of consumption.

We also want them to increase allocations to marketers, to accelerate deliveries to wholesalers and retailers before the full onset of the heavy heating season during the winter, and to maintain historical credit practices so that consumers will have an opportunity to purchase oil on the same credit terms as they have enjoyed in previous years.

I know that the increase in the price of oil will cause a hardship on some consumers and particularly those on low and fixed incomes. I urge the Congress to adopt without delay the measures I have proposed which will make \$1.6 billion available this winter to assist the poor and the aged and others who are unable to meet the rapidly increasing energy costs. I have today sent the Congress a supplemental appropriations request for \$1.2 billion to achieve this purpose.

With the passage of the windfall profits tax we will have the assurance each year, for the next 10 years, of \$2.4 billion at least to accomplish the purposes of alleviating the heavy financial burden on the low-income families because of increased prices of energy. In addition, I have instructed the Small Business Administration to ensure that there is adequate assistance available to small suppliers who are in need of credit to make purchases for major supplies of home heating oil.

We are doing everything we can to prevent interruptions of supply, to make sure that supplies are adequate, to reduce the heavy burden on the poor families of increased energy costs, and to make sure that distributors have adequate credit to

keep their supplies on hand during the coming months of the winter.

I'd like now to introduce the Secretary of Energy, who will answer questions from the media if you have details which you would like to have explored.

Charlie.

NOTE: The President spoke at 12:05 p.m. in the Briefing Room at the White House. Following his remarks, Secretary of Energy Charles W. Duncan, Jr., held a news conference on the President's announcement.

Federal Emergency Management Agency

Nomination of Frank A. Camm To Be an Associate Director. October 12, 1979

The President today announced that he will nominate Frank A. Camm, of Arlington, Va., to be an Associate Director of the Federal Emergency Management Agency. His area of responsibility would be plans and preparedness.

Camm has been Deputy to the Director of Central Intelligence since 1977.

He was born March 13, 1922, in Fort Knox, Ky. He is a graduate of West Point and holds masters degrees from Harvard University in civil engineering and George Washington University in international affairs.

Camm was commissioned in the Army Corps of Engineers, and early in his career served at the Pentagon and worked on the Manhattan Project. In 1969 he was promoted to brigadier general and took charge of the Corps of Engineers construction on Army and Air Force bases west of the Rockies and on river and harbor and civil emergency work in a similar area. In 1972 he became Assistant General Manager for Military Application in the Atomic Energy Commission.

In 1973 Camm became military director for the civilian Army Materiel Acquisition Review Committee. In 1974 he joined the Army staff to supervise strategic plans and operations, organization, materiel needs, command-control, and help in domestic emergencies.

In 1975 he was promoted to lieutenant general and became deputy commanding general of the U.S. Army Training and Doctrine Command. He retired from active duty in 1977.

Federal Energy Regulatory Commission

Nomination of Charles B. Curtis To Be a Member, and Designation as Chairman. October 12, 1979

The President today announced that he will nominate Charles B. Curtis for reappointment as a member of the Federal Energy Regulatory Commission for a term expiring October 1, 1983. He also announced that he would redesignate Curtis as Chairman of the Commission on confirmation. Curtis has been a member and Chairman of the Commission since 1977.

He was born April 27, 1940, in Upper Darby, Pa. He received a B.S. from the University of Massachusetts in 1962 and an LL.B. from Boston University Law School in 1965.

From 1965 to 1967, Curtis was a staff attorney, then supervising staff attorney in the Office of the Comptroller of the Currency. From 1967 to 1971, he served on the Securities and Exchange Commission as special counsel to the Division of Trading and Markets, Chief of the Branch of Regulation and Inspections, and attorney-adviser (finance).

Curtis was counsel to the House Committee on Interstate and Foreign Commerce from 1971 to 1976, with special emphasis on energy and securities regulation. From November 1976 to January 1977, he worked for the Carter-Mondale transition team as liaison to the Federal Energy Administration.

Curtis was with the Washington law firm of Van Ness, Curtis, Feldman & Sutcliffe from January 1977 until August 1977, when he became Chairman of the Federal Power Commission. He became Chairman of the Federal Energy Regulatory Commission in October 1977, when it was created by the Department of Energy legislation.

Interstate Commerce Commission

Designation of Darius W. Gaskins, Jr., as Chairman. October 12, 1979

The President today announced that he will designate Darius W. Gaskins, Jr., as Chairman of the Interstate Commerce Commission, effective January 1, 1980.

Gaskins has been a member of the ICC since earlier this year. He replaces Daniel O'Neal as Chairman, who has announced his resignation, effective December 31, 1979.

Gaskins, 40, of Washington, D.C., is an economist with regulatory experience. He has served as Deputy Assistant Secretary of Energy for Policy Analysis, Director of the Office of Economic Analysis of the Civil Aeronautics Board, Director of the Bureau of Economics of the Federal Trade Commission, and as a professor of economics at the University of California at Berkeley.

Agency for International Development

Nomination of Genta A. Hawkins To Be an Assistant Administrator. October 12, 1979

The President today announced that he will nominate Genta A. Hawkins, of Huntington Park, Calif., to be an Assistant Administrator of the Agency for International Development (AID). She would replace Jean P. Lewis, and her area of responsibility would be legislative affairs.

Hawkins has been legislative management officer for foreign aid in the Office of Congressional Relations at the State Department since 1978.

She was born September 3, 1940, in Anadarko, Okla. She received a B.A. from the University of Southern California in 1962, and took graduate studies in international relations at the London School of Economics and Political Science in 1962-63.

From 1964 to 1966, Hawkins was director of AID's "Self-Help" program in Abidjan, and from 1966 to 1968, she was liaison officer for U.S. and international voluntary agencies in the Office of the Special Assistant to the Secretary for Refugee and Migration Affairs at the State Department. From 1968 to 1970, she was special assistant to the U.S. Ambassador to France. In 1970 she was secretary of the U.S. Delegation to the Committee of the Conference on Disarmament in Geneva.

From 1972 to 1973, Hawkins was deputy public affairs officer at the regional Office of Economic Opportunity in New York. She took economic studies at the Foreign Service Institute and served as a loan officer in the State Department's Office of Development Finance from

1973 to 1974. From 1974 to 1977, she was chief of the economic/commercial section and AID liaison officer at the American Embassy in Nassau. From 1977 to 1978, she was a Congressional Fellow, serving as legislative assistant to Senator Gary Hart and Congressman David Obey.

Highway Safety and National Traffic and Motor Vehicle Safety Acts of 1966

Message to the Congress Transmitting Two Reports. October 12, 1979

To the Congress of the United States:

The 1966 traffic safety legislation which initiated a cohesive national effort to curb deaths, injuries and accidents on the Nation's highways also requires that annual reports be rendered to the Congress on the administration of the Acts. This is the 12th year these reports have described the problems and the remedies that have been applied to ameliorate them.

The report on motor vehicle safety includes the annual reporting requirement in Title I of the Motor Vehicle Information and Cost Savings Act of 1972 (bumper standards). An annual report also is required by the Energy Policy and Conservation Act of 1975 which amended the Motor Vehicle Information and Cost Savings Act and directed the Secretary of Transportation to set, adjust and enforce motor vehicle fuel economy standards. Similar reporting requirements are contained in the Department of Energy Act of 1978 with respect to the use of advanced technology by the automobile industry. These requirements have been met in the Third Annual Fuel Economy Re-

port, the highlights of which are summarized in the motor vehicle safety report.

In the Highway Safety Acts of 1973 and 1976, the Congress expressed its special interest in certain aspects of traffic safety which are addressed in the volume on highway safety. The annual reporting requirements set forth in the Highway Safety Act of 1978 will be covered in future editions of this report as may be appropriate.

JIMMY CARTER

The White House,
October 12, 1979.

NOTE: The reports are entitled "Highway Safety 1978: A Report on Activities Under the Highway Safety Act of 1966 as Amended, January 1, 1978–December 31, 1978—U.S. Department of Transportation, National Highway Traffic Safety Administration, Federal Highway Administration" (Government Printing Office, 67 pages plus appendices) and "Motor Vehicle Safety 1978: A Report on Activities Under the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act of 1972, January 1, 1978–December 31, 1978—U.S. Department of Transportation, National Highway Traffic Safety Administration" (Government Printing Office, 57 pages plus appendices).

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

October 6

The President met at the White House with Zbigniew Brzezinski, Assistant to the President for National Security Affairs.

The President and his family met with Pope John Paul II in the Residence.

Administration of Jimmy Carter, 1979

October 9

The President met at the White House with:

- Dr. Brzezinski;
- Frank B. Moore, Assistant to the President for Congressional Liaison.

The President met in the Oval Office with Manny Mota, an outfielder for the Los Angeles Dodgers professional baseball team, to congratulate him on breaking the major league record for pinch hits.

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Iowa in the East Room at the White House.

October 10

The President met at the White House with:

- David L. Aaron, Deputy Assistant for National Security Affairs;
- the Democratic congressional leadership;
- Mr. Moore;
- Vice President Walter F. Mondale;
- Gen. Bernard W. Rogers, Supreme Allied Commander, Europe, and Commander in Chief of U.S. Forces in Europe.

The President participated in a briefing by administration officials on energy legislation and the windfall profits tax given for civic and community leaders in the East Room at the White House.

October 11

The White House announced that the President and Mrs. Carter have accepted the invitation of Prime Minister Clark to visit Canada on November 9 and 10. President Carter will be accompanied by a party of senior officials. During the visit the President will address a joint meeting of the Senate and the House of Commons.

The President transmitted to the Con-

gress the 1977 and 1978 annual reports of the Civil Service Commission.

October 12

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown, Hedley W. Donovan, Senior Adviser to the President, Hamilton Jordan, Assistant to the President, and Dr. Brzezinski;
- Mr. Moore;
- Senator William V. Roth, Jr., of Delaware;
- James T. McIntyre, Jr., Director of the Office of Management and Budget;
- Joseph M.A.H. Luns, Secretary-General of the North Atlantic Treaty Organization.

In a ceremony in the Oval Office, the President received diplomatic credentials from Ambassadors John Tzounis of Greece, Enriqueillo Antonio del Rosario Ceballos of the Dominican Republic, Raoul Schoumaker of Belgium, Joshua Luyimbazi Zake of Uganda, and Ricardo Crespo Zaldumbide of Ecuador.

The President participated in a briefing by administration officials on the strategic arms limitation treaty given for community leaders in the East Room at the White House.

**NOMINATIONS SUBMITTED
TO THE SENATE**

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted October 9, 1979

RUTH M. DAVIS, of Maryland, to be an Assistant Secretary of Energy (Resource Applications), vice George S. McIsaac, resigned.

NOMINATIONS—Continued

Submitted October 9—Continued

WILLIAM WALKER LEWIS, of the District of Columbia, to be an Assistant Secretary of Energy (Policy and Evaluation), vice Alvin L. Alm, resigned.

JOHN N. GENTRY, of Virginia, to be Under Secretary of Labor, vice Robert J. Brown, resigned.

Submitted October 10, 1979

ANNE FORRESTER HOLLOWAY, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Mali.

ROBERT B. OAKLEY, of Louisiana, a Foreign Service officer of Class one, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Zaire.

Submitted October 11, 1979

NATHAN J. STARK, of Pennsylvania, to be Under Secretary of Health, Education, and Welfare, vice Hale Champion, resigned.

ANDREW L. JEFFERSON, JR., of Texas, to be United States Circuit Judge for the Fifth Circuit, vice a new position created by P.L. 95-486, approved October 20, 1978.

CECIL F. POOLE, of California, to be United States Circuit Judge for the Ninth Circuit, vice a new position created by P.L. 95-486, approved October 20, 1978.

WILLIAM O. BERTELSMAN, of Kentucky, to be United States District Judge for the Eastern District of Kentucky, vice a new position created by P.L. 95-486, approved October 20, 1978.

PETER HILL BEER, of Louisiana, to be United States District Judge for the Eastern District of Louisiana, vice a new position created by P.L. 95-486, approved October 20, 1978.

L. T. SENTER, JR., of Mississippi, to be United States District Judge for the Northern District of Mississippi, vice Orma R. Smith, retired.

JAMES T. GILES, of Pennsylvania, to be United States District Judge for the Eastern District of Pennsylvania, vice Herbert A. Fogel, resigned.

LUCIUS DESHA BUNTON III, of Texas, to be United States District Judge for the Western District of Texas, vice John H. Wood, Jr., deceased.

HARRY LEE HUDSPETH, of Texas, to be United States District Judge for the Western District of Texas, vice Adrian A. Spears, retired.

NOMINATIONS—Continued

Submitted October 11—Continued

CHARLES FREDERICK CARSON RUFF, of the District of Columbia, to be United States Attorney for the District of Columbia for the term of 4 years, vice Earl J. Silbert, resigned.

TERRY LEE PECHOTA, of South Dakota, to be United States Attorney for the District of South Dakota for the term of 4 years, vice David V. Vrooman, resigned.

**CHECKLIST OF WHITE HOUSE
PRESS RELEASES**

The following listing contains releases of the White House Press Office which are not included in this issue.

Released October 6, 1979

Advance text: remarks at the welcoming ceremony for Pope John Paul II

Advance text: remarks at a White House reception for the Pope

Released October 10, 1979

Advance text: remarks at the annual convention of the Building and Construction Trades Department, AFL-CIO, in San Diego, Calif.

Released October 11, 1979

Announcement: nomination of Andrew Jefferson, Jr., to be United States Circuit Judge for the Fifth Circuit

Announcement: nomination of Cecil F. Poole to be United States Circuit Judge for the Ninth Circuit

Released October 12, 1979

News conference: on the President's remarks concerning home heating oil supplies—by Secretary of Energy Charles W. Duncan, Jr.

**ACTS APPROVED BY
THE PRESIDENT**

Approved October 6, 1979

- H.J. Res. 303----- Public Law 96-80
A joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning October 7, 1979, as "National Port Week".
- S. 721----- Public Law 96-81
Civil Rights Commission Authorization Act of 1979.

ACTS APPROVED—Continued

Approved October 10, 1979

- S. 237----- Public Law 96-82
Federal Magistrate Act of 1979.
- S. 756----- Public Law 96-83
Office of Federal Procurement Policy Act Amendments of 1979.
- H.R. 3920----- Public Law 96-84
An act to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes.
- S. 233----- Public Law 96-85
An act to amend the International Travel Act of 1961 to authorize additional appropriations, and for other purposes.

Approved October 12, 1979

- H.J. Res. 412----- Public Law 96-86
A joint resolution making continuing appropriations for the fiscal year 1980, and for other purposes.
- H.R. 5419----- Public Law 96-87
An act to authorize the Secretary of the Interior to provide for the commemoration of the efforts of Goodloe Byron to protect the Appalachian Trail, and for other purposes.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, October 19, 1979

“Ask the President”

*Remarks During a Telephone Call-out
Program on National Public Radio.
October 13, 1979*

ANNOUNCER. From National Public Radio in Washington, this is “Ask the President,” a live, 2-hour broadcast with President Jimmy Carter. President Carter will be speaking with Americans by telephone from the Oval Office. The questions will not be screened before they are put to the President. For technical reasons, listeners cannot call in to the White House or National Public Radio. NPR will call out to questioners. For several weeks now, on radio, television, and in newspaper ads, Americans have been notified of this broadcast. They were invited to send NPR their names and phone numbers if they wished to ask Mr. Carter a question. The names are being selected at random, and National Public Radio staff members are now placing the calls.

Here now in the Oval Office with President Carter, NPR’s Susan Stamberg, your host for “Ask the President.”

MS. STAMBERG. Good afternoon, President Carter. It’s good to have you with us.

THE PRESIDENT. Thank you, Susan. I’m looking forward to it.

MS. STAMBERG. This is a format that you enjoy a lot, isn’t it, this radio-telephone business?

THE PRESIDENT. It is. I’ve not only done it here in the Oval Office, but for instance, when I went down the Mississippi River on a paddle-wheel steamboat—

MS. STAMBERG. That’s right.

THE PRESIDENT. —we stopped and had a telephone call-in show. And in addition to that, whenever I have a chance, I go out into the country and, with several hundred or sometimes several thousand people present, take questions from the audience in an unrehearsed way. You get a lot different kind of question that relates more directly to people than just the ordinary political questions, very good—

MS. STAMBERG. Do you think they are as intense—the questions that you get from citizens—as the sort that you would get from the Washington press corps?

THE PRESIDENT. Without exhibiting prejudice, I think they’re much more intense and much more heartfelt. It’s a rare thing for a citizen to have a chance to ask a question directly to a President, and quite often that remark or that question is the most important thing in a person’s

life, at least at that moment. Sometimes there's just a friendly exchange, you know, people saying, "Glad to talk to you, Mr. President, wish you well." But ordinarily the questions asked are extremely important to that person.

Ms. STAMBERG. Well, let's get to some of those questions.

Before we take the first call, I have a few cautionary notes to make to our callers. Please, folks, keep your questions short, no speeches, no filibustering, or I'm going to have to cut you off. And the reason for this is not that I'm rude, it's that we want to get a chance to have as many of you on the line as possible. Also, when you are speaking with the President, stay on the phone as he is giving you his answer. In case you have any followup questions that you want to ask, you'll have that opportunity.

All right, Mr. President, the first call is from David A. MacIver, in Springfield, Massachusetts. Go ahead, Mr. MacIver.

INCOME TAX REFORM

Mr. MACIVER. Good afternoon, sir.

THE PRESIDENT. Hello, David.

Mr. MACIVER. I'd like to ask about possible income tax reform and the guides to the inequities between filing as a married person versus a single person. Being married and with two incomes, presently we pay more than two comparable single persons would. Also, I'd like to know why a certain amount of interest couldn't be earned before taxing it, as an incentive to the small saver.

THE PRESIDENT. Thank you, David.

We've attempted, as you know, since I've been in office, to have some income tax reform measures passed and have been partially successful. One of the major issues that has been addressed, on which I've talked with the chairman of

the Finance Committee in the Senate and the Ways and Means Committee in the House, is to remove that inequity between a married couple and two individuals who are single. Now there is a penalty against marriage, in effect, and I think it would be a good step to remove that inequity.

We at this time are concentrating on controlling inflation, which is our biggest single economic threat, and we are not working on any income tax reductions for the time being.

In the future, if we do go to an income tax reduction proposal, one of the considerations would be to encourage saving, as you've described, and also to encourage investment to make sure we have additional jobs available in the future. Another one is to provide more equity or fairness among people who have to pay income taxes, and of course, another one would be to reduce inflation itself. There are some types of income tax reductions which could contribute to reduced inflation.

We've been successful in reducing income taxes since I've been in office. I think next year, for instance, the income tax reductions that we've already initiated will amount to about \$40 billion, and at the same time, we've cut the Federal deficit down by \$36 billion. So, we are making some progress, still have a long way to go.

The suggestions that you made are very interesting and, I think, good ones.

Ms. STAMBERG. Mr. MacIver, anything else that you wanted to ask?

Mr. MACIVER. No. Thank you very much.

Ms. STAMBERG. Good. Thank you so much.

The next caller, Mr. President, is Mrs. Mary Tingle, in Louisville, Kentucky.

Go ahead, Mrs. Tingle; you're on the line with President Carter.

PRAYER IN SCHOOLS

MRS. TINGLE. President Carter, first, we love you, your family, and Miss Lillian. And the question is, our Nation was built on trust in God, and a lot of our young people don't know Him. And why can't we have prayer in school?

MS. STAMBERG. Mrs. Tingle, we had a little bit of trouble hearing you.

THE PRESIDENT. I think I understood her. She said, "Why don't we have prayer in school?"

MRS. TINGLE. Yes.

THE PRESIDENT. Mary, as you know, I'm a Christian and a Baptist, and I believe very strongly in the separation of church and state, which is guaranteed under our Constitution.

MRS. TINGLE. I know.

THE PRESIDENT. I am in favor of voluntary prayer in school and the right of each person to worship God in his or her own way at any time one is motivated. I pray frequently in my own daily life as President, more so now than I used to, I might say.

I don't believe, though, that it's proper for a government entity, either the Federal Government or local government or even a school board, to require that children worship in school. And sometimes even a small child would be embarrassed if, for instance, there are different faiths represented in the classroom. Sometimes the children don't worship God at all; sometimes they might be Jewish or Christian, sometimes Catholics and Protestants, sometimes in our modern-day society even those who are Moslems. And I think that to mandate or to require a person to worship in school is not proper.

The Supreme Court has ruled on this,

and the Supreme Court ruling is basically in accordance with what I've just described to you as my preference.

MS. STAMBERG. Thank you very much, Mrs. Tingle.

The next caller is Mrs. Annette Lantos, and she's calling from Hillsborough, California. Good morning. It's morning for you, isn't it, Mrs. Lantos? You're on the line with President Carter.

RAOUL WALLENBERG

MRS. LANTOS. Mr. President, when my husband and I were youngsters in Hungary during World War II, our lives were saved through the intervention of a Swedish diplomat named Raoul Wallenberg. We later learned that Mr. Wallenberg, who also saved the lives of thousands of other Jewish people like us, was acting in behalf of the American State Department. But unfortunately, Mr. Wallenberg was arrested at the end of the war by the Russians and has been in a Russian prison ever since. And although the Russians claim that he died, there is an overwhelming amount of evidence which indicates that he's still alive in a Soviet prison. Could you do something, Mr. President, to help him get released?

THE PRESIDENT. There's a limit to what I can do. We have inquired into the Wallenberg case with the Russians, both when I was in Vienna this year with President Brezhnev and other Russian leaders, and through the Soviet Ambassador here in Washington and also our Ambassador in Moscow. On occasions, when Secretary Vance has met with Foreign Minister Gromyko, we've also inquired about the Wallenberg case, along with the cases of many others.

The Soviets maintain their claim that Mr. Wallenberg is no longer alive, but we

are not forgetting about this case and will continue our efforts.

MRS. LANTOS. Thank you very much, Mr. President. I hope you will.

MS. STAMBERG. Thank you, Mrs. Lantos.

The next caller is in Jacksonville, Florida. It's Mrs. Carol A. Whitcomb. Go ahead, Mrs. Whitcomb, you're on the line with President Carter.

ADDRESSING THE PRESIDENT

MRS. WHITCOMB. President Carter?

THE PRESIDENT. Good morning.

MRS. WHITCOMB. I just want to say that this is really an honor to talk to you, and I'm so thrilled. I want to tell you also, I went down to Tampa on August 30 to see you, and I really enjoyed your speech. But my question is really a complaint about the news media, how they always tend to call you Mr. Carter. And to me, I think they should show you the respect that is due to you by calling you President Carter. And that is really the only thing I have to say except that I just wanted to talk to you.

THE PRESIDENT. Well, thank you very much, Carol. I hope I can meet you personally sometime.

MRS. WHITCOMB. I hope so, too, President Carter. And also, is there any way I can get a letter saying that I talked to you, so I can have it to show to my children?

THE PRESIDENT. Well, there are literally hundreds of thousands of people listening to us, and I will also write you a letter.

MRS. WHITCOMB. Thank you, sir, I really appreciate it.

THE PRESIDENT. Let me comment on your comment, first of all, before we quit. I hope you don't forget to go to the caucuses today; everybody in Florida ought to participate.

MRS. WHITCOMB. Yes, sir, I saw that.

THE PRESIDENT. Good. And the second thing is that I believe we ought to have the President addressed by "Mr." It's perfectly all right.

When Washington became the first President, there was a move made to give him some sort of title, and he objected to this. And there was some doubt about how he should be addressed during his term of office, and also John Adams. When Thomas Jefferson became President, he insisted that everyone call him "Mr. Jefferson."

And so, I don't have any objection to that. The President ought not to be honored any more than just being able to hold the office, and so "President Carter" or "Mr. President" is also very good. And when I drive down the streets—for instance, recently in Tampa for a townhall meeting—and the children and everybody yell "Hi, Jimmy," I also am thrilled by the friendship. But I think "Mr. Carter" or "President Carter" are both appropriate.

MS. STAMBERG. Thanks very much, Mrs. Whitcomb.

The next call comes from Jerry Johnson, and he's calling from Flint, Michigan. Go ahead, Mr. Johnson, you're on the line with President Carter.

STRATEGIC ARMS LIMITATION

MR. JOHNSON. Good afternoon, Mr. President.

THE PRESIDENT. Good afternoon, Jerry.

MR. JOHNSON. How are you?

THE PRESIDENT. Fine.

MR. JOHNSON. Okay, I have a question here concerning the SALT treaty.

THE PRESIDENT. Okay.

MR. JOHNSON. All right. If it's rejected by the Senate—and I know there's doubts right now—what are your future options

concerning arms reductions? And is verification really the chief obstacle to its ratification right now?

THE PRESIDENT. Jerry, if the SALT II treaty is rejected, this would be a severe blow to our country, to our Nation's security, and to the prospects for world peace. SALT II is a treaty that's been negotiated over a 7-year period by three different Presidents—two Republicans and myself as a Democrat. It's a carefully negotiated treaty that is in the best interest of our own country and also, I might add, in the best interest of the Soviet Union and all those who want peace on Earth.

We have adequate means to verify compliance with the SALT II treaty. We do not depend on trusting the Soviet Union. We have our own national technical means that we can use to make sure that the Soviets do honor every provision in the SALT II treaty. If we should detect in the future—and we have that ability—any evidence that the Soviets are violating the treaty, then we have the right under the terms of the treaty itself to terminate the treaty at that moment.

Another thing that I'd like to point out to you are the consequences of rejection. It would end, really, a 30-year process toward controlling nuclear weapons throughout the world, particularly in our country and the Soviet Union. If that was ended, it would be very difficult to recommence it, and if we did start another 2- or 3- or 7-year negotiation, the chances are very high that the final product would be almost identical to what we have negotiated this time.

In addition, a lot of countries around the world—our allies, like those in Europe, Japan, the less developed countries, non-aligned nations like India, for instance—look upon us and the Soviet Union as having a major responsibility to negotiate successfully. We have negotiated success-

fully. The Soviets have, in effect, adopted the treaty, because they don't have democratic processes, but we still have to get the approval of the Senate.

If the Senate should vote no on SALT, this would be a clear signal to the people all over Earth that our country is not indeed committed to the control of nuclear weapons adequately, and the Soviets would be given a tremendous and undeserved propaganda weapon to use against us. They would say, falsely, that they are a nation committed to peace and the control of nuclear weapons, but that we, because the Senate rejected SALT II, are a nation that's not inclined toward peace and the control of nuclear weapons. That would be a false claim, but it would be a very powerful political weapon that the Soviets could use.

What I want to do is to maintain equivalency and equality of nuclear capability, reduce sharply in the future atomic weaponry, and then compete with the Soviet Union on a peaceful basis, because we've got all the advantages on our side—democracy, freedom, respect for human rights, basic ethical standards, deep religious commitments. On a peaceful basis, we can compete and win. We don't want to compete on a warlike basis, but we're going to stay strong enough to deter any potential aggressor from daring to attack us. SALT II would accomplish all these worthy goals.

MS. STAMBERG. Mr. Johnson, does that answer your question?

MR. JOHNSON. Yes, it does.

MR. PRESIDENT. I'd like to know if you're coming back to Flint next—well, I hope you do come back to Flint next year. I remember you were here in '76.

THE PRESIDENT. I hope, too, yes.

MR. JOHNSON. Yes. Thank you.

MS. STAMBERG. Thank you, Mr. Johnson.

President Carter, Senator Frank Church has said that he wants to attach an understanding to the SALT treaty which, in effect, says it won't go into effect until you can provide him with some assurances that that Soviet troop problem in Cuba has been solved. Do you think that's feasible? Is that a reasonable request?

THE PRESIDENT. I don't think it's necessary. My own belief is, Susan, that the SALT II treaty ought to be accepted or rejected on its own merits. Does it indeed enhance the security of our Nation? It's obvious to me that it does. Does it indeed contribute to world peace? And I think there's no doubt that it does. Is the treaty fair? The answer is yes. Can it be verified? The answer is yes.

The Senate will go into the debate on SALT II, hopefully, around the first of November, and I don't have any doubt that there will be some requests by the Members of the Senate for clarification of its terms or maybe for some requirements on us in the future. Those will be carefully considered, but my own judgment now is that those kind of amendments and so forth are not needed. If they come, we'll just have to assess them on an individual basis.

Ms. STAMBERG. Thank you.

Before we take the next question, I want to remind our listeners that what you're hearing is a live, 2-hour telephone program with President Carter from the Oval Office at the White House. National Public Radio welcomes your participation, but, alas, you cannot call us; we have to do the phoning out to you. For some weeks now, citizens have been sending NPR cards with their names, addresses, and phone numbers on them, and the cards are now being chosen at random. The calls are being placed from Washington. So, please don't call us; we'll call you.

The next call is from Mrs. Jeanette Lindstrom in Sun City, Arizona. Go ahead, Mrs. Lindstrom.

U.S. MARINES IN GUANTANAMO

Mrs. LINDSTROM. President Carter.

THE PRESIDENT. Yes, Jeanette.

Mrs. LINDSTROM. Yes. I'm so thrilled to be talking with you. I'm just getting over a bad cold, so you'll have to excuse my scratchy voice.

THE PRESIDENT. It sounds beautiful. And I'm glad to talk to you, too.

Mrs. LINDSTROM. I'm so thrilled to be talking with you; I'm so excited.

I'm concerned about the Marines in Guantanamo. I lost a brother in World War II. He was a Marine, and this has got me quite upset about the Marines being down there. Can you assure me, Mr. President, that they are not there for any other purpose than what the media is telling us?

THE PRESIDENT. Yes, I can assure you of that. We have a perfect right to be in Guantanamo and to have a military base there. This is in accordance, Jeanette, with a 1903 treaty. This treaty was reconfirmed by the Cuban Government in 1934, and after Fidel Castro became the head of the Cuban Government, he reconfirmed to us the right of the United States to have this small military base. From time to time, as a matter of routine military maneuvers, we've put in more troops there for a few days or a few weeks and then take them out just to practice on military affairs, as is common for all nations on Earth.

There is no prospect for a war or for conflict or for combat. It's a very safe thing to do. We're going to stay in Guantanamo in accordance with our negotiated rights, and there need be no concern on your part.

MRS. LINDSTROM. Oh, thank you, and I feel better about that. And God bless you, President Carter.

THE PRESIDENT. Well, I hope your cold's better soon.

MRS. LINDSTROM. Thank you.

MS. STAMBERG. Thank you, Mrs. Lindstrom.

The next call is Mr. Adrian Boles, and he's on the line with us from Madison, Wisconsin. Go ahead, Mr. Boles.

ENERGY AND THE NATION'S ECONOMY

MR. BOLES. Good afternoon, Mr. President.

THE PRESIDENT. Hello, Adrian.

MR. BOLES. The reason why I'm calling is, you like to hear what people feel like. And when I go to a bank, the interest rates have gone up, and when I go to the food store, that has gone up. And, you know, inflation has really affected the country, especially when it comes down to me personally. And, you know, I've had loans on my car—and luckily, I got them years ago, because I'm still paying for the car. But the problem is that everything has gone up, Mr. President. And I know you're trying to do the best you can, but, you know, when you have—I think it's a Democratic Congress, I believe, you're working with?

THE PRESIDENT. That's correct. Adrian, this is one of the biggest responsibilities that I have and the biggest problems that I have as President.

I'm the fourth President now who's tried to deal with excessive inflation. Most of the inflation is uncontrollable, at least in the short term, and a great portion of it has been caused by the, I think, unnecessary and excessive increases in energy costs put on us by the OPEC countries, both in 1973, when they quadrupled the price of oil, and even in this last 8 or 9 months,

when they've increased energy prices or oil prices by 60 percent. For instance, if we didn't have energy, if we could remove the energy part of the inflation picture, then during this past summer, say, June, July, August, we would have the same inflation rate that we had a year ago or 2 years ago. And now about 4 percent of the inflation rate is caused by these increases in oil prices.

What we're trying to do is to deal with inflation on a long-term and consistent and persistent basis. We're not going to back down on it. Obviously, a major unmet need is to have an energy policy in our country that reduces dependence on imported oil.

We not only import about 8½ million barrels of oil from foreign countries every day, but we import along with it inflation and unemployment. Next year we'll send overseas \$70 billion in American money to pay for oil that we are importing. That's why we've needed so long and the Congress is now working so hard on getting a national energy policy. This would depend primarily on conservation, and we're trying to encourage every American to cut back on the waste of energy of all kinds, to save energy.

We're going to shift toward the kinds of energy in our country that's so plentiful, for instance, solar power and replenishable supplies of energy that come from wood and growing plants—gasohol is one evidence of that—geothermal heat underneath the surface of the Earth that we've just begun to tap. We've got a lot of coal that would last six or seven hundred years. We're going to increase the use of it and have it in such a form that it wouldn't create low-quality air or violate our environmental standards.

These kinds of things will let us cut back on the future dependence of imported oil, I would say at least two-thirds

by the year 1990, and at the same time help to control inflation.

There's no way that we can avoid, at this time, having high interest rates, because interest rates go with inflation, and the best way to get the interest rates down is to reduce inflation.

One other comment I might make very quickly is that we've tried to do it through Government action as well. For instance, we've cut the Federal budget deficit since I've been in office more than 50 percent, by \$36 billion. We have about 20,000 fewer Federal employees now than we had in 1976, in spite of the fact that we are delivering more services. And we've cut down the portion of our gross national product, everything America produces, that's being collected and spent by the Federal Government. These kinds of things in the long run will have a good impact on inflation.

So far, we are dealing with it on a broad base. I believe that the inflation rate will turn downward during the end of this year and, I hope, continue downward in the years ahead.

MR. BOLES. Okay. I like that answer, Mr. President, because, you know, like I said, my apartment where I live is insulated. So, that has really cut down the cost as far as heating. And a lot of people are saying, well, that costs too much and this and this. But you've got to have that because it saves a lot on heating bills.

THE PRESIDENT. I think in the long run our awareness that energy supplies might be short and the prices very high will encourage Americans to do what we've always needed to do, that is, stop waste of energy and have conservation efforts on our own.

I hope that every American listening, by the way, to my voice now, every family will kind of get together before the day is over and decide how that particular family can cut back on the waste of en-

ergy in their homes, on their jobs, or traveling. That will be the biggest single one thing that we can do to control inflation in the future.

MR. BOLES. Just like me, personally, I will drive to work every day—and I don't live too far from my job—but in the wintertime I will drive, too. But if there was some mass transportation, I wouldn't have to depend on my car. We have buses. But when I leave at 1 o'clock in the morning to go home, then there's no buses anymore, and I don't want to take my chances.

THE PRESIDENT. That's a good point. I hope you've got more than one person in your car when you go to work.

MS. STAMBERG. Mr. Boles, thank you so much for joining us today. We appreciate it.

President Carter, that sparks a question from me, and that is, there are nations in Europe, also Japan, where they're paying \$2 a gallon for gasoline.

THE PRESIDENT. Or even more, \$2.70.

MS. STAMBERG. Or more, yeah. But their inflation is lower than ours and their unemployment rate is lower than ours. Why can't we do that?

THE PRESIDENT. Let me tell you why. In the past our gasoline prices have—say, just even in recent months, have been 90 cents. If gasoline prices all over the world go up 10 cents a gallon, and ours go from 90 cents to \$1, that's about an 11-percent inflation rate. Are you with me so far?

MS. STAMBERG. Sort of.

THE PRESIDENT. But say in a foreign country—Italy or France—if the price of gasoline to begin with was \$2.40 and the price only went up 10 cents, then the inflation rate in percentages would be much, much less, like 3 percent or less. So, since their prices have always been so high on energy to start with, and ours have been much lower, any increase in the price of

energy shows up much greater in our inflation rate than it does in other countries around the world.

I represent and lead, really, two nations, as far as energy is concerned. We have the greatest energy-consuming nation on Earth, and our Nation produces as much energy as any nation on Earth. So, we are a consumer and a producer.

In the past, the Congress has been influenced very heavily by the oil producers, the oil companies, and only since I've been in office, the last few months, have we seen consumers having an equal voice in the Congress. And my prediction to you is that by the end of this year, when the Congress adjourns, we will have on the law books of our country a comprehensive energy policy that will really benefit our Nation in the future.

Ms. STAMBERG. The public sometimes gets the feeling, though, that it's taken an awfully long time for this to come through.

THE PRESIDENT. It has. We've never had it before.

Ms. STAMBERG. Why is that?

THE PRESIDENT. Well, the longer I've been involved in the energy question, the more I can understand why my predecessors in this office didn't try to do anything about it. It is a losing proposition politically.

When I spoke to the country in April of 1977 in an evening television address, I told them that just opening up the energy problem would probably cost me 15 points in the public opinion polls. I underestimated the problem; it's cost me a lot more than that, because the oil-producing States think we have hurt the oil industry, and many consumers think we have not done enough for them.

But just to address this problem and to make Americans realize that we do have a problem and start cutting down on the unnecessary oil imports will help every American in the future. And it also en-

hances our Nation's security, because we are subject now to blackmail, and we are subject to having a major portion of our energy supplies interrupted in countries over which we have no control. And obviously, every time they jack up prices, the more oil we're importing, the more it costs American consumers.

So, we'll shift toward more conservation, more use of American energy of all kinds. That's the best approach.

Ms. STAMBERG. Let's get to the next question from a listener, although it would be nice to continue chatting. Robert O'Connor is on the line from Elkader, Iowa. Am I pronouncing Elkader properly, Mr. O'Connor?

MR. O'CONNOR. That's Elkader, Iowa; that's in northeast Iowa.

Ms. STAMBERG. Oh, thank you very much.

ENERGY RESOURCES AND CONSERVATION

MR. O'CONNOR. Good morning, Mr. President.

THE PRESIDENT. Good morning, Robert.

MR. O'CONNOR. And I appreciate you calling me.

Basically, I sort of want to continue a little bit on the line of the energy program. It seems that the part of the program or the general trend is towards trying to satisfy America's energy addiction, rather than curbing it. It seems like you're continuing to advocate the use of nuclear power, contrary to the campaign promise, and also, recently, this inefficient and perhaps environmentally dirty synthetic fuel program. And I was wondering—it all seems to try to be towards avoiding the purchasing of foreign oil, but it seems like the area that's still, you know, in the end result is still being avoided is the use of renewable fuels. And some of these conservation measures don't

seem to actually be happening, and I'm just wondering, why hasn't a greater emphasis been put on these things?

You know, maybe I'm being impatient or something, but it seems like more of an emphasis can be put on some of these other things, rather than synthetic fuel, which seems to be oriented just towards trying to keep it just in America. And, you know, I think it's okay to use some of the foreign fuels, but why not put more emphasis on conservation and renewable fuels right here, that we have?

THE PRESIDENT. Well, our number one reliance on correcting the energy problem, Mr. O'Connor, is conservation. That's the cheapest and best way to cut down on imports. And as I said earlier on this program, I hope that every American will do everything possible within one's own life to be more efficient in the use of energy. The Government's doing its share as well. And the things we've already done will save about 2½ million barrels of oil per day by 1990.

In addition to that, we are trying to shift toward more renewable supplies of energy. Solar power is one that you mentioned, and I'll comment on that specifically. We've set as a goal for ourselves by the end of this century to have 20 percent of the total energy used in this country coming directly from the Sun. This is a tremendously ambitious goal, but I believe that we can meet it.

In order to do that, for instance, we are setting up a solar bank that will give loans to people who will take actions to increase their own use of solar power. We've put into effect tax credits for families throughout the country if they will insulate their homes, for instance, or put in solar heat. They can get tax credits and reduced income tax payments because of that.

We have, in addition, a major move toward using the kinds of growing plants

that can produce energy and be replenishable every year, deriving their substance indirectly at least from the Sun. For instance, I was in Georgia recently at a seminar at Georgia Tech, where we discussed innovative ways to resolve our energy problems. It was pointed out that Georgia's growing plants produced twice as much energy every year, just 1 year's growth, as the entire State uses. And we now waste throughout our forests in this country about 30 percent or 35 percent of the total tree that grows. And this kind of waste can be used in the future. Burning wood is obviously the most well known way, in stoves.

MR. O'CONNOR. I burn wood myself.

THE PRESIDENT. So, these are the kind of things we are pursuing.

As a last resort, we'll have to have some additional supplies of energy. And coal is not, in some forms, a clean-burning product, and so the synthetic fuels program is designed primarily to get clean-burning fuels, like gas and oil, out of coal and shale, which is of tremendous importance in our country. And nuclear power is an integral part of our energy supplies, too. But I think we ought to minimize nuclear power and, as I said during the campaign, have it as a last resort, just to make up the difference between what we can produce and save from other sources compared to what we totally need.

MS. STAMBERG. Thank you, Mr. O'Connor, for posing your question to President Carter.

A quick reminder that you're listening to "Ask the President" on National Public Radio, and our callers are being selected at random from postcards sent in over the past few weeks. Please do not call National Public Radio, don't call the White House, and don't call your local public radio station. If your card has been chosen, we'll do the calling, and we'll call you.

We have just called, and on the line with us now, a 10-year-old named Shanie Ridge in Colorado Springs, Colorado. Shanie, are you there? Go ahead. The President's on the line with you.

VIEWS ON THE PRESIDENCY

MISS RIDGE. Mr. Carter?

THE PRESIDENT. Yes, Shanie.

MISS RIDGE. Do you like your job?

THE PRESIDENT. Yes, I like it very much. I like the White House and the life there; so does Amy, by the way. And I like my job. It's the best job in the greatest country on Earth.

MISS RIDGE. That's what you think?

THE PRESIDENT. That's what I think. Would you like to be President some day?

MISS RIDGE. Oh, I don't know, I guess so.

THE PRESIDENT. Well, good. You might have to run against Amy; I don't know.

INFLATION

MISS RIDGE. And my other question is, what could I do to help stop inflation?

THE PRESIDENT. I don't know if you've been listening to the program or not, Shanie, but I think one of the things is that you could help to save energy, and around the house you could observe ways to keep doors closed, to make your parents insulate their home better to prevent heat from escaping. You could keep the thermostat set fairly high during the summer and low during the winter so you don't waste heat. You could cut off electric lights and other electrical appliances when they're not in use.

And when you're driving along the road with your parents, you could certainly make sure they obey the speed limit. And I think that when your father or your mother go to work, for instance,

you could try to get them to join in a carpool so that one automobile could be filled before it rides up and down the highways with just one person in it.

We're doing all we can on this end, but there are a lot of things that a 10-year-old can do. Around the school, you ought to get together with other kids in your class, for instance, and try to share ideas with each other about what you can do in addition to those things that I've already described.

As far as buying things is concerned, if you see a product that's going up in price too much or if your mother sees one going up in price, shop around and try to get lower priced products that give you the same service, like food or clothing and so forth. Good shopping, I think, will also help to control inflation.

I wish you well. It's really good to see a 10-year-old interested in public affairs. And you can help me as much as anyone in this country can to cut down on energy waste and hold down inflation.

Ms. STAMBERG. Thank you, Shanie, for your question.

Mr. President, the next caller is Michael Del Coro, and he's calling from the Bronx, New York. Go ahead, Mr. Del Coro.

SOLAR ENERGY

MR. DEL CORO. Hello, Mr. President.

THE PRESIDENT. Yes, Michael.

MR. DEL CORO. I'd like to ask you, do you believe in solar energy?

Ms. STAMBERG. Mr. Del Coro, would you say your question again, please? We didn't understand you.

MR. DEL CORO. Do you believe in solar energy?

THE PRESIDENT. Solar energy—yes, very much so. I think people forget how much solar energy we already use. A great

portion of the heat that we use in homes, for instance, comes through the windows and through the walls and through the roof of homes, even if you don't have a solar collector, as such, on the roof. And, of course, the Sun provides ultimately all the heat that we use on this Earth, either by stored, Sun-produced products in the past that make oil and coal or through the generation of hydroelectric power by water that's been taken to the mountains by Sun's evaporation, and so forth.

So, I believe very deeply in solar energy and believe that in the future, Michael, that we can use a lot more of it.

POTENTIAL WARS OVER OIL

MR. DEL CORO. Yes, I am—[*inaudible*]*ible*]—to ask you about that. Now, the second question is this, that is there any possibility of any war for oil?

MS. STAMBERG. Any war for oil.

THE PRESIDENT. I don't believe so. Obviously, there's always a possibility that other nations would try to interrupt supplies of oil for us. We're trying to improve our Nation's security by cutting down on the amount of oil that we have to import and become more self-reliant, that is, produce more oil of our own.

I think that in 1973, it was, some of the Arab countries and OPEC countries had an embargo against our country and did not send us oil for a while. I don't believe that's likely in the future. We have a much better relationship now with those countries than we did in the past. And I believe that the prospect for war over oil would be very, very remote.

MR. DEL CORO. Okay. Now, this is—

MS. STAMBERG. Mr. Del Coro, I'm so sorry, I'm going to have to interrupt you. I think two questions is about the limit for each caller. Thank you very much, Mr. Del Coro.

THE PRESIDENT. Good luck to you.

MS. STAMBERG. We're going to go on to the next call. It's from Samuel Scott Rosenberg, in Key Biscayne, Florida. Go ahead, Mr. Rosenberg.

ALCOHOL FUEL

MR. ROSENBERG. Hello, Mr. President.

THE PRESIDENT. Yes.

MR. ROSENBERG. Greetings from Key Biscayne. How are you today?

THE PRESIDENT. Just great.

MR. ROSENBERG. Good. I'm real excited to be able to speak to you today, because I have good news, rather than a question regarding our energy, which is really in response to what's going on. It would take about 30 seconds to tell you. May I?

THE PRESIDENT. Yes, it suits me fine.

MR. ROSENBERG. Sure. One of the ways, you know—on the farm alcohol stills in America more and more are showing us that 100-percent alcohol is used as a motor fuel in today's engines, as well as the recent announcement by Brazil to agree to produce 650,000 alcohol-powered cars by 1982. In fact, their President said it's their key weapon in the fight against rising oil prices.

Now, I myself, personally, have a simple, coordinated strategy not only to bring down the cost of fuel to under \$1 at the pump, but obviously it would cool inflation as well. And, frankly, I'd like to share it with you.

As we all know, Thanksgiving time is here, and we really have to take stock and be thankful we are Americans. We're the envy of the world. There's nothing that we can't do. We gave the world electricity, lights—

MS. STAMBERG. Mr. Rosenberg.

MR. ROSENBERG. —telephones, airplanes, and if that doesn't seem unreal, we even put a man on the Moon. And then—

Ms. STAMBERG. Mr. Rosenberg, excuse me, I'm going to have to interrupt. I think you're either filibustering or making a speech; I'm not sure which. Could you get to the question for President Carter, please?

Mr. ROSENBERG. Yes, I will. What I was simply saying is that rather than a question, I would like to just advocate more alcohol fuel, and I have a plan laid out, blueprints and books. So, as I say, I don't want to filibuster, but I would like to meet with you or your people in the White House and show you what it is I'm talking about.

THE PRESIDENT. Mr. Rosenberg, send me a letter up here and mark on the front of the envelope that you are one of those who called me on the telephone. I get about 50,000 letters a week, and I want to make sure yours gets to me personally. And I'll refer you to someone up here who can discuss it with you, okay?

Mr. ROSENBERG. Yes, sir. And by the way, prior to your becoming President, I was one of your rooters for you, and I had gotten a letter from one of your top people in Washington, which I also have, as well as having been invited to your Inauguration.

THE PRESIDENT. Good luck to you, and thank you for your friendship.

Mr. ROSENBERG. Thank you, sir.

Ms. STAMBERG. Thank you very much, Mr. Rosenberg.

President Carter, next on the line, Judy Caufeld, in Pittsburgh, Pennsylvania. Go ahead, Ms. Caufeld.

EQUAL RIGHTS AMENDMENT

Ms. CAUFELD. President Carter.

THE PRESIDENT. Yes, Judy.

Ms. CAUFELD. I've always been a supporter of the equal rights amendment.

THE PRESIDENT. So am I.

Ms. CAUFELD. What type of positive action are you going to take to ensure its ratification by June of 1982?

THE PRESIDENT. I'll work as a partner with you, Judy, and others around the country who believe that women do need equal rights and deserve them. My wife is also very active in the equal rights amendment movement, and of course, my daughter-in-law, Judy, my oldest son's daughter [wife], travels nationwide to work with equal rights proponents to try to get those reluctant States to ratify the amendment.

So, I'm a partner with you. I believe in it, and I believe that your question and my answer might help to convince some of those State legislators who still are not convinced that the equal rights amendment is best for our country as well as, of course, best for all women.

Ms. CAUFELD. Okay. Thank you.

THE PRESIDENT. Thank you.

Ms. STAMBERG. Thank you, Judy.

Mr. President, I wonder what you think of the kind of economic boycotting that's going on against cities and States which are not getting behind the ERA.

THE PRESIDENT. Well, you know, I can't be a proponent of boycotts. But I believe that the political season is going to come this year, and if women who suffer most from hiring discrimination, wage discrimination, would let their voices be heard by State legislators who will make the judgment or decision, that's the best approach.

Quite often working women are not as highly organized or as highly motivated as some of the nationwide women's groups, and I think that when women who do have a job and who see the discrimination against them become aroused, they prevail, and this is the best approach to it.

MS. STAMBERG. Good. Let's take another call now. This is from Elizabeth Gamble, in Everett, Washington. Mrs. Gamble, go ahead, please; you're on the line with President Carter.

PRESIDENTIAL TERMS OF OFFICE

MRS. GAMBLE. Hello, Mr. President.

THE PRESIDENT. Hello, Elizabeth. Go ahead.

MS. STAMBERG. Go ahead.

MRS. GAMBLE. Hello, Mr. President.

THE PRESIDENT. Hello, I hear you very well.

MRS. GAMBLE. I'm honored to be called. Now my question is this: What do you think of one 6-year term for the Presidency instead of two 4-year terms? Under the present law, a President is forced to spend time and energy in the first term working for reelection—unfortunately, this year, sooner than usual.

THE PRESIDENT. I agree with you.

MRS. GAMBLE. Good.

THE PRESIDENT. Since I've been in this office, I've become more and more convinced that one 6-year term would be better. We have too much of an emphasis by the news media, in my opinion, on political motivations of a President, almost as soon as a President takes office.

And I've seen and talked to and studied the situation where other Presidents in countries in this hemisphere, like Mexico and Venezuela, for instance, have one 6-year term. I think they're much more likely not only to act in a nonpolitical basis or a nonpartisan way but also to have the recognition among people, including the news media, that when they do take a difficult stand or do make a public statement or take action, that it is not politically motivated.

And I think the injection of politics so early in the election year—already, as a matter of fact—is unfortunate.

MRS. GAMBLE. Well, that is my opinion. Do you think that there's any possibility of there ever being—the law ever being changed?

THE PRESIDENT. I think it's quite remote, because it requires a tremendous and concerted effort all over the Nation to make a change in the U.S. Constitution. And I don't see the issue being so sharply of interest to American people that this high motivation would ever be marshaled any time in the near future.

MRS. GAMBLE. Well, I don't wish to take up too much time, but before closing, I wish to say I think that Rosalynn is the ideal American woman.

THE PRESIDENT. I know she's the ideal wife. Thank you very much.

MRS. GAMBLE. Thank you, Mr. President.

MS. STAMBERG. Thank you, Mrs. Gamble.

On the line now, from Fairbanks, Alaska, Mr. President—

THE PRESIDENT. Very good.

MS. STAMBERG.—is John Jacques. Go head, Mr. Jacques.

ALASKAN PUBLIC LANDS

MR. JACQUES. Yes. Good morning, Mr. President, how you doing this morning?

THE PRESIDENT. Good morning. I hear you perfectly well. I'm glad to hear from you.

MR. JACQUES. Well, Mr. President, I have an Alaskan question to ask you. With your imposition of the Antiquities Act and the National Monuments a year ago, you have locked up a few acres, matter of fact, millions of acres of land here in Alaska, taken this control away from the State government—

THE PRESIDENT. No, that's not—

MR. JACQUES. I was—

THE PRESIDENT. Go ahead.

MR. JACQUES. I was wondering—with the energy crisis, we can't explore on this land, and there's no way that we can explore on this land. I was wondering why you have taken the State control and put it in the Federal Government's hands.

THE PRESIDENT. Well, I think you've got it a little bit backwards, John. This is not State land that we've taken away from the State of Alaska; this is Federal land that we're retaining for the use of all Americans. It's, in effect, being put in a protected status—very carefully chosen, about 115 million acres, which is a tiny portion of the total acreage in Alaska. And we very carefully excluded whenever possible those areas of Alaska that did have promise as far as major energy production is concerned.

As you know, Alaska has become a great oil-producing State, natural gas-producing State, which we hope to bring down to our country through a new gas-line, and obviously has other minerals of value as well. But as has been the case throughout our country, the land is first owned by the Federal Government and then a portion of it, either almost all or very little, is turned over to the State. Some is preserved for the entire American population if it's especially beautiful or especially precious, and that's the kind of land that I have preserved for posterity, for Americans of all 50 States and Alaska.

I think it was a very wise decision. It has not interfered with the Alaskan ability to produce energy.

MR. JACQUES. But don't you feel that we can't explore on this land, if there's oil and natural resources on this land?

THE PRESIDENT. Well, I might say that there are certain circumstances under which oil exploration can be done even on some of this land. Some of it is too valuable and too precious to have exploration. But there is plenty of land in

Alaska for any time in the years immediately ahead to completely use all the oil exploration capability that we have in this country.

MR. JACQUES. Okay. Thank you, Mr.

THE PRESIDENT. Thank you, John.

MS. STAMBERG. Thank you, Mr. Jacques.

A reminder again that you are listening to "Ask the President" on National Public Radio. This is a live, 2-hour telephone program from the White House Oval Office. President Carter is answering questions from citizens across the country, and for technical reasons you cannot phone us with your question. NPR instead is phoning out to randomly selected listeners.

And here comes one now. It's Mrs. Moila Roundy, in St. Joseph, Missouri. Go ahead, Mrs. Roundy; you're on the line with the President.

ENVIRONMENTAL LAWS

MRS. ROUNDY. Good morning, Mr. President. I feel very fortunate to speak with you. My question is, is there some way that we can get the Clean Air Act of 1977 amended or rescinded?

THE PRESIDENT. I would not be in favor of rescinding it.

MRS. ROUNDY. But—[inaudible]—amend it. The EPA has become such a monster, and it's costing us and wasting so much of our energy unnecessarily. They placed a burning ban on us here in St. Joseph, and we are mostly made up of senior citizens on fixed income. And we are in annexed areas, so large with all of this waste. We can't afford to buy bags, pay the minimum wage to have it cut up, and pay to have it hauled off to these landfills, which pollute much worse our soil and our water tables. It's costing an awful hardship on us here in St. Joseph,

and we're fighting. We have over 8,000 signatures to try to get this amended.

THE PRESIDENT. I don't know which particular provision of the law you refer to, but I think in general the environmental laws are very important.

MRS. ROUNDY. But our air isn't that dirty. It comes from agriculture and from the State of Kansas and the two Kansas Cities and the airports. And our burning of our leaves and yard waste and garden waste, seasonal, will not add to this pollution.

THE PRESIDENT. I understand. Sometimes when a city has a very high air pollution to begin with, because of many factors, including factories and automobiles and so forth—

MRS. ROUNDY. Well, we don't have that.

MS. STAMBERG. Mrs. Roundy—

MRS. ROUNDY. They seem to think burning yard waste—but the monitors were inaccurate. We found that out. So, we're trying to get another way of monitoring our air.

THE PRESIDENT. I understand. I know in Atlanta, when I was living there as Governor, the air pollution got very high, and everybody was encouraged to take their yard wastes—for instance, fallen leaves and branches and things of that kind—and make mulch out of them, which is a very nice thing that all farmers have done since I've been a farmer, and then use that mulch for fertilizer. It solves the problem of excessive burning and air pollution and also gives you a very valuable product at the end.

MRS. ROUNDY. That's true. I do some of that. But these people who have 5 to 40 acres and are senior citizens, they just can't do these things. And it's going to take all of our money for our heating bills. Now, Mr. President, last year my oil, my heating bill was \$183 to \$235 per month.

THE PRESIDENT. Yes.

MRS. ROUNDY. And that was less than half the price it is today, even though I set my thermostat at 65 and 55. So, this is going to exceed the income of these senior citizens, and what will they do for taxes, food, and other utility bills?

THE PRESIDENT. That's a very good question and a different question. I think that, obviously, the two—

MRS. ROUNDY. Well, I think it ties in, Mr. President, because we'll be using all this extra oil to buy bags, this extra oil to transport our garden waste to these landfills. And I think that's unnecessary when we could burn them.

THE PRESIDENT. Let me answer your question. I think one thing that can be done if your house has a wood stove is to use some of that waste for fuel. I do it in my own home in Plains and also in the White House.

The second thing is that we're trying to provide some financial assistance for people like you to help pay those extra energy costs this winter. I've just sent to the Congress this week, for instance, a request for \$1.2 billion, to be added to \$400 million we already have, to help pay those high costs. And I'm also asking the Congress to set aside about \$2½ billion every year for the next 10 years to give people some help on the very high energy bills.

You have put your finger, however, on the best way to start solving the question, and that is to save the amount of energy that we have been wasting in the past.

MRS. ROUNDY. That is what we must do, is to save, conserve, yes.

THE PRESIDENT. I think all three of those things are important: to save energy, to start with; to use fuels that are available to us, like wood in your case; and for us to help with some financial help, which will be coming to you later on this winter.

MRS. ROUNDY. Well, I'm a commission member on aging in this area and in the

city, too, and these problems come to me all the time. We must do something for our senior citizens. And they say that our rights, our human rights and all are being taken away from us due to this EPA monster, and I agree.

MS. STAMBERG. Mrs. Roundy, thank you so much for joining us and participating in this program today.

Our next caller, Mr. President, is in Springville, Alabama. It's Lew Windham. Mr. Windham, go ahead, please.

ENERGY PRICES

MR. WINDHAM. Mr. President?

THE PRESIDENT. Good morning, Lew.

MR. WINDHAM. We're in the petroleum business here, in an area of the country that I'm sure you're familiar with. We own two LP gas companies that supply these rural people with propane for heating; at the same time we're in the oil-jobbing business.

We find it extremely hard to explain to our customers why every time they buy a petroleum product that it is higher. Now, we cannot see any evidence that the Department of Energy is doing anything. Now, I feel that the majority of the people in this country need a very good explanation as to what the Department of Energy is doing to put the lid on these producing companies.

THE PRESIDENT. Well, that's not an easy question to answer, Lew, because there's very little that the Department of Energy or a President can do to prevent foreign countries from raising their price of oil. And the basic thrust that we are pursuing is to cut down on that imported oil.

As you know, this past month the rate of increase of energy was more than a hundred percent per year on an annual basis, and as I said earlier, about 4 percent of our inflation rate is derived directly from energy costs. This is a very serious

matter, and I think you've noticed, if you've listened to this call-in show, how many people have raised this same question.

MR. WINDHAM. Yes.

THE PRESIDENT. We are concerned about home heating oil in the Northeast, but I think many people forget that in the area where you live and where I live, that the isolated farm families and families in small towns also have to heat their homes, and most of them do use propane. And the cost of propane is derived from natural gas prices and goes up also, along with oil and coal and everything else.

I can't give you any easy answer. There's no reason for me to sit here in the Oval Office and try to mislead the American people. There are only three ways that we can deal with this question: one is to use as little energy as possible through conservation, savings; second, to use more of the energy that we produce in our own country than we have been doing in the past; and third, provide Federal and other assistance for the low-income families to make sure that they do have enough fuel to heat their homes and to cook with, and so forth, and also so that they can have enough money to pay those bills.

But there's no way that I can mislead you. The prices are high now; they're going to get higher in the future than they are already. And unless our Nation unites itself and deals with this very serious threat, we're going to be worse off in the future than we have in the past.

I inherited this problem. I'm not complaining about it, but it has been an extremely difficult thing to get the Congress to pass any legislation on this issue, because it's so controversial. We have still not passed a single line of legislation in the Congress dealing with oil. This year we have a very good prospect of finally getting those laws on the book, which will

help you and me and all your customers and people like them throughout the country.

It's been slow in coming, but we're now making some progress. It's not really fair to blame the Department of Energy, because they don't have the authority to control energy prices charged by foreign countries. We've just got to do what I've just told you as the best way to deal with this problem.

MR. WINDHAM. Mr. President, I would like to congratulate you and the Congress on the move that you have put forth to help these needy people in this crisis we're in, because I feel that that is one answer, and you're to be congratulated on that move.

THE PRESIDENT. Thank you. This will amount, by the way, I think, between \$100 and \$200 per family, to help them with the fuel bills this winter. So, if they combine that help, if they're a poor family, with saving as much energy as possible, I think we can get people through the winter.

MR. WINDHAM. Thank you.

THE PRESIDENT. Good luck, Lew, and thank you.

MS. STAMBERG. Thank you, Mr. Windham.

The next call is from Lancaster, Kentucky, Mr. Carter, Mr. President Carter, and it's from Robert Gordon. Go ahead, Mr. Gordon, you're on the line with President Carter.

SUGGESTION FOR PRESIDENTIAL CAMPAIGN

MR. GORDON. Yes, Mr. President. Well, first off, I'd just like to say I love you very much. I'm praying for you, and my friends are praying for you.

THE PRESIDENT. Thank you.

MR. GORDON. You've got quite a responsibility. May I make a suggestion, Mr. President?

THE PRESIDENT. Please.

MR. GORDON. Well, what I would like to just suggest and encourage, sir, is that when politicking time comes, cut that time in half and spend it on your knees seeking the Lord Jesus Christ, because, sir, Jesus is more important than this country. He will give you the answers, sir. He will give you the answers to lead, as it is His will—excuse me, I'm a little nervous.

THE PRESIDENT. That's all right.

MR. GORDON. But the Lord Jesus that puts a man in power—and if you spend your time on your knees, seeking His will, and if it's His will that you stay in power another 4 years, then He'll put you in power.

Mr. President, again, I'm praying for you. I love you. And this is going to seem a little silly, but I was wondering if you could send me your autograph, sir.

THE PRESIDENT. Yes, I'll be glad to. I'll do that.

MS. STAMBERG. Thank you very much.

THE PRESIDENT. Good luck, and thank you for those good wishes and advice.

MS. STAMBERG. The next question comes, Mr. President, from Mrs. Colleen Porter, and she is joining us from Provo, Utah. Go ahead, Mrs. Porter.

GOVERNMENT-SPONSORED DAY-CARE CENTERS

MRS. PORTER. Yes. I'm married, and I'm a full-time mother. We've got two children, and we hope to have a few more. And I really love my job, and I'm concerned about the prospect of Government-sponsored day-care centers, because it seems to me it's logical that the increased taxation necessary to keep these running would force our economy into even more of a two-income economy—and there's us on our one-income budget—and force me to work. And that's not really far-fetched, because I think you

know what the tax rates are in some of the Scandinavian countries and places that have these really nifty Government-sponsored day-care centers. And I wondered how you felt about that.

THE PRESIDENT. Okay. My own basic philosophy, Colleen, is that anything that can be done by the private individuals of our Nation or private institutions, churches and others—certainly the private enterprise system ought to be first, and that the Government should inject itself into the lives of American people in a minimal way, only as a last resort to meet a need that can't be met otherwise.

There are many communities around the country where there is no private offering of day-care services. In those instances I think the Federal Government has a role to play. I don't think it ought to abuse the right or the duty, and I think that even in that case, there ought to be as much care and consideration, not only for the children but for the sensitivities of the parents and the community as possible.

Many women, for instance, and, I guess, on occasion some men could not possibly work and would be permanent welfare recipients if there was not a place to leave a small child and to have that child cared for. And also, of course, with the Head Start program and other more permanent programs during the year, small children on the pre-first-grade level start to get a good education. So, I think that this is a partial answer to your question.

The other one is, we don't anticipate any massive increases in Federal day-care programs that would put an additional burden on the taxpayers of our country. This is a fairly well established program. I don't anticipate any substantial changes in the future.

MRS. PORTER. Well, you're so, just so in favor of the equal rights amendment, and—

THE PRESIDENT. Yes, I am.

MRS. PORTER.—most of the people that are in favor of the equal rights amendment, the women's groups, are also very strongly in favor of massive day-care centers. And I just hope you'll keep your convictions about where to draw that line.

THE PRESIDENT. Okay. They're not necessarily related, but I agree that some people do relate them.

MRS. PORTER. Yes, most of them. And also, I'd just like to say that when you, if you ever did get in the situation to cut down on the role of the family, not only are you going to put out tax money for day-care centers but for more prisons, for more welfare, for more drug and alcohol rehabilitation. And I think if I can just stay home and raise my kids, they're going to be good citizens.

Thank you.

THE PRESIDENT. That sounds like a good thing to do if that's your preference. Good luck to you.

MRS. PORTER. Thank you.

Ms. STAMBERG. Thank you so much, Mrs. Porter.

President Carter, at this point we're going to take a 1-minute break. During that time our stations across the country can identify themselves, and you can get a 4½-inning stretch; so can I.

THE PRESIDENT. Very good.

Ms. STAMBERG. Then we will be back with another hour of "Ask the President," from NPR, National Public Radio.

This is Susan Stamberg, back again at the Oval Office in the White House for National Public Radio's live broadcast, "Ask the President."

President Carter is answering questions by telephone from citizens across the country. The questions are not being screened, but the questioners are being chosen on the basis of geographic distribution. We're kind of strolling around the

country by phone, and we're doing it for the reason that citizens from many parts of the Nation want to have a chance to speak with the President. We want to give them that chance.

To explain, again, this curious procedure, you cannot call us; we have to do the calling out to you. For several weeks now, in newspaper ads and on the radio and television, citizens have been invited to send us their names, their addresses, phone numbers, to put it all on a postcard if they wanted to ask a question. Those names are being chosen at random now, and we are placing the calls—all this for technical reasons.

There will be another hour of questions and answers with President Carter, which will be followed by a half-hour analysis of the President's statements by National Public Radio reporters.

Mr. President, you ready for the next call?

THE PRESIDENT. All set.

Ms. STAMBERG. It's from Al Sheahen, and he's in Van Nuys, California. Go ahead, Mr. Sheahen.

DEFENSE SPENDING AND NATIONAL SECURITY

Mr. SHEAHEN. President Carter?

THE PRESIDENT. Yes, Al.

Mr. SHEAHEN. We admire your courage and enthusiasm for running for the 10-kilometer races, and I hope you'll keep it up.

THE PRESIDENT. I will.

Mr. SHEAHEN. The reason I'm calling, the question I had—we all know that inflation is caused by deficit spending, and we've got a \$30 billion deficit this year, I think you said.

THE PRESIDENT. This coming year, yes.

Mr. SHEAHEN. The largest expenditure by the Government is defense spending,

military spending. One out of every two of our income tax dollars goes for defense. In 1976 when you campaigned, you said you'd try to cut the defense budget by five to seven billion dollars, and yet right now it's about \$40 billion per year more than when you first took office. And now you're asking for an MX missile, which is going to cost anywhere from \$30 billion to \$90 billion. Experts say we don't need it. My question is, why don't you try to stop inflation by stopping the unnecessary military spending and put that money to work in our economy?

THE PRESIDENT. Al, let me say that we have cut more than six or seven billion dollars out of the Defense Department by increased efficiency.

But I need to make a point very clear to you and to other Americans. The number one responsibility on my shoulders, above everything else, is to guarantee the security of our country. And I don't make any apology for it.

We spend now a very small portion of our gross national product on defense, about 5 percent. Other countries like the Soviet Union spend often much more. The Soviet Union spends maybe 13 to 15 percent of their GNP on defense. For the last 15 or 20 years, they have increased their defense expenditures by about 3 or 4 percent per year in real terms, like compound interest. We spend now less than we did 15 or 20 years ago, in real dollars, on defense. We've tried to make up that difference and to retain our strength by more efficient expenditure of funds and to tap the basic strengths of our country in politics and economics and otherwise.

We have at this time the strongest nation militarily on Earth. And we've tried to enhance our strength by making sure that our NATO Alliance, our alliances with other countries around the world stay sound and that there is a mutual

sharing of responsibility and an enhanced trust between us.

We are moving toward a possibility of drastically reducing nuclear weapons in the future if we can get SALT II ratified. Both President Brezhnev and I, I think the people of America and the people of the Soviet Union want to see drastic cuts made in nuclear armaments below what they are now, even below what they will be under SALT II.

We have in addition—and the last point I'd like to make—a major responsibility on Earth. People look to us to maintain stability and to prevent war. We have been at peace for the first term, I might say, of a President in 40 years. No American has lost a life in combat since I've been here in the Oval Office. I pray that that might be the record that I leave here when I have finished my service as President.

But we cannot afford to become weak. The surest way to end peace and to cause war is for a potential adversary of our country to believe that we are weak in military strength or in the will to protect ourselves.

I hope that the expenditures that we presently are making on armaments, on military personnel salaries, even the future expenditures will be a good investment. And a good investment is a weapon which is never fired. I hope that no person ever dies because we get into a war.

MR. SHEAHEN. We certainly appreciate the job that you're doing in keeping peace. It's an enormous job. I can't even imagine how difficult it is.

But can't you—you mentioned that the United States only spends 5 percent of our gross national product on defense, which is true. But I understand that Germany spends substantially less, 3 percent, Switzerland only 2 percent, Japan less than 1 percent. Isn't it time for them

to—why should we assume this tremendous burden? Why can't our allies take care of some of it?

THE PRESIDENT. Well, I can't comment on those exact figures. Japan is the one that I do know about. When we occupied Japan after the Second World War, under General MacArthur and Harry Truman, who was President, we required the Japanese to limit themselves on military capability strictly to an ability to defend their own country. And at that time there was established a limit on how much would be spent on armaments.

We have some troops in Japan, not a large number, and we provide part of the protection for Japan. I think this is a good and stabilizing factor. And of course, they, in addition to their own forces, pay a substantial portion of the cost of maintaining American troops in Japan.

It's a complicated thing, Al; it's not simple. But I believe that over a long period of years the trend has been distinctly downward in our own country in the portion of our wealth that we spend on defense. I personally believe that what we are spending now is an excellent investment, and I don't see any way that we could possibly lower our resolve or our commitment to a strong defense. That would be the best way to lead toward a war, which would cause an enormous explosion in defense expenditures. I think this is an insurance policy that really pays rich dividends for our country.

MR. SHEAHEN. Thank you, Mr. President.

MS. STAMBERG. Thank you, Mr. Sheahan.

A call now, a little closer to home, President Carter, from Baltimore, Maryland, Dr. Edward Davens. Go ahead, Dr. Davens.

DR. DAVENS. Good afternoon, Mr. President. This is Dr. Ed Davens in Baltimore.

THE PRESIDENT. Go ahead, Doctor.

NUCLEAR ENERGY

DR. DAVENS. You've already referred to nuclear power, which is what my question is about.

THE PRESIDENT. Yes.

DR. DAVENS. But I'd like to have you pursue it just a bit more. Will you please state clearly your policy on the development of nuclear power? My impression is that you're convinced that going full steam ahead is essential for the good of the economy. Am I wrong about that?

THE PRESIDENT. During my own campaign for President and since I've been in office, I've taken a position on nuclear power that I think is a proper one—first of all, that there is a place in our energy industry for nuclear power. It's already been established, and I think that it would be very difficult if not impossible to root it out. For instance, I was in Hartford, Connecticut, not long ago. Connecticut derives about 60 percent of all their electricity from nuclear powerplants; Chicago, for instance, about 50 percent; and so forth.

However, as I said earlier, I think that the nuclear power portion and also the synthetic fuel portion can be minimized by those who fear it or those who want to avoid it, to the extent that we can have conservation, the increased production of other forms of energy in our own country.

We will get back, probably around the end of this month, a report from the so-called Kemeny Commission on the Three Mile Island accident. At that time I will analyze that Commission report very thoroughly and make a report without delay to the American people about its recommendations and whether or not we can

carry out those recommendations and the extent to which we can remove present doubts about the safety or advisability of nuclear power in the future.

I think our country is possibly, probably going to rely on nuclear power less in future years than other major nations about which I happen to know. In Japan, in Germany, Great Britain, even oil-producing countries like Iran and Saudi Arabia, they're moving much more rapidly toward nuclear power than are we. We are blessed with a broad diversity of energy sources, not only solar, with the technical ability to use it, but also coal, geothermal supplies, oil, natural gas, shale deposits, and many others, hydroelectric power.

So, I think there is a place for nuclear power. It ought to be safe; the American people ought to understand all the facts about it; and its use can be minimized to the extent that we save energy and shift to other sources of energy. But I don't want to mislead you. I think there will be a place for nuclear power in the future. It's my responsibility along with many others to guarantee that it is safe.

DR. DAVENS. Your background is in nuclear engineering; mine is in pediatrics. I would like to urge you to look very carefully at the evidence that nuclear radiation is simply not a viable thing for the survival of the race on this planet, and I hope you will pay real attention to the Kemeny Commission and other advice you may get on minimizing this dangerous pollution of the environment.

Thank you very much.

THE PRESIDENT. Doctor, I will. I don't want to lose that point without making, however, a clarification. I have done graduate work in nuclear physics and nuclear engineering at the beginning of its use back in the early 1950's, and I'm familiar with the dangers of radiation.

I would like to point out that in the production of power in our country, using nuclear power, there has never been a per-

son killed or a life lost. And this is not to say that we should not be extremely cautious about nuclear power in the future. In coal-burning plants, even hydroelectric plants and other kinds, there have been numerous deaths.

But we've done a good job so far in setting standards for operation and design and installation to enhance to a maximum degree, so far, safety standards. I think we can do a better job in the future, and I'm looking forward with a great deal of anticipation and a sober expectation to the Kemeny report. I think that we can make corrections in past mistakes and make even more effort in the future to make sure that nuclear power is safe.

I'll add one other point. I think that the economic considerations and others that I've already described, that I need not repeat, will permit our country to minimize the use of nuclear power in the future, compared to some other countries.

DR. DAVENS. I hope so. This is no place to argue the issue, but I'm not completely satisfied with your answer.

Thank you.

THE PRESIDENT. I didn't think you were.

MS. STAMBERG. Thank you very much, Doctor.

President Carter, I'd like to ask you something about what you've just said, that argument about no lives lost. It's pretty much the standard argument of the nuclear industry. Is that really the point? You're not going to see an instant death. You may see some problems from cancer 10, 20, 30 years down the line.

THE PRESIDENT. I think the answer is accurate, including radioactivity. There have been some people injured, even killed, in experimental nuclear powerplants in very rare occasions. But in the standard designed and operated nuclear powerplants to produce electricity in our country, there has never been an incident

that led, so far as we know, to a human death. At the same time, there have been numerous deaths involved in boiler explosions with plants that burn oil or coal and so forth.

That's not to say that I'm not concerned about safety. I am deeply concerned, and I am determined to act accordingly. And I believe that the incident, which could have been very serious, at the Three Mile Island plant in Pennsylvania gives us a cautionary signal to stop, to think, to study, to analyze, and then to make decisions based on what our country should do in the future.

I have no idea what the Kemeny Commission is going to recommend. But I will read and very carefully analyze that report myself, and if they make recommendations on the design of powerplants using atomic energy, the installation, the operation, the training of personnel, preparations for a possible accident that are feasible for us to carry out, then I will make sure they are carried out. And if they point out some inherent defect in nuclear powerplants that can't be corrected, obviously that would be cause for termination of such approvals in the future.

I think the best thing, though, that can happen is for American people to know the facts, not to be excessively afraid and also not to be excessively at ease. And it's part of my responsibility as President not only to act but to educate in cases of this kind. And it was my decision to appoint the Kemeny Commission itself to make sure that they, on a completely unbiased and free basis, made an analysis.

No Federal official has tried to influence the outcome of the Kemeny report. We've given them every assistance. They have been given authorization by Congress to deliberate in private without any sort of interference from outside, and I believe that their report will be a full one and also

will be accurate. And I hope that every American who's interested will study the report and join with me in analyzing where we go from now.

There's a role for nuclear power. As I've described, we need to emphasize and correct any defects that might exist now, in the past, or in the future.

MS. STAMBERG. We'll get to the next call in a moment. But again, a reminder that this is a live, 2-hour broadcast from National Public Radio in Washington. President Carter is speaking by telephone with Americans. None of the questions are screened, but for technical reasons, you cannot phone in with your questions. Please do not call NPR, don't call the White House, don't call your local public radio station. Instead, National Public Radio is phoning out to randomly chosen listeners who have written to say that they wish to "Ask the President."

Here's one of those listeners now, President Carter. It's Kimberly Powell from Hyannis, Massachusetts, and I'm told that Kimberly is 13 years old. Go ahead, Kimberly.

VISIT TO BARNSTABLE MIDDLE SCHOOL,
MASSACHUSETTS

MISS POWELL. Hi, Mr. President.

THE PRESIDENT. Good afternoon.

MISS POWELL. My name is Kim Powell, and I'm from the Barnstable Middle School, Red House Team II. As you already know, our team of eighth graders sent out an invitation, a note for you to come and teach a history lesson to our school in any way possible that would be convenient to you. We did get a response, but they didn't give us a definite answer. We would like to know if you are really considering to come and when your visit will be? It will be greatly appreciated.

THE PRESIDENT. Well, thank you, Kimberly. I have seen news reports that you all were inviting me to come to Hyannis and to visit your school. I don't know whether I can do it or not. I'll be coming up to Massachusetts again on the 20th of this month to join in dedicating the library of former President John Kennedy, but whether I can visit Hyannis, I don't know. I'll check with my schedulers after this program's over, and we'll let you know directly whether or not I can be there.

MISS POWELL. Okay, thank you. I would also like to ask you a question.

THE PRESIDENT. Okay.

INFLATION

MISS POWELL. Do you have any idea what inflation will be when I get out of school, like, you know, when I'm 18?

THE PRESIDENT. I hope it will be much less.

MISS POWELL. Me, too.

THE PRESIDENT. If every American will help with it, then it'll be much less.

We've had, by the way, Kimberly, pretty good luck with our wage and price guidelines that we've established about a year ago. And now we've got a new thing that's never been formed in the past in our country, and that is an agreement that we reached voluntarily with labor and with business so that government, labor, and business will all join in together in a common effort to hold down inflation. In the past, the Government has passed a law and, in effect, forced on the working people and business, standards for wages and prices. I think this new so-called national accord or agreement will be a major step forward.

And we've already discussed on this program the things that we can do about buying habits and energy waste and so forth, that would help.

So, I think the inflation rate's going to be down considerably by the time you get out of school.

MISS POWELL. Okay. Thank you very much.

THE PRESIDENT. Good luck to you.

MISS POWELL. All right. Bye.

MS. STAMBERG. Thank you, Kimberly.

President Carter, over the last week-end, your administration took some dramatic steps to help hold down inflation. One of those steps was raising the prime interest rate to 14½ percent. To a lot of people, that seems like a gigantic leap of faith. Is it going to work, and are you going to get behind it and back it up? Where does it go from here?

THE PRESIDENT. Well, the Federal Reserve raised, in effect, the interest rates 1 percent, which was a clear signal not only to our country but to the rest of the world that we do consider inflation to be the number one economic threat to our lives and to the quality of our life. I think that this analysis, or this decision was applauded by both liberal and conservative economists, and I believe there's no question about the fact that we have got to deal with inflation. The interest rates really go with inflation, and the only way to get interest rates down is to get inflation down.

We must have a stable dollar. When the dollar values go down in foreign countries, it hurts us directly. We can't export our—we can't have as much trade as we would like, to produce American products and to sell them. In addition to that, the reputation of our country is extremely important on a worldwide basis.

We have taken action since I've been in office to minimize the damage to employment with high inflation. We, in the past, have seen, whenever the interest rate went up, an immediate nosedive in housing construction. As a matter of fact, since

I've been in office, because of energy prices, inflation has gone up, but we've had a 50-percent growth in the rate of production of homes for people to live in. And we've been maintaining this very high rate of home construction.

Another point is that we've kept people at work since I've been in office. Again, working with the Congress and in spite of inflation, which is too high, we've had a net increase of 8½ million jobs in this country. It's never been accomplished before. And we've cut the unemployment rate down by a full 25 percent. So, so far, in spite of these pressures for inflation, which have been with us more than 10 years, we have been successful in keeping people at work.

MS. STAMBERG. Yes, but I think some of your own advisers—Stuart Eizenstat, William G. [G. William] Miller—have said that they expect that unemployment rate to go a bit higher next year, up to 6.6 or 7 percent.

THE PRESIDENT. It might go a bit higher. Well, it was 8 percent or more when I came in office. And we've added, as I say, over 8 million new jobs, and the labor force has grown in our country. Another factor that people forget in looking just at the unemployment rate, which has come down very gratifyingly, is that when a teenager, for instance, sees a neighbor get a job, that teenager goes and puts his or her name on the employment rolls and starts looking for a job. So, as people are put to work—and we've increased teenage employment about 26 percent in the last 2½ years—you have more people registering for jobs, which tends to make the unemployment rate look like it's rising.

But I think in general, that's one of the most notable achievements of the last 2½ years, that in spite of energy costs, in spite of high inflation, in spite of increased

interest rates, we have still improved Americans' ability to get jobs.

Ms. STAMBERG. Let's take another question from a listener. Mr. President, this is Kenneth Morris, in Chatham, New Jersey. Go ahead, Mr. Morris.

GRAIN EXPORTS

Mr. MORRIS. Well, it's quite an honor, I must admit, to be talking to you, Mr. President. I have two questions, I guess. I'm doing the family bills, and I have to admit I'm worried about inflation. Why can't the U.S. Government put more muscle in support of American business in dealing with the OPEC countries and sit down on a government-to-government level and negotiate oil for barrels of wheat or even form an agreement with other major grain-producing countries, like Argentina, or even perhaps consider certain exemptions to the antitrust laws. That's a mouthful, I suppose.

THE PRESIDENT. Kenneth, this is a frequent proposal made, that our Nation exchange a bushel of wheat for a barrel of oil, something of that kind. It has an immediate appeal to people, but it's just not practical.

The oil-producing countries, like Saudi Arabia, for instance, which produces about 9½ million barrels a day, have a very small population, and they, therefore, import very little food although they don't produce it themselves. Any other country that's of any size at all, like France, in Europe, or other European countries or countries in Latin America, would be eager to provide those small quantities of grain to the oil-producing countries if we decided not to. And it would be a very serious mistake for us to try, through a wheat embargo, to cut out food supplies to those foreign countries.

One of the most important gifts that God has given us is fertile land and a free enterprise system, which gives us food and grain and other products to sell to others. I would say that we have a better advantage in producing food, which will last, hopefully, forever, than the oil-producing nations overseas have with depleting oil supplies. The greatest strategic advantage that I see that our country will have in years to come is food, which can be made available in a very beneficial way to all the people on Earth who need food.

Secondly, we have derived from this much better and more stable markets in our own country. Since I've been in office, for instance, we've increased the amount of grain that's stored on farms, we've improved the quality of life, and the income of farm families is near the peak that it's ever been in history now. And every year we have set records, unprecedented on Earth, for the export of American products.

So, just as Saudi Arabia or Iran or Nigeria or Venezuela benefit from their sale of oil to other countries, we benefit on a permanent basis, hundreds of years, from the export of food products. And if we should interrupt the sale of those grain products overseas, as was done quite frequently when Secretary Butz was running the Agriculture Department and the Republican administration was in office, we would make our potential buyers of American products very uncertain about our ability to supply them.

We have not had grain embargoes since I've been in office, and we're not going to have them. So, we can deal with the energy imports in other ways—which we are doing—without stopping the export of our equally valuable product, even more valuable product, and that is food.

INFLATION

MR. MORRIS. I guess the second question is related to inflation. That is, how can you persuade families to hold down on consumer spending when they know that 6 months from now things will be so much more expensive?

THE PRESIDENT. Well, my daddy always said, "If you don't need something, it's not cheap, no matter what you buy it for," and he had to warn my mother about this quite often when they went to auction sales around home. I think prudent buying is obviously an important element of any family's existence, unless one is so wealthy that you don't have to worry about what you spend for.

And also, of course, what we forget about is that when we save and don't waste things, if there's a given supply, the competition to sell to customers will force the price down. I hope this will happen, for instance, with the most significant product that I hear about now, and that's home heating fuel. We've got adequate supplies on hand, for instance, in our country for home heating oil—240 million barrels have now been put in the primary reserves.

If the families throughout our country will, through thermostat settings and very careful living habits, reduce the amount of energy that they use this winter, compared to previous winters, then there'll be much more competition among oil suppliers to get those customers' business—and they don't want to carry over those oil stocks until next winter. So, prudent use of energy supplies can be a major factor in forcing down prices in a competitive free market system.

So, there are many different elements of the issue that I could discuss—I've tried not to repeat things that I've said earlier in the program. But that's one that I hadn't

mentioned previously that I think is an important factor. Prudent buying, no matter what the item is, can help us control inflation.

MR. MORRIS. Thank you very much, Mr. President, and good luck.

THE PRESIDENT. I've enjoyed talking to you. Thank you, Kenneth.

MS. STAMBERG. Thank you, Mr. Morris.

A reminder again to listeners that you cannot call into President Carter. National Public Radio is doing the phoning to citizens who have been chosen at random and have written in advance to "Ask the President."

The next question will come from Bruce Hallock, Mr. President, and he's on the line from Austin, Texas. Go ahead, Mr. Hallock.

U.S. SPACE ACTIVITIES

MR. HALLOCK. Hello, Mr. President.

THE PRESIDENT. Hello, Bruce.

MR. HALLOCK. What is your view of mankind's future in space for the long term and for right now?

THE PRESIDENT. I think we have a very bright future, Bruce. We're moving into a new era of the use of space that will be quite different from what we've known in the past. We've had the highly publicized exploratory flights into space, not only to the Moon with men—Americans on the Moon—but also in trips with our space vehicles through the different planets themselves.

Now we are shifting to a more routine use of space flights with the shuttle, that will be launched for the first time next year. This will permit us with a space vehicle to launch relatively cheaply a major load of equipment and other things into space—both from our Government, from other governments who are friendly to us,

and from private enterprise as well—for experimental purposes or for commercial purposes, and then have that vehicle returned back to Earth to be used over and over again. And, as you know, on the Florida coast we'll launch for basic flights east and west, and from the California coast region we'll launch for basic flights that will go over the poles.

And so, we're going into an era now where all of the technological advances that have been made with previous space flights can be used for direct benefits. And we've derived, in my opinion, tremendous personal benefits from the experiments and the innovations that went into earlier space flights. We're now ready to capitalize on that in the future—both in the quality of our life, with weather, with geothermal analyses, photography and experiments in space, an absence of an atmosphere, direct observations of stellar things for astronomical observations—there are so many that it's almost mind-boggling. But I think that now we're going into a more routine space use—quite a transformation from previous experimental flights.

MR. HALLOCK. Well, does it bother you that now we're at the dawn of this bright future, that we seem to be cutting back with NASA's budget while the Russians are proceeding methodically with their manned space programs?

THE PRESIDENT. I don't believe that that's an accurate comparison. I believe that the space shuttle will be a major innovation. In effect, now, the Soviets are just following along with what we've done many years ago.

MR. HALLOCK. Thank you.

MS. STAMBERG. Thanks very much, Mr. Hallock. Thank you for joining us.

The next question will come from Ann Williams, President Carter, and she is on

the line with us from Indianapolis, Indiana. Go ahead, Ms. Williams.

INHERITANCE TAXES

MS. WILLIAMS. Mr. Carter.

THE PRESIDENT. Yes, Ann.

MS. WILLIAMS. The very rich are able to protect their wealth with trusts and various other means and are able to pass their wealth down from generation to generation, whereas the average people, who really cannot afford to set up such expensive tax-saving devices, are taxed so heavily on inheritance taxes. This is a socialistic program which only benefits those who do not accumulate wealth in their lifetime.

Why don't you propose increasing the estate deduction to a much higher dollar amount than the present level, or eliminate inheritance taxes altogether?

THE PRESIDENT. Well, Ann, I think that your question provides two different views of the same subject. The inheritance taxes fall much more heavily on the extremely wealthy, and we have tried and are still trying to close loopholes in how those trusts can be used. I think there are still some gross abuses—where people put a large estate into a foundation, for instance, that's ostensibly to be used for the benefit of other people and then, through various loopholes in the law, provide very high salaries for members of that family to continue to benefit from the trust itself.

We have, I believe, a need from time to time to increase the amount of a person's inheritance left to children and to other members of the family that is excluded from taxation. As land values go up, for instance, it's very damaging to a farm family to have to sell even a relatively small farm in order to pay inheritance taxes, instead of letting the

children take that farmland and continue to use it.

So, we are making modifications in the size of inheritance that is excluded from inheritance taxes to preserve relatively small estates. And I hope that we'll continue to close loopholes for the very wealthy. I agree with your basic premise.

Ms. WILLIAMS. Thank you very much.

Ms. STAMBERG. Thank you, Ms. Williams.

On the line now from St. Paul, Minnesota, is Cassandra Johnson. Go ahead, Ms. Johnson.

HUMAN RIGHTS

Ms. JOHNSON. Thank you. Good morning, Mr. President. I have a question involving human rights that I would like you to answer. I first of all would like to say that I'm really pleased that you've made that an issue and that you have raised the consciousness level throughout not only our own country but throughout the world. My question involves three countries which we support—South Korea, Chile, and the Philippines—who are gross violators of human rights to their own people in their own country.

I would like to know, is there any way that we as a country and you as a President who is for human rights can put more pressure, especially on the Philippines, to ease the tension and release the political prisoners in those countries?

THE PRESIDENT. Cassandra, we utilize every legitimate means to influence both leaders and governments of other countries to move toward a deeper honoring of human rights. There have been some substantial indications of progress in this hemisphere and, indeed, throughout the world in recent years, I think possibly because of our emphasis on human rights. Literally tens of thousands of prisoners

have been released from incarceration, and we've seen major moves away from totalitarian governments toward more democratic forms of government.

Just yesterday, for instance, I welcomed here the new Ambassador from Uganda, who has spent a lot of time in our country when Idi Amin, supported by the Soviet Union, was violating human rights in the grossest and most obnoxious way. Now the new government is much more inclined toward honoring human rights.

In the Philippines, there has been a good bit of progress made—still they don't measure up to standards that we ourselves would espouse in this country. And I visited South Korea not too long ago and had some very strong and heart-to-heart talks with President Park, letting him know that the relationships between his country and ours would be severely damaged with any indication of violation of human rights. Following that visit, large numbers of prisoners were released. But recently, as you've seen in the legislative body of South Korea, the opposition party members have resigned in protest because one of their leaders was excluded, a Mr. Lee.*

So, we are trying to encourage and sometimes even force other countries, as best we can legitimately, to shift toward a greater honoring of human rights. In international lending institutions, for instance, we don't vote for economic aid—except for the most narrowly defined humanitarian purposes, like food for starving people—unless that country does honor human rights as assessed by us. And I'm required each year to give to the Congress a report on every country with whom we deal at all, concerning the de-

*The President later said that he had intended to refer to Mr. Kim Yong Sam. [Printed in the transcript.] See page 1919.

gree of their compliance with our own human rights standards.

This is sometimes a cause of major diplomatic protests from those countries, but we do it. And I think that their awareness that they are being assessed by us and by Amnesty International and other countries are very important factors. I doubt now in the last 2½ years that there is any government leader on Earth, either in totalitarian countries or democratic countries, including myself, who don't frequently stop and say, "What are we doing that would cause the condemnation of the world to come on us because we are violating human rights?"

We're making some progress; but still have a long way to go.

INDIAN RESERVATIONS

MS. JOHNSON. Along with that question, Mr. President, I'd like to ask about, you know, the Indians. I've been aware—'cause this is an area that we've got reservations, in Minnesota and throughout the Midwest area and South Dakota and such—that with the energy crunch as it is today, that the energy companies—oil, electricity—are coming into some of these reservation lands and in some way trying to get hold of the land and take it over to produce energy, whatever that—you know, uranium, especially, I'm thinking of, in the Black Hills area in South Dakota.

Can there be any assurances that those treaties that were made with the Indians will not be violated by the Federal Government?

THE PRESIDENT. Yes, the assurance lies under the constitutional guarantees of honoring civil rights or human rights of those Indians. And as you probably have noticed in the last few years, the Federal courts have been much more inclined to honor the Indians' rights, even though

they were derived from very ancient treaties. They were violated for many generations. Now I think there's a substantial movement toward honoring those original treaties.

MS. STAMBERG. Thanks very much, Ms. Johnson.

Let's move on now, President Carter, to another question. This one from Peg Ormsby, in Weston, West Virginia. Go ahead, Ms. Ormsby.

DAM AND WATER PROJECTS

MS. ORMSBY. Hello, President Carter; we're grateful for the chance to talk to you.

THE PRESIDENT. Thank you. I'm honored to have a chance to talk to all of you.

MS. ORMSBY. You're asking us to make sacrifices in the name of the energy crisis and to help control inflation, and you said that the Federal Government is doing everything it can to help with these problems. But here on the local level, in Lewis County, West Virginia, we're fighting to keep the Federal Government from building the expensive Stonewall Jackson Dam.

Now, this dam would destroy existing coal, oil, and gas reserves as well as using an enormous amount of energy in its construction. Alternatives to the dam exist, but they haven't been explored.

President Carter, this dam was never reviewed under your water projects criteria. EPA has challenged its justification. So, how can you tell us here on the local level, who feel the results of Federal projects and Federal dictates, that the Government itself is doing everything it can to save energy and fight inflation?

THE PRESIDENT. Peg, I can't say that the Government's doing everything it can; I say we're doing a lot, and we're trying as best we can.

One of the things that I've done since I've been in office, that's been one of the most difficult things and most controversial things, is to try to eliminate the construction of unnecessary dam or water projects and to preserve the analysis rights of the Federal Government to screen out, in the future, projects that are not needed.

In many cases—I'm not sure about the project to which you refer—but in many cases, these decisions to construct such a project were made many years ago and ostensibly with the support of not only the Federal Government but your own Members of Congress and local officials who had to participate, including, I presume, your own Governor and your own State legislature. It's extremely hard, although we've been successful in some cases, to cancel a project—even though it's ill-advised—if it has a lot of commitment already made to be completed.

The environmental element is one factor involved. We are trying now to get installed for the first time a permanent screening group that would look at each of these dam construction projects on its own merits and in a much more objective and fair way and to eliminate politics or local chamber of commerce support from it. I think that in any particular construction project that the best way to stop it, if it's once begun and once a commitment is made, is through a delegation of your Members of Congress or your Governor or your State legislature or from the local level.

We're doing our share here, but it's very hard to reverse standards and procedures that have been in existence in our Government for generations. We've made a lot of progress, though. I think anyone would admit that.

Ms. ORMSBY. Yeah, I agree that you've made a lot of progress, and we certainly applaud your efforts. This is a very old

project. The problem is that the Federal Government itself, not just Congress, has a role—every agency from EPA to the Fish and Wildlife people. They're not doing their share in their honest evaluation. It's too easy to always pass the blame onto your Congressman, and we're working on the local level to ensure a change here. But we still need the help of the Federal agencies whose job it is to watchdog over these kinds of projects.

THE PRESIDENT. I agree with you. I was not trying to put the blame on Congress.

Ms. ORMSBY. No, I know that, although they shoulder their share.

Thank you very much.

THE PRESIDENT. Yes, there's plenty of blame to go around.

Ms. STAMBERG. Thank you, Ms. Ormsby.

Dr. George Bergstrom joins us now. He's on the line from Fallbrook, California. Go ahead, Dr. Bergstrom.

U.S.-SOVIET RELATIONS

DR. BERGSTROM. Good morning, Mr. President.

THE PRESIDENT. Good morning, Doctor.

DR. BERGSTROM. As an American who's spent much of the last 19 years traveling and living in Asia and Europe, I'm greatly concerned with the rather serious growth of Russian military and political influence in not only Asia and Europe but in various other parts of the world as well. Your proposed SALT treaty appears to be, I think, a positive step forward towards meeting this challenge. Can you comment on how SALT will strengthen America's position vis-a-vis Russia?

And secondly, I think one of the most strategic, long-range actions of your administration has been the establishment of working relations between America and

China. Can you expand on some of the specific programs you plan to establish which will increase cultural and business relations between America and China?

THE PRESIDENT. Yes. And I'll try to be brief, although your question is very deep and a penetrating one and hard to answer in a few words.

There's no doubt in my mind that the SALT II treaty will enhance our relative military strength with the Soviet Union. For instance, the Soviets will be required to dismantle or destroy about 10 percent of all the nuclear missile launchers that they have. We will not be required to dismantle any of them. And this will mean that over a period of time, we'll maintain equivalency with the Soviet Union in strategic or nuclear armaments and, at the same time, have a chance to take our great reservoir of financial and natural resources and our human resources and orient them either toward conventional defense capability or toward a better life for our people.

If we can maintain military strength adequate to defend our country—and that's what I'm committed to do—then we put the competition with the Soviet Union on a peaceful basis where, in my opinion, we have all the advantages.

For instance, the Soviet Union is a totalitarian government; ours is a free government, a democratic government. The Soviets believe that the citizen ought to be subject to the mandates of the state; we believe that citizens as individuals ought to be honored and that the citizens ourselves should control the government. We believe in individual initiative and in the worth of the human beings; the Soviets believe that the state should dominate in every respect. Ours is a country that's founded on a free enterprise system, where innovation and new ideas, through a competitive society, have a chance to

succeed, and it inspires the rapid development of research and development.

I think if you'd look at the Nobel prizes given out in health or chemistry or physics and so forth in the past number of years, America takes a tremendous number of those because this is an advantage that we have.

One of the most important advantages, however, is that we have moral and ethical standards, human rights standards that make us competitively superior over the Soviet Union in the peaceful competition for the friendship, the hearts and the minds, the trade relationships of uncommitted or nonaligned people around the world.

We value also the independence of other governments, even in small or weak or new nations. The Soviets often try to subvert those governments and take over control of the affairs of people.

So, in a peaceful competition with the Soviet Union, I think we have all the advantages to prevail. That is an important element of the SALT treaties.

On the China question—if you look at the last number of years, we have made tremendous strides, in my opinion, in this peaceful competition for the friendship of those around the world. It wasn't too long ago that the closest ally that the Soviets had was the People's Republic of China, a fourth of the population of the entire Earth. That's changed dramatically now.

It wasn't too long ago that, under Mrs. Indira Gandhi, India was closely allied with the Soviet Union and quite antagonistic toward us. That has been completely changed.

It wasn't too long ago that Egypt, the largest and most influential and important Arab country, was closely aligned with the Soviet Union and diametrically opposite and opposed to us. That's changed.

In Africa the largest black nation and the most influential and powerful black nation in the African continent is Nigeria. It wasn't too long ago that Secretary Kissinger couldn't even get permission to go inside Nigeria, because they were antagonistic toward the United States. I've visited there myself. Now they're one of the best friends and allies we have.

We haven't been successful in every instance. But in general, in our peaceful competition with the Soviet Union, we are making out very well. And I think this gives us an opportunity—with China and other countries—to benefit Americans in the future.

Ms. STAMBERG. Thank you, Dr. Bergstrom.

U.S. STRENGTHS

President Carter, I noticed when you answered that question outlining our relations with the Soviets, your answer was very similar to one that you gave earlier in the week at a news conference. And it begins to sound like a kind of litany, a list that you're doing really of a definition of what the Soviet Union is about, as compared to what the United States stands for. Why are you doing that right now? Is this some sort of escalation of rhetoric?

THE PRESIDENT. No, no. I think it's good for our country to be reminded of our strengths. We're the strongest nation on Earth militarily. We're the strongest nation on Earth economically. We're the strongest nation on Earth politically. I think we're the strongest nation on Earth when you compare ethics and moral standards and a commitment to basic human freedoms. It does give us an advantage that Americans ought not to forget about.

Quite often we read in the news media, watch television, listen to the radio, and all we hear about are the tem-

porary inconveniences and the differences that exist in Washington between the President and the Congress or between the House and the Senate, the arguments and the debates and the temporary setbacks and the failures. But in general, the progress of our country is absolutely superb. It's something that we ought to remember—how much we've been blessed, what a superior opportunity we have in life, and how influential our country is among the community of nations in the world.

And I believe that to point out these basic advantages strengthens the ability of Americans to overcome temporary setbacks and to meet challenges and to answer questions and to resolve problems, whereas on the other hand, we often tend to become discouraged. And I think that a part of my duty as President is not to mislead anyone, but to remind Americans of how strong and how great our country is now and can be in the future.

Ms. STAMBERG. Interesting that you're saying this. Now, a few months ago you were telling us about the malaise that you were perceiving across the country.

THE PRESIDENT. Exactly.

Ms. STAMBERG. Has now that disappeared?

THE PRESIDENT. No, it hasn't disappeared. But part of that malaise that I pointed out and a lack of confidence in the American people is what I'm trying to address. If we'll just stop and inventory what we have, there is no need for us to be discouraged or divided or antagonistic toward our own Government or discouraged about the strength of America, now and in the future. We need that confidence, and we need—not only that—to respect each other.

When we have gasoline lines or even when we have a serious problem like increased home heating costs, we tend to overemphasize those inconveniences and those problems. They are serious, and our

Nation is able to address them. But for us to use those temporary or transient inconveniences or serious problems as an excuse to lash out at one another and to try to grasp a selfish advantage for ourselves or to turn against our own Government or to turn against our own free enterprise system and condemn ourselves, that's what I deplore.

And so, I think we do have a serious problem in our country with a lack of confidence in the future and some tendencies toward disunity. But when we analyze the reasons for unity and the need for us to work together and the blessings that we have, I think that's an accurate means for Americans to derive an honest opinion of our own country.

PRESIDENT'S LEADERSHIP QUALITIES

MS. STAMBERG. President Carter, to what extent does that lack of confidence that you say we're exhibiting in the future of the country depend on a confidence in you and your ability to govern?

THE PRESIDENT. A lot.

MS. STAMBERG. You've seen your ratings in the polls are very low, and real questions are being raised about your own leadership abilities.

THE PRESIDENT. Sure. I think that has a lot to do with it. It's not only a lack of confidence in the President but an even lower confidence, for instance, in the Congress and a very low confidence in the news media, in the churches, in the schools. And people have become more uncertain, as I pointed out in my Sunday night speech in July.

A part of it is because of present inconveniences and divisions and competition. Part of it, however, is derived from historical events—Vietnam war, Watergate embarrassments, and so forth—that America is now beginning to heal. But I think the fact that we have been able to weather the leaving of this office, in which

we are sitting, by an incumbent President under embarrassing circumstances, the fact that we have been willing to face the first experience in American history when we were not successful in a war, in Vietnam, and still have a strong country is a sign that we ought not to be discouraged, but that we ought to be encouraged.

Our basic institutions that we sometimes doubt—government, the Presidency, the Congress—have survived and have prevailed. And I don't think our system of either economics or our social system or our government system has any equal anywhere on Earth. We ought to remember that.

MS. STAMBERG. But are you saying, though, that your low ratings in the polls are a result of general public lack of confidence in the institution itself, or in your own ability to be President, to provide leadership?

THE PRESIDENT. I think both. I don't think that all of my low ratings in the polls are attributable to a general lack of confidence. Part of it is because of people's opinion about me.

This has not been a unique circumstance. All previous Presidents have had very low ratings in the polls at one time or another. Without being apologetic about it, we have never failed. And I hope I never fail, as long as I'm in this office, to address a necessary and difficult question just to avoid criticisms or a lower rating in the poll.

There's no way to benefit, for instance, from addressing the energy question. You're condemned by producers of oil, you're condemned in some ways by consumers who, once the issue is raised, say, "Well, why doesn't the President do something about it?" We're trying. And I think that this is inherent in this office.

I didn't come here looking for glory or looking for everyone to approve what I did; I came here to do a job for our coun-

try. And if it results in either temporary or permanent criticisms or lower opinion among American people, if I think I'm right and doing what is best for this country, I'm going to do it.

I believe that this next year, 1980, a presidential election year, will serve as a time for presentation to the American people of what I have done as President, the problems that still remain, and what I can propose to the American people in the future to correct those problems. And if I can build up at that time adequate confidence in me, when the issues are clearly addressed and that accurate inventory is made, then perhaps the people will change their opinion.

MS. STAMBERG. President Carter, we're almost at the end of our time, but we do have time for perhaps a few more callers' calls.

This is Mrs. Sue Eik, and she's in Philipsburg, Montana. Go ahead, Mrs. Eik.

HOSPITAL COST CONTAINMENT

MRS. EIK. Thank you.

Mr. President?

THE PRESIDENT. Yes. Go ahead.

MRS. EIK. I'm very pleased to be able to speak with you. Speaking of something closer to all of our hearts and on the home-front, I recently, due to personal experiences within the family—I'm concerned with rising medical costs and care of the elderly. I guess until you get involved in it yourself you just pretty much take it for granted. You're aware of these high costs, but when you really get down to it and you're trying to figure out adequate means for your family to get good health care, do the best you can for them, then you come down to figuring out how you're going to pay for it. It really is a concern to each and every one of us.

I have in-laws that are in very poor condition, and I'm doing everything I can

for them. But in this last month, I have come to see very good cases of good health care, and in the same instances I feel that as great of a nation as we are, we're really handling things very poorly.

THE PRESIDENT. Mrs. Eik, let me see if—

MRS. EIK. There are great strides in medicine, and yet it doesn't seem like we have very much interest or care in our aging people. We're doing great things with heart surgery and transplants.

MS. STAMBERG. Mrs. Eik, let me interrupt you for a moment, because our time is running short. Why doesn't President Carter go ahead and answer you?

THE PRESIDENT. One of the best things that we can do about all the problems that you've described, Mrs. Eik, is to have the Congress pass the hospital cost containment legislation that's before them. Last year the Senate passed it, and now it's before the House and the Senate again. The lobbyists are trying to oppose this legislation, and it must be passed. It would cut down on the amount that Americans will spend for hospital care in the next 5 years by \$53 billion. It'll not only cut your future hospital bills by roughly \$500, but it'll also leave the hospitals adequately profitable and will not reduce the level or quality of health care.

Hospital cost containment is extremely important. We hope to get it finally passed.

KIM YONG SAM

I would like to correct one thing I said earlier, if you don't mind.

MS. STAMBERG. Okay.

THE PRESIDENT. When I was in Korea I met with Kim Yong Sam, who is the opposition leader in the legislature that was expelled. I think I inadvertently said Mr. Lee. But it's Kim Yong Sam whom I met there. I didn't want to leave an error.

MS. STAMBERG. Thanks for the correction. Thanks very much.

We have no more time, I'm afraid——

THE PRESIDENT. Oh, sorry.

MS. STAMBERG.— President Carter. We've come to the end of it. Thank you so much for taking part in this broadcast.

THE PRESIDENT. Well, I've thoroughly enjoyed it, Susan. I hope we can do it again.

MS. STAMBERG. I want to thank the thousands of citizens who wrote in asking to speak with the President and thank all of you who did get a chance to pose questions. "Ask the President" was made possible with funds provided by the Corporation for Public Broadcasting. Stay with us for some analysis of the President's remarks in a few moments.

This is NPR, National Public Radio.

NOTE: The program began at 12 noon.

Kennedys-King Day Dinner

Remarks at the Annual Dinner Honoring John F. Kennedy, Robert F. Kennedy, and Martin Luther King, Jr. October 13, 1979

Thank you, my good friend Walter Fauntroy, Mayor Barry, who spoke so eloquently about future plans for the city and for mine and his relationship, Mrs. King, distinguished guests, fellow Democrats, and fellow citizens of the District of Columbia:

I've been reading lately about Mayor Barry's attempts to find a house to live in. [Laughter] He has my sympathy. I understand his problem. It took my wife and me 2 solid years—[laughter]—of hard work to get the exact house we wanted in the District. [Laughter] And we could not have succeeded without the help of many of you. And I have particularly enjoyed the high quality of the garbage collec-

tion—[laughter]—in our residence, Mr. Mayor.

It's especially appropriate that the Democratic Party of this District should honor the recent heroes of our country, for it was only recently that your own struggle for the right to vote was honored. The early days of that struggle were shadowed by the cruel and heart-rending deaths of John F. Kennedy, Robert F. Kennedy, Martin Luther King, Jr. They championed the cause of the voiceless—people whose silent pain became an ocean roar that swept across our Nation, helping to wash away ancient hatreds and prejudice and discrimination and fear.

Their success was made possible by the people who stood with them, their closest loved ones, like Coretta Scott King, who spoke on this platform a few minutes ago. We finally won some of the battles which they began. And, as you know, old barriers have been falling so that many people can now share more fully the life in a nation dedicated to freedom and equality. This has been especially true here in the District. Yet for all of our victories, the right for full citizenship must continue.

Our strong District Democratic Party, represented by this enormous crowd tonight, is proof of some of those victories. You won the right to vote for President in 1964. It took you 10 years to win the right to vote for local officials, in 1974. You've got a good record. In 1964, 1968, 1972, you cast at least or almost 80 percent of your votes for the Democratic candidate for President. This is the kind of careful, balanced political judgment that I really admire. [Laughter] This District is truly the most Democratic place in our country and, therefore, a good place to live. And it inures a great deal of justifiable credit to you.

In 1976 you were able to improve even on that remarkable early record, casting

82 percent of your votes for the Carter-Mondale ticket, and I thank you for it. And I hope that you all do even better in 1980—[*laughter*—for all the Democrats who run.

You yourselves have produced outstanding political leaders: your able representative to the United States Congress, Walter Fauntroy; your dynamic and nationally admired young mayor, Marion Barry; the effective leader of your local Democratic Party, Bob Washington; your distinguished national committeeman and committeewoman, John Hechinger and Sharon Dixon.

And, in addition, this great city has provided many outstanding people to serve with me in the administration of the affairs of the United States of America: people like Pat Harris, Cliff Alexander, Geno Baroni, Sterling Tucker; Tyrone Brown, the FCC; Emmett Rice, the Federal Reserve; Senator Joe Tydings, Ruth Prokop, the Merit Systems Protection Board; Edith Barksdale Sloan, the Consumer Product Safety Commissioner; Bunny Mitchell; Wiley Branton at Conrail; Marjorie Lawson, Kennedy Center; Jim Dyke; Pauline Schneider, and many others—I don't have time to name them all. But this forces the Federal Government to recognize you, to recognize your hopes and your dreams and your problems and your aspirations. And it also gives the District, which has a highly motivated and consummately, politically educated electorate, to have a great and beneficial effect on the rest of our country.

The party that produced this tremendous array of talent also nurtured the District's image as a vigorous local entity, separate and apart from the seat of our Federal Government. As a matter of fact, as you well know, there are really two Washingtons: one, of the Federal city, which is a national and an international

center; and hometown Washington, where 700,000 local people live and work and make a good city function. When I campaigned, I often mentioned the mistakes of the Federal Government, and I have even had a few things to say about that since I have been living here. But I have never confused the two cities, and I have only had good things to say about hometown Washington.

This city enjoys the special beauty and the cultural advantages of being the Nation's Capital. And you've coped well with the special responsibilities of being an international center. But hometown Washington must also correct or prevent problems that you share with other cities throughout this country—such as urban decay, poverty, crime, and unemployment. You manage this and you manage it well, because you have a special kind of determination which has sustained this community despite generations of deprivation of basic human rights.

As far as hometown Washington is concerned, I have the same commitments tonight that I had when I was a candidate for President.

More than 2 years ago, I asked Vice President Walter Mondale to bring together a group, a high-level task force of local officials, officers from our own administration, Members of Congress, and to work with me and to work with you to carry out those campaign commitments and make sure that the basic problems of the District were not only identified but resolved.

First, I'm determined to reduce Federal intrusion into the local affairs of the District of Columbia. I've already ended Presidential review of local decisions where there is no significant Federal interest involved, and I support similar elimination of congressional review of such local matters. I will never treat the

District as merely an extension of the Federal Government. I'm committed to complete home rule for the District of Columbia.

This is an easy thing to say; it's a difficult thing to do. But you have a partner here who will work with you in every single opportunity to bring about what I have just described, because until these goals can be reached, we must press for decisions in the meantime that are speedy, simple, and fair to your people.

Secondly, I'm determined to establish a sound financial relationship between the District and the Federal Government.

I support increasing the authorized Federal payment and appropriating the full amount authorized, with a formula to make this process both orderly and predictable. I want to remove the Federal Government from the budgetmaking process for the District, because I think budgets ought to be made by the people who pay them.

There is a fact unknown by the rest of this Nation, that the bulk of your budget comes from local taxes. Other cities get Federal help and they still have a right to make their own budget decisions, and I believe so should the District of Columbia.

We have ended the last vestige of colonialism in Latin America on October 1, when the Panama Canal Treaty was implemented. And I want to end the last vestige of colonialism in America by passing the voting rights amendment in the 38 States of this country to make it law.

With your mayor, with other political leaders, with Walter Fauntroy, I am eager to cooperate mutually, to consult with one another, to lay a political strategy and to help to carry it out, because there is an awful lot of misinformation around this country about the composition of the Dis-

trict—its people, your qualifications, and the cheating that has taken place under present constitutional provisions, and the tinge of racism which has colored the reluctance to make this decision which is so long overdue. Fundamental justice requires that all citizens have not only a voice but also a vote in Congress.

The right to win congressional approval of this amendment was not easy, but for the first time in history—and this can make a difference—a President is supporting full voting representation for the District.

We received the necessary bipartisan support in Congress, because we all worked as a team. We made it attractive for both Democrats and Republicans to support this controversial issue. Had we not, it could not have passed the House or the Senate of the Congress. Many people deserve credit for that victory, but we all owe a special debt of gratitude to the man who never stopped letting us dream the impossible dream—Walter Fauntroy.

That success has been one of the most gratifying victories that's taken place during my administration. But we cannot rest until we have full congressional representation in the House and Senate for the citizens who live in the District.

Early in his administration, Mayor Barry visited me in the Oval Office, and we discussed ways that we could work together to form an even better partnership between him and me, his administration and mine, to solve other problems that involve the District and the Federal Government. Since then, our offices have been working closely together—constantly—to cement and to utilize this partnership.

It hasn't been long yet, but we've already seen significant results.

Working together, we're going to complete the Metro system. The Federal Government has now placed its total

monetary commitment to Metro on the table. Now it's up to the surrounding jurisdictions to fund their share of the system—and Washington needs the full 101 miles of the Metro system—and working together as partners, we're going to get it.

Until tonight I believe that that was the plan. We might have to cut maybe a mile or two off, Mr. Mayor, to get a few more garbage trucks. We'll see about that in the future. *[Laughter]*

Also working together, we've developed a plan to transfer authority to prosecute local crimes from the United States attorney's office to the District Government. Legislation to bring this transfer about will be a top priority for my administration. Other cities have control over their local criminal justice system, and so should the people who live in the District of Columbia.

I'm committed as well to having the mayor appoint local judges. This district is the only jurisdiction in the United States where local judges must be appointed by the President. The right to make decisions affecting your life is crucial to you, but the District also has special problems and it needs special help.

We recently approved grants totaling \$58 million for the District. These funds came from you in Federal income taxes paid, and they will go to construct new sewage treatment systems, to complete urban renewal projects, to modernize the public housing development, to provide financial aid and home weatherization for the elderly and low-income people, and to pay for various health improvement programs. The partnership between me and the mayor, my administration and his, is already paying off.

And now I'd like just to add a personal note: This is not just your city, it's my city, too. My whole family enjoys living in

this exciting and beautiful place. As you know, we came from a small town, and as you know, one of the things that we have been is part of this community. We don't get to do enough of the simple things along with you that we enjoy, most of all, because of the pressures of the office I hold. But without publicity and without fanfare, we walk around the Tidal Basin to see the cherry blossoms, and we run along the canal towpath, and we visit some of the churches around the District—not with publicity, but quietly—St. Matthew's, St. John's, St. Patrick's, Washington Cathedral, National Cathedral, Warner Presbyterian, Zion Baptist, Metropolitan AME, my own First Baptist Church, and others.

As parents of a student in the public schools, in Stevens Elementary and now at Hardy Middle School, we are personally interested in the quality of education in the District for Amy Carter and for your children, too.

In private homes which we visit, in stores, in restaurants and theaters and art galleries and museums, at the memorials commemorating the lives of famous Americans, we share the culture and excitement with tourists and with other residents of the District. Like you, we watch the Redskins and the Bullets play ball.

And Rosalynn has visited and worked with you in many places. I'd like to name just a few so you will know what my wife has been and is doing—the Children's Hospital, the Green Door, D.C. General Hospital, where she has led Jaycees and others to remodel that hospital and to get certification for nurses; immunization centers for children; the D.C. Village, Home for Older Americans, at Jubilee House, Friendship House; employment seminars for the well, employment seminars for the handicapped; at the Federal

City Club to inspire the business community to work more closely together to make this a truly great city; at Terrell Junior High School, at the Children's Museum, and many others. She has been there, and she works with you on projects.

We've tried to learn about the Nation's problems by learning about yours and to learn about some solutions to those problems by trying to solve yours and mine—how to improve health care, how to have better public housing, how to care for alcoholics, how to care for the mentally afflicted, how to promote employment, how to enhance the beauty of the city.

And we've invited literally hundreds of people like you to come to join in with us at the White House, and we've invited volunteers who work with Rosalynn, and other workers, to come to the White House so we could thank them and encourage them to be better citizens of the District of Columbia.

We're one of you, and we're part of the city, and I don't want you to ever forget that you've got official friends and personal friends who live at 1600 Pennsylvania Avenue.

Washington does share the problems of other cities, but Washington is also unique. Washington should be a model of how problems can be solved creatively and compassionately so that every citizen of the District will have a share in both the present and the future, not just of this city, but of our Nation. And I think we've got a tremendous untapped resource in the Congress. And I think you and I collectively ought to encourage the Members of the Congress to get to know more about the District, not just the places of entertainment and where to eat, but also to learn about the life of people who live here who are not rich, but who are struggling for a place under the Sun in life.

I believe it would help you all over the

country if they were invited specifically to visit some of the places that I've just named, where Rosalynn goes and many others where she has not yet been. We cannot have a Federal city of affluent officials, lobbyists, lawyers, and others, serving in the midst of another city, a very different city of the poor, the lonely, the sick, the homeless, the jobless, the old—a city of disadvantaged citizens and disfranchised citizens.

This city has already proved a major point for our country: that black and white citizens can live and work together and can build an effective Democratic Party together, yes, but also you've proven that you can build a greater community together. You are building a community that proves what America—the land of opportunity—really means.

Because of you, this unique national city—international center and hometown—is a vigorous community, ready to accept the full responsibilities—along with the full rights—of citizenship.

Like you, I'm proud to be a Democrat, and I am also proud to be a Washingtonian.

Thank you very much.

NOTE: The President spoke at 10:10 p.m. in the International Ballroom at the Washington Hilton Hotel.

Aid for Kampucheans

Statement Announcing United States Relief Effort Pledge. October 15, 1979

A human tragedy of horrifying proportions is unfolding in Kampuchea, with millions of people facing illness or death from starvation. Every member of the international community has a duty to help avert further mass suffering in Kampuchea. This is beyond politics. It is a

matter of simple and urgent humanitarian concern.

Two respected agencies—the International Committee of the Red Cross (ICRC) and the U.N. Children's Fund (UNICEF)—have been acting as agents for concerned governments and the United Nations in launching a major relief program to get food and medicine to the people of Kampuchea before it is too late.

I am today announcing an initial United States pledge of \$7 million to this effort: \$2 million from the United States Emergency Refugee and Migration Assistance Fund, plus 10,000 tons of food, worth \$5 million from Food for Peace. This is in addition to the more than \$1.2 million we have already devoted to feeding and caring for people along the Thai-Kampuchean border. I hope we can do more once the food and medicine begins to flow to those who need it, and I am eager to work with Congress to that end. Subsequently, we expect that the United Nations World Food Program, which is taking a leading role in mobilizing international food assistance, will draw upon U.S. pledges already made.

Secretary-General Waldheim has appealed to U.N. member states to support this effort with money and food. Japan, the Federal Republic of Germany, Australia, Britain, and the European Economic Community, have already responded. I urge others to follow their example.

I want to commend the private voluntary agencies which have moved so quickly to deal with this emergency. During Pope John Paul's visit to the White House, he and I discussed the need to act swiftly. I know that his concern is shared by religious groups of many denominations.

A heavy responsibility rests on the regimes and fighting armies causing so

much of the misery in Kampuchea. I call on those who are supplying them the weapons of war to use all their influence to assure that humanitarian relief reaches the people.

Kansas City, Missouri

Remarks at the Annual Convention of the National Conference of Catholic Charities. October 15, 1979

Bishop Sullivan, Father Dunn, Monsignor Corcoran, Governor Carlin, Congressman Skelton, distinguished volunteers who combine together, and have for 251 years, in our Nation to make us proud of benevolence and unselfishness through Catholic charities:

I was at Sunday school yesterday morning, and someone said to me, "Mr. President, you're spending an awful lot of time with Catholics lately." [Laughter] And one of my Baptist friends, who was standing there said, "It hasn't hurt you a bit." [Laughter]

After inviting Pope John Paul to come to the United States and, 10 days ago, having the great honor to receive him as my personal guest, I thought for the Nation how unprecedented an event it was to have the President of the United States welcome the spiritual leader of the world's Roman Catholics to our Nation's Capital for the first time, to the White House, the symbolic home of all Americans. For me personally, this occasion ranked as one of the best experiences of my Presidency.

There was a glow of warmth and friendship with the outstretched arms of millions of Americans to welcome our distinguished visitor. He and I had a delightful private conversation, quite extended. I told him I was surprised. He said he was, too. I knew that the welcome

would be warm, but the overwhelming nature of it was indeed one of the most remarkable events of the entire world.

He and I talked about many things. We talked about weapons. We talked about peace. We talked about Ireland, and we talked about the Middle East. We talked about China. We talked about hunger. We talked about charity. We talked about abortion. We talked about families. We talked about communism. We talked about freedom. We talked about the role of the church in this hemisphere and the spread of the gospel in countries where missionaries are now excluded. We talked about the relationship between the church and the state and how the efforts of public and private lives might be harnessed in common causes.

Pope John Paul's visit merits our continuing thoughts and reflections. His message to America was first and foremost a spiritual message. In his address to Catholic University, he said, "Materialistic concerns are never sufficient to fill the heart and mind of a human person. A life reduced to the sole dimension of possession of consumer goods, of temporal concerns will never let you discover and enjoy the full richness of your humanity."

The Pope's message and his visit stirred our Nation's Capital and, indeed, the entire world, and it stirred particularly the lives of our countrymen whenever he visited a streetcorner or a community or a small or a large church.

Looking for truth in a time of doubt, people have found in this good man a reaffirmation of those values that hold our society together—the fundamental values of love, unity, charity, family. In normal circumstances, we Americans have a very difficult time expressing our sentiments about these kinds of things. But they are as real as any of our more tangible con-

cerns. John Paul's visit showed that these feelings are always within us.

People were waiting for someone to say, "God bless America." And it sounded, I believe, particularly good coming from the lips of a world leader whose life is devoted to the service of God—Pope John Paul II.

I spoke to the Nation about this great underlying sense of community and patriotic values in my July address on Sunday evening, following a long period of consultation and meditation at Camp David. I believe such values are as important now as they were to our mothers and fathers and our ancestors when they first arrived in this country—either 3 years ago, 30 years ago, or perhaps 300 years ago—immigrants to a new land, determined to build a new life in what Pope John Paul has christened our "continent of hope."

If Pope John Paul left our Nation with one central message, it was this: We need to put our deep moral beliefs into action. And that's what you do, and I'm proud of you for it. "The poor," he said, "are our brothers and sisters." Instead of throwing them "crumbs," we should treat them like "guests at our family table."

Your great organization, the National Conference of Catholic Charities, personifies this standard of compassion. For 250 years, you've put your faith and your values into action. You've translated your vision of mankind and your philosophy into a working, living reality.

It's hard to imagine how differently our Nation would have grown had it not been for your own historic commitment. Generations ago, when government welfare programs were scarce or nonexistent, it was your organization and others like it that provided welcome and initial nourishment to millions of immigrants who reached our shores. To the huddled masses, it was not the government, but the

church and voluntary charitable groups that one had to look to for help.

And for many immigrant groups—from Ireland and Italy and Poland and Latin America—it was the Catholic Church that stood as the one institution that gave them an immediate sense of belonging to American society. The church helped new arrivals put down roots socially and economically, as well as spiritually. In the process it helped not only to build lives, but it helped to build our Nation.

Today your organization remains at the cutting edge of our Nation's great social commitment. Without your voluntary action, without generous participation of other private citizens in communities, churches, and organizations, we would live in a society without a soul.

All the grants-in-aid, all the income maintenance programs of the Federal Government, and all the well-intentioned and effective efforts of dedicated Federal and other government employees could never replace this heartfelt, voluntary effort that covers our Nation like they do. But neither can voluntary agencies do the job alone. To meet our society's needs, we need to foster a true partnership, one which involves government at all levels, private enterprise, and unselfish volunteers.

This partnership of public and private interest is a major element in my own administration's domestic policy. It's also been illustrated vividly in the resettlement in our country of many thousands of Indochinese refugees. This step would not have been possible without the help of the voluntary agencies and, especially, Catholic charities.

There is now developing, to the horror of the world, a tragedy of profound consequence in Cambodia, known now as Kampuchea. Today I announced a

United States pledge of \$7 million, which will be increased in the future, to help feed the tens of thousands of starving human beings.

We have difficult obstacles to overcome in the distribution of this food. And this effort will be carried out by private charities and by organizations of the United Nations, and together we must succeed. If obstacles arise between the starving and the food we offer, those obstacles need to be highly publicized so that the officials of south Vietnam will not dare perpetuate the horrible circumstances which they themselves have created.

These steps in Southeast Asia and in other places around the world would not have been possible without the help of the voluntary agencies. On behalf of all Americans, I thank you for your service and salute your tremendous humanitarian work in this area.

I might mention here another example of successful public and private partnership—in the fine work that your own president-elect, Monsignor Fahey, has been doing as my appointee on the Federal Council on the Aging.

There's one aspect of our national life where we need to put our partnership to even better use—and I talked about it when I was with you 3 years ago, in 1976—that is the problem of the families. This is a subject of pivotal concern to all of us and was especially during Pope John Paul's American visit. Families are the foundation of a healthy and a vibrant society. They carry out the timeless tasks of nurturing, supporting, and caring for their own members, in many different cultures and many different communities. They provide irreplaceable strength and shelter for one another.

Today, what Pope John XXIII called "the first and essential cell of human society"—that is, a family—is in trouble.

Many families have already been strained to the breaking point by social and economic forces beyond their own control. Some families indeed have broken. The tragic results are all around us, in alcoholism, drug addiction, social alienation, and crime.

Three years ago in Denver, I told you there was a gap in the way our country makes public policy—the lack of an explicit, conscious concern for how government policies and activities affect families. I said at the time that a nonpolicy toward families by government has the same adverse consequences as an antifamily policy would have.

I promised that my administration would make a conscious commitment to strengthen the American family, and I promised to consult with you and your own officials so that I might have the proper guidance. We set to work on that commitment, and in every policy area, economic and otherwise, we have sought to assist and to support families. We recognize that spiritual uplift for a person can only follow if the bare necessities of life are provided.

I'm proud of my administration's record in pursuing this approach. We've added, for instance, more than 8 million new jobs to combat perhaps the greatest twin threats to the family—unemployment and poverty.

We've undertaken to reform our Nation's ineffective, inefficient welfare programs, programs that for too long have been antiwork and antifamily. We've finally gotten this legislation out of the Ways and Means Committee in the House, and I need for you to help me get it the rest of the way through the Congress. Only by building up public awareness and public support for a proposal like this can it overcome the inertia of the Congress and arouse the support that will

encourage the Men give it their support.

We've greatly increased social services, for health care, for education, and to pass comprehensive legislation, another long overdue hope to implement in our policies and foster care and adoption if poorly administered rather than helped.

In dozens of other areas we build a strong core and protect American diversity.

We've worked for important new legislation to end abuse, sexual exploitation, discrimination in employment, pregnancy. We've begun new programs, we've begun new adolescent pregnancy, expanded the Foster Care

With your help food stamp program and to make it more families by eliminating pay cash for food stamps.

We've strengthened the system and put it on we've removed some features.

We've enacted new provisions to promote part-time and flexible time schedules will permit employment workday to fit today's needs.

I've also asked Congress \$1.6 billion this year to rising energy costs or most need this assistance also asked the Congress billion annually for this purpose. With your

strong, so powerful, that there is no challenge we cannot meet, there is no problem we can't resolve, there is no question that we can't answer, if we have confidence in one another and if we are united in a common purpose.

I'm the fourth President, for instance, who's dealt with 10 or 11 years of inflation, which is too high. But if Americans are willing to work together, to have confidence in one another, we can get inflation under control.

We've never had an energy policy for our country, because for too long we had extremely cheap oil—a dollar and a half or so a barrel—and we didn't have to worry about it, and we became addicted to—a highly dependent society on—foreign oil.

We import about half the oil we use now. Next year we'll send overseas \$70 billion in American money that could provide jobs for our people. And as we import 8½ million barrels of oil per day, we also import inflation, and we import unemployment.

These are just a few of the questions or problems that I have to face along with problems of defense and the search for peace. But it's a wonderful job to have because it's the greatest elected office in the greatest nation on Earth.

And President Truman said another thing that I've noticed, particularly lately. He said, "If a President ever becomes mid because he's worried about public opinion polls or what newspaper columnists say might be the results of the next election, then he's not worthy to lead this great country." So, I remember that. I'm not concerned. I look to the future with great confidence in myself, in politics, and so in this country. I base that confidence on what I know our Nation is.

Jimmy just spoke to the national convention of Catholic charities, a group that's been

Many families have already been strained to the breaking point by social and economic forces beyond their own control. Some families indeed have broken. The tragic results are all around us, in alcoholism, drug addiction, social alienation, and crime.

Three years ago in Denver, I told you there was a gap in the way our country makes public policy—the lack of an explicit, conscious concern for how government policies and activities affect families. I said at the time that a nonpolicy toward families by government has the same adverse consequences as an antifamily policy would have.

I promised that my administration would make a conscious commitment to strengthen the American family, and I promised to consult with you and your own officials so that I might have the proper guidance. We set to work on that commitment, and in every policy area, economic and otherwise, we have sought to assist and to support families. We recognize that spiritual uplift for a person can only follow if the bare necessities of life are provided.

I'm proud of my administration's record in pursuing this approach. We've added, for instance, more than 8 million new jobs to combat perhaps the greatest twin threats to the family—unemployment and poverty.

We've undertaken to reform our Nation's ineffective, inefficient welfare programs, programs that for too long have been antiwork and antifamily. We've finally gotten this legislation out of the Ways and Means Committee in the House, and I need for you to help me get it the rest of the way through the Congress. Only by building up public awareness and public support for a proposal like this can it overcome the inertia of the Congress and arouse the support that will

encourage the Members of Congress to give it their support.

We've greatly increased funding for social services, for health, for housing, and for education, and we are today working to pass comprehensive health insurance, another long overdue aid to families. I also hope to implement major improvements in our policies and programs concerning foster care and adoption. Such programs, if poorly administered, have often hurt rather than helped children and families.

In dozens of other ways, we've sought to build a strong commitment to preserve and protect American families in all their diversity.

We've worked for the passage of important new legislation to combat child abuse, sexual exploitation of children, and discrimination in employment because of pregnancy. We've extended Head Start, we've begun new programs to deal with adolescent pregnancies, and we've expanded the Foster Grandparents program.

With your help, we've reformed the food stamp program to eliminate fraud and to make it more available to poor families by eliminating the requirement to pay cash for food stamps.

We've strengthened the social security system and put it on a sound basis, and we've removed some of its antimarriage features.

We've enacted new laws and regulations to promote part-time employment and flexible time schedules, both of which will permit employees to adjust their workday to fit today's family responsibilities.

I've also asked Congress to appropriate \$1.6 billion this year to ease the burden of rising energy costs on poor people, who most need this assistance, and then I've also asked the Congress to provide \$2.4 billion annually for the next years for this purpose. With your help, we can win

approval of the windfall profits tax on the unearned profits of the oil companies, which will help to finance this and other programs to help the low-income families.

We've worked on all of these projects in partnership and shoulder to shoulder with you.

We're making final plans now, after a very careful and, I think, well-placed preparation, for a White House Conference on the Families. This conference will involve the public in long overdue assessment of how actions by the government, and major private institutions as well, sometimes help or hurt or neglect American families.

The White House conference will not limit itself to what Washington officials think is important, but we will learn what American families believe is important to them. We'll look at the real and important changes that have taken place in American family life and discuss what we as a nation can do to support and to strengthen families.

Instead of a single Washington event, which has always in the past been the case, we will have three separate White House conferences on families next summer—one in Baltimore, one in Minneapolis, and one in Los Angeles. These conferences will bring together families, or those who speak for them, in the widest possible geographic diversity and will encourage the broadest participation in setting an agenda for action on behalf of America's families.

Just as previous White House conferences have really helped to generate ideas and to prepare an agenda on behalf of the young, the old, the handicapped, and others, this set of conferences—the first of its kind—can help bring concern for families to the center of national policymaking, where it deserves.

I might emphasize here that the prob-

lems of American families cover almost the entire gamut of responsibilities of public and private service. Some of the issues are extremely sensitive and controversial, as you well know, but I believe that they should no longer be ignored. And only if we are all willing to come together to discuss in a frank fashion the acknowledged problems of the family, to let those who are affected speak up and be heard throughout the country, and then in a common way seek solutions to those problems, can we ever hope to arrest the downward slide of the strength of families in our country. And as you know, the strength of families is equivalent exactly to the strength of the moral character of our Nation.

And I urge you and the people whom you serve to get involved in this important initiative, in the hearings that are now going on in the State conferences and the three White House conferences next summer. I hope that you will be there.

You and Catholic charities have already a great voice in the direction of the conference on the families. Your past president, the man who greeted me so warmly when I spoke to you in 1976, Rashey Moten, is on the Conference Advisory Committee. And if you don't like the way the conference is doing, see Rashey Moten. After getting to know him at your conference 3 years ago and since then, at my request he is engaged, along with others, in one of the most important and challenging tasks ever undertaken by a group of Americans.

I can assure you that this conference on the family will not simply produce another one of those government reports which all too often go on the shelf and then becomes forgotten. Because the needs of families is so deeply ingrained in my own consciousness and within the lives and hearts of people like you and others

around the country, this report cannot be forgotten.

The conference will serve as a catalyst for continuing and expanding action on family issues in the Federal Government. To ensure this development, I've today directed all Federal departments and agencies to support and to cooperate with the conference's activities.

And I'm also announcing today that Health, Education, and Welfare Secretary Patricia Harris is creating for the first time an office for families within HEW. I know you agree with me that this is long overdue.

But I want to make sure that this office is not only involved in the preparation for the conference and helping to make the conference a success, but after the conference work is completed, this office, a permanent entity within HEW, will be there as a focal point to carry out the recommendations of the conference itself. It will be deeply involved in implementing those recommendations and also generating new thoughts and new ideas on a continuing basis after the conference adjourns, because Americans' social life and the problems of the families changes from one year to another.

I'd like to add that Rosalynn shares my interest in the success of the administration's program for the American family, and my whole family will be involved in making sure that this entire effort is successful. Once my mother and Rosalynn and Amy get involved in something all together, you can be sure that we will not permit this effort to fail. *[Laughter]*

As I said at the beginning of my remarks, family values are not the only reason for national concern. In my July speech to the Nation, I spoke about the crisis of the spirit that I saw brewing in America. I listened carefully to the prayer a few minutes ago, and this message to

God, this request for help by God, mirrored the same concern.

I warned in July, and I have been saying ever since, that we are threatened with the loss of that fundamental trait which has characterized Americans since the foundation of our country—optimism, confidence in one another, and confidence in the future.

The response to that speech was overwhelming. Those who have worked in the White House for 25 or 30 years say the response was unprecedented. We received tens of thousands of letters and hundreds of telephone calls, all sounding similar themes. "You're right," they said, "now tell us what we can do to help."

My answer to those thousands of Americans is the same as my message to you. The answer to the crisis of confidence is action. The answer to alienation from one another or from government is participation. The way we solve our problems is through unity and partnership.

You in this room typify, personify the best in America. Your network of social services, the largest in our country, is composed of tens of thousands of Americans united by faith, dedicated to the ideal of serving others, and determined to translate that ideal into action for the benefit of others. You've chosen to light a candle and not to curse the darkness, and the flame of compassion lights the road for all of us to follow.

Let us carry on our own the tasks outlined so eloquently by Pope John Paul. Let us preserve and enhance the partnership between government and the private sector, which serves our people well, and let us make every effort to strengthen our families.

Finally, let us share the prayer of the American poet Stephen Vincent Benet: "Grant us brotherhood," he said, "not

only for this day, but for all our years—a brotherhood not of words, but of acts and deeds.” With this kind of generous spirit, we can strengthen our Nation and bring new enrichment in every way to the lives of the people we love.

NOTE: The President spoke at 1:09 p.m. in the Imperial Ballroom at the Radisson Muehlebach Hotel.

Kansas City, Missouri

Remarks at a Reception for Business and Civic Leaders. October 15, 1979

First of all, I want to thank our host, Mr. Baumgardner, for that good introduction and also to tell you that for any President it's both an exhilarating and a sobering experience to come to the home of President Harry Truman.

As you know, President Truman is a man who has grown in stature with historians and with American people and with those throughout the world who know history—the more we have a chance to assess what his contributions were.

He was a tough political infighter. He was highly partisan. He told me—rather, he said once, and I've read his comments—that “When somebody comes and tells me they're bipartisan, I know I've lost a vote. They're not going to vote with me.” And I've still got in the Oval Office an exact replica—I tried to get the original, but Mrs. Truman and Margaret wouldn't let me have it—of his sign, “The buck stops here.” And I think about that a lot as I carry on the affairs of our great Nation.

Times change from one President to another, from one generation to another—challenges, problems, questions, change. But there's a surer realization as history progresses that our Nation is so

strong, so powerful, that there is no challenge we cannot meet, there is no problem we can't resolve, there is no question that we can't answer, if we have confidence in one another and if we are united in a common purpose.

I'm the fourth President, for instance, who's dealt with 10 or 11 years of inflation, which is too high. But if Americans are willing to work together, to have confidence in one another, we can get inflation under control.

We've never had an energy policy for our country, because for too long we had extremely cheap oil—a dollar and a half or so a barrel—and we didn't have to worry about it, and we became addicted to—a highly dependent society on—foreign oil.

We import about half the oil we use now. Next year we'll send overseas \$70 billion in American money that could provide jobs for our people. And as we import 8½ million barrels of oil per day, we also import inflation, and we import unemployment.

These are just a few of the questions or problems that I have to face along with problems of defense and the search for peace. But it's a wonderful job to have because it's the greatest elected office in the greatest nation on Earth.

And President Truman said another thing that I've noticed, particularly lately. He said, “If a President ever becomes timid because he's worried about public opinion polls or what newspaper columnists say might be the results of the next election, then he's not worthy to lead this great country.” So, I remember that. I'm not concerned. I look to the future with great confidence in myself, in politics, and also in this country. I base that confidence on what I know our Nation is.

I just spoke to the national convention of Catholic charities, a group that's been

involved in volunteer work for other people for more than 250 years in our country. And I mentioned to them about the profound impact of the visit of Pope John Paul II to our country. It was kind of an outpouring of awareness of the kind of ethical and moral and spiritual characteristics which never change in the hearts and minds of American people, but sometimes get buried under the transient or the temporary problems or inconveniences that we, as extremely fortunate people, have in our country.

And I think that was a good reminder that we ought not to be discouraged, that we ought to be inspired to look to the future with confidence, and to reach our hand out to a neighbor and say, "Let's work together to make the greatest nation on Earth even greater in the future."

Thank you very much for letting me be your President and for letting me visit you here.

NOTE: The President spoke at 1:53 p.m. at the Jackson County Courthouse.

Chicago, Illinois

Remarks at a Fundraising Dinner for Mayor Jane Byrne. October 15, 1979

This is unbelievable. When Jane Byrne raises a crowd, I'm always eager to come and speak. I've never seen such a tremendous outpouring of support and Democratic enthusiasm and harmony and commitment and courage and anticipation for the future as you've demonstrated here tonight.

You might feel bad about sitting in this room—you'll be hearing the speeches on television later on—but it took me and Rosalynn and many of you 2½ years to get the place we wanted to live in in Washington, D.C. So, maybe before 2½

years you'll be moving up to the next floor. [Laughter]

I predict that if Jane Byrne stays as your mayor, and I think she will, this outpouring of affection and appreciation which you have demonstrated for her will continue.

This afternoon I was in Kansas City—Kansas City, Missouri—in a county courthouse, Jackson County. It's a famous courthouse, because 8 years before he became President, Harry Truman was a county judge.

As I stood there this afternoon in a small crowd on the main floor of the courthouse, I thought about him as President and what he meant as a Democrat. Harry Truman believed in Democratic Party unity. Harry Truman stayed close to the people. Harry Truman was plain-spoken. He said what he thought, and the people listened. Harry Truman was not always popular, because he did what was right, regardless of public opinion polls. Harry Truman was a man of his word. When he said something, you could believe it.

Harry Truman recognized that we had a nation, during the last part of the Second World War and during the few years afterwards, which was shot through with very serious problems, but he never gave up. He tapped the reserves not only of the Democratic Party but of the people of our country.

He believed in families; he believed in neighborhoods; he believed in communities. And he saw that, in spite of problems which change from one day to another or divisions among people which cause hot debates in a free country, that there was an undercurrent, a reservoir, a foundation, a base of innate courage among the American people, and there were principles which never change, principles of honesty, integrity, dedication, concern

about one another, steel strength when our country was in danger, and compassion and love among American people.

And his ability as a President to tap these tremendous resources come daily for me in the White House as a reassuring fact, because I know that the same characteristics that existed when he became President, when he served, still exist among people in our country today.

A few days ago in Grant Park, you had assembled for a great visitor probably the largest crowd of human beings ever assembled in the United States, perhaps even the world, in history—about a million and a half people, who came not out of curiosity, but to demonstrate that there was a hunger among us to preserve the finest characteristics that permeate our lives, fill our hearts and our souls. You recognized that there are things eternal and that there are things in a modern technological world that do not change.

We Democrats must remember that, although all parties have deep religious faiths. But we should remember that our country also is strong, ethical, morally, spiritually, that we don't change inside, that we have an obligation to one another. And the strength of our party and of our country lies in our belief in one another, our confidence in the future, and our determination, which we will never yield, that we will make together the greatest nation on Earth, the United States of America, even greater in the future. If you'll help us, we'll help you realize this dream.

Thank you very much. I'll see you on television in a few minutes.

[The President spoke at 8:09 p.m. in the Banquet Annex Hall at the McCormick Place Convention Center. He then went to the Don Maxwell Hall, where he delivered the following remarks at the main dinner at 9:05 p.m.]

My good friend Mayor Jane Byrne, Chairman Dunne,¹ Michael Howlett,² State officials, Members of Congress, distinguished leaders of Chicago and Cook County, both Democratic and those who've not yet been converted to our party—[laughter]—and especially more than 12,000 of Jane Byrne's closest friends:

I know where to come the next time I want a quiet, restful evening to spend alone. *[Laughter]*

Just a few minutes ago, I went down and spoke to five or six thousand people, and I was on the way back to my hotel when Jane said, "Wait, you haven't seen anything yet." And this is an absolutely unbelievable sight. I'm proud to be here.

In the last few years, this is my third visit to this great city on an occasion when the mayor of Chicago is honored. A President has many interesting and exciting experiences, but I don't believe any more interesting or exciting than to be here tonight.

I've been doing a lot of different things lately. When I was at Sunday school yesterday morning, one of my friends said, "Mr. President, I know what you've been doing the last week or so. What are you going to do next?" And I said, "Well, I'm going to Kansas City tomorrow morning to speak to the National Conference of Catholic Charities, and then tomorrow night I'm going to Chicago to a large testimonial dinner to Mayor Jane Byrne." And they looked at me for a while and said, "You've been spending an awful lot of time with Catholics lately." And another Baptist friend standing nearby said, "Well, it hadn't hurt you at all. Keep it up."

¹ Cook County Democratic chairman.

² Master of ceremonies for the dinner.

I am glad to be with you, members of all political parties, members of all faiths. I speak to you tonight as President of the greatest nation on Earth, and I also speak to you as a friend of your mayor. I also speak to you as a Democrat.

This enormous attendance is proof indeed of the enthusiasm and the dedication and the unity and the commitment and the confidence of people who live in Chicago, and it's also proof of the tremendous leadership of your mayor, Jane Byrne. You've made a wise choice, and I'm proud of it.

We are here to honor the mayor, to provide her with the support and the help she needs in a very difficult job and to recognize the fine performance which she has already exhibited to the rest of the Nation in the short time she's held this exalted office.

I want to thank you for this support for her personally and to encourage you to keep it up. The lifeblood of politics and effective government is good and loyal people ready to work, ready to contribute talent, ability, and care for one another. Your mayor is depending on you, and your President is depending on you, also.

God must have loved Democrats because he made so many of us. However, he always leaves us short of money. Our opponents can almost always outspend us. Since we don't like to lose elections, we work harder to raise money, and we do a better job in office after we are elected. Your mayor has proven that. This extraordinary determination and fighting spirit and better performance all in our party make sure that our party is the first choice of Americans. By earning the loyalty and the support of the American people, we have been the majority party for the last 50 years, and my determination is to keep it that way.

Mayor Richard Daley understood the basis for party strength. He was proud of the people of Chicago. He dedicated his life, as you know, to serving you. He earned the loyalty of the people of this city, no matter what your party preference might be. In doing that, he made Chicago synonymous with economic progress and with workable government.

What I admired most of all and what kept him in office so long was that his government, your government, was one with a human side. He understood that politics is a two-way street that loyalty comes to an officeholder only if we give good government to the people who vote, and bring into the political system working people—immigrants, minorities, the old, the needy. Then they'd know they are better off to be inside the political system rather than outside as an alienated and lonely American citizen.

So, when we honor Jane Byrne tonight, we also honor the tradition of Chicago and the people who helped to make her become your mayor—I might add, with an unbelievable 82 percent of the vote. And we also honor the people who have made Chicago one of the great success stories in the entire world.

From the time Chicago was founded, people came here in search of better lives. They came here to work and to build together. That's what still distinguishes Chicago today. You are a city of builders—builders of new industries and great enterprises and the most superb architects on Earth. There is no better symbol of this than the Chicago skyline—nothing like it in the world.

This afternoon I and Rosalynn and Jane Byrne, George Dunne, and others flew down the lakeshore and looked at the skyline from a helicopter. It was a thrilling sight, and I get a thrill as President and as an American every time I see

it. And there's another side to Chicago that I also admire, which I mentioned earlier—its human dimension. This is a city of families. This is a city of neighborhoods, where churches and community life and traditions are important.

When His Holiness Pope John [Paul]³ II came here, he did not visit just the great cathedrals. He went to the neighborhoods, and he went to their churches. He went to the South Side, to Marquette Park, to Pilsen, to the Five Holy Martyrs Church, and the Visitation Church. He was in the different communities of this city, where unique heritages and customs stay strong and vital.

Sustaining that neighborhood life has been a chief goal of Mayor Jane Byrne. She's fighting for the well-being of neighborhoods in Chicago, and I can assure you that she's fighting for Chicago in Washington as well. And she is winning her fight in both places—here and in Washington.

With a good partnership between your mayor and your President, Chicago is leading the country in Urban Development Action Grants, above any other city in the Nation. We expect this money to stimulate \$300 million in private investment, creating 5,000 new and permanent jobs in Chicago. In addition, we've approved block grants for Chicago of \$127 million for this 1 year. We've just reached an agreement with Mayor Byrne, who is a tough negotiator, that will preserve over 1,300 federally funded city government jobs.

My urban policy means making government work better together—Federal, State, and local. In Chicago, we have had an opportunity to ensure that a major national and international travel

system is not stifled in its necessary development and expansion.

I'm very pleased to report to you tonight that after 10 years of waiting and after several months of work with Mayor Byrne, we have finally reached an agreement in principle to relocate some defense facilities at O'Hare Airport, which will permit the much-needed expansion and modernization of your international air terminal.

This is good news for Chicago, and it's good news for the millions of people who fly in and out of O'Hare Air Terminal, and it's good news to me, because it represents precisely that kind of creative Federal-local cooperation that's so important to our mutual success and lets our Nation realize its great strength.

I don't want to recite a long list tonight. I just want to emphasize to you at this special evening banquet that Jane Byrne is working hard for this city in the same tradition as her great predecessors. And I can also say that if we had more congressional delegations like Chicago's, we would be moving even more vigorously to rebuild all our cities and also to rebuild our national economy even more rapidly.

I've worked closely with Senator Adlai Stevenson, with Danny Rostenkowski, with Frank Annunzio, and all the rest of the Chicago delegation. When I say that Chicagoans are builders, I mean that you also send that same building spirit to Washington.

When I took office as President and the times called for rebuilding a stagnant economy, I called on the Democratic Congress and Chicagoans in that Congress to get the job done. We've done that job—together—and we can be proud of it.

We've increased our commitments to Democratic programs—social security, housing, education, and health. Corporate

³ Printed in the transcript.

profits are up 50 percent. Farm exports have broken world records in 1977, 1978, and again in 1979. Taxes have been cut. In 1980 you will realize tax savings of over \$40 billion. We've had good luck in getting away from unnecessary regulations. We have cut 1,000 OSHA regulations off the books. Paperwork is down 15 percent, and the budget deficit has been slashed 60 percent by \$36 billion. Those things are important. They are kind of a measure of what we have tried to do in this country and what we've accomplished.

In 30 months, we've created 8½ million new jobs in America, a quarter million of those jobs right here in Chicago. We've brought the national unemployment rate down by 25 percent. And in Chicago, because of your extra good leadership, unemployment has been cut almost 30 percent.

Throughout the country, we created a million new jobs for black workers, over 1,000* of those jobs for black citizens here in Chicago. We've created 700,000 jobs for teenagers in America, 17,000 of those jobs here in Chicago. We've created over a million jobs for construction workers, 30,000 of those jobs here in Chicago. The country's never had before so many new jobs in such a short time, and we are still hard at work.

Americans in 1976 also wanted to rebuild our cities, our older cities. I knew that with the right policies older cities could be rebuilt, a new spirit could be engendered, past defects could be corrected, our urban dwellers could be given a better life.

With your help, we launched the Nation's first comprehensive urban program. We changed old and existing Federal pro-

grams so that for the first time they really began to give better services to our people. Now downtown and inner-city communities are reviving all over the Nation. As in Chicago, the building spirit has revived, and people are putting hard work and new life back into our cities.

There's plenty to be done. It will not be easy, but we are off to a good start. And I pledge to keep this progress going. Our cities in America must be rebuilt. If you'll help me, we will succeed with that job.

And we are now devoting that same American spirit—individualism, innovation, dedication—to our energy problem, to free us from dangerous overdependence on imported oil. We now import more than half the oil we use from foreign countries. Next year, we will spend \$70 billion on foreign oil. We are importing oil; we are exporting jobs, we are importing inflation.

We've begun to act after too long a delay. We've already cut imports by 2½ million barrels per day by 1985, but we know that this will not be enough. We must do better.

I have now sent to Congress, in July, a program to conserve more energy and to produce more American energy. I proposed a windfall profits tax on the unearned income of the oil companies of this country to help poor families pay high energy bills, to build a better transportation system, and to produce synthetic fuels, solar power, and other energy in our own country.

It will amount to the most ambitious peacetime undertaking in our history, on the same massive scale as we saw when we built the Interstate Highway System throughout the United States. It's the kind of program Chicagoans like. It builds on American strengths. It harnesses American ingenuity. It provides American jobs.

*The President meant to say 100,000.
[Printed in the transcript.]

We can cut our oil imports by one-half by 1990. We can reassert American leadership. We can achieve energy security. All it takes is a spirit of common enterprise and determination, and that's what we've got.

Energy price increases are now the main force driving inflation. Oil price increases have caused 4 percent of our own inflation rate. Without energy, the inflation rate this past summer—this summer—would be no higher than it was in 1978 or 1977.

Clearly, no economic problem today is more important than the 10 years of high inflation, and I intend, with your help, to bring it under control.

We took a big step forward just a few weeks ago by forging a historic national accord. It's a broad agreement with labor on economic and domestic policy, with direct participation on wage and price stability. For the first time ever, we've made full partners of those who suffer most from inflation—the working men and women of America.

The national accord acknowledges that we all have to tighten our belts. We've recognized inflation as the number one threat economically to our country.

The national accord acknowledges that we can succeed. We can and we will do it fairly. We can and we will protect jobs. We can and we will protect the poor and the disadvantaged. That's what the national accord is all about. It's not just to make life comfortable for the few. It is to bring economic justice and security to all Americans.

There's nothing easy about this inflation fight for you or for me. In fact, I'm the fourth consecutive President to confront this same problem. Presidents before me have tried mandatory controls, and they've also tried the deepest recession since the 1930's. Neither worked. I believe

they didn't work because we've never before had a comprehensive energy policy, and we've never before had a national accord where the tackling of the inflation problem would be a joint effort among government, business, and labor.

The national accord gives us all an historic opportunity to bring inflation down without massive unemployment and suffering. It's a program that can appeal to our finest instincts and can bring about the best in Americans.

We face other challenges and opportunities. As President, my first and my foremost responsibility is to keep America strong and to maintain peace for our people. We are also helping to bring peace to our friends in the Middle East, who've been enemies for centuries and at war almost continually for the last 30 years.

We're determined to control nuclear weapons. The Senate must ratify the SALT II treaty.

And as Americans, we will always hold high the banner of basic human rights throughout the world.

We are indeed maintaining America's leadership among all nations on Earth. This is not an easy role, but we will not fail.

Let me add this about inflation and jobs and world peace and our other challenges: When I became President, I decided to confront the fundamental problems of our country. I decided to do it forcefully and directly, no matter what the political impact might be, no matter what the public opinion polls might be.

Whatever the future may hold, I want the personal satisfaction to know that we did not duck problems, that we did not settle for half-hearted approaches, that we always put the interests of this country first. We owe that debt to the Democratic Party. We owe that debt to the people of

this country, and I owe that debt to myself.

As a Democrat and as President, I'm not afraid; in fact, I look forward to tough political fights—and with your help, we will not lose those fights ahead. This has been the approach of the Democratic Party, and this has been the approach of our country to major challenges in the past.

Whenever our Nation has been in danger, whenever we have seen our Nation being tested, Americans have put aside differences, have put aside trepidation and fear, have reached our hands out to one another, have joined in together and have approached the future with determination and with confidence. That must always be our commitment, as it must be in times like these.

The energy crisis, the inflation crisis, is not as easy to see as the First World War or the Second World War or the Great Depression. But at the same time, our Nation's security is in danger.

At times serving as President can be a lonely job, but a President, particularly a Democratic President, does not stay lonely on a trip to Chicago, especially when you're with Jane Byrne and 12,000 friends of hers and great leaders on your own.

I'll still be with you when I'm back in Washington. I'll still be working with Mayor Byrne, with George Dunne, with Frank Annunzio, Danny Rostenkowski, and all the other good Democrats and Republicans who are here representing Chicago.

We'll be working together to tap that great reservoir of strength in America—the same spirit that's brought us together in time of war and depression, that can reunite us again to meet any challenge and to prevail.

When Pope John Paul spoke to a million and a half Chicagoans in Grant Park,

he saw in you a picture of America—a nation formed of many people, each with a different history, but together creating something new each day. I share that beautiful vision of Chicago and of America. And our common prayer will be that we will return to the basic and unchanging values that have made this country great.

I pledge to you as President to lead this Nation—all of our people—to realize that vision so that our most fervent prayers for each other and for our great country will be answered as God has answered them in the past.

Thank you very much. God bless all of you.

NOTE: The following morning, the President attended a private reception at the residence of Mayor Byrne.

Commissioner of Patents and Trademarks

*Nomination of Sidney A. Diamond.
October 15, 1979*

The President today announced his intention to nominate Sidney A. Diamond, of Tucson, Ariz., to be Commissioner of Patents and Trademarks. He would replace Donald Banner, who has resigned from the Commission.

Diamond, 64, is currently counsel to the New York City firm of Kaye, Scholer, Fierman, Hays & Handler and vice president of the International Patent and Trademark Association, the American group of the International Association for the Protection of Industrial Property.

He was born October 17, 1914, in New York City. He received an A.B. from Dartmouth College in 1935 and an LL.B. from Harvard Law School in 1938.

Diamond practiced law in New York

City from 1938 to 1941 and in Washington from 1941 to 1943. From 1943 to 1946, he was with the Justice Department as special attorney and special assistant to the Attorney General. He has practiced law in New York City since 1946, first with Roosevelt, Freidin & Littauer, then since 1956 with Kaye, Scholer, Fierman, Hays & Handler.

Diamond has served as chairman of the American Bar Association's section of patent, trademark and copyright law and as vice president of the Copyright Society of the U.S.A. He has written numerous articles in legal and other journals on trademark and copyright matters.

White House Conference on Families

Memorandum From the President.
October 15, 1979

Memorandum for the Heads of Executive Departments and Agencies

In July, the National Advisory Committee of the White House Conference on Families held its first meeting. The Committee adopted a plan of action for the Conference, which includes hearings, state activities, and White House Conferences at several sites throughout the country.

A major goal of the White House Conference on Families, which I called for in my campaign for the Presidency, is to identify public policies which strengthen and support families as well as those which harm or neglect family life, and to recommend appropriate changes. To accomplish this goal, the Conference must have the support and assistance of every Department and Agency within the government.

I am, therefore, directing Department and Agency heads to cooperate fully with

the staff of the White House Conference on Families. Such cooperation should include, but not be limited to, the following: Identifying and cataloging programs, policies and research studies which impact on family life; analyzing the impact of selected policies and programs; publishing studies, reports and other informational materials relating to families; providing detailees, logistical assistance, meeting facilities and other resources for Conference activities; earmarking discretionary funds for projects which support the goals of the White House Conference on Families, and informing employees and constituent groups about Conference activities.

To demonstrate this Administration's commitment to the goals of the WHCF, I am requesting Agency and Department heads to be available to make presentations at the hearings which will be held this fall and at the White House Conferences scheduled for June and July of next year. To coordinate government-wide participation in the Conference, an Interagency Task Force will be established. Please designate one of your Special Assistants or an Assistant or Deputy Assistant Secretary for Policy or Planning who has knowledge of family-related programs and a capacity to draw on the resources within your Department to serve on this Task Force. Notification of this appointment should be sent to John Carr, Executive Director of the White House Conference on Families (472-4393) by October 25, and your designee should plan to attend the first meeting of the Interagency Task Force scheduled for November 1.

Thank you for your assistance in helping strengthen and support our nation's families.

JIMMY CARTER

NOTE: The text of the memorandum was released on October 16.

Dolton, Illinois

Remarks and a Question-and-Answer Session at a Townhall Meeting. October 16, 1979

THE PRESIDENT. First of all, I want to thank my good friend, Marty Russo, for that wonderful introduction.

In 1974, a little bit earlier in the year than this, I was Governor of Georgia, and this district had an incumbent Congressman. I won't say which party he represented. But I heard way down in Georgia about a fine young man who was running for Congress for the first time. And I left Georgia and came up here and went to the VFW club just a couple blocks from here. They told me they may not have but 50 or 75 people there—it was a fairly small building—but there were six or seven hundred local citizens packed in that place, not to see me, because I was an unknown Governor, but to see Marty Russo. You've been good to him, and he's been good to this district and good to the country.

The most important thing I know of as President is, in times of trouble and challenge, in times when our Nation might even be in danger, in times when people's lives are changing very rapidly and people are concerned about their own families, to tap the tremendous strength of this country, the strength that comes from a knowledge of one another, a confidence in our neighbors, and a confidence in the future. And it's very important—[*interruption from the audience*]. Free country. I think you can hear me okay. It's very important for us in this country when we do have trials to rally together.

I was in Chicago last night standing on the decks of *Delta Queen No. 2* with a great mayor, and we had one of the most

remarkable political events that I have ever known about—12,000 people came to show their confidence in local government, their confidence in a superb new mayor, and an appreciation of what Chicago has been in the past, is now, and will be in the future.

I've come to listen to your questions and to give you the best answers I can. It's a pleasure to be here. You've honored me by letting us meet together. And now, I'd like to turn to the first questioner, and if you'll give me your name and the question, I'll be glad to try to answer.

QUESTIONS

POPE JOHN PAUL II

Q. My name is Father Al Pizza. I'm from St. George, in Tenley Park. First of all, I just feel fortunate to be able to tell you I think you're doing a fantastic job. I think you have an impossible job, and I would wish sometimes that the news media would give you an even break.

My question has to do with—it's an easy question for you, I think.

THE PRESIDENT. You can stop right there to be safe. [*Laughter*]

Q. It has to do with the Pope's visit. He drew millions of people around our country, and I was wondering what your personal thoughts would be about the effects he's going to have in the long range around the world with, especially, maybe in Communist countries. Do you think he is going to be able to change people or change the attitudes, maybe lift the apathy and the cynicism and things like that, along those lines? If we could just maybe hear your thoughts on that.

THE PRESIDENT. Obviously, as President, I was extremely interested in having the Pope come here to begin with. I extended him a personal invitation last

spring and was delighted when he decided to accept it.

When I had a private meeting with the Pope in the Oval Office, following the North Lawn reception and before the South Lawn speeches, he and I discussed his visit. He and I were both surprised, pleasantly surprised, at the tremendous, unanticipated outpouring of affection and love for him, exemplified by the enormous crowds. I doubt that there's ever been a larger crowd assembled, for instance, than there was in Grant Park in Chicago, to see His Holiness there.

It was a great testimony, I believe, to a hunger among the American people to be reminded of and to remember those characteristics of human beings that never change—truth, integrity, humility, gentleness, the strength of families, compassion, concern, unselfishness, love. Those kinds of things we don't talk much about in public life, but the Pope, in speaking of them, aroused in American people a response that was truly remarkable and very good for all our country, no matter what faith an American might espouse in his own religion or her own religion.

In our private conversations we talked about many things. We talked about families. We talked about abortion. We talked about the truth that exists in open societies and the threat of communism to stamp out peoples' deep religious beliefs. We discussed his recent trip to Poland, which is a Communist Government, but where the church is undoubtedly stronger than the government itself. We talked about the overwhelming Christian nature of the people who live in both North and South America. We talked about parts of the world where it's very difficult for the Christian message to be promulgated—in China, for instance, or in some other places throughout the world. We talked

about the shift toward secularism in Western Europe and the concern that the Pope has about that development.

There was a great belief expressed by him, which I certainly share, that we've got to put our religious faith to action, that we can't just talk about gentleness, we can't just talk about compassion, we can't just talk about love, and overlook the deep needs of our immediate neighbors and those who suffer from hunger or lack of clothing or lack of shelter throughout the world.

So, I believe that the message he brought, both publicly and privately, was an inspiration to me as President. It was also an inspiration to our whole country. I think his beneficent influence throughout the world has been well established, not only in his trip to free countries like ours and Mexico's but also behind the Iron Curtain in Poland.

I might say one thing finally about that. It was an unprecedented thing to have the Pope visit the White House. This has never been done before. But I hear from all kinds of religious faiths—Jews, Protestants, even those who belong to the Islamic faith. I've not had any criticism at all, so far as I know, from any of those other religious faiths because the Pope did come to our country, because they all see that his ministry and his message was one that tapped the best in America. And I'm very proud that he could come, and I invited him back. He said he wanted to rest up first. *[Laughter]*

THE NATION'S ECONOMY

Q. Good morning, Mr. President.

THE PRESIDENT. Good morning.

Q. By the way, welcome to Dolton.

THE PRESIDENT. Good to be in Dolton.

Q. The thing that seems to be foremost in everyone's minds now is the fact that

your economic program isn't working real well. We still have runaway inflation, and the only prices that seem to be coming down are gas-guzzling automobiles and pork. [*Laughter*]

Do you think that it might be time for a change in your policies, such as strict wage and price controls?

THE PRESIDENT. I think the policies that we have established are the best, and I believe that they're going to pay off. What we've had in the past 11 years is excessive inflation. I'm the fourth President who's tried to deal with inflation. So far we've not been successful. Mandatory wage and price controls were attempted by President Nixon. They were very quickly abandoned. And we still suffer with high meat prices because of those mandatory price controls on farm products.

We also went through a time of deep recession, almost a depression, approaching the problems of the 1930's. That also did not cure inflation.

What I've tried to do is to deal at the roots of it. For instance, we've just formed a national accord, an agreement between the government, business, and labor, to work together now to hold down both wages and prices. We've been remarkably successful already with our wage and price guidelines. For instance, the wage increases in 1979 have been no higher at all than the wage increases in 1978. And the prices over which we do have some authority in our voluntary price controls have been going up in price only one-half as much as those over which we do not have control, like energy. We've never had this before, a voluntary cooperative effort.

Energy is the main threat and the main cause of high inflation. The oil prices raised by OPEC have caused 4 percent of our inflation rate. If it weren't for energy,

if you could just set aside energy and count everything else put together—food and everything else—this past summer of 1979, the inflation rate would be no higher at all than it was in 1978 and 1977. But OPEC oil prices have increased more than 60 percent since last December. The approach to that is to have an energy policy that cuts down on oil imports. We now import half the oil we use. We also import, along with that, inflation and unemployment.

The Congress is finally addressing, after long years of delay, this energy problem. We're trying to reduce imports, increase oil production in our own country, gas production, coal production, use of solar power, synthetic fuels, and also have a major emphasis on conservation.

If we can cut down on the amount of oil we import, that'll be a major step toward controlling inflation. And I predict to you that before this year is over, you will see the inflation rate begin to go down because of the action we've already taken.

The last point to a very complicated answer is that we have tried in this process not to have jobs fall off. In the first 30 months of my term—I've only been in office now less than 3 years—we have had a net increase—not decrease, but a net increase—of 8½ million jobs in this country: a million construction jobs, 700,000 jobs for black people; a quarter of a million of those increased jobs are in Chicago alone. So, at the time we've had high inflation and high interest rates, we've also had the highest employment level in the history of our Nation.

We've tried to protect people from high job losses that have always come along in the past with high inflation. And if we turn the inflation rate down—and I'm predicting that we will—and hold those jobs up, I think it'll be a good step in

the right direction. And controlling those energy costs and having cooperation between labor and business with government, I think, is a good policy.

I might say that we've done all we could at the Federal Government level. We've restricted spending programs, but given our people better lives. We've cut the deficit by 60 percent. Corporate profits are up 50 percent. We've got 20,000 fewer Federal employees now than we had when I took office. We've cut down paperwork by 15 percent. We've gotten the Government's nose out of the private sector by deregulating airlines. We're now moving on other sectors.

So, I believe our total package of economic policies is the best we can have. And I think with a little patience, which everybody must have, and a little realization that it's a common problem, not one caused by any particular person or party, I think with that understanding and strength of our country, having confidence in it, we'll succeed.

So far, we've got problems; we can solve them together.

U.S.-CUBAN RELATIONS

Q. Mr. President, my name is Joe Penn, from Riverdale. I'm a semi-retired pharmacist, and it is indeed an honor and privilege, most sacred as far as I'm concerned, to be able to speak to the President of the United States. I'm actually awed, and therefore, I have to read my question.

The gentleman before me stole the thunder, and you answered it very well. I was going to ask you about putting an immediate freeze on wage, prices, et cetera. So, my alternate question is in regards to Cuba.

In view of the fact that we've finally

come to recognize Communistic countries such as Russia, Red China, and others, why can't we accept the fact that our neighbor Cuba and its form of government is here to stay and end the futile and useless embargo once again and give Monroe Doctrine a chance to work?

THE PRESIDENT. Okay. I'll be glad to answer that. I'll be glad to answer that.

We are not at war with Cuba. We have no intention of being antagonistic toward the people of Cuba. The fact is that Cuba's policies, within their own nation and relating to other countries, make them a very difficult government to recognize officially. Also, they are almost completely subservient to the Soviet Government. They're kind of a surrogate of the Soviets. The Cubans have over 45,000 troops in countries overseas where, in my opinion, they have absolutely no business. It's the most highly militarized country on Earth per capita.

They are constantly interfering in the affairs of adjacent countries or other people, for instance, Puerto Rico. The Puerto Rican people voluntarily choose the form of government they want. They are now a commonwealth of our country. They may prefer to be a State, the 51st State; they may prefer to be independent. Whatever the Puerto Rican people want suits me fine. Castro is constantly trying to stir up the people of Puerto Rico to seek independence from the United States, which the Puerto Rican people do not want. He points out the advantages of independence. But when people leave one country and go to another, the people leave Cuba and go to find a better life in Puerto Rico.

I think we've got to have a firm policy on Cuba.

The last point is this: There's no way that Cuba could survive economically, with their Communist experiment 90

miles from our country, without the Soviets propping them up. Every day the Soviet Union sends to Castro \$8 million just to keep the Cuban people alive economically and to keep Castro in power. And they send them large quantities of arms, military weapons—and don't even charge Cuba for it. All the other satellite countries in Eastern Europe, for instance, when they get arms from the Soviet Union, they have to pay for it.

So, I believe that until Cuba can bring their own troops back from unwarranted involvement in the internal affairs of other countries, until they release the hundreds and hundreds, even thousands of political prisoners they have in jail—and some of them have been there over 20 years—and until they stop interfering in the internal affairs of countries, even in this hemisphere, we will not recognize Cuba. After that, we'll consider it.

Q. Thank you, Mr. President.

THE PRESIDENT. Thank you, Doctor, very much.

OIL IMPORTS AND GRAIN EXPORTS

Q. Hello, Mr. President, my name is Harvey Harris, and I attend school here at Thornridge High School.

THE PRESIDENT. Right on. *[Laughter]*

Q. The question that I would like to ask you is, what do you plan to do about the rising prices of gasoline, and what do you plan to do about the OPEC nations keep raising the prices of barrels of oil? Do you plan to raise the price of wheat or the imports that go over there?

THE PRESIDENT. I see. We don't have any control, Harvey, over the prices that are charged to us for oil from overseas. What we must do is to cut down on our overdependence on that oil. So, what we want to do is to cut down on imports and produce more energy in our own country.

The most important thing that we can do, everyone in this room can do, is to save energy. The more we save, the more our families benefit and the more the security of our country is protected.

Every family represented here, I hope, later on today will meet together, either at suppertime or at lunch, and just talk over how you, in your own homes, on your own jobs, traveling back and forth, can cut down on the consumption of energy. The more we save, the better off we all are.

We're also trying to shift toward the use of energy sources that never give out—solar power—and the use of growing crops like trees or farm crops, like to make gasohol out of. If we can do that, then year after year, for thousands of years, we'll have an adequate supply of energy.

Another thing that we can do is to use the kinds of energy in our own country that we have most of. The number one State in the Nation on coal reserves—you know what it is?

AUDIENCE. Illinois.

THE PRESIDENT. Illinois, right. And we can increase the use of coal. So, the more we can move away from dependence on those foreign countries, the better off we are.

You mentioned wheat and corn. I would rather have what God has given us, in the way of land and the ability to produce food, than I would to have all the oil deposits in Saudi Arabia and all the OPEC countries put together, because we've got a permanent, very fine strategic export that the rest of the world needs, they will get, and is profitable for us.

The number one State in the export of farm products—you know what it is?

AUDIENCE. Illinois.

THE PRESIDENT. Illinois. Right. Very wise audience.

And every year since I've been in office, we have tried to increase the exports of grain. We set world records in 1977, world

records in 1978, world records in 1979. I believe in 1980, next year, we'll set world records again on the total amount of grain exported.

We don't want to punish our farmers by raising the prices of our grain so it cannot sell on foreign markets. The OPEC countries have very small populations; they don't buy much food. And if we cut off all our shipments of wheat and corn to the OPEC countries, they could very easily get that wheat or corn from France or from European countries or from Argentina or some other country aside from us. It would only hurt our farmers. So, I would rather see our exports be sure, so customers could depend on us and to have this tremendous benefit from getting new customers for our grain.

When I ran for President, I promised that there would never be any grain embargoes put on the farmers as there were several times just before I became President. So, I think for us to export our beautiful product of food and to import less oil from overseas because we save and produce more energy at home, is the best approach. That's what we're doing. I need all of you to help me with it.

Thank you very much, Harvey.

DEFENSE AND NATIONAL SECURITY

Q. Mr. President, my name is Gerald Reilly. I reside in South Holland, Illinois. I would like to add my words of welcome to you for coming to our area and express my appreciation for the wonderful job you are doing under conditions as they exist today.

THE PRESIDENT. Thank you, sir.

Q. Mr. President, do you feel that the money appropriated for defense in your 1980 budget is really for defense or a step towards the possible conflict with another nation?

THE PRESIDENT. I'll be glad to answer that.

The most important responsibility that I have as President is to guarantee the security of our Nation. It comes above everything else—above inflation, employment, energy, agriculture—to preserve the security of our country, because unless our Nation is secure, unless our Nation is free from the constant threat of a successful attack by other countries, then everything that we stand for would be lost.

I have no apology for the defense budget request. I believe in a strong defense, and as long as I'm President, the strength of our military forces will be second to none. I want to be sure that if any other country is tempted to attack the United States, that they will realize that they are committing military suicide.

We only spend about 5 percent of our gross national product on defense. In the past, this is the lowest we've ever spent. In the past, we've spent 8, 9, 10, 11 percent. The Soviet Union spends 13 percent of their gross national product on defense. Our military is still better than theirs, and we're going to keep it that way. But I hope that every American will realize that it's not a sacrifice when we pay our military personnel a good salary, when we give them high training, when we give them the best weapons.

What I want to be sure of is that all of our nuclear submarines, all of our airplanes, all of our tanks, all of our artillery pieces, are never used—are never used—and the way to do this is to let the world know that we are strong, not only in weapons and service people but also in our national will.

If the other countries on Earth—our allies, our friends, our potential adversaries—know that the United States is a strong country, then we'll have peace. If they ever believe that the United States is weak, either because we don't have ade-

quate weapons or because we don't have the courage and the unity to defend ourselves, that's when we'll have to use our weapons and that's when we'll have loss of life.

One of the greatest things that I've experienced as President—the first time in 40 years—is that since I've been in the White House, we have not lost a single life of a young American in combat, and I pray to God that we'll have that record when I go out of office.

So, to summarize: peace with all nations on Earth, through strength here at home.

DEPARTMENT OF EDUCATION

Q. Good morning, Mr. President.

THE PRESIDENT. Good morning.

Q. I'm Pershing Broome, of Phoenix, Illinois. I'm also on the faculty here at Thornridge High School. And I, too, would like to welcome you to Thornridge.

THE PRESIDENT. It's a pleasure.

Q. I believe during your campaign for the Presidency some 3 years ago, you proposed to take the "E" out of HEW. I also believe that the Congress has voted to do just that. Do you plan to sign the bill to make this effective?

THE PRESIDENT. Absolutely. I'm very proud of that legislation. I'll tell you why, just briefly.

When I was in State politics, my main interest was in education. When I was elected to the State Senate, I had one request when I got to Atlanta. That was to be put on the education committee. I was on a local school board for 7 years before I went to the State Senate. And when I became Governor, I spent about 25 percent of my time trying to make sure that education for our students was improved.

Since I've been President, that has not been the case. Education in Washington

gets lost. I doubt that 2 percent of the people in this room could tell me who is specifically responsible for better education from the Federal point of view.

So, I believe that a separate department that can focus not on social programs, not on arguments and so forth and lawsuits, but on better classroom education is a very important step forward.

The second thing is this: We wrote into the law a requirement that the bureaucracy be reduced. The law says that we've got to have 500 fewer employees in the new department of education than we have now. With increased efficiency, we can do that. The law also requires that no increase in personnel in the new department can be approved unless the President, the Office of Management and Budget, and also the Congress specifically votes to increase personnel. So, we've tried to build in there a protection against increased bureaucracy.

The third thing that the law says is that local people, not the Federal Government, shall have control over the policy and the curriculum of the schools. I want to keep the Federal Government's nose out of the business of the local school system.

So, I'm proud of the new law, as you can well see, and I believe it's going to be better for education all over the country.

Thank you, sir.

SCHOOL BUSING

Q. Mr. President, I am Marcella Kuersten, of South Chicago Heights. And it is indeed a privilege to be here today.

THE PRESIDENT. Thank you, ma'am.

Q. Young families, when they buy homes or go out to rent, usually buy a home that is near a school. Then they find out when their children go to school, they

are bused maybe on the other side of the city or to other parts of the county. Now, you mentioned a few minutes ago, we should learn how to cut back on our gas situation. Do you think it's feasible to continue the busing of students? And it's also a tremendous tax burden on the taxpayer.

THE PRESIDENT. My own experience has been and my own belief is that mandatory busing ought to be minimized.

There are requirements under the law, as you know, against any sort of discrimination or preventing students from getting the same quality of education within a given city or within a given school district. That's got to be honored.

My hope is that the present dispute concerning the integration of the schools or the elimination of discrimination in the schools in the Chicago region can be solved harmoniously. And I don't know where the best place might be to do it.

I have a feeling that to have the decision made by the local Federal court might very well be better for Chicago and the preservation of its neighborhoods and the honoring of the civil rights of people than to have it as a debate between the local school system and the Department of HEW. I'm not sure; that's my belief. I don't know what will come out.

We are operating under Federal laws concerning school districts and busing and integration, the elimination of deprivation of basic civil rights, and we're trying to work out an agreement. If that agreement can't be worked out between HEW and the local school board, then the normal transfer would be to the Federal court. And I've seen the Federal courts in the South, 10, 15 years ago, do outstanding jobs in trying to relieve these conflicting tendencies and pressures for the best interests of the students. I have confidence that that will be done in this case.

I don't have any authority over it, as you know, as President. But I believe that everyone wants to work it out so that there can be a satisfactory solution for black parents, for those who speak Spanish or other languages, for those who have strong ethnic commitments, and for those who want to preserve neighborhoods, those who want higher quality education.

So, what happens in the future will be very closely observed by me, and I'll do the best I can to reach the ultimate goal of honoring people's rights and having better education. But don't consider it to be a catastrophe if the case is moved into court. I think there it can be considered very calmly, very carefully, and I believe that ultimately the solution will be satisfactory to you.

FINANCIAL ASSISTANCE FOR HIGHER EDUCATION

Q. Good morning, Mr. President.

THE PRESIDENT. Good morning.

Q. I'm Arlene Zuiker, from Dolton, Illinois. And as an elementary school-teacher, on behalf of the children, I'd like to thank you for coming to Dolton so they can see participatory democracy in action.

THE PRESIDENT. Thank you very much.

Q. Mr. President, my husband and I are both employed, and our combined incomes put us in the above-average group, which does not allow for grant-in-aid eligibility for our four college-age children. Yet by the time we pay tuition for these four children, our income drops to the poverty level, practically. Question: Is there any hope in this inflationary period to have a tax credit for educating our most important natural resource, the youth of America?

THE PRESIDENT. The question is not whether to give assistance to a family with

college-age children, but what form that assistance should take.

I decided—before I became President, as a matter of fact, but after long experience in education and financing—that the best approach was the one that we've taken. We've increased the Federal contribution to education, in the first 2 years I was in office, by 60 percent above what it had been in the past. We implemented last year, 1978, a \$12 billion* increase in aid to make sure that every family in this country, even one like your own, would have an opportunity to put their children through college, if the students are academically qualified and do their work.

We've approached it on a broad base. First of all is direct grants to students if their parents don't have the financial ability to put them through; secondly is a loan program to guarantee that the students, on their own initiative, can finance their college tuition and other costs and then repay afterwards when they are able to sustain their own income; and the third one, of course, is a work-study program, where the students can work part-time and go to school part-time or go to the classroom part-time, combining those two efforts so that the work part of their life is related in some way to the actual courses that they are taking. But we've tried to increase this tremendously.

The problem with going to tax credits is that we have not found any formula by which you could help the low- and middle-income families. You have a much greater financial benefit to the very wealthy families at the expense of the other taxpayers. So, this direct focusing of help on grants, loans, and work-study programs is a much better and fairer way to guarantee that the students can go to college.

*The President meant to say \$1.2 billion.
[Printed in the transcript.]

I believe that if you have a thorough knowledge of what we do offer that there won't be any reason for all four of your children or the ones that you might have in the future—I don't know how many that would be—[not] to go to college and get a good education.

Good luck in the future and also now.

HOUSING CONSTRUCTION AND FINANCING

Q. Good morning, Mr. President.

THE PRESIDENT. Good morning.

Q. I'm Pat Adamski, and I live here in Dolton. My question—

THE PRESIDENT. What's your first name?

Q. Pat.

THE PRESIDENT. Pat.

Q. My question this morning is—as you know, the mortgage market is getting very tight. Fourteen States now either are running short of or have no money. How are you going to ease this problem, because this is going to affect people countrywide—real estate agents, builders, and people who buy and sell.

THE PRESIDENT. It's hard to answer that question about the future. My hope is that interest rates have peaked, along with inflation, and will now be going down.

High interest rates are caused by high inflation. It's very difficult to have interest rates lower than the inflation rate. So, the best attack on interest rates is to do what I've described earlier—to get the inflation rate back down, with high yield of farm products, adequate farm storage, the working relationship between labor, business, and government, for a change, to hold down wages and price increases, and to decrease the imports of oil.

As far as the homebuilding is concerned, we've taken some action since I've been President that has paid off very well. In the past, when interest rates got

up above 9 or 10 percent, the homebuilding industry took a nosedive, because it was almost impossible to get financing. That has not happened. I can't say that in the next few months it may not happen, but so far we have sustained a remarkable record of home construction. We've averaged about 1.8 million homes per year in this country so far, in spite of high interest rates, because we've made available to homebuilders and to families new sources of financing for homes.

I don't know what will happen in the future. I can't guarantee that there won't be some dropoff in that level, but it set records for the first 2 years, even in spite of high interest rates. In my opinion, the purchase of a home is still a good investment for a young couple that can afford the monthly payments.

I think real estate, including land, homes, and other things, will continue to go up at least a moderate rate, and I believe that when we get inflation under control with the policies that I've described, we'll alleviate that pressure. But we are doing everything we can with savings and loan bankers, the people who help us with finances, Government programs for low- and middle-income families, FIIA, Farm Home Administration loans, to make sure that there is no dropoff in home construction or availability of homes. There may be local problems. I'm not trying to mislead you, but we have really held down the historic dropoff in home construction.

I might say, as another indication of that—I spoke to the building and construction workers union meeting in San Diego this past week—and since I've been in office, we've put an extra million construction workers on the job; we've cut the unemployment rate in that industry down by 40 percent. That's another indication that homebuilding and other con-

struction is still a very strong element in our society.

I hope it will stay the way it has been. So far, we've got a good record. I just pray it'll hold.

ENERGY

Q. Good morning, Mr. President.

THE PRESIDENT. Good morning.

Q. My name is Christopher Stevo. Could you please tell me how we are progressing in developing new energy sources?

THE PRESIDENT. I couldn't hear you. Come up here a minute. *[Laughter]*

When I get supporters and allies his age trying to help me resolve the energy question, I think we're on sound ground and we've got the right road filled out for us.

We're doing several things at one time.

First of all, the Congress has very wisely required that all the automobiles produced now and in the future would have to be much more efficient, get a lot more miles for every gallon. That's the first step. By 1985 all the automobiles produced in our country would have to average 27½ miles per gallon, a big improvement over what we have had in the past.

Secondly, automobile buyers, with the high gasoline prices and with the few gasoline lines that took place this summer, have rapidly shifted toward the smaller and the more efficient automobiles.

All of you can help. I said earlier that I hope the families would have a consultation about how you can save energy.

When you go home from this meeting, look at how many cars you meet on the road that only have one passenger—sometimes two, very rarely three or four. And if you would change your driving habits, and five people could ride in your car to and from work, instead of five automobiles going to and from work, that saves a tremendous amount of fuel.

Another thing that we can do is to shift toward the use of gasohol and other automobile fuels that come not from oil, which is going to run out on Earth, but which can be sustained on a permanent basis. We've made a move in that direction in the Congress in the last year, and it's going to have tremendous influence. Brazil, for instance, now produces about 10 percent of all its automobile fuel from growing plants, through gasohol, and I think our country is moving very rapidly toward that.

We're also encouraging automobile manufacturers to shift toward other kinds of propulsion. You've probably noticed that one of the major automobile producers, the biggest one in the world, has just come out with an experimental automobile that uses batteries that can run 30,000 miles on one set of batteries, about a hundred miles before it has to be recharged. You can drive your car a hundred miles during the day, put it in the garage, plug it into the plug in your garage; the next day you can go a hundred more miles. And you can do that 300 times before you have to change batteries.

So, new design of automobiles, more efficient driving habits on the part of Americans, and new forms of energy, like gasohol, can all help to make sure that we have a better efficiency in the future and that we use our fuel more wisely.

That was a great question, and I thank you for it very much.

I might say that it doesn't hurt people to ride bicycles instead of cars. I was out early this morning before the Sun came up, and I ran 4 miles. And it doesn't hurt people to walk to work every now and then.

And I hope that you'll see, in general, that when our country faces a problem like energy shortages, that we need not shrivel up and be fearful about the future

or start lashing out against one another and try to take some selfish advantage. It may be that the new awareness on the part of Americans that we have limited amount of energy will be the best thing that ever happened.

I think our country can be stronger, not weaker. I think our family life might be coordinated rather than more fragmented. I think neighborhoods might be preserved a little bit more. I think people might be healthier, because they get more exercise. And we might pause a little bit in our lives and enjoy the beauty of the places that we live, instead of dashing from one place to another and not even recognizing what God's given us. So, I think in general we might be a better people because of it.

FEDERAL-LOCAL RELATIONS

Q. Good morning, Mr. President. My name is Ralph Spencer. I'm from Calumet City, Illinois. I am involved there in local politics, somewhat. I'm an alderman in Calumet City, and being involved in the local politics, I do get concerned and have a lot of people asking, is the return and the balance of money that goes into Washington from a particular area and the amount that comes back to this—particularly Illinois.

One of the things that is very important in the financing of local government is Federal revenue sharing. It has developed into a very, very important function or very, very important source of revenue. I understand that very shortly Federal revenue sharing, as it stands right now, is destined to cease.

What is your feeling, and what is your stand towards balancing out the payments to the local people, and what is the future of Federal revenue sharing?

THE PRESIDENT. I don't believe there's

any chance that Federal revenue sharing would be in danger for local governments. That answers part of your question.

Secondly, when you start balancing how much Federal money comes back into a community, compared to how much goes from that community to the Federal Government, you get into some very complicated economics.

The best way I know to make sure you get more money back than you pay in is not make so much money yourself, to start with, because the rich communities, where the people have high income and pay more income tax, don't ever get back as much as you paid in, whereas a poorer community, with income very low or perhaps very serious problems on housing and a high unemployment rate, they're the ones that do get Federal money back to let their lives be better. So, I think you live in one of those very fortunate communities, apparently, where you have a fairly good life and a fairly high income, fairly high employment, not any serious housing problems, and so forth.

We have always believed that the Federal Government should provide aid and have a minimum control over the lives of people. One of the best things that we can do to control inflation, by the way, that I have not mentioned so far, is to get the Federal Government's nose out of the affairs of private citizens or out of the affairs of the free enterprise system. We've tried to do this, and we've been successful in some areas. I'll give you one quick example.

We made a move to deregulate the airline industry. It was opposed by almost every airline company in the Nation, but Marty Russo and others helped, and we got that legislation passed. It's been a great benefit. Airline fares have dropped remarkably low. The airplanes now, instead of their being a quarter full, are

almost filled to capacity, passengers have gone up in number tremendously, and the profits of the airlines have also gone up. We're trying to do the same thing now with other elements of the American free enterprise system.

In some cases, too many cases, the Federal regulatory agencies that are supposed to regulate an industry have become protectors for that industry at the expense of the American people. And I think the more we can get the Federal regulatory agencies' nose out of the business of the free enterprise system and let competition work, the better off our country will be.

So, there are many ways that you can make sure that the Federal Government does have a more effective relationship to the people in your own community.

One other thing that I've tried to do is to cut the Federal deficit. We've slashed the Federal deficit by more than 60 percent, \$36 billion, and at the same time, we've cut down on the percentage of our total Nation's income that's collected from people and spent by the Federal Government. When I became President, it was about 23½ percent. We've cut that down now to 21½ percent, and we've got it going in the right direction.

So, we're trying to cut the Federal deficit, balance the budget, reduce the amount of your money that the Federal Government collects and sends back to somebody, and also, we're trying to get the Federal Government's nose out of your business. All those things, in the long run, will pay off.

TRAFFIC STOP SIGNS

Q. Mr. President, my name is Larry Kast, and I'm a mechanical engineer. I live in Dolton, and I work for the Metropolitan Sanitary District of Greater Chi-

cago. I'm going to address myself to conservation of energy. I know it's a very good subject of yours.

Four-and-a-half years ago, I was picked by the late Mayor Daley to run for Cook County commissioner, and Mayor Jane Byrne, at that time, was our chairman of the nominating committee. And I ran. But during the campaign, I made a study on where are we wasting energy or where can we save energy, and I found out that we—I addressed myself to the 1,200,000 cars, automobiles that are in use today on a day-by-day basis, 110,000 trucks that are running around every day, mostly 8 hours a day, and I addressed myself to kinetic energy, which is energy of motion.

And when you see these automobiles with a 2-ton vehicle coming to a stop sign, an unnecessary stop sign, and stopping, to get that car going 30 miles again requires an awful lot of energy, not to mention a 78,000-pound truck, approximately 40 pounds [tons] fully loaded, 40 miles an hour coming to a stop light, an unnecessary stop light, or a stop sign, and then to get that car or that truck going again, 40 tons, 40 miles an hour, you eat gasoline or fuel up by the gallons. And this is where we are losing or wasting fuel.

I also make these statements, and I have calculations to prove it. Four-and-a-half years ago, during that campaign, I calculated it. And would you believe, by the time I—

THE PRESIDENT. I think the people are going to want you to ask a question.

Q. All right, fine. I took kinetic energy, I converted it to Btu's; Btu's to gallons of gas; gallons of gas to crude oils; crude oils to number of barrels. And it came out to be we could conserve 7 million barrels a day—fantastic—exactly what we were importing 4½ years ago. Today it's 8.3 million or more barrels.

All right, my question is: Do you think that system of reducing or eliminating

one-third of the stop signs has merit across the country?

THE PRESIDENT. Good question. It was a long question, but I think it's worthwhile, because this is one of the few questions that I get for which I'm not responsible. [Laughter] Nobody can accuse me of putting in those extra stop signs, right? [Laughter]

You know, I believe that this is one area that we have not adequately addressed. And I will relay your question to the Secretary of Transportation, Neil Goldschmidt, and tell him, in working with local people and also in the Federal highway system, to see if we can't reduce the number of unnecessary stop signs. And I think that that is a very worthy suggestion.

We get a lot of good thoughts and a lot of good ideas from coming out to meet with people like you, and I think the sense that I get is that we are all partners. Every one of your constituents, as a local official, is also my constituent, and every one of Marty Russo's constituents in this district is my constituent. We represent the same people. And what I do as President that benefits our Nation is exactly what you want, whether you're a Democrat or a Republican. You want the President to do a good job.

I don't have time for another question, I'm sorry. But I would like to say this in closing.

When we read the local newspapers or see the evening television or listen to the radio, what we get at that moment of that day is a picture, most often an accurate picture, of the problems of our society. The inconveniences are multiplied in their importance, and the debates that take place on controversial issues, like taxes or housing or interest rates or inflation or legislation concerning education—we see and we think about the difficulties and the arguments and the temporary failures.

What we don't see on the news, but what we ought to remember, is the blessings that we have in this country. I think we ought to be sure to inventory for our own reassurance and then just comment every now and then to people that listen to your voice about what God's given us in this Nation.

We're a nation of freedom. Our people can stand on our own feet, make our own decisions, be different, be individuals, be innovative, be hard-working, be lazy if we want to, get a good education, choose our own jobs, choose a place to live, choose our own officials, criticize the government, make comments, make suggestions, influence our neighbors. We have a country that lets each person take whatever talent we have and express that talent and let that talent grow to a maximum degree.

We also have a nation that's strong. We're the strongest nation on Earth. Militarily, we're the strongest; economically, we're the strongest; politically, we're the strongest; morally, ethically. Deep religious beliefs all exist within us. We've got our faults; we make our mistakes; we're not perfect. And as I mentioned to the Pope on the South Lawn of the White House the Saturday before last, we're responsible for our own actions. But let's don't ever forget that the United States of America is the best place on Earth to live. It's the greatest nation on Earth, and I believe that you and I together can make it even greater.

Thank you very much. God bless you all.

NOTE: The President spoke at 10:05 a.m. at Thornridge High School gymnasium.

Following the town meeting, the President attended a private reception for Democratic State representatives and officials of the State Democratic Party at the Holiday Inn in Harvey, Ill.

Pay Advisory Committee

*Appointment of Chairman and 17 Members.
October 16, 1979*

President Carter today announced selection of 17 prominent business, labor, and public figures to serve as members of the anti-inflation program's Pay Advisory Committee. They will serve with John Thomas Dunlop, a Harvard economics professor and former Secretary of Labor, who has accepted the Chairmanship of the Committee.

The President said on September 28 that he would name a committee to broaden public participation in the development and administration of the voluntary pay standard for the second year of the anti-inflation program. It was enlarged from 15 to 18 to provide for wider participation.

The Pay Advisory Committee will advise the Council on Wage and Price Stability on developing policies that encourage anti-inflationary pay behavior by employers and labor, in order to decelerate the rate of inflation and provide for fair and equitable distribution of the burden of restraint.

The Committee will recommend any modifications to the pay standard it considers necessary and to pay exception and noncompliance decisions of the Council. It will also recommend new or revised interpretations of the pay standard.

Members of the Committee were chosen after wide consultation with representatives of labor, business, and the general public.

The Committee will hold its first meeting at 10 a.m., Wednesday, October 17, in Room 2008 of the New Executive Office Building.

Following are names of the Committee members and the sectors which they represent:

Public members

JOHN T. DUNLOP—Chairman. Mr. Dunlop is currently Lamont University professor at Harvard Business School and was Secretary of Labor from March 1975 to February 1976;

PHYLLIS WALLACE, professor of industrial relations at the Sloan School of Management of the Massachusetts Institute of Technology;

ROBBEN W. FLEMING, president of the Corporation for Public Broadcasting and former president of the University of Michigan; he has accepted subject to approval of his board;

ARVIN ANDERSON, chairman, Office of Collective Bargaining, City of New York;

LLOYD ULMAN, professor of economics, Institute of Industrial Relations, University of California, Berkeley;

ROBERT NATHAN, consulting economist and chief executive officer of Robert R. Nathan Associates, an economic consulting firm.

Labor members

LANE KIRKLAND, secretary-treasurer of the AFL-CIO;

WILLIAM WYNN, president, United Food and Commercial Workers;

JOHN LYONS, president, International Association of Bridge and Structural Iron Workers;

LLOYD MCBRIDE, president, United Steelworkers of America;

FRANK FITZSIMMONS, president, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America;

DOUGLAS FRASER, president, United Automobile, Aerospace, and Agricultural Implement Workers Union.

Business members

R. HEATH LARRY, president of the National Association of Manufacturers;

JESSE HILL, president and chief executive officer of Atlanta Life Insurance Co.;

CHARLES R. McDONALD, chairman, Council of Smaller Enterprises, and president, McDonald Equipment Co. of Cleveland, Ohio;

JOHN T. CONNER, chairman of the board, Allied Chemical Corp.;

NORMA PACE, senior vice president, American Paper Institute;

PHILIP M. HAWLEY, president and chief executive officer of Carter Hawley Hale Stores.

Alternates will be named later for business and labor representatives.

Carter Family Peanut Warehouse*White House Statement on the Findings of a Special Investigation. October 16, 1979*

We are, of course, carefully studying the report and will have further comment on it later.

We said from the beginning of the investigation that no moneys were diverted from the Carter warehouse into the Jimmy Carter Presidential campaign or from the campaign into the warehouse, and the report shows our statements were absolutely correct. We also said from the beginning that we would cooperate fully with the investigation, and the report shows we did exactly that.

We are very pleased by the special counsel's findings.

NOTE: On March 20, 1979, Paul J. Curran was appointed by the Department of Justice as a special counsel to investigate the financial transactions of the Carter family peanut warehouse.

International Convention on Load Lines, 1966*Message to the Senate Transmitting an Amendment to the Convention. October 17, 1979**To the Senate of the United States:*

I transmit herewith, for the advice and consent of the Senate to acceptance, an amendment to the International Convention on Load Lines, 1966. The report of the Department of State is enclosed for the information of the Senate in connec-

tion with its consideration of the amendment.

The International Convention on Load Lines establishes uniform international principles governing the safe loading of ships in all seasons and waters. The purpose of this amendment is to expedite the procedure for amending the technical annexes to the Convention.

I believe that the proposed amendment is highly desirable. The Convention's present amendment procedure has made it impossible to bring into force many technical improvements to the requirements of the Convention. The new procedure will greatly facilitate and accelerate the entry into force of these essential improvements.

I recommend that the Senate give consideration to this amendment and advice and consent to its acceptance.

JIMMY CARTER

The White House,
October 17, 1979.

Department of Education Organization Act

*Remarks at the Bill Signing Ceremony.
October 17, 1979*

THE PRESIDENT. The first thing I want to do is to invite into the room the real beneficiaries of the new Department of Education, a group of fourth grade students from Brent Elementary School. This morning they can stand where they want to. *[Laughter]*

In 1962 I was serving on a local school board in the Deep South and had been for 7 years. We were going through a time of sociological change, when public, elected officials, and churches, business leaders stood mute while children suffered

because of ancient policies of racial discrimination. That situation changed because of schoolteachers and the courage of educators, who saw the devastating effect of continued racial policies in the South and throughout the country.

I decided to run for the State Senate to see if I could help in Georgia, based on my own experiences under those trying circumstances. And when I got to Atlanta as a newly elected senator, I had one request, and that was that I be put on the education committee. And I was.

I later ran for Governor, and my prime campaign commitment was to improve education in Georgia. And we did. I spent probably 25 percent of my time as Governor trying to deal with better education for our students.

When I became President, that situation was drastically different. There has not been in the Federal Government an adequate mechanism by which we can improve the quality of education in the United States, and I say that not in criticism of those who've served under such difficult circumstances. But I think you could interrogate local elementary and high school principals and classroom teachers, county school board members, State school superintendents, college professors, university presidents, Governors, and you would find an almost complete negative attitude toward how much support is given from the Federal Government for better education, compared with the tremendous potential that exists.

As Fritz¹ pointed out, we have increased tremendously the Federal financial contribution to education, 60 percent in 2½ years, with the help of the Congress. This has obviously been focused in a very fine way, but the interrelationship between local people—public and private

¹ Vice President Walter F. Mondale.

education—and State officials, who are directly responsible and ought to have control over the policy of the schools—relationship between them on the one hand and the Federal bureaucracy on the other one has been a very poor record.

I don't know what history will show, but my guess is that the best move for the quality of life in America in the future might very well be this establishment of this new Department of Education, because it will open up for the first time some very substantial benefits for our country.

There is a growing concern in our Nation about the decrease of the measurement of the quality of education through testing, through the achievement levels of our students. And it's not the students' fault, it's not the teachers' fault that there have been obstacles placed in the way of better education because of bureaucracy, too much redtape, too much confusion, an inadequate consultative process.

When I was a Governor, I didn't know where to go in Washington to get the answer to a question about education in my State. And I'll bet you very few—I'll bet you not more than two or three Governors in this Nation know who, specifically, is responsible for the educational programs in Washington. I'll bet you not 10 percent of the Members of the House and Senate know, specifically, who is responsible. In the future I hope that everyone will know—who's interested in education—this is the Secretary of Education, and that's the person that I'll go to to get the answer to a question or to resolve a problem or to overcome a difficulty. That is a great step in the right direction.

Also, I hope and I pray and I'm determined that we're going to cut out unnecessary forms, applications, redtape, regulations that have been an obstacle in the past.

It's important for us to remember that education is the biggest single national in-

vestment in the United States. Sixty million Americans are directly involved in the educational process: that is 3 Americans out of 10, who work in a direct or indirect way in education, \$120 billion spent in our country every year on education. And I want to see that investment of human and financial resources pay rich dividends in the future. It hasn't in the past, not nearly up to the potential. We're going to change that.

I believe that we can have, in the future, the acknowledgement that policy, curriculum, personnel decisions should be made at the local level, as close as possible to the parents and to the students in private and public education, and that the Federal Government is there, eager to help, to bridge gaps, to consult, to remove problems. And I hope the prime focus will be on the quality of the knowledge and the future life of each student.

I think this can be a fairly narrowly focused commitment. It's not possible to have that focusing of attention in Health, Education, and Welfare, where education is buried under the enormous responsibilities of welfare, health, and other related subjects.

There can also be a substantial saving in administrative costs, and that's built into the legislation in a mandatory fashion. I won't go into details about it.

And I believe that in the future we can have a much more responsive Federal Government, where, if a problem should arise in an embryonic way, an educator can know exactly where to go to get an answer, and where there can be a bridging of a chasm that quite often in the past has separated educators from the Federal Government. It's not going to be a panacea which can resolve every problem immediately, but I'm determined to make it work.

And I'm very grateful to all of those who've been instrumental in reaching

this goal after I don't know how many years of frustrated efforts. Sometimes it didn't look as though we were going to make it, and Fritz has already thanked those who have helped. Educators, local officials of all kinds, interested parents, students helped, and I think in the House and Senate, as Fritz has already said, we had superb bipartisan leadership.

I'd like to introduce now, to speak for the House, Jack Brooks, who's a formidable ally to have in a tough fight. He hates to lose, and he rarely does. *[Laughter]* And I'm very grateful to Jack Brooks, because there were times when the outcome was in doubt, and had it not been for him, we would not have prevailed. And I think what he's done for me as President, for our government, and for the children and other students in our country is a notable achievement, and I'm deeply grateful to Jack.

I might point out that *[Representative]* Frank Horton and the Republicans helped enormously to make sure that the Nation knew, and the votes indicated, that this is not a partisan issue, as Fritz has already pointed out.

But I would like to introduce to you my friend, with a great deal of gratitude, Jack Brooks.

REPRESENTATIVE BROOKS. Mr. President, I want to thank you. It gives me a great pleasure to be here on this occasion. We weren't always sure we'd make this trip. *[Laughter]*

But an educated citizenry is essential to the survival of a democratic form of government, to the promotion of justice and equality, and to our country's economic progress. And for the first time, our \$14 billion education program will be receiving Presidential attention, and the managers can be held accountable for achieving maximum results.

So, I want to congratulate you, Mr. President, for your insight, your leadership in the field of education. This bill is a result of cooperation and teamwork between the White House and the Congress, and we're just pleased to join you here in finalizing that successful effort.

THE PRESIDENT. I don't know if *[Representative]* Carl Perkins is here. Is he? I wanted particularly to thank him. Well, Jack, you tell him that we missed him, and thank him especially.

And now I'd like to turn to Abe Ribicoff, who had a similar responsibility and achievement in the Senate. He, contrary to Jack Brooks, made an extremely difficult issue look easy. *[Laughter]* But I was involved in both fights on both sides, and they are great allies to have.

But I'd like to call now on Abe Ribicoff to come and say a word, if he will. Abe?

SENATOR RIBICOFF. Mr. President, in 1960 President-elect Kennedy asked me what job I'd like in the Cabinet, and I told him I'd like to go to HEW. And the basic reason for that was education. When I got in the Cabinet, I realized that the problems of health and welfare were so overriding that education was relegated to the back burner.

When I came to the Senate in 1963, the first measure I placed in the hopper was the creation of a department of education. I felt then that it was absolutely essential. If we were to take care of children such as this, we needed the organization to put into effect the huge expenditures of money that we have been appropriating. And I'm so pleased that President Carter was the first President during that interim period who realized the absolute necessity for a department of education.

So, now it's become a reality—organization is policy, the policies that we have

been adopting can be put into effect. And I want to take this opportunity of thanking my colleagues in the Congress and especially you, Mr. President, for making it possible for this Nation to move forward for all its people with a Department of Education.

THE PRESIDENT. I don't think Senator Percy is here, but he was a strong right arm for Abe Ribicoff.

Is Dr. Benjamin Mays here? I've been looking around to see if I could find him. Dr. Mays, would you come here, please?

Dr. Mays probably personifies the dedication of educators as well or perhaps better than anyone I know in this country. He's been involved in education under the most trying circumstances for more than 50 years, as a teacher, as a president of a great university, as a leader in the extremely difficult sociological changes that took place under the aegis of education, which required great courage and his personal influence over many Americans, including myself. I think he personifies—just to repeat myself—the finest elements of education.

And I just thought it might be good for me to get one of the fourth graders from Brent and for Dr. Mays to stand here, just to show you how important it is to bridge the generation gap and how the beneficial effect of distinguished and dedicated educators, many of whom cannot be recognized—how their impact on the life of a child can be so beneficial to our country. So, I just want to get these two up here with me.

And now I'd like to sign the bill.

NOTE: The President spoke at 10:10 a.m. in the East Room at the White House.

As enacted, S. 210 is Public Law 96-88, approved October 17.

Department of Education Organization Act

*Statement on Signing S. 210 Into Law.
October 17, 1979*

Education is our most important national investment. It commands the time and attention of 60 million Americans—3 citizens in 10. It consumes an annual public and private expenditure in excess of \$120 billion. Every citizen has a vital, personal stake in this investment. Our ability to advance both economically and technologically, our country's entire intellectual and cultural life depend on the success of our great educational enterprise.

At no time in our history has our Nation's commitment to education been more justified. At no time in our history has it been more obvious that our Nation's great educational challenges cannot be met with increased resources alone.

I came to the office of the Presidency determined that the American people should receive a better return on their investment in education. I came equally determined that our Nation's formidable educational challenges should be brought to the forefront of national discussion, where they belong.

Primary responsibility for education should rest with those States, localities, and private institutions that have made our Nation's educational system the best in the world, but the Federal Government has for too long failed to play its own supporting role in education as effectively as it could. Instead of assisting school officials at the local level, it has too often added to their burden. Instead of setting a strong administrative model, the Federal structure has contributed to bureaucratic buck passing. Instead of stimulating

needed debate of educational issues, the Federal Government has confused its role of junior partner in American education with that of silent partner.

The time has passed when the Federal Government can afford to give second-level, part-time attention to its responsibilities in American education. If our Nation is to meet the great challenges of the 1980's, we need a full-time commitment to education at every level of government—Federal, State, and local.

The Department of Education bill will allow the Federal Government to meet its responsibilities in education more effectively, more efficiently, and more responsively.

First, it will increase the Nation's attention to education. Instead of being buried in a \$200 billion-a-year bureaucracy, educational issues will receive the top-level priority they deserve. For the first time, there will be a Cabinet-level leader in education, someone with the status and the resources to stir national discussion of critical education concerns.

Second, it will make Federal education programs more accountable. For the first time there will be a single Cabinet Secretary, responsible full-time for the effective conduct of Federal education programs.

Third, it will streamline administration of aid-to-education programs. Separating education programs from HEW will eliminate unnecessary bureaucracy, cut redtape, and promote better service for local school systems. For the first time there will be a direct, unobstructed relationship between those who administer aid-to-education programs and those who actually provide education in our country.

Fourth, a Department of Education will save tax dollars. By eliminating bureaucratic layers, the reorganization will permit direct, substantial personnel reductions. By enhancing top-level management attention to education programs, it will

mean improved educational services at less cost.

Fifth, it will make Federal education programs more responsive. Placing education in a highly visible department of its own gives the American people a much clearer perspective on what the Federal Government is doing in education and who is responsible for these activities. It allows people to better decide what the Government should and should not be doing in education.

Sixth, a Department of Education will ensure that local communities retain control of their schools and education programs. That is essential if our schools are to serve their students properly, and the Department of Education will, therefore, not permit the Federal Government to begin making decisions on education policy that are best made at the local level.

The Department of Education bill will permit improved administration of the Government's health and human service programs, whose functions are closely related. It will allow the Government to focus greater attention to the needs of those Americans who need it most—the poor, the disabled, and the elderly.

Today's signing fulfills a longstanding personal commitment on my part. My first public office was as a county school board member. As a State senator and Governor I devoted much of my time to education issues. I remain convinced that education is one of the noblest enterprises a person or a society can undertake.

I would like to thank the leadership of both houses of Congress for bringing this historic measure to final passage. I would like to pay particular tribute to the leadership role of Chairman Jack Brooks, Senator Abe Ribicoff, Senator Chuck Percy, and Congressman Frank Horton. Your relentless dedication to this legislation has earned you the gratitude of every citizen.

I would like also to salute the active participation in this legislative struggle

by a strong coalition of groups devoted to educational quality and equal educational opportunity. You refused to believe that education is a part-time responsibility, for the Federal Government or for yourselves.

NOTE: As enacted, S. 210 is Public Law 96-88, approved October 17.

15th Anniversary of the Job Corps

Statement by the President. October 17, 1979

The Job Corps began 15 years ago on the premise that, if given the opportunity, young people who had grown up in poverty and frustration could become responsible, employable, and productive citizens.

With government, labor, and industry working together, this idea has become a reality for more than 700,000 young men and women who have received basic education, skills training, work experience, and health care through the Job Corps. With their new skills and pride in accomplishment, Job Corps graduates are entering the labor market, confident that they can become contributing workers with satisfying careers.

In the years to come, I know that the Job Corps will continue to assist young men and women, who might otherwise have been neglected and forgotten, to lead rewarding lives.

Department of Health, Education, and Welfare

Nomination of Joan Zeldes Bernstein To Be General Counsel. October 17, 1979

The President today announced that he will nominate Joan Zeldes Bernstein,

of Chevy Chase, Md., to be General Counsel of the Department of Health, Education, and Welfare. She would replace Richard Beattie, resigned. Bernstein has been General Counsel of the Environmental Protection Agency since 1977.

She was born March 17, 1926, in Galesburg, Ill. She received a B.A. in economics from the University of Wisconsin in 1948 and an LL.B. from Yale Law School in 1951.

Bernstein was an associate attorney with the New York firm of Sherman & Sterling from 1951 to 1952 and with the Chicago firm of Dahlstream, Schiff, Waite & Hardin from 1952 to 1953. From 1968 to 1970, she was an associate attorney with the Washington firm of William B. Wolf, Jr.

Bernstein was with the Bureau of Consumer Protection of the Federal Trade Commission from 1970 to 1976, serving as a trial attorney, then Assistant to the Director, Deputy Director, and finally Acting Director. From 1976 to 1977, she was a partner in the Washington firm of Baker, Hostetler, Frost & Towers.

Department of State

Nomination of William G. Bowdler To Be an Assistant Secretary. October 17, 1979

The President today announced his intention to nominate William G. Bowdler to be Assistant Secretary of State for Inter-American Affairs. Bowdler has been Director of the Bureau of Intelligence and Research at the State Department since 1978.

He was born March 27, 1924, in Buenos Aires, Argentina, and became a

naturalized citizen in 1945. He received a B.A. in history from the University of Richmond in 1948 and an M.A. from the Fletcher School of Law and Diplomacy in 1949. He served in the U.S. Army from 1944 to 1946.

From 1950 to 1951, Bowdler was a research assistant at the State Department, and from 1951 to 1952, he was an international administration officer. From 1952 to 1956, he was an international relations officer in the Bureau of Inter-American Affairs. From 1956 to 1961, he was political and consular officer in Havana.

From 1961 to 1963, Bowdler was an international relations officer, and from 1963 to 1964, he was Deputy Coordinator of Cuban Affairs. From 1964 to 1968, he was executive liaison officer for Latin American affairs with the White House. From 1968 to 1971, he was Ambassador to El Salvador.

From 1971 to 1973, Bowdler was Ambassador to Guatemala. He became Deputy Assistant Secretary of State for Inter-American Affairs in 1973 and Acting Assistant Secretary in 1974. He served as Ambassador to South Africa from 1975 to 1978.

Drug Enforcement Administration

Nomination of Frederick A. Rody, Jr., To Be Deputy Administrator. October 17, 1979

The President today announced that he will nominate Frederick A. Rody, Jr., of Miami Lake, Fla., to be Deputy Administrator of the Drug Enforcement Administration in the Department of

Justice. He would replace Jerry N. Jensen, resigned. Rody is Regional Administrator of the Drug Enforcement Administration for the southeast region.

He was born September 8, 1931, in Sewickley, Pa. He received a B.S. from Michigan State University in 1955. He served in the U.S. Army from 1955 to 1957.

In 1954 and 1955, Rody was assistant chief of police in Davison, Mich. In 1957 he was with the Ottawa Roughriders of the Canadian Football League.

From 1957 to 1975, Rody was with the U.S. Bureau of Customs, where his positions included Deputy Assistant Commissioner and special agent in charge of the Seattle and Laredo district offices.

Rody has been with the Drug Enforcement Administration since 1975, and has served as Acting Assistant Administrator for Enforcement, Acting Deputy Administrator, and Regional Director in the Seattle and Miami regional offices.

Federal Prison Industries, Inc.

Appointment of Two Members of the Board of Directors. October 17, 1979

The President today announced the appointment of two persons as members of the Board of Directors of the Federal Prison Industries, Inc., in the Department of Justice. They are:

DARYL F. GRISHAM, a Chicago businessman, who is chairman of the PUSH Foundation, a principal of Chicago United, and chairman of the Chicago Metro Division of the National Alliance of Businessmen;

MONICA HERRERA SMITH, a deputy probation officer with the Los Angeles County Probation Department and program coordinator for CONTACT, an exoffender employment project.

Internal Revenue Service

Nomination of N. Jerold Cohen To Be Chief Counsel. October 17, 1979

The President today announced that he will nominate N. Jerold Cohen, of Atlanta, Ga., to be Chief Counsel of the Internal Revenue Service in the Department of the Treasury. He would replace Stuart Seigel, resigned. Cohen is with the Atlanta law firm of Sutherland, Asbill & Brennan.

He was born June 13, 1935, in Pine Bluff, Ark. He received a B.B.A. from Tulane University in 1957 and an LL.B. from Harvard Law School in 1961.

Cohen has been with Sutherland, Asbill & Brennan since 1961. He is an adjunct professor at Emory University School of Law and serves as chairman of the Atlanta Community Relations Commission.

1979 Nobel Prize in Medicine

Message of Congratulations to Allan McCleod Cormack. October 12, 1979

To Professor Allan McCleod Cormack

Congratulations! I know that all Americans join me in applauding the tribute you have received from the Nobel Assembly.

Untold numbers of persons stand to benefit—as have thousands already—from the advanced diagnostic procedures made possible by your work on the theoretical processes underlying the development of the CAT scan. Your work has meant not only a triumph for science but also a triumph for humanitarian concerns.

It gives me great pleasure to salute you

on this occasion and to send you my best wishes.

Sincerely,

JIMMY CARTER

[Professor Allan McCleod Cormack, Department of Physics, Tufts University, Medford, Massachusetts 02155]

NOTE: The text of the message was released on October 17.

1979 Nobel Peace Prize

Message of Congratulations to Mother Teresa of Calcutta. October 17, 1979

To Mother Teresa of Calcutta

I would like to express my personal congratulations for your richly deserved award of the Nobel Peace Prize for 1979.

Your work on behalf of children, refugees, the poor and the sick has been a great inspiration for many years to those of us who cherish and espouse human rights. Mankind is in your debt for your fine contributions and for the example you have provided of selfless concern for others.

I wish you every continuing success in your service to humanity.

Sincerely,

JIMMY CARTER

[Mother Teresa of Calcutta, Missionaries of Charity, 54 A Lower Circular Road, Calcutta 16, India]

1979 Nobel Prize in Chemistry

Message of Congratulations to Herbert C. Brown. October 17, 1979

To Professor Herbert Brown

Congratulations on your Nobel Prize in Chemistry for 1979.

I am pleased that your outstanding work in boron chemistry, which has led to the development of large molecules of enormous use to industry, is being recognized through this renowned international prize.

I know that Americans everywhere are proud of your accomplishments and join me in sending you our very best wishes.

Sincerely,

JIMMY CARTER

[Professor Herbert C. Brown, Department of Chemistry, Purdue University, Lafayette, Indiana 47907]

At a time when the economic problems of the developing world are among the most urgent problems of all mankind, it is significant and gratifying that your achievements have been recognized with this renowned international award.

I know that Americans everywhere join me in extending our very best wishes to you at this proud moment.

Sincerely,

JIMMY CARTER

[Dr. Theodore W. Schultz, Professor Emeritus, Department of Economics, University of Chicago, 5801 South Ellis Street, Chicago, Illinois 60637]

1979 Nobel Prize in Economics

*Messages of Congratulations to Sir William Arthur Lewis and Theodore W. Schultz.
October 17, 1979*

To Sir Arthur Lewis

Congratulations on your Nobel Prize in Economics for 1979.

Your work in economic growth and development theory has had a profound effect on everyone involved in efforts to advance the lives of people in the underdeveloped areas of the world.

I am indeed pleased that you have long pursued your career at Princeton University, where your teaching and writing have been so admired and appreciated.

I know that all Americans join me at this time in sending you these congratulations and best wishes.

Sincerely,

JIMMY CARTER

[Sir William Arthur Lewis, Woodrow Wilson School, Princeton University, Princeton, New Jersey 08540]

To Dr. Theodore Schultz

Congratulations on winning the 1979 Nobel Prize in Economics.

1979 Nobel Prize in Physics

*Messages of Congratulations to Sheldon L. Glashow and Steven Weinberg.
October 17, 1979*

To Professor Sheldon Glashow

Congratulations! I am pleased that you and your colleague, Professor Weinberg, are being awarded the Nobel Prize in Physics for 1979.

Your independent work in particle physics has brought one step closer to realization the long-standing dream of a unified field theory. Americans everywhere are proud that your accomplishments have been recognized with this renowned international prize.

On their behalf, and on my own personal behalf, I want to express our appreciation and our best wishes as we share with you this proud moment.

Sincerely,

JIMMY CARTER

[Professor Sheldon L. Glashow, Department of Physics, Harvard University, Cambridge, Massachusetts 02138]

To Professor Steven Weinberg

Congratulations! I am pleased that you and your colleague, Professor Glashow,

are being awarded the Nobel Prize in Physics for 1979.

Your independent work in particle physics has brought one step closer to realization the long-standing dream of a unified field theory. Americans everywhere are proud that your accomplishments have been recognized with this renowned international prize.

On their behalf, and on my own personal behalf, I want to express our appreciation and our best wishes as we share with you this proud moment.

Sincerely,

JIMMY CARTER

[Professor Steven Weinberg, Department of Physics, Harvard University, Cambridge, Massachusetts 02138]

Death of S. J. Perelman

Statement by the President. October 18, 1979

S. J. Perelman was one of the best writers of comic prose our country has ever produced. His playground was the American language, and whether he was writing the screenplay for a Marx brothers movie or a short essay for the New Yorker, his verbal gymnastics were sometimes surprising, often breathtaking, and always funny. Like Mark Twain, George Ade, Ring Lardner, and James Thurber, S. J. Perelman made a permanent contribution not only to American humor but to American literature as well.

Windfall Profits Tax Legislation

Statement on Senate Finance Committee Approval of the Legislation. October 19, 1979

I am pleased that the Senate Finance Committee has approved the windfall

profits tax. The committee has adopted the basic framework I proposed, dedicating the proceeds of the tax to important energy-related purposes, such as low-income assistance and public transportation, as I urged.

While I am pleased that the committee has rejected a number of major exemptions from the tax, I am also disappointed with some of the exemptions that were adopted. I do not believe they are cost-effective. They would ensure little additional crude oil production, while losing billions of dollars of revenue for the public. I will work for the elimination of these exemptions.

The committee has produced a constructive bill that we can continue to strengthen on the Senate floor and in conference.

National Transportation Safety Board

Nomination of G. H. Patrick Bursley To Be a Member. October 19, 1979

The President today announced that he will nominate G. H. Patrick Bursley for reappointment as a member of the National Transportation Safety Board, for a term expiring December 31, 1984.

Bursley has been a member of the National Transportation Safety Board since earlier this year. He retired from the Coast Guard in 1978 as Chief Counsel, with the rank of rear admiral, after 32 years of service.

He was born April 5, 1925, in Istanbul, Turkey. He received a B.S. from the U.S. Coast Guard Academy in 1946 and a J.D. from George Washington University Law School in 1953.

Bursley had various sea and shore assignments with the Coast Guard between

1946 and 1954. From 1954 to 1958, he was district legal officer in Seattle. From 1958 to 1960, he was commanding officer of the Coast Guard cutter *Magnolia*. From 1960 to 1964, he was a district legal officer, first in San Francisco, then in Honolulu. From 1964 to 1966, he was Coast Guard liaison with the Treasury Department.

From 1966 to 1968, Bursley was assistant to the Deputy Under Secretary of Transportation. From 1963 to 1969, he was with the Office of Policy Review in the Office of the Secretary of Transportation, and from 1969 to 1972, he was chief of the Maritime and International Law Division of the Coast Guard.

From 1972 to 1974, Bursley was captain of the port for the Coast Guard in Baltimore. From 1974 to 1976, he was commander of the second Coast Guard district. In 1976 he was chief of the U.S. delegation to the International Conference on Convention for the Limitation of Liability of Maritime Claims, held in London.

From 1976 until his retirement in 1978, Bursley was Chief Counsel to the Coast Guard and Chairman of the Marine Safety Council of the Coast Guard.

Export-Import Bank

Executive Order 12166. October 19, 1979

By the authority vested in me as President of the United States of America by Section 2(b)(1)(B) of the Export-Import Bank Act of 1945, as amended (12 U.S.C. 635(b)(1)(B)), and by Section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

1-101. The function vested in the President by Section 2(b)(1)(B) of the Export-Import Bank Act of 1945, as

amended (12 U.S.C. 635(b)(1)(B)), is delegated to the Secretary of State. That function is the authority to determine that a denial by the Export-Import Bank of an application for credit would be in the national interest, where such action could clearly and importantly advance United States policy in such areas as international terrorism, nuclear proliferation, environmental protection and human rights.

1-102. Before making such a determination, the Secretary of State shall consult with the Secretary of Commerce and the heads of other interested Executive agencies.

1-103. In accord with Section 2(b)(1)(B) of that Act, only in those cases where the Secretary of State has made such a determination should the Export-Import Bank deny an application for credit for nonfinancial or noncommercial considerations.

JIMMY CARTER

The White House,
October 19, 1979.

[Filed with the Office of the Federal Register,
4:08 p.m., October 19, 1979]

Urban Development Action Grant Program

*Remarks at a White House Reception
Commemorating the Second Anniversary
of the Program. October 19, 1979*

MR. WATSON. It's a great pleasure to welcome all of you to the White House.

As I look around the room, I feel as though this is Old Home Week, because there are so many familiar faces here who've worked so hard on what we are here to celebrate. And I will say only with this one remark, because it will be underscored by several of the people on the

platform, including the President, who will arrive shortly, we're here today, very pleased that you can join us, quite simply to celebrate a spectacularly successful program in which the Federal Government and local governments and the private sector all over this Nation have been participating now for 2 years.

It's my great personal pleasure and privilege to present to you the distinguished former Secretary of HUD, present Secretary of Health, Education, and Welfare, the shy, the retiring—[laughter]—the demure Patricia Harris.

SECRETARY HARRIS. *My distinguished colleagues, my particularly distinguished successor at HUD, all my friends:*

This really, you know—it's Old Home Week to be here.

Jack, many a true word is spoken in jest. Simply because you don't know that you were accurately describing me doesn't mean that you weren't. [Laughter]

I particularly wanted to be here today, because I wanted to go back a bit in history. The former Secretary of State entitled his autobiography "Present at the Creation." And there are few of us in this room who were present at the creation of UDAG, and I'm not sure that many people know the story of how the UDAG started, and I want to be sure that you hear it today.

Before there was an inauguration, before there was a Jay Janis or Bob Embry or even a Larry Simons at HUD, in fact, before there was a Pat Harris at HUD, but after the President said, "Pat, I'd like you to do this," I asked a group of people to join me at my former law firm and talk about where we were going in the area of community development.

I was initially very conservative. And I said, instead of changing the way in which we distributed funds under the Community Development Block Grant

formula, we ought to ask for a 1-year extension. And those three conservative characters, who are still at HUD, demure and quiet Carl Riedy, shy Ron Gattion, and quiet, agreeable Deputy Assistant Secretary Garrison, were in the room that day, and they, along with Chuck Edison, said to me, "We can do some very good things."

And they started talking about the formula for the distribution of Community Development Block Grant funds, and they started talking about a discretionary program whose purpose was to do something we all agreed we wanted to do as part of the Carter administration—give maximum discretion to the cities on how they revitalize their cities, to maintain standards for the expenditure of Federal funds, but allow the widest discretion to the cities, and finally, to bring in the private sector to aid in the development of cities in a way that would keep the private sector there, but more importantly, would have the private sector there at the beginning.

They discussed these ideas with me, and I said, "Go ye forth and till the earth and sow the seeds." Well, a lot of things happened. We had discussions with the OMB, but the President's wisdom prevailed. [Laughter] And we were able to go to the Congress with a plan that some people in Congress questioned. And a few people wanted to know if this wasn't too much discretion for Democratic HUD Secretaries, because after all, everybody knew HUD Secretaries were the same—Democrats or Republican. They had forgotten. And we got the UDAG.

The seed was planted, and what a harvest it's been: nearly 500 projects approved, nearly a billion dollars in grants awarded, nearly a quarter of a million permanent jobs created, more than \$5½ billion in private sector commitments—

\$5½ billion, I remind you—to distressed cities, stronger local tax bases, and growing confidence in our cities. That's what the Carter administration brought to the cities; that was a Carter administration creation.

And for those who tell you that an administration cannot plan what it wants to do and bring that plan to fruition, today's celebration of the anniversary of the UDAG proves that they are wrong. We can plan; that's what the Carter administration has demonstrated here. And as I've said so many times in recent weeks, you ain't seen nothin' yet in terms of the future.

And one of the reasons you ain't seen nothin' yet is the distinguished Secretary of Housing and Urban Development, Moon Landrieu. Moon.

SECRETARY LANDRIEU. I am what they say in vaudeville is a straight man. I speak between Pat Harris and the President of the United States for as many minutes as it takes. [*Laughter*] So, in a few moments I expect the President to be here.

I just came from a luncheon over at the Federal City Council, which is a group of businessmen, politicians, citizens interested in the city of Washington, D.C., as a place to live, as distinguished from the seat of government. And Mrs. Katherine Graham was the principal speaker and gave a fascinating talk on the beginning of that council, which, she pointed out, started back in 1954 as a thought of her husband's, the late Philip Graham, who, being devoted to Washington and being concerned about what he saw as a deterioration of a great city, began a series of articles in the Washington Post which began to search for ideas and for analysis of what was happening to Washington, D.C., and perhaps all cities in the United States. It just so happens that today

marked the 25th anniversary of the beginning of that effort.

And it occurred to me that many people were in the field of concern about urban America a long, long time before I ever came on the scene in the early 1970's and late 1960's. And it also occurred to me that it took some 10 years from that point—and I don't mark that as necessarily the very beginning of the effort, but at least of one effort in one city—that it took until 1965 to organize the Department of HUD, which was the first formal recognition, the first gathering together of the resources of this country for an all-out effort on what was obviously a growing urban problem.

By that time, we had already been into 400 years of physical development and redevelopment of the United States, and we had been a nation for almost 200 years. And yet it took that period of time in which to formalize our concerns in the way of a department dedicated to that purpose. And it actually took another 10 to 12 years before we could formulate a comprehensive urban policy.

There are too many people in this room to thank individually who began that program, and there are too many people in this room who are consulted in the process to thank individually. But it did result in the President of the United States, President Carter, establishing a task force to examine the possibility of creating for the first time a very comprehensive national urban policy, which would not only use the resources of the one department that was defined as an urban department but which would also use all the resources of the Federal Government to redevelop the cities of this Nation and the urban centers of this Nation.

And the cornerstone of that policy came out with the funny name of Urban Development Action Grants. And it has

performed well beyond, I think, anyone's expectations, not only because it has channeled significant amounts of money into the urban areas but, most importantly, has been the key link in forming the partnership that President Carter so desperately sought between the Federal Government and local governments and between the government itself and the private enterprise system.

It was his belief that the private sector had built this country and that it was certainly capable of rebuilding it if government could create the atmosphere in which the private sector could move and to exercise its ingenuity and its capital and its desires.

And so, we're here today, marking the second anniversary of the founding of that program, and I'm so happy—

[At this point, the President entered the East Room.]

—happy to join here with so many who brought it about.

THE PRESIDENT. When I heard all of you were in town, I knew that Moon was announcing new UDAG grants today. *[Laughter]*

It's a real pleasure for a President to meet with a group who have formed an effective partnership in dealing with some of the most serious problems of our country, and I emphasize the word "successful." Sometimes an idea or a dream or a determined effort—many times those concepts are not realized. And there is a building up of hope and expectation and a forming of a partnership, the delineation of a plan, an effort through Congress, a bill is passed, money is appropriated, and then there's an embarrassed realization that the idea was not a good one. This is not the case.

In 1975 and 1976, I traveled around this country as a candidate, and there

were several serious problems that I detected. I would say that one of the most persistent problems was the realization in our urban areas, our cities, our downtown central cities that their prospects for a good life or even survival was not good. This was a concept or belief that permeated our country. It was most highly publicized in New York City, but at the time of the shock of the New York City financial problem announcement, there was a general feeling around the country that "this could happen in my city next."

We began to evolve this program—Pat Harris, Bob Embry, many others that I won't name now—to try to deal with that problem, because we realized, first of all, that there was not an adequate consultation between labor, business, private investors, county officials, mayors, Governors, Members of Congress, administration officials, or the President, that there was no way to share the problem and, in effect, share the probing for a solution. But we formed one, and the outcome has been, I think, very good.

The Urban Policy Group has functioned well. Some of you in this room have been here to Washington, have been in the Cabinet Room, have been in the Oval Office 5, 6, 7, 8, 9, 10 times as we've tried to hammer out a solution to serious problems in our urban areas.

The Urban Development Action Grants, UDAG program, has been the centerpiece of what we proposed. It's new, it's innovative. And we also recognized that there would not be enough Federal money to solve the problem, but we also saw that there were many potential investments that would restore the spirit of a community and keep the responsibility where it ought to be—the people who had to pay for and administer and benefit from a major project. The ratio between

Federal moneys and private investments had been about 6 to 1, as you well know, and the results have been notable.

There is no more a feeling of isolation or despair or hopelessness or alienation from the Federal Government—quote, “from the Federal Government.” I believe that mayors, county officials, local officials from all over the country now feel that there is an open reception here for you and for those that you represent. I think there’s a new sense of enthusiasm.

I do some traveling still since I’ve been in the White House. I was in Chicago recently; I was in Kansas City recently; I was in New York City recently; Hartford, Connecticut, recently; and smaller towns as well. And I don’t get the complaints that I used to get, and that’s, in itself, gratifying.

There has been, in addition, an effort, because of your instigation, to bring good people into the Government. I can’t say that there haven’t always been good people occupying the same positions; I’m not criticizing others. But we’ve got in the Department of Housing and Urban Development—brought in by Pat, now with Moon Landrieu—a collection of people who understand the problems of the urban areas and who know what it means to be faced with a serious challenge and who know what it means to resolve a problem. We’ve got more mayors in the President’s Cabinet now than we had all put together in the last 50 years, and I think that’s a great achievement in itself.

I’ve been determined that the urban centers would, in the future, be the backbone of the social and economic structure of our country and not the Achilles heel which it has been in the past. We’ve moved on a broad front: CETA programs, we’ve doubled them; youth programs, we’ve added 70 percent; education programs, 60 percent in funding from

the Federal Government. But in urban development, with UDAG and EDA, we have increased these commitments 3,000 percent. We’re now putting 30 times as much effort and financing into the reconstitution of our urban areas as had been the case before, and it’s paid rich dividends. It’s let us know what could be done in housing, in social programs, in health, in education, in transportation.

As we’ve gone into these projects and investigated them, we’ve learned a lot about the community. There hasn’t been a chasm that we couldn’t cross. We’ve been there on the street, in the alleys, looking at homes, looking at people who had to be moved and where they wanted to be moved to and how they wanted to be treated. And we’ve learned in the process to make government, on a daily basis, much more responsible, much more responsive, much more knowledgeable about the people that we were trying to serve.

In the last 2 years, I think, we’ve had about \$6 billion in programs. In 1980 we are asking for another \$6 billion program that will engender 400,000 jobs in the private sector. Here, again, about one-sixth of the money will come from the Government itself.

Another thing that we’ve tried to do is to not eliminate private initiative. The initiative is yours, whether you’re a mayor or county official or whether you don’t hold public office. The initiative is yours. We’re trying to help. And the applications don’t get bogged down in interminable redtape and delay. We try to have a turnaround time, between when we get an application and when we give an answer, 60 days. And I think it’s a rare occasion when people have to wait 90 days, is it not, Pat? That’s extraordinary for the Government to do that way, and I say this not to congratulate myself, but to tell you that we’ve

got people here eager to work with you, and they've been successful in it.

I might say in summary that this coming year, 1980—we're already in it—we're asking for a 70-percent increase in this program, and we're trying to focus it on pockets of poverty that exist within communities that are, basically and on the average, healthy. And we've increased the percentage that the conference committee reports are accepting up to 20 percent that can be derived from UDAG. We want to do even better in the future.

And I said earlier, I hadn't recognized all the people involved. Pat and Bob did help, but the basic concepts that I have tried to pursue as President came from officials who have served for a long time on the firing line.

And I'd like to call now on the dean of those local officials, a good friend of mine, the mayor of Milwaukee, Henry Maier, who has served in his difficult job—it's become easier, I think, the longer he's been there—since 1960. He organized the Conference of Democratic Mayors. He's been the president of the U.S. Conference of Mayors.

And in 1975 and 1976, because of his consultations and the trust that others had in him, he put together—Henry did—a kind of a picture of what the Federal Government ought to do in a comprehensive urban policy, and we have basically adopted what he and many of you that I see in this room have put together. And that's been the Government program—the program that we got from local officials. That's the way it ought to work, in my opinion.

And I'm very grateful to call now the mayor of Milwaukee, my friend.

MAYOR MAIER. Mr. President, I am overwhelmed. I thank you very much for those very kind words.

Senator Williams and Representative

Ashley, our very good friends, and our other good congressional friends, whom I want to thank very much—who are here today—for all the help you've given us, and Secretary Harris and Secretary Landrieu, and distinguished audience:

I am greatly honored to speak as a mayor on this milestone occasion, and I'm particularly grateful, because I recall the days when an official national urban policy was just a dream. And as the first president of the National Conference of Democratic Mayors in 1974, I was in the long effort to spell out a first national urban policy statement to give our cities a top priority on the national agenda.

And I recall very vividly the day some 3 years ago in New York when you appeared, Mr. President, and you appeared with the other Presidential candidates before a panel of Democratic mayors in a conference that I chaired. And that day you pledged to support and actively work for a national urban policy, and you also pledged that, as President, you would institute a White House open-door policy for the mayors of America. And further, you promised that programs and the policies of your administration affecting our Nation's urban areas would be coordinated. And you have kept those promises, Mr. President, and we thank you.

And I know the leaders of the Democratic Mayors, fighting mayors like Dick Hatcher of Gary, Indiana, and Coleman Young of Detroit and Maynard Jackson, our present president of the Democratic Mayors, Bill McNichols of Denver and Kevin White of Boston, Neil Goldschmidt of Portland and Moon Landrieu of New Orleans—once a mayor, always a mayor—[laughter]—and my very good friend Lee Alexander, who is vice president of the Democratic Mayors, will be president next year, and is past president of the United States Conference of Mayors—these men

were the men who held the eight regional hearings throughout the country in which we received testimony related to our national urban policy.

And I would say, Mr. President, that you have exceeded your pledges to the mayors of America. Your very recent appointments of our good friends and fellow mayors, Secretary Landrieu and Secretary Goldschmidt, reflect a true commitment to urban America in the full implementation of your national urban policy.

Now, I'll admit, Mr. President, that the policy that we formulated and was entered in this document, in which these gentlemen's pictures are also present, was a little, perhaps, exaggerated, and you probably couldn't agree with all of it. But the mayors have instructed me to inform Secretary Landrieu and Secretary Goldschmidt that we fully expect them to effectuate that policy. *[Laughter]* And I know I speak for my fellow Democratic mayors when I commend you and thank you for keeping the pledges and keeping the faith.

And in very concrete terms, the Urban Development Action Grant component of your national urban policy is giving our cities a basic new life in the area where our hugest tax base was in a state of decline. In Milwaukee our original UDAG grant for our downtown shopping mall was based upon an anticipated \$60 million in private investment. And we have already now exceeded over \$100 million as a result of the spinoffs from our UDAG grant, and we're still climbing.

As you mentioned, Mr. President, it is indeed a blue chip investment, in capital investment and in jobs and in tax dollars. We find that for every Federal dollar spent, there's a \$6.10 private investment, and for every UDAG dollar, an additional 10 cents in property tax revenue. And there isn't another Federal program in

existence that has given us these kinds of fiscal tangible results. And I thank you, Mr. President, and I commend you for carrying forward the program.

Thank you.

THE PRESIDENT. As all the Members of the Congress know, and as I know very well and I'm sure all of you realize, we have a very serious conflict, basically between trying to control the Federal budget expenditures, to hold down the deficit, and to help control inflation on the one hand, and to sharply focus direct and expanded benefits when Federal moneys are expended. And this fiscal year 1980 appropriation, which has now been passed through the Congress and through its conference committee, will provide just in the construction area alone 230,000 permanent jobs and 130,000 temporary jobs, in addition to giving people a better life in the communities involved and increasing the hope and the expectation that they can work in harmony, not only with themselves but also with their government. It restores confidence, which I think is very good.

Have the Members of Congress been recognized yet—the individuals? All the Members of Congress here that are not on the stage, would you all stand? I think you really deserve a debt of gratitude.

There are many others, obviously, in the Congress who've been in the forefront of this, and those are here today. There are others who couldn't be here, and there are many others who are now claiming credit for the program—*[laughter]*—which is very good and the highest accolade that the program could have.

But I would like to introduce two people now to make remarks, one from the House and one from the Senate, representing a bipartisan group. Since we do have a majority of Democrats, they happen to be Democrats. *[Laughter]* But I

would like to point out that this is really and genuinely a bipartisan program, and I'm grateful for it.

Pete Williams, the Senator from New Jersey, is chairman of the Subcommittee on Housing and Urban Development. He's been one of those who has helped to initiate the UDAG program and has been in the forefront of housing, urban development long before I became President. I'm very grateful to Pete for not only his help with proposals that I made but also the initiative that he has shown in channeling his own ideas into the administrative process and through Congress, in legislation passed.

I'd like to introduce now, Senator Pete Williams.

SENATOR WILLIAMS. *Thank you very much, Mr. President and Secretary Harris, Secretary Landrieu, Mayor Maier, and my colleague here on the platform, Lud Ashley, and colleagues in the room, ladies and gentlemen:*

Everybody here can be called an ally in urban revitalization. It's, of course, a very, very happy anniversary—second anniversary of UDAG—celebration for all of us.

We remember 2 years ago this week that UDAG became law, signaling a new and exciting initiative in urban revitalization, a new partnership between private enterprise and government, designed to deal with one of the most complex problems our society faces, this kind of partnership, which you, Mr. President, have articulated so well in the urban policy initiatives you have presented to Congress that represents the best hope for our distressed cities. And by cities, we don't mean monolithic institutions; we're talking about people.

Mr. President, I can tell you firsthand how much UDAG does mean to people. Earlier this year, I toured Newark's neighborhood improvement program, a

UDAG project—by the end of next year, will result in the rehabilitation of 1,500 homes.

Newark had become a classic example of the decline—physical and spiritual—of a major city. But my most vivid recollection very recently in Newark is not of rebuilt buildings—and we have a lot of them—but the vividness that comes back to me is being there to observe and to feel, to sense the rebuilding of lives. Resident after resident came to me truly expressing joy. It was an outpouring of gratitude for the help that they have received. And over and over they said that this program meant the difference between continued wretched living or a life in a wholesome, decent, and, to say it again, joyful environment.

So, Mr. President, I extend to you their thanks. They are representative of people throughout our country that have had this opportunity under UDAG, in cities large and small.

So, there is a new sense of revival and progress for communities that have been plagued by economic decline. Mr. President, as you and Secretary Harris worked so hard to get this program underway, your leadership brought us all together. You can be so very proud of its achievements.

And I want to say, looking ahead, when UDAG comes up for reauthorization next year, I look forward to working with you, with Secretary Landrieu, Lud Ashley, to ensure that this vitally important tool remains available to our communities that need it so much.

THE PRESIDENT. I wish everybody could see the expression on Tom Marsaro's face. Tom, raise your hand. Raise your hand, keep it up.

Tom happens to be the young, very competent man who's in charge of the particular project in Newark—and others,

too. And when Pete Williams was describing the effect on the lives of those who live in that reconstituted area of our Nation, it was gratifying to me to see Tom, with genuine pride and gratification, know that he had done a good job. And I thank you and Bob Embry and others, Pat Harris and now Moon Landrieu, who have made this project a success.

The Urban Development Action Grants—I would say, of those four words, the most important word is “action”—we don’t mess around with the applications or the carrying out of those projects once they get to us. And I think that “action” word exemplifies the political life, the congressional leadership of Lud Ashley.

Perhaps the most difficult legislation which has ever faced the Congress, certainly in my lifetime, was the very complicated, comprehensive energy policy that I proposed to the Congress in April of 1977. We hope that we’ll complete it this year. But when the Speaker of the House put together an ad hoc committee, comprised of the leaders of many committees in the House of Representatives, he chose Lud Ashley to head that program. And Lud is more famous, perhaps on a nationwide basis, for having dealt successfully with the energy problem in a very expeditious and effective fashion.

But I think the longest testimony to Lud’s effectiveness is in the area of housing and urban development. He cares about people, and he’s superb in his ability to conceive legislative programs, to get them passed by Congress, to have them financed, and then to make sure that they do apply to improving the life of a human being. And I’m very grateful at this time to introduce to you Lud Ashley.

REPRESENTATIVE ASHLEY. Well, Mr. President, if I had known I would get such an introduction from you, I promise you,

I would have written something down. [Laughter]

I want to take just a moment to say what I feel, which is that President Carter is the first President in the history of the United States that really has had the courage to try to articulate a policy for our cities. And you know that’s true, and I know it’s true. We know why it’s true.

We may as well put it where it is. You know, the reason the Presidents have been a little reluctant to do this is not because they haven’t recognized that cities have problems, it’s because to try to articulate a policy for the cities exposes you and makes you vulnerable, because 4 years hence you can be held accountable to those strategies that you tried to articulate. Well, I kind of like to have a President that will risk that, and we have that President.

I do have to be absolutely honest with you, Mr. President. It’s been my conviction, pretty much since coming to the Congress, that any initiative that comes from the White House is one that in almost every instance can be improved upon by the Congress. You understand that. [Laughter] The marvelous thing about the UDAG program is that that wasn’t so. And don’t think we didn’t look, Mr. President, because we did. [Laughter]

But the reason that it couldn’t be really improved upon is because it does combine what my associates, Pete in particular, has touched upon. You know, it starts off with a partnership concept, predicate, and it insists that there be the kind of 6-to-1 leverage that is the usual. It relies primarily on local initiative, nothing from the Federal Government. Nobody’s out there saying, do this, do that—not at all. So, it’s got the partnership concept, it’s got the local initiative, it’s got that marvelous feature—from the time of application, if successful, to the time that the pick goes

by a strong coalition of groups devoted to educational quality and equal educational opportunity. You refused to believe that education is a part-time responsibility, for the Federal Government or for yourselves.

NOTE: As enacted, S. 210 is Public Law 96-88, approved October 17.

15th Anniversary of the Job Corps

Statement by the President. October 17, 1979

The Job Corps began 15 years ago on the premise that, if given the opportunity, young people who had grown up in poverty and frustration could become responsible, employable, and productive citizens.

With government, labor, and industry working together, this idea has become a reality for more than 700,000 young men and women who have received basic education, skills training, work experience, and health care through the Job Corps. With their new skills and pride in accomplishment, Job Corps graduates are entering the labor market, confident that they can become contributing workers with satisfying careers.

In the years to come, I know that the Job Corps will continue to assist young men and women, who might otherwise have been neglected and forgotten, to lead rewarding lives.

Department of Health, Education, and Welfare

Nomination of Joan Zeldes Bernstein To Be General Counsel. October 17, 1979

The President today announced that he will nominate Joan Zeldes Bernstein,

of Chevy Chase, Md., to be General Counsel of the Department of Health, Education, and Welfare. She would replace Richard Beattie, resigned. Bernstein has been General Counsel of the Environmental Protection Agency since 1977.

She was born March 17, 1926, in Galesburg, Ill. She received a B.A. in economics from the University of Wisconsin in 1948 and an LL.B. from Yale Law School in 1951.

Bernstein was an associate attorney with the New York firm of Sherman & Sterling from 1951 to 1952 and with the Chicago firm of Dahlstream, Schiff, Waite & Hardin from 1952 to 1953. From 1968 to 1970, she was an associate attorney with the Washington firm of William B. Wolf, Jr.

Bernstein was with the Bureau of Consumer Protection of the Federal Trade Commission from 1970 to 1976, serving as a trial attorney, then Assistant to the Director, Deputy Director, and finally Acting Director. From 1976 to 1977, she was a partner in the Washington firm of Baker, Hostetler, Frost & Towers.

Department of State

Nomination of William G. Bowdler To Be an Assistant Secretary. October 17, 1979

The President today announced his intention to nominate William G. Bowdler to be Assistant Secretary of State for Inter-American Affairs. Bowdler has been Director of the Bureau of Intelligence and Research at the State Department since 1978.

He was born March 27, 1924, in Buenos Aires, Argentina, and became a

naturalized citizen in 1945. He received a B.A. in history from the University of Richmond in 1948 and an M.A. from the Fletcher School of Law and Diplomacy in 1949. He served in the U.S. Army from 1944 to 1946.

From 1950 to 1951, Bowdler was a research assistant at the State Department, and from 1951 to 1952, he was an international administration officer. From 1952 to 1956, he was an international relations officer in the Bureau of Inter-American Affairs. From 1956 to 1961, he was political and consular officer in Havana.

From 1961 to 1963, Bowdler was an international relations officer, and from 1963 to 1964, he was Deputy Coordinator of Cuban Affairs. From 1964 to 1968, he was executive liaison officer for Latin American affairs with the White House. From 1968 to 1971, he was Ambassador to El Salvador.

From 1971 to 1973, Bowdler was Ambassador to Guatemala. He became Deputy Assistant Secretary of State for Inter-American Affairs in 1973 and Acting Assistant Secretary in 1974. He served as Ambassador to South Africa from 1975 to 1978.

Drug Enforcement Administration

Nomination of Frederick A. Rody, Jr., To Be Deputy Administrator. October 17, 1979

The President today announced that he will nominate Frederick A. Rody, Jr., of Miami Lake, Fla., to be Deputy Administrator of the Drug Enforcement Administration in the Department of

Justice. He would replace Jerry N. Jenson, resigned. Rody is Regional Administrator of the Drug Enforcement Administration for the southeast region.

He was born September 8, 1931, in Sewickley, Pa. He received a B.S. from Michigan State University in 1955. He served in the U.S. Army from 1955 to 1957.

In 1954 and 1955, Rody was assistant chief of police in Davison, Mich. In 1957 he was with the Ottawa Roughriders of the Canadian Football League.

From 1957 to 1975, Rody was with the U.S. Bureau of Customs, where his positions included Deputy Assistant Commissioner and special agent in charge of the Seattle and Laredo district offices.

Rody has been with the Drug Enforcement Administration since 1975, and has served as Acting Assistant Administrator for Enforcement, Acting Deputy Administrator, and Regional Director in the Seattle and Miami regional offices.

Federal Prison Industries, Inc.

Appointment of Two Members of the Board of Directors. October 17, 1979

The President today announced the appointment of two persons as members of the Board of Directors of the Federal Prison Industries, Inc., in the Department of Justice. They are:

DARYL F. GRISHAM, a Chicago businessman, who is chairman of the PUSH Foundation, a principal of Chicago United, and chairman of the Chicago Metro Division of the National Alliance of Businessmen;

MONICA HERRERA SMITH, a deputy probation officer with the Los Angeles County Probation Department and program coordinator for CONTACT, an exoffender employment project.

Internal Revenue Service

Nomination of N. Jerold Cohen To Be Chief Counsel. October 17, 1979

The President today announced that he will nominate N. Jerold Cohen, of Atlanta, Ga., to be Chief Counsel of the Internal Revenue Service in the Department of the Treasury. He would replace Stuart Seigel, resigned. Cohen is with the Atlanta law firm of Sutherland, Asbill & Brennan.

He was born June 13, 1935, in Pine Bluff, Ark. He received a B.B.A. from Tulane University in 1957 and an LL.B. from Harvard Law School in 1961.

Cohen has been with Sutherland, Asbill & Brennan since 1961. He is an adjunct professor at Emory University School of Law and serves as chairman of the Atlanta Community Relations Commission.

1979 Nobel Prize in Medicine

Message of Congratulations to Allan McCleod Cormack. October 12, 1979

To Professor Allan McCleod Cormack

Congratulations! I know that all Americans join me in applauding the tribute you have received from the Nobel Assembly.

Untold numbers of persons stand to benefit—as have thousands already—from the advanced diagnostic procedures made possible by your work on the theoretical processes underlying the development of the CAT scan. Your work has meant not only a triumph for science but also a triumph for humanitarian concerns.

It gives me great pleasure to salute you

on this occasion and to send you my best wishes.

Sincerely,

JIMMY CARTER

[Professor Allan McCleod Cormack, Department of Physics, Tufts University, Medford, Massachusetts 02155]

NOTE: The text of the message was released on October 17.

1979 Nobel Peace Prize

Message of Congratulations to Mother Teresa of Calcutta. October 17, 1979

To Mother Teresa of Calcutta

I would like to express my personal congratulations for your richly deserved award of the Nobel Peace Prize for 1979.

Your work on behalf of children, refugees, the poor and the sick has been a great inspiration for many years to those of us who cherish and espouse human rights. Mankind is in your debt for your fine contributions and for the example you have provided of selfless concern for others.

I wish you every continuing success in your service to humanity.

Sincerely,

JIMMY CARTER

[Mother Teresa of Calcutta, Missionaries of Charity, 54 A Lower Circular Road, Calcutta 16, India]

1979 Nobel Prize in Chemistry

Message of Congratulations to Herbert C. Brown. October 17, 1979

To Professor Herbert Brown

Congratulations on your Nobel Prize in Chemistry for 1979.

I am pleased that your outstanding work in boron chemistry, which has led to the development of large molecules of enormous use to industry, is being recognized through this renowned international prize.

I know that Americans everywhere are proud of your accomplishments and join me in sending you our very best wishes.

Sincerely,

JIMMY CARTER

[Professor Herbert C. Brown, Department of Chemistry, Purdue University, Lafayette, Indiana 47907]

At a time when the economic problems of the developing world are among the most urgent problems of all mankind, it is significant and gratifying that your achievements have been recognized with this renowned international award.

I know that Americans everywhere join me in extending our very best wishes to you at this proud moment.

Sincerely,

JIMMY CARTER

[Dr. Theodore W. Schultz, Professor Emeritus, Department of Economics, University of Chicago, 5801 South Ellis Street, Chicago, Illinois 60637]

1979 Nobel Prize in Economics

*Messages of Congratulations to Sir William Arthur Lewis and Theodore W. Schultz.
October 17, 1979*

To Sir Arthur Lewis

Congratulations on your Nobel Prize in Economics for 1979.

Your work in economic growth and development theory has had a profound effect on everyone involved in efforts to advance the lives of people in the underdeveloped areas of the world.

I am indeed pleased that you have long pursued your career at Princeton University, where your teaching and writing have been so admired and appreciated.

I know that all Americans join me at this time in sending you these congratulations and best wishes.

Sincerely,

JIMMY CARTER

[Sir William Arthur Lewis, Woodrow Wilson School, Princeton University, Princeton, New Jersey 08540]

To Dr. Theodore Schultz

Congratulations on winning the 1979 Nobel Prize in Economics.

1979 Nobel Prize in Physics

*Messages of Congratulations to Sheldon L. Glashow and Steven Weinberg.
October 17, 1979*

To Professor Sheldon Glashow

Congratulations! I am pleased that you and your colleague, Professor Weinberg, are being awarded the Nobel Prize in Physics for 1979.

Your independent work in particle physics has brought one step closer to realization the long-standing dream of a unified field theory. Americans everywhere are proud that your accomplishments have been recognized with this renowned international prize.

On their behalf, and on my own personal behalf, I want to express our appreciation and our best wishes as we share with you this proud moment.

Sincerely,

JIMMY CARTER

[Professor Sheldon L. Glashow, Department of Physics, Harvard University, Cambridge, Massachusetts 02138]

To Professor Steven Weinberg

Congratulations! I am pleased that you and your colleague, Professor Glashow,

are being awarded the Nobel Prize in Physics for 1979.

Your independent work in particle physics has brought one step closer to realization the long-standing dream of a unified field theory. Americans everywhere are proud that your accomplishments have been recognized with this renowned international prize.

On their behalf, and on my own personal behalf, I want to express our appreciation and our best wishes as we share with you this proud moment.

Sincerely,

JIMMY CARTER

[Professor Steven Weinberg, Department of Physics, Harvard University, Cambridge, Massachusetts 02138]

Death of S. J. Perelman

Statement by the President. October 18, 1979

S. J. Perelman was one of the best writers of comic prose our country has ever produced. His playground was the American language, and whether he was writing the screenplay for a Marx brothers movie or a short essay for the New Yorker, his verbal gymnastics were sometimes surprising, often breathtaking, and always funny. Like Mark Twain, George Ade, Ring Lardner, and James Thurber, S. J. Perelman made a permanent contribution not only to American humor but to American literature as well.

Windfall Profits Tax Legislation

Statement on Senate Finance Committee Approval of the Legislation. October 19, 1979

I am pleased that the Senate Finance Committee has approved the windfall

profits tax. The committee has adopted the basic framework I proposed, dedicating the proceeds of the tax to important energy-related purposes, such as low-income assistance and public transportation, as I urged.

While I am pleased that the committee has rejected a number of major exemptions from the tax, I am also disappointed with some of the exemptions that were adopted. I do not believe they are cost-effective. They would ensure little additional crude oil production, while losing billions of dollars of revenue for the public. I will work for the elimination of these exemptions.

The committee has produced a constructive bill that we can continue to strengthen on the Senate floor and in conference.

National Transportation Safety Board

Nomination of G. H. Patrick Bursley To Be a Member. October 19, 1979

The President today announced that he will nominate G. H. Patrick Bursley for reappointment as a member of the National Transportation Safety Board, for a term expiring December 31, 1984.

Bursley has been a member of the National Transportation Safety Board since earlier this year. He retired from the Coast Guard in 1978 as Chief Counsel, with the rank of rear admiral, after 32 years of service.

He was born April 5, 1925, in Istanbul, Turkey. He received a B.S. from the U.S. Coast Guard Academy in 1946 and a J.D. from George Washington University Law School in 1953.

Bursley had various sea and shore assignments with the Coast Guard between

1946 and 1954. From 1954 to 1958, he was district legal officer in Seattle. From 1958 to 1960, he was commanding officer of the Coast Guard cutter *Magnolia*. From 1960 to 1964, he was a district legal officer, first in San Francisco, then in Honolulu. From 1964 to 1966, he was Coast Guard liaison with the Treasury Department.

From 1966 to 1968, Bursley was assistant to the Deputy Under Secretary of Transportation. From 1963 to 1969, he was with the Office of Policy Review in the Office of the Secretary of Transportation, and from 1969 to 1972, he was chief of the Maritime and International Law Division of the Coast Guard.

From 1972 to 1974, Bursley was captain of the port for the Coast Guard in Baltimore. From 1974 to 1976, he was commander of the second Coast Guard district. In 1976 he was chief of the U.S. delegation to the International Conference on Convention for the Limitation of Liability of Maritime Claims, held in London.

From 1976 until his retirement in 1978, Bursley was Chief Counsel to the Coast Guard and Chairman of the Marine Safety Council of the Coast Guard.

Export-Import Bank

Executive Order 12166. October 19, 1979

By the authority vested in me as President of the United States of America by Section 2(b)(1)(B) of the Export-Import Bank Act of 1945, as amended (12 U.S.C. 635(b)(1)(B)), and by Section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

1-101. The function vested in the President by Section 2(b)(1)(B) of the Export-Import Bank Act of 1945, as

amended (12 U.S.C. 635(b)(1)(B)), is delegated to the Secretary of State. That function is the authority to determine that a denial by the Export-Import Bank of an application for credit would be in the national interest, where such action could clearly and importantly advance United States policy in such areas as international terrorism, nuclear proliferation, environmental protection and human rights.

1-102. Before making such a determination, the Secretary of State shall consult with the Secretary of Commerce and the heads of other interested Executive agencies.

1-103. In accord with Section 2(b)(1)(B) of that Act, only in those cases where the Secretary of State has made such a determination should the Export-Import Bank deny an application for credit for nonfinancial or noncommercial considerations.

JIMMY CARTER

The White House,
October 19, 1979.

[Filed with the Office of the Federal Register,
4:08 p.m., October 19, 1979]

Urban Development Action Grant Program

*Remarks at a White House Reception
Commemorating the Second Anniversary
of the Program. October 19, 1979*

MR. WATSON. It's a great pleasure to welcome all of you to the White House.

As I look around the room, I feel as though this is Old Home Week, because there are so many familiar faces here who've worked so hard on what we are here to celebrate. And I will say only with this one remark, because it will be underscored by several of the people on the

1965

platform, including the President, who will arrive shortly, we're here today, very pleased that you can join us, quite simply to celebrate a spectacularly successful program in which the Federal Government and local governments and the private sector all over this Nation have been participating now for 2 years.

It's my great personal pleasure and privilege to present to you the distinguished former Secretary of HUD, present Secretary of Health, Education, and Welfare, the shy, the retiring—[laughter]—the demure Patricia Harris.

SECRETARY HARRIS. *My distinguished colleagues, my particularly distinguished successor at HUD, all my friends:*

This really, you know—it's Old Home Week to be here.

Jack, many a true word is spoken in jest. Simply because you don't know that you were accurately describing me doesn't mean that you weren't. [Laughter]

I particularly wanted to be here today, because I wanted to go back a bit in history. The former Secretary of State entitled his autobiography "Present at the Creation." And there are few of us in this room who were present at the creation of UDAG, and I'm not sure that many people know the story of how the UDAG started, and I want to be sure that you hear it today.

Before there was an inauguration, before there was a Jay Janis or Bob Embry or even a Larry Simons at HUD, in fact, before there was a Pat Harris at HUD, but after the President said, "Pat, I'd like you to do this," I asked a group of people to join me at my former law firm and talk about where we were going in the area of community development.

I was initially very conservative. And I said, instead of changing the way in which we distributed funds under the Community Development Block Grant

formula, we ought to ask for a 1-year extension. And those three conservative characters, who are still at HUD, demure and quiet Carl Riedy, shy Ron Gatton, and quiet, agreeable Deputy Assistant Secretary Garrison, were in the room that day, and they, along with Chuck Edison, said to me, "We can do some very good things."

And they started talking about the formula for the distribution of Community Development Block Grant funds, and they started talking about a discretionary program whose purpose was to do something we all agreed we wanted to do as part of the Carter administration—give maximum discretion to the cities on how they revitalize their cities, to maintain standards for the expenditure of Federal funds, but allow the widest discretion to the cities, and finally, to bring in the private sector to aid in the development of cities in a way that would keep the private sector there, but more importantly, would have the private sector there at the beginning.

They discussed these ideas with me, and I said, "Go ye forth and till the earth and sow the seeds." Well, a lot of things happened. We had discussions with the OMB, but the President's wisdom prevailed. [Laughter] And we were able to go to the Congress with a plan that some people in Congress questioned. And a few people wanted to know if this wasn't too much discretion for Democratic HUD Secretaries, because after all, everybody knew HUD Secretaries were the same—Democrats or Republican. They had forgotten. And we got the UDAG.

The seed was planted, and what a harvest it's been: nearly 500 projects approved, nearly a billion dollars in grants awarded, nearly a quarter of a million permanent jobs created, more than \$5½ billion in private sector commitments—

\$5½ billion, I remind you—to distressed cities, stronger local tax bases, and growing confidence in our cities. That's what the Carter administration brought to the cities; that was a Carter administration creation.

And for those who tell you that an administration cannot plan what it wants to do and bring that plan to fruition, today's celebration of the anniversary of the UDAG proves that they are wrong. We can plan; that's what the Carter administration has demonstrated here. And as I've said so many times in recent weeks, you ain't seen nothin' yet in terms of the future.

And one of the reasons you ain't seen nothin' yet is the distinguished Secretary of Housing and Urban Development, Moon Landrieu. Moon.

SECRETARY LANDRIEU. I am what they say in vaudeville is a straight man. I speak between Pat Harris and the President of the United States for as many minutes as it takes. [Laughter] So, in a few moments I expect the President to be here.

I just came from a luncheon over at the Federal City Council, which is a group of businessmen, politicians, citizens interested in the city of Washington, D.C., as a place to live, as distinguished from the seat of government. And Mrs. Katherine Graham was the principal speaker and gave a fascinating talk on the beginning of that council, which, she pointed out, started back in 1954 as a thought of her husband's, the late Philip Graham, who, being devoted to Washington and being concerned about what he saw as a deterioration of a great city, began a series of articles in the Washington Post which began to search for ideas and for analysis of what was happening to Washington, D.C., and perhaps all cities in the United States. It just so happens that today

marked the 25th anniversary of the beginning of that effort.

And it occurred to me that many people were in the field of concern about urban America a long, long time before I ever came on the scene in the early 1970's and late 1960's. And it also occurred to me that it took some 10 years from that point—and I don't mark that as necessarily the very beginning of the effort, but at least of one effort in one city—that it took until 1965 to organize the Department of HUD, which was the first formal recognition, the first gathering together of the resources of this country for an all-out effort on what was obviously a growing urban problem.

By that time, we had already been into 400 years of physical development and redevelopment of the United States, and we had been a nation for almost 200 years. And yet it took that period of time in which to formalize our concerns in the way of a department dedicated to that purpose. And it actually took another 10 to 12 years before we could formulate a comprehensive urban policy.

There are too many people in this room to thank individually who began that program, and there are too many people in this room who are consulted in the process to thank individually. But it did result in the President of the United States, President Carter, establishing a task force to examine the possibility of creating for the first time a very comprehensive national urban policy, which would not only use the resources of the one department that was defined as an urban department but which would also use all the resources of the Federal Government to redevelop the cities of this Nation and the urban centers of this Nation.

And the cornerstone of that policy came out with the funny name of Urban Development Action Grants. And it has

performed well beyond, I think, anyone's expectations, not only because it has channeled significant amounts of money into the urban areas but, most importantly, has been the key link in forming the partnership that President Carter so desperately sought between the Federal Government and local governments and between the government itself and the private enterprise system.

It was his belief that the private sector had built this country and that it was certainly capable of rebuilding it if government could create the atmosphere in which the private sector could move and to exercise its ingenuity and its capital and its desires.

And so, we're here today, marking the second anniversary of the founding of that program, and I'm so happy—

[At this point, the President entered the East Room.]

—happy to join here with so many who brought it about.

THE PRESIDENT. When I heard all of you were in town, I knew that Moon was announcing new UDAG grants today. *[Laughter]*

It's a real pleasure for a President to meet with a group who have formed an effective partnership in dealing with some of the most serious problems of our country, and I emphasize the word "successful." Sometimes an idea or a dream or a determined effort—many times those concepts are not realized. And there is a building up of hope and expectation and a forming of a partnership, the delineation of a plan, an effort through Congress, a bill is passed, money is appropriated, and then there's an embarrassed realization that the idea was not a good one. This is not the case.

In 1975 and 1976, I traveled around this country as a candidate, and there

were several serious problems that I detected. I would say that one of the most persistent problems was the realization in our urban areas, our cities, our downtown central cities that their prospects for a good life or even survival was not good. This was a concept or belief that permeated our country. It was most highly publicized in New York City, but at the time of the shock of the New York City financial problem announcement, there was a general feeling around the country that "this could happen in my city next."

We began to evolve this program—Pat Harris, Bob Embry, many others that I won't name now—to try to deal with that problem, because we realized, first of all, that there was not an adequate consultation between labor, business, private investors, county officials, mayors, Governors, Members of Congress, administration officials, or the President, that there was no way to share the problem and, in effect, share the probing for a solution. But we formed one, and the outcome has been, I think, very good.

The Urban Policy Group has functioned well. Some of you in this room have been here to Washington, have been in the Cabinet Room, have been in the Oval Office 5, 6, 7, 8, 9, 10 times as we've tried to hammer out a solution to serious problems in our urban areas.

The Urban Development Action Grants, UDAG program, has been the centerpiece of what we proposed. It's new, it's innovative. And we also recognized that there would not be enough Federal money to solve the problem, but we also saw that there were many potential investments that would restore the spirit of a community and keep the responsibility where it ought to be—the people who had to pay for and administer and benefit from a major project. The ratio between

Federal moneys and private investments had been about 6 to 1, as you well know, and the results have been notable.

There is no more a feeling of isolation or despair or hopelessness or alienation from the Federal Government—quote, “from the Federal Government.” I believe that mayors, county officials, local officials from all over the country now feel that there is an open reception here for you and for those that you represent. I think there’s a new sense of enthusiasm.

I do some traveling still since I’ve been in the White House. I was in Chicago recently; I was in Kansas City recently; I was in New York City recently; Hartford, Connecticut, recently; and smaller towns as well. And I don’t get the complaints that I used to get, and that’s, in itself, gratifying.

There has been, in addition, an effort, because of your instigation, to bring good people into the Government. I can’t say that there haven’t always been good people occupying the same positions; I’m not criticizing others. But we’ve got in the Department of Housing and Urban Development—brought in by Pat, now with Moon Landrieu—a collection of people who understand the problems of the urban areas and who know what it means to be faced with a serious challenge and who know what it means to resolve a problem. We’ve got more mayors in the President’s Cabinet now than we had all put together in the last 50 years, and I think that’s a great achievement in itself.

I’ve been determined that the urban centers would, in the future, be the backbone of the social and economic structure of our country and not the Achilles heel which it has been in the past. We’ve moved on a broad front: CETA programs, we’ve doubled them; youth programs, we’ve added 70 percent; education programs, 60 percent in funding from

the Federal Government. But in urban development, with UDAG and EDA, we have increased these commitments 3,000 percent. We’re now putting 30 times as much effort and financing into the reconstitution of our urban areas as had been the case before, and it’s paid rich dividends. It’s let us know what could be done in housing, in social programs, in health, in education, in transportation.

As we’ve gone into these projects and investigated them, we’ve learned a lot about the community. There hasn’t been a chasm that we couldn’t cross. We’ve been there on the street, in the alleys, looking at homes, looking at people who had to be moved and where they wanted to be moved to and how they wanted to be treated. And we’ve learned in the process to make government, on a daily basis, much more responsible, much more responsive, much more knowledgeable about the people that we were trying to serve.

In the last 2 years, I think, we’ve had about \$6 billion in programs. In 1980 we are asking for another \$6 billion program that will engender 400,000 jobs in the private sector. Here, again, about one-sixth of the money will come from the Government itself.

Another thing that we’ve tried to do is to not eliminate private initiative. The initiative is yours, whether you’re a mayor or county official or whether you don’t hold public office. The initiative is yours. We’re trying to help. And the applications don’t get bogged down in interminable redtape and delay. We try to have a turn-around time, between when we get an application and when we give an answer, 60 days. And I think it’s a rare occasion when people have to wait 90 days, is it not, Pat? That’s extraordinary for the Government to do that way, and I say this not to congratulate myself, but to tell you that we’ve

got people here eager to work with you, and they've been successful in it.

I might say in summary that this coming year, 1980—we're already in it—we're asking for a 70-percent increase in this program, and we're trying to focus it on pockets of poverty that exist within communities that are, basically and on the average, healthy. And we've increased the percentage that the conference committee reports are accepting up to 20 percent that can be derived from UDAG. We want to do even better in the future.

And I said earlier, I hadn't recognized all the people involved. Pat and Bob did help, but the basic concepts that I have tried to pursue as President came from officials who have served for a long time on the firing line.

And I'd like to call now on the dean of those local officials, a good friend of mine, the mayor of Milwaukee, Henry Maier, who has served in his difficult job—it's become easier, I think, the longer he's been there—since 1960. He organized the Conference of Democratic Mayors. He's been the president of the U.S. Conference of Mayors.

And in 1975 and 1976, because of his consultations and the trust that others had in him, he put together—Henry did—a kind of a picture of what the Federal Government ought to do in a comprehensive urban policy, and we have basically adopted what he and many of you that I see in this room have put together. And that's been the Government program—the program that we got from local officials. That's the way it ought to work, in my opinion.

And I'm very grateful to call now the mayor of Milwaukee, my friend.

MAYOR MAIER. Mr. President, I am overwhelmed. I thank you very much for those very kind words.

Senator Williams and Representative

Ashley, our very good friends, and our other good congressional friends, whom I want to thank very much—who are here today—for all the help you've given us, and Secretary Harris and Secretary Landrieu, and distinguished audience:

I am greatly honored to speak as a mayor on this milestone occasion, and I'm particularly grateful, because I recall the days when an official national urban policy was just a dream. And as the first president of the National Conference of Democratic Mayors in 1974, I was in the long effort to spell out a first national urban policy statement to give our cities a top priority on the national agenda.

And I recall very vividly the day some 3 years ago in New York when you appeared, Mr. President, and you appeared with the other Presidential candidates before a panel of Democratic mayors in a conference that I chaired. And that day you pledged to support and actively work for a national urban policy, and you also pledged that, as President, you would institute a White House open-door policy for the mayors of America. And further, you promised that programs and the policies of your administration affecting our Nation's urban areas would be coordinated. And you have kept those promises, Mr. President, and we thank you.

And I know the leaders of the Democratic Mayors, fighting mayors like Dick Hatcher of Gary, Indiana, and Coleman Young of Detroit and Maynard Jackson, our present president of the Democratic Mayors, Bill McNichols of Denver and Kevin White of Boston, Neil Goldschmidt of Portland and Moon Landrieu of New Orleans—once a mayor, always a mayor—[laughter]—and my very good friend Lee Alexander, who is vice president of the Democratic Mayors, will be president next year, and is past president of the United States Conference of Mayors—these men

were the men who held the eight regional hearings throughout the country in which we received testimony related to our national urban policy.

And I would say, Mr. President, that you have exceeded your pledges to the mayors of America. Your very recent appointments of our good friends and fellow mayors, Secretary Landrieu and Secretary Goldschmidt, reflect a true commitment to urban America in the full implementation of your national urban policy.

Now, I'll admit, Mr. President, that the policy that we formulated and was entered in this document, in which these gentlemen's pictures are also present, was a little, perhaps, exaggerated, and you probably couldn't agree with all of it. But the mayors have instructed me to inform Secretary Landrieu and Secretary Goldschmidt that we fully expect them to effectuate that policy. [*Laughter*] And I know I speak for my fellow Democratic mayors when I commend you and thank you for keeping the pledges and keeping the faith.

And in very concrete terms, the Urban Development Action Grant component of your national urban policy is giving our cities a basic new life in the area where our hugest tax base was in a state of decline. In Milwaukee our original UDAG grant for our downtown shopping mall was based upon an anticipated \$60 million in private investment. And we have already now exceeded over \$100 million as a result of the spinoffs from our UDAG grant, and we're still climbing.

As you mentioned, Mr. President, it is indeed a blue chip investment, in capital investment and in jobs and in tax dollars. We find that for every Federal dollar spent, there's a \$6.10 private investment, and for every UDAG dollar, an additional 10 cents in property tax revenue. And there isn't another Federal program in

existence that has given us these kinds of fiscal tangible results. And I thank you, Mr. President, and I commend you for carrying forward the program.

Thank you.

THE PRESIDENT. As all the Members of the Congress know, and as I know very well and I'm sure all of you realize, we have a very serious conflict, basically between trying to control the Federal budget expenditures, to hold down the deficit, and to help control inflation on the one hand, and to sharply focus direct and expanded benefits when Federal moneys are expended. And this fiscal year 1980 appropriation, which has now been passed through the Congress and through its conference committee, will provide just in the construction area alone 230,000 permanent jobs and 130,000 temporary jobs, in addition to giving people a better life in the communities involved and increasing the hope and the expectation that they can work in harmony, not only with themselves but also with their government. It restores confidence, which I think is very good.

Have the Members of Congress been recognized yet—the individuals? All the Members of Congress here that are not on the stage, would you all stand? I think you really deserve a debt of gratitude.

There are many others, obviously, in the Congress who've been in the forefront of this, and those are here today. There are others who couldn't be here, and there are many others who are now claiming credit for the program—[*laughter*]—which is very good and the highest accolade that the program could have.

But I would like to introduce two people now to make remarks, one from the House and one from the Senate, representing a bipartisan group. Since we do have a majority of Democrats, they happen to be Democrats. [*Laughter*] But I

would like to point out that this is really and genuinely a bipartisan program, and I'm grateful for it.

Pete Williams, the Senator from New Jersey, is chairman of the Subcommittee on Housing and Urban Development. He's been one of those who has helped to initiate the UDAG program and has been in the forefront of housing, urban development long before I became President. I'm very grateful to Pete for not only his help with proposals that I made but also the initiative that he has shown in channeling his own ideas into the administrative process and through Congress, in legislation passed.

I'd like to introduce now, Senator Pete Williams.

SENATOR WILLIAMS. *Thank you very much, Mr. President and Secretary Harris, Secretary Landrieu, Mayor Maier, and my colleague here on the platform, Lud Ashley, and colleagues in the room, ladies and gentlemen:*

Everybody here can be called an ally in urban revitalization. It's, of course, a very, very happy anniversary—second anniversary of UDAG—celebration for all of us.

We remember 2 years ago this week that UDAG became law, signaling a new and exciting initiative in urban revitalization, a new partnership between private enterprise and government, designed to deal with one of the most complex problems our society faces, this kind of partnership, which you, Mr. President, have articulated so well in the urban policy initiatives you have presented to Congress that represents the best hope for our distressed cities. And by cities, we don't mean monolithic institutions; we're talking about people.

Mr. President, I can tell you firsthand how much UDAG does mean to people. Earlier this year, I toured Newark's neighborhood improvement program, a

UDAG project—by the end of next year, will result in the rehabilitation of 1,500 homes.

Newark had become a classic example of the decline—physical and spiritual—of a major city. But my most vivid recollection very recently in Newark is not of rebuilt buildings—and we have a lot of them—but the vividness that comes back to me is being there to observe and to feel, to sense the rebuilding of lives. Resident after resident came to me truly expressing joy. It was an outpouring of gratitude for the help that they have received. And over and over they said that this program meant the difference between continued wretched living or a life in a wholesome, decent, and, to say it again, joyful environment.

So, Mr. President, I extend to you their thanks. They are representative of people throughout our country that have had this opportunity under UDAG, in cities large and small.

So, there is a new sense of revival and progress for communities that have been plagued by economic decline. Mr. President, as you and Secretary Harris worked so hard to get this program underway, your leadership brought us all together. You can be so very proud of its achievements.

And I want to say, looking ahead, when UDAG comes up for reauthorization next year, I look forward to working with you, with Secretary Landrieu, Lud Ashley, to ensure that this vitally important tool remains available to our communities that need it so much.

THE PRESIDENT. I wish everybody could see the expression on Tom Marsaro's face. Tom, raise your hand. Raise your hand, keep it up.

Tom happens to be the young, very competent man who's in charge of the particular project in Newark—and others,

too. And when Pete Williams was describing the effect on the lives of those who live in that reconstituted area of our Nation, it was gratifying to me to see Tom, with genuine pride and gratification, know that he had done a good job. And I thank you and Bob Embry and others, Pat Harris and now Moon Landrieu, who have made this project a success.

The Urban Development Action Grants—I would say, of those four words, the most important word is “action”—we don’t mess around with the applications or the carrying out of those projects once they get to us. And I think that “action” word exemplifies the political life, the congressional leadership of Lud Ashley.

Perhaps the most difficult legislation which has ever faced the Congress, certainly in my lifetime, was the very complicated, comprehensive energy policy that I proposed to the Congress in April of 1977. We hope that we’ll complete it this year. But when the Speaker of the House put together an ad hoc committee, comprised of the leaders of many committees in the House of Representatives, he chose Lud Ashley to head that program. And Lud is more famous, perhaps on a nationwide basis, for having dealt successfully with the energy problem in a very expeditious and effective fashion.

But I think the longest testimony to Lud’s effectiveness is in the area of housing and urban development. He cares about people, and he’s superb in his ability to conceive legislative programs, to get them passed by Congress, to have them financed, and then to make sure that they do apply to improving the life of a human being. And I’m very grateful at this time to introduce to you Lud Ashley.

REPRESENTATIVE ASHLEY. Well, Mr. President, if I had known I would get such an introduction from you, I promise you,

I would have written something down. [Laughter]

I want to take just a moment to say what I feel, which is that President Carter is the first President in the history of the United States that really has had the courage to try to articulate a policy for our cities. And you know that’s true, and I know it’s true. We know why it’s true.

We may as well put it where it is. You know, the reason the Presidents have been a little reluctant to do this is not because they haven’t recognized that cities have problems, it’s because to try to articulate a policy for the cities exposes you and makes you vulnerable, because 4 years hence you can be held accountable to those strategies that you tried to articulate. Well, I kind of like to have a President that will risk that, and we have that President.

I do have to be absolutely honest with you, Mr. President. It’s been my conviction, pretty much since coming to the Congress, that any initiative that comes from the White House is one that in almost every instance can be improved upon by the Congress. You understand that. [Laughter] The marvelous thing about the UDAG program is that that wasn’t so. And don’t think we didn’t look, Mr. President, because we did. [Laughter]

But the reason that it couldn’t be really improved upon is because it does combine what my associates, Pete in particular, has touched upon. You know, it starts off with a partnership concept, predicate, and it insists that there be the kind of 6-to-1 leverage that is the usual. It relies primarily on local initiative, nothing from the Federal Government. Nobody’s out there saying, do this, do that—not at all. So, it’s got the partnership concept, it’s got the local initiative, it’s got that marvelous feature—from the time of application, if successful, to the time that the pick goes

in the ground, is shorter than any program of any government on the face of the Earth. It's absolutely astounding. That was certainly true in Toledo, I'll say that. [Laughter]

But finally—and here again, Pete Williams touched on this—revitalization is something that we all have our ideas about, and that's important. But more important—if possible—more important than the actual rebuilding of a community is the spirit of revitalization—the spirit of revitalization—because that goes on, that's got to live with us day in and day out. When applications are turned down, when they come back the second time, it's got to be the spirit of revitalization and a little knocking on doors and what have you. [Laughter] But it's that spirit of revitalization that I think is absolutely fundamental.

And I say to my people in Toledo, progress doesn't come in quantum leaps. You know, it's got to be regular, it's got to be constant, and, I think, on that basis. And that's why I applaud your administration, because you've given us hope, Mr. President, that we can count on a commitment from the Federal Government, that it won't necessarily come in quantum leaps, but it's going to be there. We can count on it. We can tell our constituents, we can tell our mayors, we can say this Government is committed to the continued progress and revitalization of our cities.

So, thank you, Mr. President. I appreciate it.

MR. WATSON. Thank you. Be seated for just one more moment, please. The President asked me to do something richly deserved, actually two things. I told you this was going to be a celebration. Thank you, Lud Ashley.

I would like for the folks who work in HUD and who specifically comprise the

UDAG staff please to stand in your place so that we can applaud you. [Applause]

I'm also pleased to say that the persons that you just saw stand comprise the total UDAG staff. [Laughter] Believe it or not, it's true.

The other point that the President suggested to me that I make is one also worthy of note. Though we're here really to applaud and to congratulate the Department of Housing and Urban Development, and particular staff within that Department for the program we've here been discussing, the fact of the matter is that, as a result of the President's urban policy announced now a year and a half ago, the administration and the Government at large are engaged in a way unprecedented in assessing the direct and indirect impacts and effects of Government actions on cities and towns all over the country.

There are some people in the room whom I simply want to note by name, because they represent, with respect to their departments, people who are engaged with HUD in this whole urban revitalization, small town economic development effort that we're here to celebrate.

I'm talking about people, in addition to Bob Embry and his staff, such as Larry Simons, the Assistant Secretary for Housing in HUD, Ernie Green, the Assistant Secretary of Labor, Bob Hall, the Assistant Secretary for Economic Development in the Department of Commerce, Barbara Blum, the Deputy Administrator of EPA, Mort Downey, Assistant Secretary at DOT, Alex Mercure, Assistant Secretary of Agriculture for Rural Development, and others. The Department of the Interior, virtually every domestic agency in this Government, through the Interagency Coordinating

Council and through other collaborative efforts, are engaged in this process.

Thank you all very much. We would like to invite you to the State Dining Room for a reception.

Thank you.

NOTE: The President spoke at approximately 2:30 p.m. in the East Room at the White House. Jack H. Watson, Jr., is Assistant to the President for Intergovernmental Affairs.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

October 13

The President met at the White House with David L. Aaron, Deputy Assistant to the President for National Security Affairs.

In response to inquiries on the October 12 House of Representatives gasoline decontrol vote, the White House announced that it has been the President's policy since the beginning of the administration that gasoline ultimately should be decontrolled. The President made a decision earlier this year based upon an assessment of general gasoline and economic conditions that decontrol would not be appropriate at this time. The administration does not support a congressional amendment mandating decontrol of gasoline. The President now has all the authority he needs to take this step when it is appropriate after a review of prevailing economic factors.

October 15

The President met at the White House with:

—Zbigniew Brzezinski, Assistant to the President for National Security Affairs;

—Frank B. Moore, Assistant to the President for Congressional Liaison.

October 17

The President met at the White House with:

—Dr. Brzezinski;

—Vice President Walter F. Mondale, Secretary of Health, Education, and Welfare Patricia R. Harris, Secretary of Housing and Urban Development Moon Landrieu, Secretary of the Interior Cecil D. Andrus, Secretary of Transportation Neil Goldschmidt, James T. McIntyre, Jr., Director of the Office of Management and Budget, Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, and Hamilton Jordan, Assistant to the President, to discuss domestic policies;

—Mr. Moore;

—members of the Pay Advisory Committee;

—Representative and Mrs. James C. Corman of California and Adam Corman;

—Stansfield Turner, Director of Central Intelligence, and Dr. Brzezinski;

—Vice President Mondale.

The President attended a reception for members of the National Minority Purchasing Council, held in the East Room at the White House.

The President transmitted to the Congress the 15th annual report on the Status of the National Wilderness Preservation System and the 1978 report of the National Cancer Advisory Board.

In the evening, the President attended the seventh and final game of the 1979 World Series at Memorial Stadium in Baltimore, Md. At the conclusion of the

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the current market landscape, identify gaps, and determine the target audience. Once a market need is identified, the next step is to develop a concept for the new product. This involves brainstorming ideas, creating a prototype, and testing the concept with potential customers. Once the concept is validated, the next step is to develop a business plan. This involves determining the costs of production, setting a price point, and identifying distribution channels. Finally, the product is launched into the market, and the company monitors sales and customer feedback to make any necessary adjustments.

Administration of Jimmy Carter, 1979

NOMINATIONS—Continued

Submitted October 15—Continued

FRANK A. CAMM, of Virginia, to be an Associate Director of the Federal Emergency Management Agency (new position).

Submitted October 17, 1979

JOAN ZELDES BERNSTEIN, of Maryland, to be General Counsel of the Department of Health, Education, and Welfare, vice Richard I. Beattie, resigned.

CHARLES B. CURTIS, of Maryland, to be a member of the Federal Energy Regulatory Commission for the term of 4 years expiring October 20, 1983 (reappointment).

N. JEROLD COHEN, of Georgia, to be an Assistant General Counsel in the Department of the Treasury (Chief Counsel for the Internal Revenue Service), vice Stuart Evan Seigel, resigned.

FREDERICK A. RODY, JR., of Florida, to be Deputy Administrator of Drug Enforcement, vice Jerry N. Jenson, resigned.

**CHECKLIST OF WHITE HOUSE
PRESS RELEASES**

The following listing contains releases of the White House Press Office which are not included in this issue.

Released October 13, 1979

Advance text: remarks at the Kennedys-King Day dinner

Released October 15, 1979

Advance text: remarks at the annual convention of the National Conference of Catholic Charities in Kansas City, Mo.

Advance text: remarks at a fundraising dinner for Mayor Jane Byrne in Chicago, Ill.

Released October 17, 1979

Fact sheet: Department of Education Organization Act

Released October 18, 1979

Announcement: resignation of Les Francis as deputy to the Chief of Staff of the White House

CHECKLIST—Continued

Released October 18—Continued

Announcement: appointments to the staff of Lloyd N. Cutler, Counsel to the President

Released October 19, 1979

Fact sheet: Urban Development Action Grant program

**ACTS APPROVED BY
THE PRESIDENT**

Approved October 17, 1979

S. 210----- Public Law 96-88
Department of Education Organization Act.

Approved October 19, 1979

S. 817----- Public Law 96-89
An act to amend the Act of July 2, 1940, as amended, to increase the amount authorized to be appropriated for the Canal Zone Biological Area.

H.R. 929----- Private Law 96-6
An act for the relief of Eun Kyung Cho and Hei Kyung Cho.

H.R. 946----- Private Law 96-7
An act for the relief of Maria Estela Sims.

H.R. 1153----- Private Law 96-8
An act for the relief of Nyoman Rahmawati.

H.R. 1163----- Private Law 96-9
An act for the relief of Gladys Venicia Cruz-Sanchez.

H.R. 1486----- Private Law 96-10
An act for the relief of Dang Petersen.

H.R. 1628----- Private Law 96-11
An act for the relief of Susan Katherine Adamski.

H.R. 2098----- Private Law 96-12
An act for the relief of Antonio Rivera Aristizabal.

H.R. 3142----- Private Law 96-13
An act for the relief of Michael Carl Brown.

H.R. 3146----- Private Law 96-14
An act for the relief of Patrick A. and Wayne L. Thomas.

H.R. 3218----- Private Law 96-15
An act for the relief of Rebecca Sevilla DeJesus.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, October 26, 1979

Boston, Massachusetts

*Remarks at Dedication Ceremonies for the
John F. Kennedy Library. October 20, 1979*

*Members and friends of the family of
John F. Kennedy:*

As President of the United States, I'm indeed honored to be here on this occasion, at once so solemn and also so joyous—the dedication of the John F. Kennedy Library. Like a great cathedral, this building was a long time coming. But it more than justifies the wait. Its grace and its dignity are, I hope and believe, worthy of the man whose memory it will nurture.

I never met him, but I know that John Kennedy loved politics, he loved laughter, and when the two came together, he loved that best of all.

For example, in a press conference in March 1962, when the ravages of being President were beginning to show on his face, he was asked this two-part question: "Mr. President, your brother Ted said recently on television that after seeing the cares of office on you, he wasn't sure he would ever be interested in being President." [Laughter] And the questioner continued, "I wonder if you could tell us whether, first, if you had it to do over again, you would work for the Presidency

and, second, whether you can recommend this job to others?" The President replied, "Well, the answer to the first question is yes, and the second is no. I do not recommend it to others—at least for a while." [Laughter]

As you can well see, President Kennedy's wit and also his wisdom—[laughter]—is certainly as relevant today as it was then. [Laughter]

This library, this repository of facts and ideas, will feed history with a permanent record of the dreams of John Fitzgerald Kennedy, and also the realization of those dreams.

In America, the records of a great political leader will not be threatened by succeeding political regimes which might fear them, because we are a nation committed not only to freedom but also to the pursuit of truth.

A library is especially fitting as a tribute to John Kennedy, for he was not only a maker of history but a writer of history as well. His fame as an author of books foretold his fame as an author of events. He said he had few apprehensions about how his Presidency would fare in history, because he planned to write that history himself.

To our loss, we will never read the books that he would have written about

his own Presidency. His death impoverished not only statecraft but literature as well. But in this building behind me, the work of reflection and evaluation of what he did can now be done very well by others.

President Kennedy understood the past and respected its shaping of the future. Yet he was very much a man of his own time. The first President born in this century, he embodied the ideals of a generation as few public figures have ever done in the history of the Earth. He summoned our Nation out of complacency, and he set it on a path of excitement and hope.

The accomplishments of this thousand days, as you well know, are notable, though his Presidency was too short for him to finish all the tasks that he set for himself. We honor him not just for the things he completed but for the things he set in motion, the energies that he released, and the ideas and the ideals which he espoused.

President Kennedy took office understanding that the texture of social and economic life of our Nation and our people was changing, and that our Nation and our people would have to change with it. "Change is the law of life," he once said. "And those who look only to the past or the present are certain to miss the future." He had a vision of how America could meet and master the forces of change that he saw around him.

President Kennedy entered the White House convinced that racial and religious discrimination was morally indefensible. Later, that conviction became a passion for him, a passion that his brother Robert shared and, as his son has so well said, carried forward.

As a southerner, as a Georgian, I saw at first hand how the moral leadership of the Kennedy administration helped to undo the wrongs that grew out of our Nation's

history. Today the problem of human rights in the United States is shifting from inequality of legal rights to inequality of opportunity. But the question of legal rights is not yet settled.

We are all Americans, we are all children of the same God. Racial violence and racial hatred can have no place among us in the South or in the North. The moral imperative of the Kennedy administration, indeed, still remains with us.

President Kennedy sought to move our foreign policy beyond the sterility of the cold war. He never failed to uphold liberty, and he never failed to condemn tyranny; yet he saw very clearly that the threat of nuclear destruction had created the need for mutual accommodation with our potential adversaries. He warned against the nation and a world turned into "a prison in which man awaits his executioner."

When the nuclear test ban treaty was signed in 1963, he voiced the hope—though he dared not yet voice the anticipation or expectation—that there would someday be controls on the numbers and the types of nuclear weapons. Now the SALT II treaty can redeem that hope. Its ratification will be a further fulfillment of the needs of all humanity.

President Kennedy knew that the future of freedom would be increasingly bound up with social, political, and economic justice in what has since become known as the Third World. His one bold expression of this vision was the Peace Corps, which, with its combination of activism, idealism, and adventure, summed up so many of John Kennedy's virtues.

I'm proud that this kind of commitment has now been vigorously renewed and that America once again holds out her hand to the poor, the silenced, and oppressed of every country in the world.

Like every President who hopes to leave the world a better place because he served in it, President Kennedy chafed under the limits of his power to act. These limits on a President still exist. As he put it during his second year in office, "There are greater limitations upon our ability to bring about a favorable result than I had ever imagined." Yet, President Kennedy persisted. He became and he still remains a symbol of human aspiration. Perhaps that's why the outpouring of grief at his death had such a special quality.

On that November day, almost 16 years ago, a terrible moment was frozen in the lives of many of us here. I remember that I climbed down from the seat of a tractor, unhooked a farm trailer, and walked into my warehouse to weigh a load of grain. I was told by a group of farmers that the President had been shot. I went outside, knelt on the steps, and began to pray. In a few minutes, I learned that he had not lived. It was a grievous personal loss—my President. I wept openly for the first time in more than 10 years—for the first time since the day my own father died.

People wept in Boston and in Paris, in Atlanta and in Warsaw, in San Francisco and in New Delhi. More than anyone had realized before that day, the spirit of this young American President had taken hold of the hearts and the imaginations of countless millions of people all over the world.

During the months that followed—in civil rights, in medical care for the aged, in greater dignity for the poor, in an increase of caring for one another—his vision was carried into the reality of our Nation's life with the help of a united Congress and a united people, united in grief, but also united in determination to fulfill the dreams which he had painted for us.

At the time, the tragedy in Dallas

seemed an isolated convulsion of madness. But in retrospect, it appears near the beginning of a time of darkness. From Vietnam to Cambodia, from Los Angeles to Memphis, from Kent State to Watergate, the American spirit suffered under one shock after another, and the confidence of our people was deeply shaken.

The American people are good and strong. We've undertaken a solid commitment to heal those wounds, and at long last the darkness has begun to lift. I believe that America is now ready to meet the challenges of the 1980's with renewed confidence and with renewed spirit.

These challenges, of course, are not the same ones that confronted us a generation ago. The carved desk in the Oval Office which I use is the same as when John F. Kennedy sat behind it, but the problems that land on that desk are quite different.

President Kennedy was right: Change is the law of life. The world of 1980 is as different from what it was in 1960 as the world of 1960 was from that of 1940. Our means of improving the world must also be different.

After a decade of high inflation and growing oil imports, our economic cup no longer overflows. Because of inflation, fiscal restraint has become a matter of simple public duty. We can no longer rely on a rising economic tide to lift the boats of the poorest in our society. We must focus our attention and our care and our love and concern directly on them.

We have a keener appreciation of limits now—the limits of government, limits on the use of military power abroad, the limits of manipulating, without harm to ourselves, a delicate and a balanced natural environment.

We are struggling with a profound transition from a time of abundance to a time of growing scarcity in energy. We're only beginning to learn the new habits

and to utilize the new technologies that will carry us to a future age of clean and renewable energy.

And we face these times when centrifugal forces in our society and in our political system as well—forces of regionalism, forces of ethnicity, of narrow economic interests, of single-issue politics—are testing the resiliency of American pluralism and of our ability to govern. But we can and we will prevail.

The problems are different; the solutions, none of them easy, are also different. But in this age of hard choices and scarce resources, the essence of President Kennedy's message—the appeal for unselfish dedication to the common good—is more urgent than it ever was. The spirit that he evoked—the spirit of sacrifice, of patriotism, of unstinting dedication—is the same spirit that will bring us safely through the adversities that we face today. The overarching purpose of this Nation remains the same—to build a just society in a secure America living at peace with the other nations of the world.

The library that we dedicate today is a symbol, above all, of that unchanging purpose. Through our study here of his words and his deeds, the service of President Kennedy will keep its high place in the hearts of many generations of America to come after us.

This library may be dedicated with the words of a poet from Tennessee, a contemporary of the President whose name the library will bear:

"To those who in all times have sought the truth and have told it in their art or in their living, who died in honor . . .

"To those who died in the high and humble knowledge of God . . .

"(T)o those who died in sorrow, and in kindness, and in bravery; to those who died in violence suddenly . . .

"(T)o those who died in the time of the joy of their strength. . . ." ¹

This library is dedicated to John F. Kennedy, 35th President of the United States of America.

NOTE: The President spoke at 11:25 a.m. outside the library.

Prior to the ceremonies, the President was given a private tour of the library.

Boston, Massachusetts

Question-and-Answer Session With Newspaper and Television Reporters. October 20, 1979

MR. FOELL. Hello, I'm Earl Foell of the Christian Science Monitor. With me today to interview President Jimmy Carter are Tom Ellis of Station WCVB-TV, Channel 5 in Boston, Jim Scott of WBZ, Channel 4, Mary Richardson of WNAC-TV, Channel 7, and Christopher Lydon of WGBH-TV, Channel 2. This program is being taped at Logan Airport on Saturday afternoon for broadcast at this time.

SENATOR EDWARD M. KENNEDY

Mr. President, before we get into the heavyweight questions, I think a lot of viewers are interested to hear what you had to say with Senator Kennedy before and after the ceremony at the opening of the Kennedy Library.

THE PRESIDENT. We have always been friendly toward one another and have conversations about matters before the Senate and also about politics. But today we concentrated mostly on the impact that his brother had—his brothers, as a matter of fact—on our Nation.

¹ Excerpts from James Agee's dedication to his first book of poems, "Permit Me Voyage."

The first thing he did was to tell my wife that the bill on mental health which she has worked 2 or 3 years to accomplish was passed through his committee. That was the business at hand. And then we had about a 35-minute tour of the library itself, looking at John Kennedy's early campaign history, his naval career. They've got a beautiful letter in there from my mother that was written to him on her 70th birthday while she was a Peace Corps volunteer in India, which I appreciated.

And I thought the whole family was extremely gracious, and I believe this is one of the most beautiful sites for the commemoration of a President's memory and to hold the records that I've ever seen. It's a place that uses a large number of visual aids. It's a human sort of environment that people will thoroughly enjoy, and I believe it's a great addition to this community and, of course, to our country.

Mr. FOELL. Tom Ellis.

1980 PRESIDENTIAL CAMPAIGN

Mr. ELLIS. Thank you, Mr. Foell.

Mr. President, first I'd like to welcome you to New England again and thank you for giving us this time to ask a few questions.

There have been some political developments this week of significance, beginning with your good showing in Florida; the announcement by Senator Kennedy's people that they're about to form an organization, which most feel is tantamount to his formal announcement; the endorsement of Senator Kennedy by the Governor of Maine, the first Governor in the Nation to do that. And in view of all of that, plus the earliness of the primaries in New Hampshire and Massachusetts, I'm

wondering how this will affect your own personal timetable.

Can you tell us today that you will be a candidate for reelection?

THE PRESIDENT. I'll be making an announcement on December 4.

I was pleased with this week. The Florida results were very encouraging to us. And it was a pretty hot contest with a lot of secondhand involvement. I didn't go in to campaign, neither did Senator Kennedy, but our surrogates were there, a lot of enthusiasm, a fairly high participation. And I thought the 2-to-1 margin that we achieved was gratifying.

I think the time that I'll spend in the next year on politics will be adequate, but, of course, as President, I won't have time to campaign as I did in 1975 and 1976 when it was an absolutely full-time job for me. But I look forward to it with a great deal of interest and anticipation and confidence.

HEATING OIL SUPPLIES

Mr. ELLIS. One of the pressing issues here in New England—we've already had an early taste of winter—is the subject of number 2 home heating oil. We've heard you give assurances in other parts of the country that we will have adequate supplies of home heating oil this winter. The fellow I buy home heating oil from has been in business for 30 years, and he tells me that because of tight credit, allocations, and the price, quite a few of his customers won't have oil if we get a severe cold spell this winter.

I'm wondering if you can assure us here today in New England that we will have adequate supplies and that the people who can't afford to pay 90 cents a gallon for it will still be reasonably warm this winter.

THE PRESIDENT. Yes. We set two goals for ourselves late in the spring, when home heating oil supplies were very low, quite a bit below last year. The first commitment that I made in Portsmouth, New Hampshire, at a townhall meeting, was that in October we would have 240 million barrels of home heating oil on hand in storage, ready to go to homes throughout the New England area and throughout the country by the end of October. We've already reached that goal.

Last year during a fairly severe winter, we had a total consumption, I think, of 233 million barrels. So, we've got enough home heating oil on hand.

The second commitment I made was to do something about helping families to meet the rapidly increasing cost of home heating oil. We took the initiative, went to the Congress quite early. As you know, OPEC has increased prices 60 percent since last December, and it's been an extraordinary burden on the entire Nation, and it's coming on homeowners in this winter.

We've not yet been able to get the bill through Congress, but we've been pushing it day and night. And I think the arousing of interest on the part of people in New England, particularly, and the rest of the country has caused Congress lately to begin to move. I can make a flat statement predicting—as sure as anything is in politics and government—that there will be a decision made by Congress to support the proposal that we made and that people will have the help for low-income families to meet the needs that are brought about by the increased cost of oil.

We are asking this year for \$1.6 billion to help low-income families, and we are also asking the Congress during the next 10 years to allocate \$2.4 billion per year. And I can assure you that the Congress will act favorably on this legislation.

MR. FOELL. Jim Scott.

MR. SCOTT. Mr. President, a followup to that question.

THE PRESIDENT. Yes.

MR. SCOTT. If the Congress does act favorably and that action is late, say, at the end of winter this year, what will the people do? What happens in the interim?

THE PRESIDENT. Well, there are two different proposals that add up to the 1.6 billion. One is \$400 million, which is being requested under a program that's been in existence ever since I've been in the White House. The first year I was in office, we asked for \$250 million and got it. This money is allotted to families, primarily through the State government structure, Governors having a lot to do with it. That will be expanded from 250 million bucks to 400 million. And in addition to that, we're adding \$1.2 billion more on to that to help the extraordinary price increase this year.

We've asked Congress to expedite the money as much as possible. Our proposal for the long run is to have the money come from the windfall profits tax, the tax on the unearned profits of oil companies, then to be put into reserve fund and used to pay for home heating oil. But since that windfall profits tax might be enacted later than we want to, we are asking the Congress in effect to expend that money out of the regular income tax collections, so that we won't have to wait for the windfall profits tax to go into effect. Later, we'll get the money through the windfall profits tax from the oil companies and repay the money that we borrow from general funds.

But to make sure that the families don't have to wait pending uncertain legislative decisions on the windfall profits tax, we'll go ahead and get that money out of regular funds for use in a timely fashion.

THE NATION'S ECONOMY

MR. SCOTT. Mr. Carter, inflation is the number one concern among many Americans, and apparently you've made it a priority. But how far will you go to curb inflation, and how lasting will your moves be?

THE PRESIDENT. The move is lasting, and I'm not going to back down in fighting inflation. And at my last press conference somebody asked me if I would stick with it even if it cost in political approval of popularity. I will.

I think in the long run our commitment to control inflation, which has been with us more than 10 years now—I'm the fourth President to have to deal with it—is a commitment that cannot be abandoned. We've had a concern that putting pressure to hold inflation down might hurt the poor and the working families of this country, who are the ones who suffer most from inflation itself. So, we focused our attention on very narrowly defined, targeted programs to maintain the employment opportunities for people in spite of our effort to control inflation. And we've been remarkably successful, more than we ever dreamed, as a matter of fact.

In the first 2½ years that I was in office, we added a net increase of 8½ million jobs in spite of very high inflation rates. And in the process, we've also made funds available for home construction, because we did not want the homebuilding industry to take a nosedive. In the past, as inflation and interest rates have gone up, the first ones to suffer were the homebuilders and the construction workers and families that need homes. But we've maintained that homebuilding rate at almost 2 million homes per year, and that rate is still holding up.

Last month, for instance, we built at a rate of 1.88 million homes per year in our country. So, we've held up job opportu-

nities, we've held up homebuilding programs and, therefore, jobs, in spite of heavy inflation pressures.

We're going to stick with the control of inflation by doing some basic things—not wasting money, having tight fiscal policies, making sure that we cut out redtape and regulations from the Government, which holds down inflation. We've been very tight on the number of Federal employees in spite of increased services. We've cut Federal employees about 20,000, and we've tried to maintain throughout the Government a commitment toward holding the budget deficit down. In fact, we've cut the budget deficit almost 60 percent since I've been in office, about \$36 billion. That combination is very difficult to maintain, but so far we've done a good job.

The last thing I want to say on a fairly lengthy answer is that it's a long-time process. We cannot expect immediate reduction of inflation that's been with us for 10 years in spite of OPEC price increases; we can't expect miracles. And the second thing is that the American people are going to have to all do our share. In home heating oil, every homeowner is going to have to conserve energy, do everything they can to keep from wasting energy, which helps them personally, also helps our country.

MR. FOELL. Mary Richardson.

1980 PRESIDENTIAL CAMPAIGN

MS. RICHARDSON. Mr. President, on the subject of a possible Carter-Kennedy contest.

THE PRESIDENT. Yes.

MS. RICHARDSON. Does the fact that you are here with us today, that you have given 1 hour of your time to local television, indicate that you're worried about your political standing in New Hampshire and in Massachusetts?

THE PRESIDENT. No. Chris has traveled with me a lot during 1976 and the campaign—even when my name wasn't even on the public opinion polls, I never was worried. And I was perfectly willing in 1976 to meet any candidate who wanted to run against me, and for a while, earlier than that, we thought that Senator Kennedy might be a very likely prospect. That doesn't bother me at all.

I've always made a practice, when I was Governor or when I was a candidate for President or since I've been in office, to take advantage of every reasonable opportunity to let my views be known to the public. And that's really what I want to do up here is to let the people of New England, who watch this program, know what we're doing about inflation, what we're doing about jobs, what we're doing about home construction, what we're doing about the energy shortage and home heating oil and so forth. And I believe that's the most important aspect of my relationship with you all.

I would hope that the political questions could wait until later, because neither of us are announced candidates, but, of course, the press is preoccupied with the subject and, I think, perhaps even more than the people are.

Last Saturday afternoon, I had a 2-hour telephone call-in show on public radio. I guess I got about 40 questions. There was not a single question about the political contest. The questions were about the things that government might do or not do that affect their lives. So, I think the injection of political questions almost invariably comes from the press, not by me.

MS. RICHARDSON. Of course, Mr. Carter, we are in Kennedy country right now, and there is an obsession with politics in New England, as you know. Being pre-

occupied with it, if I can be for one more question—

THE PRESIDENT. You might.

MS. RICHARDSON.—can you beat Senator Kennedy in Massachusetts in the primary here?

THE PRESIDENT. I wouldn't want to predict that any more than he would be likely to predict that he could beat me in Georgia. I'll do well in Massachusetts, and I think I'll win throughout the country.

I think the Florida results are a fairly good indication. Florida is a cosmopolitan State in that people from all over the Nation move to Florida. And there were just flat predictions by everyone that Dade County, Miami area, would be heavily for Senator Kennedy. We carried the delegates in Dade County almost 2 to 1. And I'm perfectly willing to meet anybody who runs against me.

I'm an incumbent President. I ran against an incumbent Republican when everybody had a chance to run. I won the election. We've got a good record, and I think the people will ultimately decide not on the basis of personal popularity or charisma or speaking ability and so forth, but on the basis of whether or not a President in office, who's a Democrat, who's done an adequate job, to be trusted to lead the country 4 more years.

And I think the opportunity for me to go throughout the Nation and for the Cabinet officers and the Vice President and members of my family and others who are interested and tell the record of what we've done and what we anticipate doing for the next 4 years is an excellent opportunity. It'll be an educational process; it'll give us a chance to learn about problems that we haven't solved and ideas we hadn't thought about, and to realize the programs that are successful and those that are not successful.

So, I don't see the upcoming political campaign as a negative thing at all or one to be feared or one to be dreaded. As I said earlier, I look forward to it with great anticipation and confidence.

MR. FOELL. Chris Lydon.

SENATOR EDWARD M. KENNEDY

MR. LYDON. Mr. President, I have a question about the Kennedy legacy. You spoke at the library dedication of John Kennedy's inspiration in your own life. Some people have always thought you resemble him. I caught a suggestion in your speech that John Kennedy, were he alive, might be closer to the restraint in your own politics than to the expansiveness of his brother Ted.

My question is, is Senator Kennedy, by his name, any more worthy of the Kennedy legacy than you are?

THE PRESIDENT. I don't think so. The family of Presidents is very small. And I have read a lot of history before I became President, certainly during the time I was planning to be President. Since I've been in the White House, I've become a much more avid history student, and I've seen and studied about the decisions that President Kennedy made under the most trying and difficult circumstances—when you're alone, when you have no one to turn to, and that ultimately the question comes to you in the Oval Office on that desk and you have to make a decision, quite often late at night when nobody's there to advise you.

I've also seen, as a President—he was the 35th President; I'm the 39th President—that some of the decisions he made have affected my life as a President very profoundly. I mentioned a few of those in the speech I made today.

So, I feel a political kinship with President Kennedy that's very intense and also

very personal. And obviously the name and the family relationship—blood kin—is a very strong and powerful force in the minds of American people and also certainly in the minds of those who are interested in politics and who will vote in 1980.

But I think as far as political alignment and relationship and the sharing of responsibility for having governed this country in the highest elected office in the land, I feel a very close kinship with President Kennedy also.

MR. LYDON. If I may follow. The point was bluntly stated in Massachusetts politics some years ago to the effect that if his name were Edward Moore, not Edward Moore Kennedy, his candidacy would be a joke. How far would you go in embracing that line with respect to the forthcoming Presidential contest?

THE PRESIDENT. I wouldn't go along with that at all. That was his first political race and he was untested then. My assessment of Senator Kennedy's accomplishments and his ability as a leader is that he's excellent, and this is based not on his relatives or his family position, but on his own record.

I think he's done a good job as a Senator, and he's espoused programs with which I agree. And in most instances, the programs that I have put forward to the Senate for decision, those that were highly publicized, those that were controversial, those that were difficult and on which I took a public position, Senator Kennedy has supported almost without exception.

So, in my own relationship with him and the sharing of opinion on controversial issues and in his performance as a Senator, I think he's built a record that's very good.

There have been some areas where we disagree. I think as far as fiscal prudence is concerned, balancing the budget, hold-

ing down unnecessary spending, being cautious about what kind of new programs we've put forth that are very expensive, we are in sharp disagreement. Senator Kennedy is much more inclined toward the old philosophy of pouring out new programs and new money to meet a social need. He may be right. I disagree with him. I'm much more inclined to try to make existing programs work efficiently and start up new programs only when it's absolutely necessary.

I think in the matter of a commitment to our Nation's defense strength, I would be in favor of much stronger defense commitments than his record shows. And I think with those two exceptions, there is little real incompatibility between us in working for peace, in trying to meet the needs of unfortunate people, and moving to eliminate racial or other discrimination in our society.

I have found a complete ability to work harmoniously with Senator Kennedy. But he's got a record of his own, and I don't think he has to depend on his brother's reputation to give him the stature of a very good leader.

EMPLOYMENT

MR. FOELL. Mr. President, you just mentioned not throwing money at programs.

THE PRESIDENT. Yes.

MR. FOELL. I'd like to double back to your answer to Jim Scott's question for a moment. There seems to be some confusion still as to whether you were including all construction workers in the promise you made to the construction workers in San Diego, and, if so, what dollar figure might be put on the size program you have in mind for them and why this would not be inflationary.

THE PRESIDENT. Well, what we've tried

to do is be firm and resolute in controlling inflation and, at the same time, without wasting money or creating massive spending programs and so forth, to focus the effective Government funding and administration of programs to hold down unemployment to give people jobs.

For instance, when I became President, the unemployment rate among construction workers was between 15 and 20 percent. We added a net increase of a million construction jobs alone, and we cut the unemployment rate among construction workers by 40 percent.

We did this in various ways: local public works projects and Economic Development Administration projects. One of the most successful, for instance, has been the Urban Development Action program, UDAG we call it.

Through this program, we have put in about \$6 billion and we've added over 400,000 jobs. Only one-sixth of that money is Federal money. The other five-sixths comes from private investment. But we've provided the incentive there to rebuild the deteriorating central cities of our country. We have slashed through redtape and government delay. And the Government never initiates these programs. It's initiated by local government and by private investors. They come to us with a proposal on very simple forms. We make a decision on that request within 60 days, and then a small amount of Federal money goes in there, a large amount of local money goes in, mostly from private sources, and people are put to work and people's lives are changed.

Housing programs become better, new facilities are built for the life of a city, transportation, otherwise, and that's the kind of effect we've had. That's one reason why we have such strong support, politically speaking, from the Governors and mayors of this country. We have

made them full partners in the process. So, we've not created jobs in the construction industry by handing people jobs in government; we've created jobs in the construction industry and other ways by letting the private sector of our country, the free enterprise system, be given a free reign absent Federal obstructions and eliminating Federal regulations with just a small amount of taxpayers' money.

That's my philosophy of approach, and that's what I intend to continue. I can't guarantee that nobody will lose a job, whether the inflation rate won't vary at all. But within the constraints of controlling inflation, we will minimize the loss of jobs, as I described to the construction workers.

MR. FOELL. Tom.

NATIONAL DEFENSE

MR. ELLIS. Mr. President, you mentioned defense preparedness, and we hear reports that our military strength is falling below what would be necessary to respond adequately to a military emergency. And in view of the recent squabble we had with Cuba over the presence of Russian combat troops, which seems suddenly to have subsided quite a bit, what do you see as an immediate step that needs to be done to strengthen our Armed Forces? Would it be reinstatement of the draft, an updating of the military?

THE PRESIDENT. Well, first of all, let me say that the military strength of the United States is the greatest of any nation on Earth. And there have been some trends upward by the Soviet Union which have concerned me and have also concerned my predecessors in office and are beginning to concern the Congress as well.

In the last 7 years, for instance—I was looking at some statistics the other day—

Presidents, two Republicans and myself, have made recommendations to increase defense expenditures—\$30 billion in total over 7 years, higher than the Congress has finally approved. I think that that trend has changed. This past year, for instance, that ended on the 1st of October, we had a 3-percent real growth, growth above and beyond the inflation rate. We'll have the same thing for 1980 fiscal year, which just began on the 1st of October.

We've tried again to eliminate waste and overlapping and to plan very carefully to put the defense investment where it will pay the richest dividends, by strengthening NATO, for instance, and getting our allies to come in and do the same thing we are. Those alliances are very important to us, and one American dollar, one American service person can be greatly magnified if we work harmoniously with our allies. We've strengthened the Navy, the Air Force, and now on strategic weapons. We're trying to go into new fields as well.

It's important to point out two other things, and I'll try to be brief. One is that my number one priority above anything else—above inflation, above jobs, above home heating oil, above everything else—is to guarantee the security of this country. That's number one, because we wouldn't have anything if this Nation ever becomes vulnerable to a successful attack or threat or blackmail from a foreign country. And I want to make sure that our Nation's defense commitment is so strong that any nation that might be tempted to test us militarily would realize that they are committing military suicide.

I also want to be sure that the people of this country understand that we are at peace. I'm the first President in 40 years where we haven't had a single American killed in combat in a foreign country. I'd like to go out of office, no

matter how long I serve, with that record intact.

But the best way, the only way, I think, that we can preserve peace is to be strong. And as long as the Nation, ourselves, and our allies and our potential adversaries all know that our Nation is strong militarily and the will to defend ourselves, under those circumstances, we are likely to maintain peace for ourselves, and our allies. If we ever become weak and vulnerable or vacillate or divided from one another, that's when we are likely to have to go to war. And so, I have no apology to make for what we've done to try to strengthen our defense. I'm going to keep it up.

I might say that the percentage of our gross national product, what this country produces, that goes into military is very low, about 5 percent, much lower than it's been in previous years—we're more efficient now—and much lower than the Soviet Union puts in. They put in about 13 percent of their gross national product into defense, but still we're the strongest and we're going to stay that way.

SHIPBUILDING CONTRACTS

MR. ELLIS. This is strictly a local or regional question that involves the General Dynamic Shipyard in Quincy, which has lost several recent shipbuilding contracts to firms from different parts of the country when we understood that they had submitted the low bid.

What is the bidding process? How is it determined who gets that bid? And if the Government were willing to step in, for instance, and come to the aid of the Chrysler Corporation, would it also be willing, do you think, to step into the aid of a business that's important regionally as the General Dynamic Shipyard is to this economy here?

THE PRESIDENT. I have a special feeling for General Dynamics. After the Second World War, as a young naval officer, I was assigned as the only officer to Electric Boat Company then, which later became General Dynamics, to build the first ship our Nation built, a little small anti-submarine submarine. At that time, General Dynamics was building refrigerator bodies for pickup trucks. So, my history of navy yards and my interest is very strong.

I don't want to mislead you. As long as I'm in the White House, I'm not going to let politics, even the hope of getting votes in Boston, affect—or Quincy—affect the decision on contracts on what's best for our whole country. I don't interfere, for political reasons, in which military base is expanded or which one's closed down. There's a tremendous temptation to do that; I'm not going to do it. I made that clear during the campaign. I'm not going to deviate from it.

The decision on contracts at Quincy and other navy yards around the Nation are made on the basis of what's best for our country. Most recently, although Quincy lost a highly publicized contract, I understand that since then, they have gotten one equally as good—that's not quite so highly publicized when they got one. It's important to us to see the shipyards around the Nation be kept viable and open and to keep their labor force relatively intact—they can't be frozen—relatively intact, because if our country is ever threatened or needs to expand rapidly what our Navy is doing or repair our ships rapidly in time of war, we'll need those navy yards to be in operating condition and to have the skilled people there.

The contract decisions about Quincy were not made with any political considerations at all. When they lost a contract,

it was not made on the basis of politics; when they got a contract later on, it was not made on the basis of politics, but what, in the opinion of our responsible defense officials, approved by me, was in the best interest of our country.

MR. FOELL. Do any of you want to follow up on that before we go to Jim? Jim, I guess you're on.

NATIONAL SPIRIT

MR. SCOTT. Mr. President, you said that the number one priority is national security, of course. But how do you ease the minds of the Americans who see their dollar buying less, the ones who can't afford to buy the homes anymore, and the ones who have the general feeling that the rich keep getting richer and the poor keep getting poorer. How do you ease their minds?

THE PRESIDENT. Jim, you know it concerns me that people's minds are not at ease. Mine's not at ease; I have challenges and questions and problems that I have to resolve as best I can. I think we've done a fairly good job so far, and I don't want people to believe, first of all, that controlling inflation is hurting the poor or the aged or the infirm or the unemployed. The people who suffer most from high inflation are the ones who are least able to afford it, the ones who can't change their income or can't move to a different community and who have to buy the necessities of life with a major portion of their total earnings.

Secondly, I don't want those people to feel that an adequate defense commitment is at their own expense. This is an extremely important thing, because in the past, at least, certainly in the Vietnam war, the ones who suffered most were the poor.

If we ever have any reason in the future

to go to a draft system, I'm going to make sure that we do not give special privilege to a young person who's in college because the wealthy can put their kids in college, which they did during the Vietnam war, and the poor people are primarily the ones that go and fight. My oldest son volunteered to go to Vietnam, but most of the discrimination, in my opinion, in the draft in the last combat was against poor people.

The third thing is this: We've had tremendous improvements or increases since I've been in office in helping the life of those who are poor. I've already mentioned employment opportunities that have increased, housing has been extremely high. We've also had commitments made to education. For instance, we have increased, just the first 2 years I was in office, the Federal allocation of funds for education by 60 percent. And I would almost say flatly—there may be a few exceptions—that now if a young person reaches college age, if that person is motivated and is educationally qualified, that young person can go to college because we've expanded those opportunities so greatly.

I think this has got to continue. We have not cheated or deprived or ignored the people who suffer most. We have shifted, however, to an attempt to focus particular programs much more specifically on those who are deprived by letting programs be drafted in the Congress and passed to meet a particular need so that people who don't need these services don't get nearly as much of it as they used to.

So, our country is strong, not only militarily but economically, it's strong politically, and I hope—and I believe that it's strong morally and ethically—that what we stand for is, indeed, an inspiration to other people throughout the world as well as reassuring to our own people.

There need be no fear on the part of anyone in this country that their needs which are presently being met will not be met in the future or that their needs will be ignored. They are an ever-present concern to me, to Senator Kennedy, to other Members of the Congress, and to the American people.

MR. SCOTT. A followup, Mr. President. As you travel about the country and go among the people, are you confident now that they believe in you and believe the things that you just said to me?

THE PRESIDENT. That's hard to say. No, I don't think there is an adequate degree of confidence in the strength of our country. I'm convinced that there is. But as I mentioned this morning in the Kennedy Library dedication, we had a series of things in the last 15 years or more that really shook the confidence of our people in our Nation, in one another, and particularly in government.

The Vietnam war was perhaps the most important single factor. The assassination of John Kennedy and Robert Kennedy, Martin Luther King, Jr., caused people to be deeply concerned about the societal structure in which we live. I would say the Watergate embarrassment and the deposing of an incumbent President caused Americans to doubt the integrity of their own Government.

And as far as the strength of our Nation was concerned, we've always thought that we were right, that our Nation fought noble battles, and we also thought that we would never lose. There are many people who doubt that the Vietnam war was a noble undertaking, and we lost; we didn't succeed in meeting the goals.

So, those kinds of factors, combined with 10 years of inflation and a realization that now we don't have as much to waste as we always thought we did—energy is a notable example—have caused

us to stop and pause and say, "Where do we go next?" But in the going-somewhere-next, we need not be afraid, because in spite of all those problems, our Government has survived; it has a basic integrity that's not going to be changed. We are sensitive about the needs of poor people and those who've been deprived in the past or have felt the rages of discrimination.

In addition to that, among the world of nations, we are reaching out. We've won new friends in the last few years that we never thought we'd get 15 or 20 years ago. Egypt, India, the People's Republic of China, Nigeria have moved toward us and away from the Soviet Union. So, we've been successful there.

And I believe that if we can resolve the energy question, which I think we can, and let people see that it's not an unpleasant experience or a great sacrifice or a permanent inconvenience when we save instead of waste, I think that our Nation can survive this present series of challenges, as we have for the last 200 years. I've got complete confidence in the people of our country and in the strength of our institutions.

MR. FOELL. Mary.

AMERICAN STANDARD OF LIVING

MS. RICHARDSON. Mr. President, you've been talking about inflation. This past week Paul Volcker, the Chairman of the Federal Reserve Board, said that Americans must accept a lower standard of living if the inflation rate is to be controlled. Why should people be asked to accept a lower standard of living? Isn't that the job of government, to control inflation? And how can you ask people who had very little to do with the causes behind inflation to tighten their belts?

THE PRESIDENT. I don't agree with

Paul Volcker. I think I know more about the people of this country than he does. I think I know more about the Nation than he does. And I'm not sure what he meant. In my own experience, in dealing with the people through the press and making an offhand statement, quite often a statement can be taken out of context and distorted from the intention of the speaker's that the speaker had when he made it. This may be the case with Paul.

If he meant that Americans can no longer avoid saving, then I think he's right. If a person measured a standard of living by saying, "I've got to be able to drive 75 miles an hour in a large, fancy, heavy automobile by myself," then he's right. Americans are already beginning to decide we've got to use public transportation when it's available, we ought to have three or four people in a car instead of one, we ought to obey the speed limit, and we're shifting toward smaller and more efficient automobiles. So, in that case he would be right. It depends on what the person thinks is a standard of living.

Let's take another example. I think in people's homes we're talking a lot about the cost of home heating oil. The average family can do more than I can. We're going to provide about \$200 to help poor families pay heating bills during the winter. It'll pay a substantial portion of the increase in cost, but that family can do a lot more than that if they insulate their homes, keep the doors shut, put weatherization on the windows, if they hold their thermostats at a reasonable level. They can save a lot more than I've just described to you with their own actions. And people might say, "Well, I don't want to cut the thermostat down, therefore, my standard of living has been decreased."

So, I believe that the American people have a strength and the resiliency to take

care of these changes in our lives when we do have limits that we didn't have before without lowering the quality of a life. I like to think about families who in the future will walk more and maybe ride bicycles more, maybe stay home more, maybe go on picnics more, or maybe drive a little slower. These kind of things cannot only be enjoyable instead of a pain, but they can also be patriotic at the same time.

So, there are ways to have a good life, even a better life without wasting so much. And if Paul Volcker meant that, I agree with him; otherwise I don't.

TAX CREDITS FOR ENERGY CONSERVATION

Ms. RICHARDSON. You mentioned weatherization, and, of course, here in New England that's very important.

THE PRESIDENT. Yes, it is.

Ms. RICHARDSON. At present there are no Federal programs, there are no incentives for multiunit buildings; in other words, buildings where there are apartments, townhouses. There are plenty of incentives for the homeowner. There are presently a million dwellings in Massachusetts. Half of those are multiunit dwellings, and yet there are no incentives for the owner of an apartment building, say, to begin a weatherization process. Do you have any plans to offer programs in that area?

THE PRESIDENT. Yes, this proposal is in Congress now, and I hope it will pass. As you know, we had to walk before we could run, and a year ago, or 6 months ago, it was almost impossible to get any American citizen, much less the Congress, to agree that we really had an energy problem. But we did last year get tax credits for homeowners to insulate their homes and to get credit for it when they paid their income tax. I think about 9 percent of all the fam-

ilies in the United States took advantage of that opportunity last year.

My guess is that with higher heating oil brought on us by OPEC oil prices, that more families will take advantage of that in 1979 and even more in 1980. But that program should be extended so that renters of multifamily homes would benefit from the weatherization of their apartments. And I think we ought to let that program go forward. I believe the Congress will favorably consider that.

MR. FOELL. Chris.

SUPPORT FROM CONSTITUENCY GROUPS

MR. LYDON. Mr. President, 4 and 5 years ago you and I used to talk at rather great length about who was for you and against you in 1976.

In office, it has seemed that your relations have eroded with a lot of the core constituencies of the Democratic party, including the black leadership, union leadership, Jewish leadership, liberals, environmentalists, and others, particularly against Senator Kennedy in 1980.

What—in political terms that you and I have talked about before—what is the Carter coalition? Or do you think you can win without a constituency coalition, so to speak?

THE PRESIDENT. Chris, first of all, I wouldn't want the viewers of this program to be misled. The fact that you and I discussed this 3 or 4 years ago does not necessarily imply that we agreed 3 or 4 years ago.

MR. LYDON. No. *[Laughter]*

THE PRESIDENT. I would say that we disagreed more than we agreed. And I don't agree with your basic premise now. I don't think we've lost that constituency group or those groups. In some cases, maybe so.

Obviously when a President or a Governor or a mayor is in office, and there are

disappointments by some people, there are programs that don't quite work, or when unforeseen or uncontrollable economic circumstances sweep across a city or a nation, the incumbent officeholder is the one to be blamed, particularly if there's no campaign underway. Then when the campaign takes place, like in Boston, or like it was in Massachusetts a year or two ago, in 1976, the people start saying, "Which one of these two people can I best trust?"

I would say, for instance, in Miami, where we just had a test vote a week or so ago, is a good example. I wouldn't say that it was an accurate mirror of the whole Nation, but there are heavy populations there of Jewish citizens, Hispanics, blacks, as well as others, and we did very well in all those constituency groups in a sharp, highly publicized test of political strength. I can't predict what will happen in the future, but I think that that shows that we've not lost those basic strengths.

And if you remember correctly, in 1976 I would say one of our most significant political victories was in Pennsylvania. All of the labor unions, the leaders and so forth, were for Senator Jackson. But we carried Pennsylvania overwhelmingly, because the workers, members of those unions and others, voted for me.

I think we've got a much better relationship now with the labor leaders and their members than we did during the 1976 campaign. They've gotten to know me; I've gotten to know them. They've seen what we've done. We've got an almost perfect record, I have as President, and my administration, on labor issues, that they've actually been able to observe for the last 2½ years.

So, I wouldn't yield to anyone on the ability to attract those really valuable constituency groups that you named.

ENVIRONMENTAL ISSUES

MR. LYDON. A quick followup. I wasn't talking about sort of the grinding disappointments of everyday life, but, for example, the more articulate disappointment of the environmental groups, with your decision on the Tellico Dam, for example, who felt not just that it was a little disappointment, but they had misjudged your whole emphasis or that you had misled them.

THE PRESIDENT. Last year, among the coalition of environmental groups, I was given the award as the outstanding environmentalist in the Nation. And it was pointed out by them—not by me, but by them—that not since Theodore Roosevelt had there been a President who had done as much to preserve environmental quality and to protect the precious qualities of life of American people. Just a couple of months ago, I was given the Environmentalist of the Year Award by the Florida Coalition of Environmentalists.

On that one decision, I can't say that it attracted the approval of environmentalists. It was a difficult thing for me. I had fought that dam for 2½ years. The Congress had passed approval of that dam over my opposition. They had already attached an amendment to a continuing resolution which I could not veto, perpetuating the Tellico Dam.

I was and am now interested in making sure that the Endangered Species Act is passed, and I believe that we picked up a lot of support that we would not have gotten because of that particular incident. Also, the small endangered fish had been transferred to another place where they are thought by the specialists to be presently protected.

In Alaska, for instance, in spite of congressional intransigence we have taken action, which is going to stand, to protect 115 million acres of valuable land from

exploitation and destruction, perhaps. And I think that our environmental record is very good. I don't have any apology to make about that.

But a President has to make decisions that are close calls and which almost invariably alienate some interest group at that particular time. The totality of a record, though, is one that has to be assessed by a particular interest group, and sometimes I just have to say, well, that interest group will have to be against me. I'm doing what I think is best for this country.

MR. LYDON. Could I sneak in one quick local environmental question? You know we have enormously valuable fishing grounds off the Massachusetts coast on Georges Bank.

THE PRESIDENT. Yes.

MR. LYDON. The Interior Department is still determined to sell oil-drilling leases on October 29 against some public and private suits in the State.

The question is why the Interior Department has not taken more formal notice of the blowout in the Gulf of Mexico and why you, with the environmental sensitivities that you have or have had, have not spoken on that matter specifically.

THE PRESIDENT. If I had to choose between protecting the fisheries industry off Massachusetts or having oil exploration, I would say zero oil exploration. I would protect the fisheries industry, because it's permanent. That's not the choice we have to make. We can have both if it's handled properly.

We have very carefully assessed the regions on the Georges Bank and excluded from any leasing the most valuable areas, and I think Cecil Andrus, the Secretary of Interior, has done a very good job. I haven't studied the maps and the charts—I haven't been out there—but I trust him.

In addition, I believe, if I'm not wrong, that very well respected environmental leaders of Massachusetts have also approved what decision we have made, I believe, including the Members of the Congress, including Senator Tsongas and also Senator Kennedy.

So, I believe that we can have very carefully controlled exploration for oil and at the same time protect the extremely valuable, much more valuable fisheries industry.

U.S. FOREIGN POLICY

MR. FOELL. We've talked about defense, but we haven't talked about foreign policy on a broader scale, Mr. President. Both you and your foreign policy advisers have denied that there's going to be any impeding of your ability to conduct foreign policy because of the early start of the campaign.

THE PRESIDENT. Yes.

MR. FOELL. What incentive does a leader of another country—let's take a PLO leader, for instance—have not to wait until he sees how John Connally might do in the primaries? What incentive does an Israeli leader have not to wait and see how Senator Kennedy does in the primaries? What's to keep them from holding back?

THE PRESIDENT. It would be a mistake to think that our country is the only one that faces election or changes in leadership. This takes place all over the democratic world and sometimes in the totalitarian world as well, and it's a part of the political structure of foreign policy with which we have to live every day.

We have, I think, been successful this first 2½, going on 3 years, in dealing with some problems that were longstanding, and we will not slow down our efforts to spread the beneficent influence of this country and other countries because of a campaign.

Panama, the most difficult political challenge I have ever faced in my life—it was more difficult for me to get the Panama treaty passed and implementation legislation than to be elected President. That had been dragging 14 years. The SALT II treaty, which we signed, that had been dragging 7 years under three Presidents. Mideast peace had been dragging for 30 years, and we finally brought the two major protagonists together in a spirit of harmony and genuine, growing friendship. Opening up Africa to the good influence of our country and on a reciprocal basis, this had been never done before. We've done this in the short time I've been in office.

All those efforts and others will be continued. The strengthening of NATO, the handling of the energy shortages on a worldwide basis, the alleviation of world hunger, the dealing with the difficulties of refugees from Southeast Asia, the maintenance of peace—those kinds of things will continue through any election interval in an undisturbed way. And I might say that the prospective opponents that I might have next year are not the kind of people that would make foreign policy a major issue.

I might say that in 1968, when an incumbent President was challenged, it was because there was a deep philosophical difference between the challengers and the incumbent over whether we should or should not stay in the Vietnam war. And because of that, President Johnson decided not to run for reelection.

We don't have that kind of difference now. There are no major, deep, philosophical differences that divide me from any potential challenger. So, I don't believe that our Nation's movement toward a better influence for our country to be strong and at peace with other countries will be a factor in the upcoming election.

I think that John Connally's statements

are not the kind that would appeal to the American people. I don't think the American people would seriously consider that as a viable approach to the Mideast problem.

MR. FOELL. Tom.

GASOLINE SHORTAGES

MR. ELLIS. Mr. President, you made a statement a few moments ago that 6 months ago, it was hard to get Americans convinced that there was an energy shortage.

THE PRESIDENT. Yes.

MR. ELLIS. The CIA told us this past week that by 1981 or '82, after the recession, we would have another gasoline shortage.

My question is, if we know this far in advance that there's going to be a gasoline shortage, why does there have to be one? And why can't the administration take steps right now to head it off?

THE PRESIDENT. We are taking steps. In the first place, the gasoline shortages that did exist in California first, and then on the east coast, that was the factor that convinced American people that we had to move on energy and also was a great factor in convincing the Congress to move.

We have been trying to get authority to develop a standby rationing plan for gasoline ever since I've been in office. The Congress has not yet acted.

This week, this past week, for the first time, the Senate voted a rationing plan through. And we hope that this coming week, if things go well, that the House will also vote to give me authority to develop a standby rationing plan so that if we do have a serious shortage, we can put it into effect and go for rationing. I hope we won't need it.

If the American people will continue to conserve gasoline with their driving habits and other ways, then we won't have

the gasoline shortage that the CIA predicted. I think we can get by without a gasoline shortage. I can't maintain here or guarantee people that we will never have a localized shortage of gasoline, but we are moving toward that.

The programs that we are putting into existence now through congressional action that will be permanent have as their number one emphasis saving, conservation of energy. The second emphasis is on developing energy supplies in our own country which are permanent, from growing plants and directly from the Sun, for instance. The third emphasis is on utilizing plentiful supplies of other kinds of energy in our country, from shale oil, from coal. And the last part is, of course, to develop more rapidly and more thoroughly and to use more efficiently those common supplies of energy, like oil and natural gas, which we've already known.

We've made good progress in all those ways, and I believe that we will not have any serious gasoline shortages if American people do conserve, if we have a standby rationing plan, and if we do move away from imported oil toward a heavier dependence on our own energy sources.

MR. FOELL. Jim, we have just a few minutes left.

REVEREND JESSE JACKSON

MR. SCOTT. Mr. President, you mentioned the bringing together of the Egyptians and the Israelis after a 30-year conflict.

THE PRESIDENT. Yes.

MR. SCOTT. And now we are seeing Reverend Jesse Jackson going to both areas and talking to these leaders, most especially the PLO leaders. Could this be an embarrassing situation for you? Is it embarrassing for you?

THE PRESIDENT. I can't say that it's embarrassing. The most embarrassing thing that I can think of is for me as a

President of a free nation to try to interfere with the right of an American citizen to travel to a country of his choice and to meet with foreign leaders of his choice. This is a free country, and I don't have any control over Jesse Jackson. And if I tried to constrain him because he's black or because he might talk to some unpopular person, then the next thing that I might want to do is to try to keep Jewish citizens from going to Israel. This is a ridiculous thing to get involved in.

He has a right to go where he chooses, to talk to whom he chooses. The foreign leaders have a right to talk to him. It's not embarrassing to me. And I think the thing that we have to depend on is the sound judgment of the American people ultimately to resolve a controversial issue of this kind. I've met with large numbers of Jewish citizens, large numbers of black citizens; they talk to me very frankly.

Jesse Jackson did not go at my instigation, he did not go to represent me, he does not represent me. I've got myself, the Vice President, the Secretary of State, and Robert Strauss specifically charged with trying to bring about permanent peace in the Mideast, to protect the security of Israel, to let that nation live in peace with its neighbors, and to legitimately solve the rights or to honor the rights of the Palestinian people. I don't need private citizens to negotiate for me, and I don't permit them to. But they have a right to do as they choose as free people, and I would protect that right.

MR. FOELL. Is Mr. Strauss making headway?

THE PRESIDENT. I think so; I believe he's making as much headway as anyone can. But now we are really, for the first time, letting, to a maximum degree, the Egyptians and Israelis negotiate with one another, which is what we wanted from

the beginning. We come in and help when they ask us to.

MR. FOELL. I'm sorry, ladies and gentlemen, but our time is up. Mr. President, thank you for joining us today.

Questioning the President have been Tom Ellis of WCVB-TV, Channel 5 in Boston, Jim Scott of WBZ, Channel 4, Mary Richardson of WNAC, Channel 7, and Christopher Lydon of WGBH, Channel 2. I'm Earl Foell of the Christian Science Monitor. Thank you for joining us.

NOTE: The question-and-answer session began at 12:50 p.m. in the Volpe International Terminal at Logan Airport. It was taped for broadcast on October 21.

The transcript of the interview was released on October 21.

Energy Emergency in Florida

Memorandum From the President.
October 19, 1979

*Memorandum for the Administrator,
Environmental Protection Agency*

Based on a request submitted to me by the Governor of the State of Florida to extend my July 6, 1979 determination that a regional energy emergency continues to exist in the State of Florida of such severity that a temporary suspension of certain air pollution control regulations which apply to fossil-fuel fired electric generating plants under the Florida Air Quality Implementation Plan may be necessary, and that other means of responding to the energy emergency may be inadequate, I hereby extend that determination from October 15, 1979, to and including December 31, 1979. This extension is limited by the same conditions as my July 6, 1979 determination.

If, during the extension, I find that a regional energy emergency no longer

exists in Florida, I will direct that this extension be rescinded, and that all suspension orders issued by the Governor be terminated on the day of that rescission. Please continue to work with State officials to monitor carefully the residual oil supply in Florida and to inform me if the emergency should cease to exist. You will continue to retain full authority to disapprove temporary suspension of regulations in Florida and to exercise your emergency powers authority under Section 303 of the Clean Air Act, when and if necessary. It is important to keep suspensions to an absolute minimum since Section 110(f) of the Clean Air Act limits each suspension to a maximum duration of 120 days.

While my determination permits the temporary suspension of certain emission limiting requirements, it in no way permits the suspension of any national ambient primary or secondary air quality standard. Protection of these national health and welfare protective standards is consistent with Governor Graham's petition, and I commend him for his past restraint in using the authority to suspend some air pollution requirements.

This determination shall be published in the **FEDERAL REGISTER**.

JIMMY CARTER

[Filed with the Office of the Federal Register, 3:08 p.m., October 22, 1979]

NOTE: The memorandum was announced on October 22.

Rock Island Railroad Labor Dispute

*White House Statement on an Agreement.
October 22, 1979*

We are pleased that all parties to the Rock Island labor dispute have reached

agreement. This is another positive step in the process initiated on September 20 to meet the threat of curtailed grain shipments in the Midwest.

We wish to thank both management and labor for their cooperative attitude. Special thanks should also be given to Chairman James Reynolds and Ida Klaus and Nicholas Zumas of the Emergency Board.

NOTE: The press release also included the following information.

On September 20 the President created an Emergency Board to examine the labor dispute between the Rock Island Railroad and its unions, the Brotherhood of Railway, Airline and Steamship Clerks and the United Transportation Union. Today, the Emergency Board reported that agreement among the parties has been reached.

The agreement will have no immediate effect on the Rock Island system, since that system is now being operated by another carrier—the Kansas City Terminal Company—under the directed service order issued on September 26 by the Interstate Commerce Commission. The Commission issued its order after finding that the Rock Island lacked the financial resources required for satisfactory rail performance. The accord announced today will be important, however, should the Rock Island be able to resume operations following the period of directed service.

National Farm-City Week, 1979

Proclamation 4696. October 22, 1979

*By the President of the United States
of America*

A Proclamation

All too often we take for granted the close working relationship between our farms and cities. On this 25th anniversary of National Farm-City Week, we can again reflect with pride on this unique interdependence.

It is a crucial interdependence that requires our constant attention. It determines whether our food and fiber supply will meet the needs of our citizens, our trading partners and our international humanitarian commitments. In short, it determines our future.

National Farm-City Week is a time for our rededication to cooperation, so we as a Nation can successfully meet the challenges that lie before us.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate the period, November 16 through November 22, 1979, as National Farm-City Week.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of October, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

United States-People's Republic of China Trade Relations

Proclamation 4697. October 23, 1979

AGREEMENT ON TRADE RELATIONS BETWEEN THE UNITED STATES OF AMERICA AND THE PEOPLE'S REPUBLIC OF CHINA

By the President of the United States of America

A Proclamation

As President of the United States of America, acting through my representatives, I entered into the negotiation of an agreement on trade relations between

the United States of America and the People's Republic of China with representatives of the People's Republic of China;

The negotiations were conducted in accordance with the requirements of the Trade Act of 1974 (P.L. 93-618, January 3, 1975; 88 Stat. 1978) ("the Act");

An "Agreement on Trade Relations between the United States of America and the People's Republic of China", in English and Chinese, was signed on July 7, 1979, by representatives of the two Governments, and is annexed to this Proclamation;

The Agreement conforms to the requirements relating to bilateral commercial agreements specified in section 405 (b) of the Act;

Article X of the Agreement provides that it shall come into force on the date on which the Contracting Parties have exchanged notifications that each has completed the legal procedures necessary for this purpose; and

Section 405(c) of the Act provides that a bilateral commercial agreement and a proclamation implementing such agreement shall take effect only if approved by the Congress;

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, proclaim as follows:

(1) This Proclamation shall become effective, said Agreement shall enter into force according to its terms, and non-discriminatory treatment shall be extended to the products of the People's Republic of China in accordance with the terms of the said Agreement, on the date on which the Contracting Parties have exchanged notifications that each has completed the legal procedures necessary for this purpose in accordance with Article X of the said Agreement.

(2) General Headnote 3(e) of the

Tariff Schedules of the United States is amended by deleting therefrom "China (any part of which may be under Communist domination or control)" and "Tibet" as of the effective date of this proclamation and a notice thereof shall be published in the FEDERAL REGISTER promptly thereafter.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of October, in the year of our Lord nineteen hundred and seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

AGREEMENT ON TRADE RELATIONS
BETWEEN
THE UNITED STATES OF AMERICA
AND
THE PEOPLE'S REPUBLIC OF CHINA

The Government of the United States of America and the Government of the People's Republic of China;

Acting in the spirit of the Joint Communiqué on the Establishment of Diplomatic Relations between the United States of America and the People's Republic of China;

Desiring to enhance friendship between both peoples;

Wishing to develop further economic and trade relations between both countries on the basis of the principles of equality and mutual benefit as well as nondiscriminatory treatment;

Have agreed as follows:

ARTICLE I

1. The Contracting Parties undertake to adopt all appropriate measures to create the most favorable conditions for strengthening, in all aspects, economic and trade relations between the two

countries so as to promote the continuous, long-term development of trade between the two countries.

2. In order to strive for a balance in their economic interests, the Contracting Parties shall make every effort to foster the mutual expansion of their reciprocal trade and to contribute, each by its own means, to attaining the harmonious development of such trade.

3. Commercial transactions will be effected on the basis of contracts between firms, companies and corporations, and trading organizations of the two countries. They will be concluded on the basis of customary international trade practice and commercial considerations such as price, quality, delivery and terms of payment.

ARTICLE II

1. With a view to establishing their trade relations on a nondiscriminatory basis, the Contracting Parties shall accord each other most-favored-nation treatment with respect to products originating in or destined for the other Contracting Party, i.e., any advantage, favor, privilege, or immunity they grant to like products originating in or destined for any other country or region, in all matters regarding:

(A) Customs duties and charges of all kinds applied to the import, export, re-export or transit of products, including the rules, formalities and procedures for collection of such duties and charges;

(B) Rules, formalities and procedures concerning customs clearance, transit, warehousing and transshipment of imported and exported products;

(C) Taxes and other internal charges levied directly or indirectly on imported or exported products or services;

(D) All laws, regulations and requirements affecting all aspects of internal sale,

purchase, transportation, distribution or use of imported products; and

(E) Administrative formalities for the issuance of import and export licenses.

2. In the event either Contracting Party applies quantitative restrictions to certain products originating in or exported to any third country or region, it shall afford to all like products originating in or exported to the other country treatment which is equitable to that afforded to such third country or region.

3. The Contracting Parties note, and shall take into consideration in the handling of their bilateral trade relations, that, at its current state of economic development, China is a developing country.

4. The principles of Paragraph 1 of this Article will be applied by the Contracting Parties in the same way as they are applied under similar circumstances under any multilateral trade agreement to which either Contracting Party is a party on the date of entry into force of this Agreement.

5. The Contracting Parties agree to reciprocate satisfactorily concessions with regard to trade and services, particularly tariff and non-tariff barriers to trade, during the term of this Agreement.

ARTICLE III

For the purpose of promoting economic and trade relations between their two countries, the Contracting Parties agree to:

A. Accord firms, companies and corporations, and trading organizations of the other Party treatment no less favorable than is afforded to any third country or region;

B. Promote visits by personnel, groups and delegations from economic, trade and industrial circles; encourage commercial exchanges and contacts; and support the holding of fairs, exhibitions and technical seminars in each other's country;

C. Permit and facilitate, subject to their respective laws and regulations and in accordance with physical possibilities, the stationing of representatives, or the establishment of business offices, by firms, companies and corporations, and trading organizations of the other Party in its own territory; and

D. Subject to their respective laws and regulations and physical possibilities, further support trade promotions and improve all conveniences, facilities and related services for the favorable conduct of business activities by firms, companies and corporations, and trading organizations of the two countries, including various facilities in respect of office space and residential housing, telecommunications, visa issuance, internal business travel, customs formalities for entry and re-export of personal effects, office articles and commercial samples, and observance of contracts.

ARTICLE IV

The Contracting Parties affirm that government trade offices contribute importantly to the development of their trade and economic relations. They agree to encourage and support the trade promotion activities of these offices. Each Party undertakes to provide facilities as favorable as possible for the operation of these offices in accordance with their respective physical possibilities.

ARTICLE V

1. Payments for transactions between the United States of America and the People's Republic of China shall either be effected in freely convertible currencies mutually accepted by firms, companies and corporations, and trading organizations of the two countries, or made otherwise in accordance with agreements signed by and between the two parties to

the transaction. Neither Contracting Party may impose restrictions on such payments except in time of declared national emergency.

2. The Contracting Parties agree, in accordance with their respective laws, regulations and procedures, to facilitate the availability of official export credits on the most favorable terms appropriate under the circumstances for transactions in support of economic and technological projects and products between firms, companies and corporations, and trading organizations of the two countries. Such credits will be the subject of separate arrangements by the concerned authorities of the two Contracting Parties.

3. Each Contracting Party shall provide, on the basis of most-favored-nation treatment, and subject to its respective laws and regulations, all necessary facilities for financial, currency and banking transactions by nationals, firms, companies and corporations, and trading organizations of the other Contracting Party on terms as favorable as possible. Such facilities shall include all required authorizations for international payments, remittances and transfers, and uniform application of rates of exchange.

4. Each Contracting Party will look with favor towards participation by financial institutions of the other country in appropriate aspects of banking services related to international trade and financial relations. Each Contracting Party will permit those financial institutions of the other country established in its territory to provide such services on a basis no less favorable than that accorded to financial institutions of other countries.

ARTICLE VI

1. Both Contracting Parties in their trade relations recognize the importance

of effective protection of patents, trademarks and copyrights.

2. Both Contracting Parties agree that on the basis of reciprocity legal or natural persons of either Party may apply for registration of trademarks and acquire exclusive rights thereto in the territory of the other Party in accordance with its laws and regulations.

3. Both Contracting Parties agree that each Party shall seek, under its laws and with due regard to international practice, to ensure to legal or natural persons of the other Party protection of patents and trademarks equivalent to the patent and trademark protection correspondingly accorded by the other Party.

4. Both Contracting Parties shall permit and facilitate enforcement of provisions concerning protection of industrial property in contracts between firms, companies and corporations, and trading organizations of their respective countries, and shall provide means, in accordance with their respective laws, to restrict unfair competition involving unauthorized use of such rights.

5. Both Contracting Parties agree that each Party shall take appropriate measures, under its laws and regulations and with due regard to international practice, to ensure to legal or natural persons of the other Party protection of copyrights equivalent to the copyright protection correspondingly accorded by the other Party.

ARTICLE VII

1. The Contracting Parties shall exchange information on any problems that may arise from their bilateral trade, and shall promptly hold friendly consultations to seek mutually satisfactory solutions to such problems. No action shall be taken by either Contracting Party before such consultations are held.

2. However, if consultations do not result in a mutually satisfactory solution within a reasonable period of time, either Contracting Party may take such measures as it deems appropriate. In an exceptional case where a situation does not admit any delay, either Contracting Party may take preventive or remedial action provisionally, on the condition that consultation shall be effected immediately after taking such action.

3. When either Contracting Party takes measures under this Article, it shall ensure that the general objectives of this Agreement are not prejudiced.

ARTICLE VIII

1. The Contracting Parties encourage the prompt and equitable settlement of any disputes arising from or in relation to contracts between their respective firms, companies and corporations, and trading organizations, through friendly consultations, conciliation or other mutually acceptable means.

2. If such disputes cannot be settled promptly by any one of the above-mentioned means, the parties to the dispute may have recourse to arbitration for settlement in accordance with provisions specified in their contracts or other agreements to submit to arbitration. Such arbitration may be conducted by an arbitration institution in the United States of America, the People's Republic of China, or a third country. The arbitration rules of procedure of the relevant arbitration institution are applicable, and the arbitration rules of the United Nations Commission on International Trade Law recommended by the United Nations, or other international arbitration rules, may also be used where acceptable to the parties to the dispute and to the arbitration institution.

3. Each Contracting Party shall seek to

ensure that arbitration awards are recognized and enforced by their competent authorities where enforcement is sought, in accordance with applicable laws and regulations.

ARTICLE IX

The provisions of this Agreement shall not limit the right of either Contracting Party to take any action for the protection of its security interests.

ARTICLE X

1. This Agreement shall come into force on the date on which the Contracting Parties have exchanged notifications that each has completed the legal procedures necessary for this purpose, and shall remain in force for three years.

2. This Agreement shall be extended for successive terms of three years if neither Contracting Party notifies the other of its intent to terminate this Agreement at least thirty (30) days before the end of a term.

3. If either Contracting Party does not have domestic legal authority to carry out its obligations under this Agreement, either Contracting Party may suspend application of this Agreement, or, with the agreement of the other Contracting Party, any part of this Agreement. In that event, the Parties will seek, to the fullest extent practicable in accordance with domestic law, to minimize unfavorable effects on existing trade relations between the two countries.

4. The Contracting Parties agree to consult at the request of either Contracting Party to review the operation of this Agreement and other relevant aspects of the relations between the two Parties.

In witness whereof, the authorized representatives of the Contracting Parties have signed this Agreement.

Done at Beijing in two original copies this 7th day of July, 1979, in English

and Chinese, both texts being equally authentic.

United States-People's Republic of China Trade Relations

Memorandums From the President.
October 23, 1979

Presidential Determination No. 80-2

Memorandum for the Secretary of State
Subject: Determination under Section 402(c)(2)(A) of the Trade Act of 1974—People's Republic of China

Pursuant to section 402(c)(2)(A) of the Trade Act of 1974 (Public Law 93-618, January 3, 1975; 88 Stat. 1978) ("the Act") I determine that a waiver by Executive order of the application of subsections (a) and (b) of section 402 of the Act with respect to the People's Republic of China will substantially promote the objectives of section 402.

On my behalf, please transmit this determination to the Speaker of the House of Representatives and the President of the Senate.

This determination shall be published in the FEDERAL REGISTER.

Presidential Determination No. 80-3

Memorandum for the Secretary of State
Subject: Determination under Section 405(a) of the Trade Act of 1974—People's Republic of China

Pursuant to the authority vested in me under the Trade Act of 1974 (Public Law 93-618, January 3, 1975; 88 Stat. 1978) ("the Act"), I determine, pursuant to section 405(a) of the Act, that the Agreement on Trade Relations between the United States of America and the People's Republic of China will promote the purposes of the Act and is in the national interest.

On my behalf, please transmit this determination to the Speaker of the House of Representatives and to the President of the Senate.

This determination shall be published in the FEDERAL REGISTER.

United States-People's Republic of China Trade Relations

Letter to the Speaker of the House and the President of the Senate. October 23, 1979

Dear Mr. Speaker: (Dear Mr. President:)

In accordance with section 407 of the Trade Act of 1974, I am transmitting a copy of a proclamation extending non-discriminatory treatment to the products of the People's Republic of China. I also enclose the text of the Agreement on Trade Relations between the United States of America and the People's Republic of China, which was signed on July 7, 1979, and which is included as an annex to the proclamation.

The Agreement on Trade Relations will provide a nondiscriminatory framework for our bilateral trade relations, and thus strengthen both economic and political relations between the United States and the People's Republic of China. Conclusion of this agreement is the most important step

Handwritten text, likely bleed-through from the reverse side of the page. The text is arranged in several paragraphs, with some lines appearing as distinct headings or sub-sections. The handwriting is cursive and somewhat faded.

United States-People's Republic of China Trade Relations

Executive Order 12167. October 23, 1979

WAIVER UNDER THE TRADE ACT OF 1974 WITH RESPECT TO THE PEOPLE'S RE- PUBLIC OF CHINA

By virtue of the authority vested in me as President of the United States of America by section 402(c)(2) of the Trade Act of 1974 (Public Law 93-618, January 3, 1975; 88 Stat. 1978), which continues to apply to the People's Republic of China pursuant to section 402(d), and having made the report to the Congress required by section 402(c)(2), I waive the application of subsections (a) and (b) of section 402 of said Act with respect to the People's Republic of China.

Low-Level Radiation Policy

**Announcement of Administration Initiatives.
October 23, 1979**

The President today announced a series of administration initiatives to deal with the problems of low-level ionizing radiation. His decisions came after a year-long, interagency analysis to consider the need for better public information, guidelines for protection of workers and citizens, research questions, potential compensation issues, and coordination of the Government's programs. The analysis was chaired by HEW and coordinated by the Domestic Policy Staff (DPS) and the Office of Science and Technology Policy (OSTP).

The President approved the establishment of a Radiation Policy Council to advise on broad radiation policy, coordinate Federal activities that use or control the use of radiation, resolve problems of jurisdiction, recommend legislation, ensure effective liaison with States and the Congress, and provide a forum for public input. This Council will be chaired by the Administrator of the Environmental Protection Agency and will include high-level officials from the other relevant agencies. It will have a 4-year sunset provision.

The President reaffirmed the lead role of the Environmental Protection Agency (EPA) in the issuance of guidance for protection from radiation. EPA will work closely with the Food and Drug Administration (FDA), the Nuclear Regulatory Commission (NRC), and other agencies.

The President directed the Office of Management and Budget (OMB) and OSTP to assure, during the preparation of his FY 1981 budget request, a sound research program on the long-term health effects of low-level radiation. The roles of the HEW agencies (the National Institutes of Health (NIH), FDA, and the Center for Disease Control), the Department of Energy, and other agencies in the research program will be decided through the cross-agency budget review.

An Interagency Radiation Research Committee, chaired by the Director of NIH, will review the kinds of research needed and the quality of research in this area supported by the Federal Government.

In addition, a task force, already established to examine criteria for compensation for civilians exposed to unusual radiation hazards, was given the additional assignment of assessing criteria for workers and veterans.

These administration initiatives are expected to improve substantially the Gov-

ernment's programs to protect the American people from unnecessary radiation exposure from medical, occupational, and environmental sources and to enhance public understanding of radiation and radiation protection.

Equal Rights Amendment

Remarks at a White House Reception for Supporters of the Amendment. October 23, 1979

Rosalynn helped me write my speech this afternoon. [Laughter] She said she was going to introduce me and then made my speech for me. [Laughter]

I think all of you can look at the women behind me on the stage and see that the broadest possible support exists for ERA, not only in a peripheral or superficial way but in the deepest possible way.

Lady Bird Johnson, I think, personifies the finest in political service and the enhancement of the beauty of our lives in every possible manner in our country.

Lynda Robb—a politician in her own right, a strong ally of her husband, a forceful leader in her own life, daughter of a great President—understands the sensitivities of America and also the needs of our country, helping to give me advice as chairman of our advisory committee on women's affairs.

Liz Carpenter, a real tough infighter. [Laughter] Ellie Peterson, who pointed out to me that the Republican Party had ERA in their platform 4 years before the Democrats. [Laughter] But this is not a partisan issue. And I would like to remind this group, as Lynda Bird Robb reminded me this afternoon, that I am the seventh consecutive President who has endorsed the ratification and the passage of the equal rights amendment. This is not a transient

thing. It is a permanent, deep commitment of many people, including all of you, and a deep need for our country.

This afternoon, I met with my advisory committee. They had spent all day analyzing 10 States where we have a good opportunity to get the remaining needed States to ratify the equal rights amendment. And we've made a very important decision, which Rosalynn has already mentioned, and that is that in 1980 we are going to ratify the equal rights amendment to the United States Constitution.

This is a human rights issue. As I've told many of you before, some of you before, the first conversation I had with the Ambassador from the Soviet Union, just a get-acquainted session which lasted about an hour, we had a good exchange of ideas and views. And finally we began to talk about basic human rights, because I had made such an issue of the human rights issue itself in my Inaugural address and in my campaign. And his response, which took me aback somewhat, "You don't even have equal rights for women in the United States." Ambassador Dobrynin told me that. It's not the only time he's ever mentioned it. [Laughter] And I believe that this is, to a major degree, an indictment of our country.

This is not an athletic contest to see whether or not the equal rights amendment is ratified. There were those who said a few months ago that the extension of the time available to ratify equal rights was not fair, there was a violation of some dreamed up, unwritten rule.

I don't believe Americans felt that way in the 1860's, when slavery was a major issue in our country. I don't believe any reasonable person said, 7 years after our Nation was founded, "Since we still have slavery after 7 years, let's never change it." And when Susan B. Anthony was seeking the right of women to vote, I don't think

she said, "Since the 7-year deadline passed and women still don't have the right to vote, let's not bring up the issue."

And when Rosa Parks and Martin Luther King, Jr., began to move for equal rights in our country without respect to race, they didn't give up after 7 years of educating the American public about the needs to eliminate the intense and debilitating racial stigma, not just on blacks but on all of us, because there had been legal discrimination still not removed completely from the consciousness of America.

And I believe that 7 years has passed. We've got an extension now, and there's the same identical issue, that is, human rights, applicable to seeking equal rights for women. I'm determined to succeed. We've been waiting long enough for it. 1980 has got to be the year.

We have this afternoon gone through a list of 10 States where equal rights can be ratified by State legislatures in 1980. I think we must go all-out to prevail in these difficult tests of strength.

On the one side: the general populus, a heavy majority of Americans, a heavy majority of Governors, seven Presidents in a row, both parties, a heavy majority in the Congress, people who know what's right and who believe in fairness—dedicated to the ratification of ERA; on the other side: a minority representing no party, not representing a majority of any elected group of people, but basing their stand on intense feelings which they exemplify in every contest, and benefiting from inertia, benefiting from delay, benefiting from confusion, benefiting from rumor, benefiting, quite often, from political timidity, benefiting, however, from a tight, close-knit, well-organized, dedicated, opposition force.

The only way to deal with that kind of opposition is to have a tight, well-knit, well-organized force to present the facts

to the American people and to analyze, State by State, where are the crucial votes? How can we approach the Members of the House and Senate in these 10 States or perhaps a few more? And what can we do to let the people in those States involved know the facts about the equal rights amendment?

We've got to assess the problem. We've got to divide up the responsibility. We've got to organize our own forces effectively. We've got to share information. We've got to put aside the inclination that we all have to find a scapegoat on which to blame a temporary setback. We've got to honor the capabilities of one another. We've got to share information about progress.

And we need never to be deterred. Our course is a proper one; our cause is right. And I predict that next year we will win. I'm determined to do so if you'll help me.

Thank you very much.

NOTE: The President spoke at 6:51 p.m. in the East Room at the White House.

In his remarks, the President referred to Liz Carpenter and Ellie Peterson, honorary cochairs and founders of ERAmerica.

International Human Rights Award

*Remarks on Accepting the Award from the Synagogue Council of America.
October 24, 1979*

First of all, I hope that before all of you leave you'll stop by, and if Ed Sanders¹ will place the acrostic here, I would like for you to know how beautiful it is. And the shofar is symbolically extremely important to me, because there's no doubt that the rest of the world needs to be awakened from its slumber about the im-

¹ Senior Adviser to the President and the Secretary of State.

portance of the preservation of human rights.

This is an honor for me for several reasons—not a personal honor, but an honor to the office I hold and the principles which I espouse as the leader of this country. The fact that the reformed, conservative, and orthodox Jews of our Nation, in complete harmony with one another, have decided to give me this award is extremely significant in itself. I know you represent, under the aegis of worshipping the same God, differences of views, but I think the exemplification which you bring to this ceremony is that the commitment to human rights transcends differences among American people.

I campaigned for this office for 2 years or more, and everywhere I went, with every opportunity I had, I promised that if I was President that I would emphasize, to the highest degree of my ability, our Nation's commitment to human rights. It's one reason that I was elected. When I made my acceptance speech at the Democratic Convention, when I made my Inaugural speech, human rights was a focal point for my basic summary of this Nation's foreign policy.

Human rights takes on a broad range of meanings. And we've had some notable successes in the last 2½ to 3 years: Prison doors have opened to release literally tens of thousands of those who've been incarcerated for years, even decades. We've seen a massive shift in countries around the world and particularly, I think, in this hemisphere toward giving people the basic human right of shaping their own future, of choosing their own leaders, of modifying and establishing the policies of their own government.

We've espoused the cause of human rights in trying to honor the desire of people to be free, to leave the Soviet Union, to escape persecution, to reunite

families, to be able to speak without fear of restraint or punishment.

Increasingly we've extended the helping hand of a highly blessed nation to those who suffer. We've taken a leadership role in helping the refugees from Southeast Asia—and later on today, I'll be making another major announcement and commitment of our country to alleviate the hunger, which is preying so heavily on my own heart and mind, on yours, and on the hearts and minds of people throughout this country.

It has not always been easy, even in this country, to maintain a strong commitment to human rights. As Pat Derian, sitting on the front row, responsible for this position in the State Department, so well knows, there are always delegations who come to me or to her or to Secretary Vance and say, "This particular dictator has been a valuable ally of ours, and when the United States makes a critical remark about political prisoners who are being restrained or in jail or punished or executed, it tends to shake our relationship with that country." We've had to withstand those kinds of pressures, and I believe that in many instances we've been successful in that effort.

Leaders of the business community—I'm sure none of you here—have sent delegations to me with a very forceful political presentation: "How can we possibly disturb our possible sales abroad or our profits abroad by making statements about apartheid or about some other deprivation of human rights?" I hope that our Nation will always stand resolved. And I'm encouraged by your recognition that I, as President, have accurately represented what our Nation is, what we hope to be in the future, and what we expect and demand, as a matter of fact, from nations all over the world.

This has not required any courage on my part, although there have been some

obstacles to overcome, which I've just described, because I know that I have the overwhelming support of the American people for our human rights policy. I hope that in the future it will never be weakened, but further strengthened. And I believe that it is accurate to say that there are very few, if any, national leaders around the world who are not reminded constantly now, because of the American position, that deprivation of human rights not only hurts them in their own country but helps to tear down the esteem and respect and influence and the well-being of their country vis-a-vis the other nations of the world.

It's a constant subject for discussion and attention no matter how the government might be, how totalitarian in its orientation or composition, or how callous they have been in the past toward basic human rights. In spite of the fact that it's a little bit difficult for us in our free Nation, under a democratic government with strong public support, we ought to recognize how extremely difficult it is, how extremely dangerous it is, how much courage is required from those who live under constant oppression to demand, in sometimes a weak and faltering voice, their basic human rights. And I believe that they will be strengthened because of the result of this ceremony.

I accept this with gratitude not because of any accomplishment of my own or courage on my part, because that's not applicable here, but because you have recognized that the President of the United States ought always to withstand any pressure that contravenes the furtherance of our basic commitments, our basic beliefs, our basic principles, our basic obligation to our fellow human beings, our basic obligation to the God we worship.

Thank you very much for honoring me in this way. I'm deeply proud to be with you.

NOTE: The President spoke at 12:01 p.m. in the Rose Garden at the White House.

The President was presented with a citation in the form of an acrostic spelling out his name and a shofar, a ram's-horn trumpet, symbolizing the President's leadership in advancing the cause of human rights.

Aid for Kampucheans

Remarks Announcing Additional Relief Efforts. October 24, 1979

Thirty [37]¹ years ago a holocaust began which was to take the lives of more than 6 million human beings. The world stood by silently in a moral lapse whose enormity still numbs the human mind.

We now face, once again, the threat of avoidable death and avoidable suffering for literally millions of people, and this time we must act swiftly to save the men, women, and children, who are our brothers and sisters in God's family.

Five days ago, the International Committee of the Red Cross and the United Nations Children's Fund appealed jointly for \$111 million in aid to help the millions of Kampucheans, formerly known as Cambodians, who are facing death from starvation during the next 6 months. We must respond to this appeal, and we must also help the related need for food and medicine and shelter for refugees who are fleeing from Kampuchea to Thailand.

Here is what we must do, and this is what we will do: First, as to the Red Cross and United Nations joint appeal, I'm today directing that \$3 million in existing refugee aid funds be made available immediately to UNICEF and to the International Committee of the Red Cross, in addition to the \$2 million that I ordered transferred last week.

¹ Printed in the transcript.

I'm urgently asking the Congress to enact a supplemental Food for Peace appropriation that will make available \$20 million in commodities for use in Kampuchea, subject only to assurances that it will reach its destination, that is, the human beings who are suffering. This is in addition to the \$5 million in food that I pledged for this purpose last week.

Today I'm also directing that \$9 million in U.S. refugee assistance funds go to meet about one-third of the total cost of Thailand's program to help starving refugees who are entering Thailand from Kampuchea. I commend the Thai Government on its decision to admit more refugees. They have already received tens of thousands of them.

Third, I've told Chairman Zablocki in the House and cosponsors that the administration supports their proposal to authorize \$30 million for the next phase of relief in Kampuchea. This would enable us, as a total, to raise our contributions to the continuing program for the alleviation of suffering in Kampuchea as high as \$70 million.

The dimensions of the Kampuchean tragedy are immense, and more aid will almost certainly be needed. And I'm also asking my Commission on World Hunger, headed by Sol Linowitz, to recommend to me the next steps that we must take to meet worldwide hunger needs.

I'm certain that the American people, in addition to their Government, will want to be part of this urgent humanitarian effort. It's absolutely too important to be left to Government alone.

Standing behind me on the platform are representatives of religious and other groups who have already pledged to help in this effort, who've called on me to do what I'm announcing now, and who, I believe, sincerely said that they would match the Government effort.

Several voluntary agencies have been working all along to meet the needs of increasing numbers of refugees, and I call upon all Americans to support this work. I ask specifically that every Saturday and Sunday in the month of November, up until Thanksgiving, be set aside as days for Americans in their synagogues and churches and otherwise to give generously to help alleviate this suffering. I'm confident that Americans' responses will be matched abroad.

Many governments and international voluntary agencies are already coming forward with their pledges. The human family, those of us who have been blessed so highly with food and a relative absence of suffering, must not be found wanting in our response to alleviate this almost unprecedented mass human suffering. If a tragedy of genocidal proportions is to be avoided in Kampuchea, we must all help, both nations and governments and individuals alike.

I would now like to call on Father Theodore Hesburgh, who was the spokesman for the group, representing private entities, churches, synagogues, and others, to say a few words to you, and he and others in this room from government and from the private sector will be glad to answer your questions about this humanitarian effort.

Father Hesburgh.

NOTE: The President spoke at 1:40 p.m. to reporters assembled in the Briefing Room at the White House.

Prior to the President's remarks, he met with religious leaders and representatives of various humanitarian organizations to discuss the situation in Kampuchea. Following his remarks, Rev. Theodore M. Hesburgh, Chairman of the Select Commission on Immigration and Refugee Policy and chairman of the board, Overseas Development Council, and Ambassador Henry D. Owen, Special Representative of the President for International Economic Summits, held a news conference on the President's announcement.

President's Commission for a National Agenda for the Eighties

Executive Order 12168. October 24, 1979

By the authority vested in me as President by the Constitution of the United States of America, and by the Statutes of the United States of America, including the Federal Advisory Committee Act, 5 U.S.C. App. I, and 3 U.S.C. 301, in order to establish an independent forum to recommend for this Nation an Agenda for the Eighties and to recommend approaches for dealing with the major issues which will confront the American people during that decade, it is ordered:

1-1. Establishment and Structure

1-101. There is hereby established the President's Commission for a National Agenda for the Eighties.

1-102. The Commission shall be composed initially of fifty members appointed by the President from among private citizens of the United States. Upon the request of the Commission, the President shall select and appoint no more than fifty additional members.

1-103. The President shall designate the Chairperson of the Commission. The Chairperson, following consultations with Commission members, shall designate no more than fifteen members of the Commission to constitute an Executive Committee.

1-104. The members of the Commission shall not receive compensation for their service on the Commission, but may receive travel expenses, including per diem in lieu of subsistence.

1-2. Functions and Reports

1-201. Under the direction of the Executive Committee, the Commission shall identify and examine the most critical public policy challenges of the 1980's. It shall examine issues related to the capac-

ity for effective Federal governance, the role of private institutions in meeting public needs, and underlying social and economic trends, as these issues bear on our public policy challenges in the 1980's. Areas to be reviewed by the Commission shall include:

(a) underlying trends or developments within our society, such as the changing structure of our economy, the persistence of inflationary forces, demands on our natural environment, and demographic shifts within our population that will shape public choices in the 1980's;

(b) opportunities to enhance social justice and economic well-being for all our people in the 1980's;

(c) the role of private institutions, including the non-profit and voluntary sectors, in meeting basic human needs and aspirations in the future;

(d) defining the role of the public sector, and financing its responsibilities in the 1980's;

(e) impediments to building policy consensus, both within government—the Executive branch, Congress, State and local government—and within the Nation as a whole.

Within this framework, the Commission shall identify the specific issues appropriate for examination.

1-202. The Chairperson of the Commission shall organize the Commission to study and make recommendations on major subject matter areas. This shall include the authority to appoint study panels and their chairpersons.

1-203. The Executive Committee shall coordinate the work and act on behalf of the Commission as necessary.

1-204. The Commission shall make every feasible effort to ensure citizen participation in the development of its Agenda and recommendations. The Commission, in preparing its recommenda-

tions, shall also consult with the Congress and with State and local officials.

1-205. The Commission shall prepare a final report setting forth its recommendations for addressing its Agenda for the Eighties and shall present the report to the President and to the Congress by December 31, 1980.

1-206. The Commission shall terminate on February 15, 1981.

1-3. *Staff and Support*

1-301. The Chairperson of the Commission shall appoint an Executive Director of the Commission.

1-302. To the extent permitted by law, Executive Agencies shall provide funds, facilities, support, services and assistance for the Commission and its subgroups, and such information and advice as the Commission may request.

1-303. Notwithstanding Executive Order 12024, the functions of the President under the Federal Advisory Committee Act (5 U.S.C. App. I), except that of reporting annually to Congress, shall be performed by the Director of the Office of Management and Budget with regard to the Commission and its subgroups. The Director is authorized to further delegate these responsibilities.

JIMMY CARTER

The White House,

President's Commission for a National Agenda for the Eighties

*Announcement on the Establishment of the
Commission. October 24, 1979*

The President signed an Executive order today establishing an independent,

nonpartisan forum to recommend a National Agenda for the Eighties.

The Presidential Commission is a direct outgrowth of the President's extensive discussions at Camp David this summer, when he determined to organize a longer term review of issues of primary priority to the country and developments that will shape them in the decade ahead.

President William McGill of Columbia University was designated Chairman of the Commission and announced that the group would begin immediately its organization planning to launch its work.

Within the framework of its broad mandate, the Commission will identify the specific issues appropriate for examination and designate panels for indepth review and discussion of these subjects. Consultative groups from the Congress and from State and local officials will be asked to exchange ideas regularly with the Commission.

Both in the makeup of the Commission itself and through its inputs from various organizations, the Commission is expected to have access to the broadest possible spectrum of our national views and thinking. The Commission will be composed initially of 50 private citizens appointed by the President. As the Commission defines and organizes its work, the President will select, at the request of the Commission, up to an additional 50 members. A partial initial list of Commission members was announced today.

To ensure the nonpartisan nature of the deliberations, the President has designated that the Commission present its report to the President and to the Congress by December 31, 1980.

The President's Executive order pledged the cooperation of all Federal agencies in the furthering of the Commission's work.

The principal White House liaison for the Commission will be through Hedley Donovan, who became a senior Presidential adviser following his retirement as editor-in-chief of Time Inc. publications. Mr. Donovan worked closely with the President in structuring the Commission, which was formally brought into being with today's Executive order.

The Office of Management and Budget will assume the responsibility for overseeing the Secretariat and providing support for the Commission's work.

John F. Kennedy Center for the Performing Arts

*Appointment of Three Members of the Advisory Committee on the Arts.
October 24, 1979*

The President today announced the appointment of three persons as members of the Advisory Committee on the Arts (John F. Kennedy Center for the Performing Arts). They are:

RALPH HORNBLOWER III, a Washington, D.C., attorney who has studied voice and has sung with the Washington Opera;

G. JOSEPH MINETTI, a Washington, D.C., attorney and former member of the Civil Aeronautics Board;

ANN K. REGAN, of Billings, Mont., a Montana State senator and junior high school teacher.

Friends of Carter/Mondale

*Remarks at a Fundraising Dinner.
October 24, 1979*

The only thing I like better than 4 more years is 5 more years. *[Laughter]*

First of all, I want to thank Fritz Mondale for that introduction and for being

the finest Vice President, perhaps, that ever served this country.

His office is right near mine. There is no meeting which I attend or have ever attended from which he was excluded. He's involved in the most sensitive areas of our Nation's life, in every aspect of our Nation's life. He's a full partner of mine in every sense of the word. And there is nothing that has been described here tonight, very generously by those who've spoken before supper, that I could possibly have done without Fritz Mondale. I don't talk of him very seriously, but I want to say that.

Because of his superb leadership and help, I think I should make a direct statement about my own plans concerning him for the future. Fritz, let me put it this way: I expect you to run for reelection. I expect you to be renominated, and if so, I intend to support you. *[Laughter]* The difference between this commitment and those you may have heard before is that I really mean it. *[Laughter]*

And as you pointed out a little earlier, it is really good to have Bob Strauss on my side this time—and before the convention, even. *[Laughter]*

In the next few weeks, I will make a statement of my own concerning 1980. Tonight I won't say exactly what that statement will be, but I can say this: For all those of you who are my friends, you will not be disappointed. *[Laughter]* Because of a deep sense of propriety, that's all I can say.

Well, as a matter of fact, I can say a couple more things. I asked my Mama. *[Laughter]* For those of you who are waiting with bated breath, she said okay. *[Laughter]* Rosalynn said she would be willing to live in the White House for 4 more years. *[Laughter]* And we have already dropped these hints around a few places in the country, recently in Florida—

[laughter]—and so far, as is proven by this group tonight, the hints have been very well received.

I want to speak to you seriously for a few minutes, and I'll try not to repeat what's already been said. I want to say a little about myself.

Where I come from, going on two centuries now, Democrats have believed in seniority. We've developed in Georgia and in many States of the South, as you well know, a tradition that once you're elected, you get reelected. [Laughter] I inherited this habit. There's no way I can break it—[laughter]—and I'm certainly not going to start next year.

But I don't want to talk about just one person's victory or even the team's victory. I'm here to talk about a Democratic victory, a victory that we Democrats throughout the Nation deserve and we are going to win in 1980. And I want to talk to you about our party as seriously as I know how—what it has been, what it means to me, what it means to you, what it means to our country.

First of all, Fritz Mondale and I are Democrats. We are loyal Democrats. We are lifetime Democrats. Neither of us have ever in our lives voted for anything except Democrats. In 1980 [1976]¹ when there was a Republican incumbent in the White House, we ran for President and won. This has been a very enlightening and a very inspiring and a very gratifying 2½ to 3 years. And since we've been in the White House, in every action that we have taken and every word that we have spoken, we've tried to live up to the highest possible principles and ideals of a Democratic party, as described by Fritz a few minutes ago.

Democrats are not afraid of government, because we know government can

work. Government can be responsive to the people's needs without interfering in an unnecessary way in people's lives. Government can help all people, all Americans, with particular attention to those who need government's help most. Government can inspire people to be better. Government can probe for weaknesses in a system that's already good and make that system better. Government can raise a banner of ideals, commitments, principles. Government can help to paint a picture of a beautiful dream and then inspire the people to work together to realize those dreams. Government can create jobs and expand economic opportunities. Government can lead the country toward peace and prosperity.

So, in times of great challenge and great crisis and great danger to our country, our people have wisely and historically turned to the Democratic Party for leadership of their government. Democrats believe in sharing that authority, that responsibility, and that power with the people. Democrats who are worthy of our party's name don't forget who put us in office.

Democrats are not afraid to face a difficult challenge, and that's where Fritz and I have been, along with many of you, the last 3 years—in the thick of our Nation's most serious challenges, almost all of which we inherited. We have never ducked; we have never hidden. We've fought the hard battles; we've stayed in the arena where, at times, political blood has been shed.

I do not want to read you a list of our accomplishments. The real achievement of the last 33 months, in my opinion, has been something quite fundamental. It's the renewal of a tradition, a tradition of service that has been reestablished now in our Nation in government after 8 years of Republican rule. I don't think I need remind anyone here about the history of

¹ Printed in the transcript.

those 8 years—a time of bloodshed and failure, a time of embarrassment for our country, a time of division and discouragement, a time of despair and alienation.

I think that the tradition which we cherish is now perhaps more alive in the hearts and minds of all Americans than any time in history, at least about which I know. I'd like to look at—just a few minutes—at that tradition.

I believe in hard work; Democrats believe in hard work. I and other Democrats believe that Americans have a right to a job, to support oneself in dignity and with self-respect. Working together during this last 33 months, we have realized that expectation; we've lived up to that tradition; we've helped Americans realize those hopes.

Despite the economic problems and discouragements that we inherited, we live in a country today with the highest level of employment and the highest percentage of its work force employed than any time in history. And that's a record of which Franklin Delano Roosevelt and Harry S. Truman and John Fitzgerald Kennedy and Lyndon Baines Johnson would all have been proud. It is a record that every one of us here can share, because we did it together.

And I particularly want to recognize the Democratic Congress. I'm waiting for the end of this term and the beginning of the campaign year, when the American people and the news media, for a change, will accurately assess what we have proposed, what we've fought for, and what we have achieved. And I believe that there has never been a list of more controversial and difficult proposals made to the Congress than have been made this last 3 years. And I believe that the record will show at the end of this term that even during those halcyon days when Lyndon Johnson, after a time of tragedy, became

President, that there will not have been a better record of White House and Capitol Hill cooperation and achievement for the American people than we have seen during this first 3 years of my term.

There's something else we've been working on. It's been mentioned twice tonight already, but I want to make it clear, because I happen to be the President and I want the words to come from me. For the first time in 40 years, I'm a President that has seen our Nation completely at peace, not a single loss of life, and I thank God for that. And I hope I can leave this office, which you've given to me, with that record still intact.

It is not an accident. I don't take credit for it myself. The American people are deeply committed to peace. But along with that, there has to be peace not just for Americans. We've used our strength and our influence, our national will, our political courage not only to avoid war for ourselves but to pursue fundamental human principles for ourselves, yes, and also for others.

Today, after long years of bloody and bitter warfare, Israel and Egypt are at peace. They are working together because of the United States. Who would have believed this possible 3 years ago? You cannot imagine—or perhaps you can—what a thrill goes through my soul when I see on television Anwar Sadat steaming into the harbor at Haifa in an Egyptian ship, escorted by Israeli ships and planes, American warships standing at a proper distance offshore, and tens of thousands of men, women, and children on the streets to welcome their former enemy with open arms and open hearts and a pledge of friendship, which is so valuable now to them both.

And I believe this period in the search for a permanent peace in the Middle East—it's good not to intrude ourselves

in an unwarranted fashion, but to let the Israeli leaders and to let the Egyptian leaders get to know each other and feel the responsibility on their own shoulders, which they do.

And I really enjoy getting a telephone call from Anwar Sadat after Begin leaves Egypt, and he says, "Mr. President, we got along just fine. You know that Prime Minister has really changed." It's the greatest feeling.

And I think here in our own hemisphere, we've enhanced the spirit of mutual respect and national dignity by implementing the Panama Canal treaties. This was my life's most difficult political effort, with absolutely no immediate political benefit, and there's not a single United States Senator who voted for the Panama Canal treaties who could possibly have expected accolades or one extra vote because of that courageous action. And I've never witnessed in my own lifetime a demonstration of greater political courage than the U.S. Senate showed in the ratification of the Panama Canal treaties and the House recent action in implementing legislation.

It made me proud, because it was a right thing to do, it was a decent thing to do, it was a fair thing to do. And it wasn't entirely an unselfish gesture, because I say flatly to you that the United States will reap rich dividends from this action in the years ahead. We're already doing it. These treaties were, indeed, worthy of the Democratic Party and all it stands for. We really honored the Democratic Party's finest principles.

In Africa, for the first time in the history of our Nation, after 200 years the United States stands boldly and clearly on the side of justice for majority rule, for democracy, for the end of apartheid. There's absolutely no equivocation about where we stand. We don't talk out of both

sides of our mouths. We can be proud of this; we can be proud of this together.

As has been mentioned several times throughout the world, we are now known as the champion of human rights. This is good for others, and it's also good for us. In our battle for basic human rights, we will never yield, and you can depend on that.

And I might add that we've not achieved full human rights here at home. It took us a long time to abolish slavery in this country. It took us even longer to find the generosity in our political system to let women have the right to vote. I think it's time to give women equal rights by ratifying the equal rights amendment, and I hope you'll all help me with that.

We can be proud, too, of the great struggle for SALT II, which will control nuclear weapons, it will enhance our Nation's security, it will contribute to world peace. It took 7 years to negotiate it. This is a goal: nuclear weapons control, strong national security, world peace. It's obviously in the tradition of the Democratic Party.

And I want to make another thing clear. I'm a Navy man, come from Georgia, and I am for a strong defense. My position is clear, and I don't want to make any apology for it. And there may be those who say, "I wish you weren't so strongly for a powerful nation, militarily." I'm just going to take one aside to comment on why. We only spend about 5 percent of our gross national product for defense. In the past we spent much more than that. We do it more efficiently now, more effectively, better coordinated, better spirit. The Soviets spend 13 percent, 14, maybe 15 percent of their gross national product on defense.

We have been at peace. We've mentioned that several times. The only reason that we are at peace is because we have a

strong nation. We are not talking about very destructive weapons. They cause me more concern than anybody in this room—the MX missile, Trident submarines, Trident missiles, cruise missiles. The best investment that we can make is in a weapon which will never be fired in anger, and the best investment we can make is in a soldier who will never die in battle.

And I think so long as our potential adversaries know that we are strong militarily and that we have the courage and the will and the unity to defend ourselves if attacked, our Nation will stay at peace, and that's the only way we can realize all the other aspirations which are so dear to our people. This is a position that the Democratic Party has maintained, and that inherited tradition is extremely important to me and to you.

The true strength of the party over the years has been its unequalled capacity to lead this Nation in times of change. As President Kennedy said—I used this same quote in Boston, Saturday—"Change is the law of life and those who look on it to the past or the present are certain to miss the future." These past 3 years, without timidity, we have plunged head on into the future with courage, with conviction, with confidence.

And today we're engaged, as you know, in a massive, unprecedented enterprise to free our Nation from a very dangerous overdependence on foreign oil. It's the most ambitious peacetime undertaking in our history, as ambitious as the Marshall plan and the space program combined, bigger than the Interstate Highway System, by far.

We'll overcome these and all the other challenges—which I don't have time to mention—but there's no shortcut. It's going to take hard work. It's going to take dedication. It's going to take unity. It's going to take perseverance, and above all,

it's going to require us to tell the American people the truth, never to mislead them, never to raise a false hope, never to lie.

We will continue to meet our Nation's needs in education, in health, in housing, better cities, transportation, agriculture, with efficiency and with carefully managed programs, not with wasteful bureaucracy, not with gimmicks.

We'll look forward in the Democratic Party, not backward. And we'll talk sense to the American people, because I believe they're prepared for it, they demand it. And it makes it doubly sure that Fritz Mondale and Jimmy Carter and all those who work with us will minimize our mistakes if, in the decisionmaking process, the American people, through full knowledge and open debate, have a voice in arriving at those conclusions. I trust the wisdom of the American people just as much as I trust their innate unselfishness and their innate patriotism, in the finest sense of those words.

We are now coming to grips with a 10-year burden of excessive inflation on the American people—fundamental challenge of our time. Recently, we moved boldly down a new road, which I believe will bring rich dividends, and that is to recruit to our side labor and business in a national accord.

In the past the Government has imposed upon the free enterprise system of our country, on the labor unions, business, and others, a mandate. It may have been a good mandate, you may have been able to defend it logically, but now we're working in harmony. We're developing our plans and the way to implement those plans jointly. Labor has a full voice; business has a full voice; the Government has a full voice. We're working to cure inflation as partners, for a change. There is no working man or woman in this country

that can find fault with our administration's policy on labor.

We're backing up this accord and what I've just said by demonstrating needed Government fiscal restraint. This is not a time to waste money; it's not a time to create excessive and unneeded bureaucracies. This is not just an ideology, but it's a simple necessity of our time.

In 1976 when I ran for President, we had a budget deficit of \$66 billion. I've just gotten the figures on this past year—\$26½ billion.

And the last thing I want to say is this: As you may have surmised, I have confidence in America. We can meet the challenges, we can solve the problems, we can answer the question if we are united with a common purpose.

Mine is a complicated and a difficult job, but I enjoy serving in the highest and greatest elective office in the world. And I deeply appreciate the support that you've given me in the past and which you've come tonight to pledge to me in the future. The Presidency can sometimes be a lonely job, but here tonight you've helped to make it a lot less lonely.

As you well know from my fairly brief but, so far, fairly successful political career, I have never feared a political fight, and I can say truthfully to you that I look forward to 1980 with anticipation and confidence. And as I said many times in 1976, when not nearly so many people listened, if I can keep my Mama's permission—[laughter]—I do not intend to lose.

Like all the rest of you in this room, I believe in a strong nation and a good nation, where every person has a better opportunity in life. I believe in a world where people can live with one another in peace and not war. These are not just dreams, but they are permanent agenda for all of us in the Democratic Party. And tonight, here among my friends, I would

like to pledge to you as President, the leader of this Nation, and as the leader of our party that with your help, I will meet that responsibility, my responsibility, to bring this Democratic agenda to completion.

I'm determined to make even greater the greatest nation on Earth.

Thank you very much.

NOTE: The President spoke at 10:15 p.m. in the Yorktown Room at the Hyatt Regency Hotel.

Prior to his remarks, the President attended a reception for Friends of Carter/Mondale in the East Room at the White House.

New Brunswick, New Jersey

*Remarks at a Meeting on Energy Conservation.
October 25, 1979*

When they told me that Congressman Eddie Patten was going to make a speech just 1 minute long, I decided to come and hear it. [Laughter] And I was not disappointed. I can't believe it. I'm sure he's going to finish his speech after I'm gone. [Laughter]

I know all of you weren't here when I arrived at the airport and came down through this beautiful community, and I wish you could have seen the tremendous, friendly reception that I got.

I remember the turning point in Brendan Byrne's campaign. He told me when they waved at him with all five fingers he knew he had it made. [Laughter] That's an actual quote from Brendan. [Laughter] I think he used it all over New Jersey, and I can't think of a more vivid description of a turning point in a political campaign than that one.

I'm here to talk to you about a very serious matter. And you have distinguished leaders on the platform with me who are an integral part of the process of

protecting the interests of our people individually and collectively and also repairing a very serious threat to the very security of our country.

We import now about half of all the oil we use—8½ million barrels a day; next year, \$70 billion worth. And along with oil we import inflation and unemployment. Our inflation rate right now would be 4 percentage points lower if you didn't have to count energy. And if you just take that one factor out—energy—the inflation rate in '79 would be no higher than it was in '78, no higher than it was in '77. You see what a tremendous impact this has had on our country, and it's getting worse, not better, provided we don't act.

The best way to cut imports is not to drill for more oil or to burn more coal or even to use more advanced synthetic fuels. The best way to cut our imports is to save, to stop wasting, to conserve energy. And that's why we're here this afternoon—to talk about a special way to save energy.

There are many ways. And I hope that every family represented here, before you go to bed tonight, will get your family together, from little children 5 years old all the way up to grandparents or even great-grandparents and say, "How can we in our own lives and using our own influence in our homes, to and from jobs, on the job, cut down on the waste of energy, save energy?"

Our country's doing a fairly good job so far. We've got a long way to go. Half the oil that we use in this country is not only imported, but half of it is used in transportation. And obviously the biggest potential saving in oil is in transportation.

I got word, after I took off in Air Force One, today that the Senate Finance Committee has passed the windfall profits tax—much lower tax on the unearned profits of the oil companies than I had wanted or anticipated. And I hope

that with Bill Bradley's good work and others—Pete Williams—that on the floor of the Senate we can restore to the American people what has been lost so far in the Senate Finance Committee in taxing these profits which the oil companies have not earned.

These taxes will be used for several reasons: One is to help the poor families of our Nation pay the rapidly increasing cost of energy. Another one is to improve the quality of transportation, public transportation. And over the next 10 years, we've set aside \$3½ billion for research and development to make sure that we have more efficient transportation vehicles. We can save about 75,000 barrels a day for every mile per gallon that we cut off the gas-burning automobiles. There's a tremendous savings there.

But I want to talk this afternoon, just for a few minutes, about ridesharing—ridesharing. It's not anything complicated; it's carpools, vanpools, subscription buses, public transit, and so forth. This saves fuel. It preserves our environment. It maintains personal mobility, and it helps the income and the standard of living of families simply because they stop wasting the money that they earn.

Over 50 million Americans every day commute to and from work in an automobile by themselves—one passenger. And if you doubt what I say, the next time you take a trip—I'm sure your car will be full—[laughter]—just look at the cars you meet. This is a tremendous waste, 150 million unoccupied spaces for American riders every day—we've only got 220 million people in our country—and that's just the cars going to and from work.

These spaces, if filled, would be just as valuable as drilling a new well to find more oil. So far, about 20 percent of all the commuters share a ride or ride on public transportation, about 20 percent.

If we could just change that 1 percent—and I have no doubt that we can, with the help of people like Brendan Byrne and Tom Bradley—1 percent change in that percentage would save about 175 million gallons of gas per year—175 million. And that would take care of all the transportation in automobiles of New Jersey for 18 days.

And as you can well figure out, if one car is filled and the ride costs are shared, then a person can travel a whole week and tap the family budget for the same thing that it costs per day if one travels alone.

You've already begun some initiatives in New Jersey that are important. Governor Byrne has spoken out forcefully for vanpooling and carsharing. Local governments have already taken action. And Prudential Insurance Company, for instance, has one of the best carsharing programs in the whole Nation. Twenty-three hundred people commute to work each day in 208 vans, under the aegis of Prudential Insurance Company, in the Newark area. Johnson and Johnson has helped, AT&T has helped, Nabisco has helped, Allied Chemical has helped, and others.

This is a difficult thing to do without some high degree of coordination and help from local governments, from the State and the Federal Governments. In the past, we've really had more obstacles to ridesharing than we've had assistance or help for ridesharing programs. And I have started an initiative, encouraged by people like Brendan Byrne and Tom Bradley, to do more at the Federal level. We hope that if we can be successful, we can save as much as half a million barrels of oil per day before this next decade is over.

We'll extend the 10-percent tax investment credit to vanpools. We'll guarantee to multiple-rider vehicles that gasoline will be available if there should be shortages in the future. There will be a high priority

allocation of gasoline to vehicles that have multiple riders. We'll issue an Executive order upgrading the ridesharing efforts for Federal employees.

We're already taking some very controversial steps by charging some Federal employees for parking privileges. In the past they've got free parking privileges in Washington. Space is at a premium, and this encourages, as you can well see, one passenger per car.

In our Department of Transportation, we're trying to move toward special highway lanes for commuter passengers and for public transit vehicles, and this would amount to about \$250 million a year in extra help for these kinds of construction projects in this next decade. And we also anticipate granting interest-free loans for the purchase of vans.

One problem has been that the insurance companies need to reassess automobile insurance charges to make it attractive for a person to have a van or a station wagon or others that are shared by other employees going to and from work. And we'll seek model State laws, because it's very difficult to have adequate vanpooling projects if a city is near a State line, unless there is some standardization of State laws themselves.

We've also organized a National Task Force on Ridesharing, and we have, luckily, the national chairman here with us this afternoon, whom I'll introduce in just a minute. We've got an outstanding young former mayor, Neil Goldschmidt, who is now the Secretary of Transportation. I think in the city of Portland, which he served before he came into my Cabinet recently, has one of the finest energy conservation programs of which I have ever heard. And he will be working intimately with any local official group or private employer group that needs help in evolving and implementing and continuing a good rideshare program.

It's now my pleasure—I want to take two pleasures. One is to thank you for coming and for letting me be a part of this program, although I am passing through your meeting very briefly. The reception that I've received is exhilarating and very gratifying to me. We've got a great and wonderful country that's facing a difficult challenge. And I think that anyone in the Congress or perhaps any of you who try to deal with the problem of evolving a comprehensive energy program, knows that it's been a very slow, tedious, and difficult thing. There have been no accolades coming forth for those who took the initiative. There have been no votes gained. It's been a losing proposition all around politically, but it's the right thing to do.

It requires a great deal of initiative. It requires a great deal of courage. It requires a deal more unity than we've had so far among the people of our Nation. And it requires all of you who are in positions of leadership to make sure that this issue is kept in the forefront, because I tell you, from the bottom of my heart as President, that our Nation's very security is at stake.

You saw what happened this past summer with very slight reductions in oil imports—the near panic that developed around Los Angeles, where Tom Bradley is the mayor, and in some places on the east coast because there was a slight shortage of gasoline. Think what would happen—and God forbid its happening—if we had a total embargo, as heavily dependent as we are on foreign oil. It would be a devastating blow to our country. We have got to have more energy produced in our own country. We've got to have a great saving in the energy that we consume and, therefore, to reduce imports.

Every effort helps, and the effort that we are launching on a nationwide basis

this afternoon, in this courthouse in Middlesex County, in New Brunswick, can have a great beneficial effect in the future—500,000 barrels in saving per day for our Nation if this seed that we plant among you takes root and sprouts and grows. And what you do here and throughout New Jersey can be an inspiration to the rest of the country. I call on you to join in enthusiastically. We'll provide the seed money to help Brendan Byrne and local officials make this a possibility.

I thank you for coming, but I particularly want to express my thanks to Tom Bradley, the great mayor of Los Angeles, whose leadership has really been an inspiration to every other public official in this country, including the President.

Tom Bradley has volunteered to be the national chairman of the ridesharing program, because he sees the potential that can be realized. He sees the difficulty of a sustained effort, but he's the kind of leader, I'm sure, that can bring this effort to fruition and help our Nation in the process and at the same time help every American who participates.

Now I'd like to introduce my friend, Tom Bradley. Tom.

NOTE: The President spoke at 3:25 p.m. in the Jury Assembly Room at the Middlesex County Courthouse Center.

National Task Force on Ridesharing

*Appointment of the Membership.
October 25, 1979*

The President today announced the persons whom he will appoint as members of the National Task Force on Ridesharing. They are:

MAYOR TOM BRADLEY, Los Angeles, Calif. (Chair);
 T. F. BRADSHAW, president, Atlantic Richfield Co., Los Angeles;
 THOMAS W. BRADSHAW, JR., secretary of the North Carolina Department of Transportation;
 ROY COUGHLIN, staff specialist, Southern New England Telephone Co., Hartford, Conn.;
 JACK DERBY, statewide ridesharing coordinator, California Department of Transportation;
 RICHARD H. ERICKSON, manager of safety, health, and security, Hallmark Cards, Kansas City, Mo.;
 GOV. ELLA GRASSO, Connecticut;
 RAY HERZOG, chairman of the board, 3M Company, St. Paul, Minn.;
 DALE W. LUEHRING, general manager, Golden Gate Bridge and Transit District, San Rafael, Calif.;
 JOHN A. MAHONY, manager, office services, Smith Kline Corp., Philadelphia, Pa.;
 LOUIS R. NICKINELLO, State senator, Boston, Mass.;
 CLARENCE SHALLBETTER, project director, Public Service Options, Inc., Minneapolis, Minn.;
 DAVID J. SHERWOOD, president, Prudential Insurance Company, Newark, N.J.;
 RICHARD SOMERVILLE, transportation program coordinator, Texas Medical Center, Houston, Tex.;
 STAN STOKEY, Tennessee Valley Authority;
 JEANNETTE WILLIAMS, city council member, Seattle, Wash.

Hungarian Americans

Statement by the President.
October 25, 1979

I want to take the opportunity of this visit to New Brunswick to salute our many citizens of Hungarian heritage. While retaining strong attachments to their 1,000-year-old homeland, Hungarian Americans have made outstanding contributions to the welfare and the cultural richness of our Nation.

Early this year we commemorated the bicentennial of the death of Col. Michael

Kovats de Fabricy, a hero of our Revolutionary War who died while defending Charleston, South Carolina, from occupation by British forces. Colonel de Fabricy's heroism symbolized the centuries-old devotion of Hungarians to freedom and liberty. Many of us recall vividly the tragic events of 1956 and the spirit that inspired them 23 years ago this week.

Although we continue to have disagreements with the present Hungarian Government over many questions of political freedom and basic human and social values, our relations have improved substantially. One important move in this improvement was the return of the Crown of Saint Stephen to the Hungarian people in January 1978. As a result, the thousand-year-old crown is back in its ancestral homeland, on dignified public display where it can be seen by Hungarians and persons of Hungarian descent from around the world.

East Rutherford, New Jersey

Remarks at a Fundraising Dinner for Democratic State Legislative Candidates.
October 25, 1979

Governor Byrne, Chairman Coffee, distinguished leaders of the State legislature, distinguished Members of your fine congressional delegation, Democrats, and my friends:

It's always a pleasure for me to come back to New Jersey. I like a State like yours: two Democratic Senators, a strong Democratic congressional delegation, a Democratic House, a Democratic Senate, a Democratic Governor, a Democratic President—and you know the proper role for the Republicans to play—that is a minority role. [Laughter] You've got to keep them that way.

And that's not the only reason I'm glad to come back to New Jersey. Somebody told me that Brendan Byrne was passing through this country, and I wanted to be here to meet him—[laughter]—because he's one of the strongest, best leaders I know.

I'd like to remind you of something tonight. I had a prepared speech, but I don't want to make it, because you need to be reminded of a fact. When I first began moving around this country in my campaign for President, I came to New Jersey. I was a lonely candidate; nobody cared about me; nobody thought I had a chance. I traveled in a car with one driver, and I had a chance to learn a lot about this Nation.

At that time—and you think back—New Jersey was a drastically different State. There was a great deal of discouragement in your State. There was a very high unemployment rate. There was very little confidence in government at any level. There was not a spirit of anticipation about the future.

Now it is absolutely different. I have never seen such a startling transition in the tone and quality and the vitality of a State anywhere in this Nation. And I think you all know why—it's because you have a great Democratic Governor in Brendan Byrne, and you have a great Democratic legislature that has backed him to the hilt and taken some very courageous stands.

It has not been easy for him or for the courageous Democratic leaders in the legislature. I came here fairly early in 1977, when Brendan Byrne was running for reelection. Everybody was calling him "One-Term Byrne"—you remember that. But as the people went through that campaign and assessed what had been done and the difficulty and the political conse-

quences of some of his courageous stands, you made the right judgment.

I believe in this country—we have the greatest nation on Earth. And I believe in the Democratic Party, and I'd like to tell you, in a few minutes, why.

The Democratic Party is a party of compassion. We care about people. We don't believe in keeping someone down. We don't believe in giving him a constant hand of help. We believe in helping them to stand on their own feet, to meet their own needs, to live their own life, and to live a life of dignity.

The Democratic Party believes in hard work. I grew up on a farm. I know what it means to work from before sunup till after sundown, day after day, to make a crop during the depression years. And I believe that every American ought to have a right to a job, and the Democratic Party has this commitment, and always has.

You remember the mess that Franklin Roosevelt inherited in the early thirties. He put America back to work. Since I've been in office, in the last 3—almost 3 years, we have added a net increase of 8½ million new jobs in this country, because we believe in work.

It's good for our country to have its people at work, that's true. But it's particularly important to a person, a human being, to be able to do something useful with a precious life, to take whatever talent or ability God might have given that person and use it with pride and with self-confidence and a realization that you're making a contribution to your own family, to your community, and to your Nation.

The Democrats believe in work and the right of Americans to have jobs. The Democrats are concerned about the older people. We believe that they ought to live in dignity and have security in their

[laughter]—and so far, as is proven by this group tonight, the hints have been very well received.

I want to speak to you seriously for a few minutes, and I'll try not to repeat what's already been said. I want to say a little about myself.

Where I come from, going on two centuries now, Democrats have believed in seniority. We've developed in Georgia and in many States of the South, as you well know, a tradition that once you're elected, you get reelected. [Laughter] I inherited this habit. There's no way I can break it—[laughter]—and I'm certainly not going to start next year.

But I don't want to talk about just one person's victory or even the team's victory. I'm here to talk about a Democratic victory, a victory that we Democrats throughout the Nation deserve and we are going to win in 1980. And I want to talk to you about our party as seriously as I know how—what it has been, what it means to me, what it means to you, what it means to our country.

First of all, Fritz Mondale and I are Democrats. We are loyal Democrats. We are lifetime Democrats. Neither of us have ever in our lives voted for anything except Democrats. In 1980 [1976]¹ when there was a Republican incumbent in the White House, we ran for President and won. This has been a very enlightening and a very inspiring and a very gratifying 2½ to 3 years. And since we've been in the White House, in every action that we have taken and every word that we have spoken, we've tried to live up to the highest possible principles and ideals of a Democratic Party, as described by Fritz a few minutes ago.

Democrats are not afraid of government, because we know government can

work. Government can be responsive to the people's needs without interfering in an unnecessary way in people's lives. Government can help all people, all Americans, with particular attention to those who need government's help most. Government can inspire people to be better. Government can probe for weaknesses in a system that's already good and make that system better. Government can raise a banner of ideals, commitments, principles. Government can help to paint a picture of a beautiful dream and then inspire the people to work together to realize those dreams. Government can create jobs and expand economic opportunities. Government can lead the country toward peace and prosperity.

So, in times of great challenge and great crisis and great danger to our country, our people have wisely and historically turned to the Democratic Party for leadership of their government. Democrats believe in sharing that authority, that responsibility, and that power with the people. Democrats who are worthy of our party's name don't forget who put us in office.

Democrats are not afraid to face a difficult challenge, and that's where Fritz and I have been, along with many of you, the last 3 years—in the thick of our Nation's most serious challenges, almost all of which we inherited. We have never ducked; we have never hidden. We've fought the hard battles; we've stayed in the arena where, at times, political blood has been shed.

I do not want to read you a list of our accomplishments. The real achievement of the last 33 months, in my opinion, has been something quite fundamental. It's the renewal of a tradition, a tradition of service that has been reestablished now in our Nation in government after 8 years of Republican rule. I don't think I need remind anyone here about the history of

¹ Printed in the transcript.

those 8 years—a time of bloodshed and failure, a time of embarrassment for our country, a time of division and discouragement, a time of despair and alienation.

I think that the tradition which we cherish is now perhaps more alive in the hearts and minds of all Americans than any time in history, at least about which I know. I'd like to look at—just a few minutes—at that tradition.

I believe in hard work; Democrats believe in hard work. I and other Democrats believe that Americans have a right to a job, to support oneself in dignity and with self-respect. Working together during this last 33 months, we have realized that expectation; we've lived up to that tradition; we've helped Americans realize those hopes.

Despite the economic problems and discouragements that we inherited, we live in a country today with the highest level of employment and the highest percentage of its work force employed than any time in history. And that's a record of which Franklin Delano Roosevelt and Harry S. Truman and John Fitzgerald Kennedy and Lyndon Baines Johnson would all have been proud. It is a record that every one of us here can share, because we did it together.

And I particularly want to recognize the Democratic Congress. I'm waiting for the end of this term and the beginning of the campaign year, when the American people and the news media, for a change, will accurately assess what we have proposed, what we've fought for, and what we have achieved. And I believe that there has never been a list of more controversial and difficult proposals made to the Congress than have been made this last 3 years. And I believe that the record will show at the end of this term that even during those halcyon days when Lyndon Johnson, after a time of tragedy, became

President, that there will not have been a better record of White House and Capitol Hill cooperation and achievement for the American people than we have seen during this first 3 years of my term.

There's something else we've been working on. It's been mentioned twice tonight already, but I want to make it clear, because I happen to be the President and I want the words to come from me. For the first time in 40 years, I'm a President that has seen our Nation completely at peace, not a single loss of life, and I thank God for that. And I hope I can leave this office, which you've given to me, with that record still intact.

It is not an accident. I don't take credit for it myself. The American people are deeply committed to peace. But along with that, there has to be peace not just for Americans. We've used our strength and our influence, our national will, our political courage not only to avoid war for ourselves but to pursue fundamental human principles for ourselves, yes, and also for others.

Today, after long years of bloody and bitter warfare, Israel and Egypt are at peace. They are working together because of the United States. Who would have believed this possible 3 years ago? You cannot imagine—or perhaps you can—what a thrill goes through my soul when I see on television Anwar Sadat steaming into the harbor at Haifa in an Egyptian ship, escorted by Israeli ships and planes, American warships standing at a proper distance offshore, and tens of thousands of men, women, and children on the streets to welcome their former enemy with open arms and open hearts and a pledge of friendship, which is so valuable now to them both.

And I believe this period in the search for a permanent peace in the Middle East—it's good not to intrude ourselves

lives, and that's what we've had to accomplish in this last 3 years.

When I was campaigning around this country, a constant question was: "What are you going to do about social security? It's on the verge of bankruptcy." It was. It's now been put into a secure status.

The Democrats believe in a strong nation, a strong defense. We believe that our Nation ought to be at peace. I'm the first President in 40 years who hasn't had a single American killed in combat overseas. I want to keep that record intact.

The reason for it is that our country has been strong, and our country must be strong to stay at peace. If we ever get weak in military strength or in the will or resolve or unity that comprises a nation's strength, that's when we'll be vulnerable to an attack by a potential adversary, and that's when our young people will be losing their lives in war. We must stay strong, and I believe in a strong defense, and the Democratic Party does. And we're going to keep it that way.

Another thing the Democratic Party believes in is harmony. Think back in the history of our country. This is a nation and you are a State of immigrants—you might even use the word "refugees." One of the great potential strengths of our country has always been that different people from all over the world come here with their own pride in their heritage, their own pride in their habits and beliefs, and still preserve those precious things in our lives, but still blend together without losing their individuality to become a strong, united nation. And the Democratic Party has always opened its arms to everyone who comes here.

The first few days or the first few weeks or the first few years a person is in this country, which party has always said, "Come and be a part of a political system of a great nation. Come and realize your

right to choose your own leaders, to shape your own government, to preserve your own freedom, and to determine your own destiny?" The Democratic Party has.

And the last thing I'd like to mention is this: The Democratic Party does not believe in waste. We believe not only in a compassionate government and a confident government, we also believe in a competent government.

Now, you can have better services delivered to people not when you establish massive spending programs that are not well run and not sensitive to the needs of the people they're serving, but wasteful. And one of the things about Democrats is that we have the kind of relationship with those who need the services of government, so we understand how well those services are being provided.

In the Republican Party there's a tremendous chasm that exists between Washington on the one hand and the people who need help on the other: a local government, a county, a city, a housing project, a family, an unemployed person. There's a big chasm if a callous party supported by big shots is in office. But the Democrats have always felt a relationship, and they've been able to consult and communicate and assess what government is doing to make sure that it is efficient and effective. We do not waste money.

Next year our country will have the benefits of \$40 billion in reduced taxes. At this moment, we have fewer Federal employees than we had when I became President. At the end of the next year, we'll have 20,000 fewer Federal employees than when I became President. We've had a tremendous improvement in housing, in education, in transportation, in every element of American life.

We've tried to cut down the Federal deficit. When I was running here in 1976, the deficit was \$66 billion. I just got the

report for this past year, that was completed the end of September—we've cut it from a \$66 billion down to a \$27 billion deficit already, and we're still on our way to making sure that in the future we have a balanced budget for our Federal Government. That's not a callous thing, that's a good thing for all Americans.

The last thing that I'd like to say to you is this: We need a nation with confidence in one another, confidence in our neighbors, confidence in our institutions, our churches, our schools, confidence in our Government.

A government leader can't always do what you like, but you have got to have confidence in the system of government in this country. And I know that we've had a lot of things happen to us during the 8 years before I became President that shook the confidence of America in our own government, things of which we were ashamed, unprecedented failures in government. Those times are gone.

We've still got problems. We've still got challenges. We've still got questions to be answered, but we can solve problems together. We can overcome obstacles and challenges together. We can answer difficult questions together, but there's got to be a sense of participation.

And I hope that every one of you tonight who have contributed your money—I hope you'll contribute more in the future—will also contribute your time in this next 12 days, because it would be a devastating blow to New Jersey if, through overconfidence or lack of concern about your own lives and your own government and your own State, you didn't participate to the fullest degree in making sure that Brendan Byrne still has for the next 2 years a strong Democratic General Assembly in New Jersey to back him, to make a great State even greater in the future.

I'm proud of New Jersey, because you're my State, too. I'm proud of this country. I'm proud of the Democratic Party. But working together with unity, we can make everything of which we're proud even better. You're my partners; I'm proud of you.

God bless every one of you.

NOTE: The President spoke at 6:47 p.m. in the East Room at the Stadium Club, Giants Stadium. In his opening remarks, he referred to Richard Coffee, chairman of the New Jersey State Democratic Party.

Prior to his remarks, the President attended a private reception for New Jersey State legislative candidates in the Pegasus Room at the Stadium Club.

East Rutherford, New Jersey

*Interview With Dick Leone of WNET-TV.
October 25, 1979*

MR. LEONE. Good evening, I'm Dick Leone.

We want to welcome President Carter to New Jersey. In a little while he will speak at a fundraising dinner here at the Meadowlands Sports Complex.

HOUSING FINANCING AND CONSTRUCTION

President Carter, earlier this week a couple of friends of mine, actually a young couple, told me that after months of looking for a new house, they had to give up the search, because there's no mortgage money. And in talking to bankers in the area, I find that's generally true, with the high interest rates. What kind of hope can you hold out to people like that?

THE PRESIDENT. Well, of course, the best hope is that we'll get the inflation rate coming down, which I think will happen before the end of this year, and therefore, interest rates can go down.

We've had good luck throughout the country, Dick, and we are now making an assessment among the different communities around the Nation to see where mortgage money is short.

Up through the end of September, we had not experienced at all a reduction in new home starts, because the figures then were 1.9 million homes per year were still being built at an annual rate. We've sustained, in spite of high interest rates, so far, almost 2 million homes being built in our country per year, which is near the alltime record, and we've been very proud of this.

But Bill Miller, who's the Secretary of the Treasury, is now making a survey throughout the Nation to see where mortgage money might be scarce, and the Home Loan Bank Board is very concerned about the possible consequences of this.

So far, we've been able to reduce the unemployment rate among construction workers by more than 40 percent since I've been in office by focusing the attention of the Government to work with private sector interests to keep the construction business going well. We are concerned about this, but so far we've held up pretty well.

INFLATION AND ENERGY

MR. LEONE. I guess the more general economic question is, has the Fed gone too far in recent days in raising reserve requirements and forcing interest rates up to historically unprecedented highs?

THE PRESIDENT. That's always a question. I think the number one threat to our country, economically speaking, though is inflation. We've tried to approach it at a multiple level, that is, different ways at the same time.

As you well know, I don't have any

control over the Fed, none at all. It's carefully isolated from any influence by the President or the Congress. This has been done for many generations, and I think it's a wise thing to do.

We've tried to hold down Government spending. We've cut the budget deficit considerably since I've been in office. We just got the figures for last year, for instance, and the deficit has been dropped down to \$27 billion. It was \$66 billion when I was running for President in 1976.

We've tried to approach the key cause of inflation after many years of delay, that is, the unnecessary and excessive importing of foreign oil. Energy is the main driving force in the high inflation rate now. As a matter of fact, energy alone, not counting anything else, adds 4 percentage points to the inflation rate and, therefore, indirectly, 4 percentage points onto the interest rates. As a matter of fact, if it were not for energy, which has been jacked up in price by OPEC because we import so much oil, our inflation rate this summer would be the same as it was in 1978, same as it was in 1977.

The Congress is approaching the end of their consideration of a package of legislation that, I believe, will be successful in the long run in cutting down our excessive oil imports. Next year we'll spend \$70 billion on foreign oil. And we not only import a lot of foreign oil, but we also import inflation, which I've already mentioned, and also unemployment.

This is a long-overdue thing. It's been one of the most difficult political battles I've ever been in. But if the American people will conserve, save all they can, and we can shift toward supplies of oil and natural gas and coal that we already know about in our own country, and develop new sources of energy, like solar energy, for instance, I think in the future we'll see a much more stable economy and

a much greater contribution to our Nation's security, because we won't be dependent on uncertain foreign sources of oil.

WINDFALL PROFITS TAX

MR. LEONE. In this part of the country, in the New Jersey, New York area, about 78 percent of all the energy is oil, and it's nearly all imported. So, I think people are aware of the pressures. On the other hand, while they recognize that OPEC is no friend of ours, they're more incensed than anything, I think, over the oil company profits which have, in the last week, been announced at over 100-percent increases for many of the largest companies. And I think they tend to say, "Why isn't the President doing something about those profits?"

THE PRESIDENT. Well, we've had a proposal to the Congress for more than 2½ years, up in April of 1977, to put a tax on the oil companies, to take back part of the unearned profits that they've received, and turn that money over to the general public. We call it the windfall profits tax. And I believe that this year you'll see the Congress pass a windfall profits tax, if the people's voice can remain strong.

The House has already passed the windfall profits tax basically as we proposed it. The Senate Finance Committee has not passed an adequate windfall profits tax. It will now go to the Senate floor. I think it's accurate to say that Senator Pete Williams and Senator Bill Bradley from New Jersey are strongly in support of a good energy package, including the windfall profits tax.

When that is done, we'll cut down tremendously on the amount of profits that the oil companies will keep—roughly \$270 billion over the next 10 years—and that money can be used to help poor people pay the increasing cost of energy in their own

homes, to develop better forms of transportation, including public transportation, and develop synthetic fuels and other energy supplies in our own country. If that profits tax does not pass, then the oil companies would keep those profits.

I might point out that a lot of the profits that are shown by the oil companies is earned overseas. And if the Congress doesn't pass an adequate windfall profits tax, then we would have to take other steps to make sure that the oil companies don't profit off of the increased prices of energy.

But I think if we can get the windfall profits tax, we'll have a good, sound energy program. We'll leave the oil companies with enough money to explore for new supplies of oil and natural gas in our own Nation. And we'll have great benefits to the poor people, to those who want better transportation, and those who want to see our country using energy derived from the United States.

But the windfall profits tax is the key to it. And I can predict to you, I believe, on this program, that it will pass the Congress in a satisfactory fashion this year, because the American people have finally become aroused about it.

HOME HEATING OIL

MR. LEONE. Let me ask you about a related prediction. The price of home heating oil is almost a dollar a gallon now in this area. There's a lot of concern about whether it'll be available. New York and Connecticut have passed laws already to help the poor pay for it; it's under discussion in New Jersey. I know that when you were in New Hampshire recently, you made a pledge that there would be enough heating oil to get them through. Can we get a similar kind of commitment here in this part of the country?

THE PRESIDENT. Late in the spring, early in the summer—I've forgotten the exact date—I made two promises to the people of New England, in fact, the entire country.

At that time we had a very short supply of home heating oil. There was a great danger that we would have severe shortages this winter. I promised that we would have 240 million barrels of oil on hand during October. Last year the total that we used was about 233 million barrels; 240 is an adequate supply. We've reached that goal already.

The other thing that I promised was that we would do everything we could in the Government to help the poor families pay the increased cost of home heating oil. And we've asked the Congress this year for \$1.6 billion to help those low-income families pay that extra cost and also to pledge the Congress, through legislation that would be permanent, that for the next 10 years we would have \$2.4 billion per year to go to the families to help them pay the increased cost of home heating oil.

I believe that I can also predict to you that within the next few weeks, we will have the Congress finally pass the legislation that I put to them to provide this financial assistance for the low-income families.

POSSIBILITY OF RECESSION

MR. LEONE. Mr. President, turning to the economy again, I think one of the most frustrating things for your supporters is explaining to people that we might need a recession in order to deal with the inflation problem. It frightens people in terms of the budgets of a Newark or a New York City, and the normal Democratic constituency doesn't understand how we can get to a point where that becomes the only policy available to us. How do you

answer that kind of criticism of where we are?

THE PRESIDENT. We're doing everything we can to avoid a recession, and so far we've been successful. I can't say that we won't have temporary recessionary figures coming in. But the last month, for instance, showed a 2.4-percent increase in our total Nation's productivity, our gross national product, and that's far from a recession. A recession is defined arbitrarily that you have zero growth for two succeeding 3-month periods.

In addition to that, we've had extraordinary good luck in keeping business profits up. Since I've been in office, they've gone up about 50 percent. We've added a net total increase of 8½ million jobs. We've cut the unemployment rate down by 25 percent nationwide, and in some industries, like the construction industry, we've cut the unemployment rate by 40 percent. These figures are accurate. We've got equivalent success in revitalizing the agricultural industry, the steel industry.

What we suffer from is a distortion in our economy, brought about by the fact that we import half our oil from overseas. And last month, for instance, the annual rate of increase of prices of energy was about 100 percent per year, and when you have to absorb that, because we have become too dependent on foreign oil, it's just going to take a while to get the economy straightened out again. But we're making good progress, and in the meantime we're holding up employment, growth, and the strength of our free enterprise system.

WAGE AND PRICE CONTROLS

MR. LEONE. I guess a number of people are beginning to talk about wage and price controls who didn't do so in the past, who basically agreed with you that they were a bad idea. I know that the

standby authority to implement them has recently lapsed, and I wonder if you have any regrets that that instrument is not available if things get worse.

THE PRESIDENT. No, I don't have any regrets. The authority for the President to impose, without warning, wage and price controls did lapse. Nixon used it back, I think, in 1972, but I don't think that having mandatory price controls is feasible or advisable.

There is absolutely no way that the Congress would pass wage and price control authority. Just one Senator could filibuster that and prevent its being passed in the Senate, and there's an overwhelming feeling in the Congress that the mandatory price and wage controls would not work.

If the Congress started working on this, trying to pass it, then just knowing that the wage and price controls might come in a few months, in the future, would cause an extraordinary increase in the prices charged to people. I think it would make our inflation rate much greater.

I really believe that the best way to control inflation is to get at the roots of the problem: to control the Federal deficit, to have an efficient government, to cut down on our overdependence on foreign oil, to keep the supply of basic products stable, not to let our basic industries, like steel, for instance, go under, which it was threatened with for a while, and to make Americans more self-sufficient, and to generate more confidence in government. We've done all these things with fairly good success.

The inflation pressures are not only on our Nation, but they're all over the world. For instance, in Israel the inflation rate, I think, is over a hundred percent. And in Europe, where the countries have been deathly afraid of any inflation—and they have always accepted much higher un-

employment, instead of inflation—now they're facing the same degree of inflation that we are.

So, I believe that we've got it under fairly good shape, if the people will be patient, not lose their confidence, work together, and help us address these basic questions.

Another thing that I didn't mention a few minutes ago is to increase American exports overseas. This helps to hold down inflation in our own country. And of course, we need to keep the dollar value stable—and the dollar values are stable. As a matter of fact, even a month ago, when the dollar seemed to be somewhat lower than the average, it had actually increased in value by 8 percent, compared to a year ago, among the things that the OPEC nations have to buy. These are very complicated matters, and it requires patience.

And I would say the crux of the whole issue of controlling inflation and keeping a strong economy is to have an adequate national energy policy, which we have never had. None of my predecessors in the White House proposed, effectively, a national energy policy. After I've gotten into it, I've seen why they postponed it until the next President each time. It's a difficult issue.

But I think I can predict, again—this is my third prediction—that before the Congress goes home this year, we will have the total package of establishing in legislation, in law permanently, a national energy policy that will help address our problems.

ENERGY CONSERVATION

MR. LEONE. I sometimes get the feeling that a successful energy policy or anti-inflationary policy requires a lot of cooperation from the American people.

THE PRESIDENT. Yes, it does.

MR. LEONE. And I think about the fact, from everything one knows of you, you are a very disciplined man. I believe if you weren't President, you would drive 55 miles an hour and turn the lights off and try very hard.

THE PRESIDENT. Yes, I would.

MR. LEONE. Do you have any sense of frustration that you don't get that kind of response from the man in the street, that he just wants to know that there's gasoline down at the corner pump?

THE PRESIDENT. I did much more 2½ years or 2 years ago or 1 year ago or 6 months ago than I do now. I think there's a growing awareness, very rapidly coming on us, among the American people that we do indeed have an energy problem and that every American needs to do something about it.

The thing that impresses me most strongly is that the conservation of energy, the saving of energy, the stopping of the waste of energy need not be an unpleasant thing; it need not be a sacrifice; it need not be something that disrupts America. It can be an exciting, positive, pleasant thing.

It's not necessary for us to drive around in automobiles that weigh 5,000 pounds, one person in an automobile, going 75 miles an hour. It's not necessary to have a house in the wintertime that's up to 80 degrees temperature or one chilled down to 55 or 60 degrees in the summer, where you have to wear a sweater.

You know, these kinds of things can give us a better life. And I think that I can say accurately that as we move toward more conservation, increased use of solar power, and the development of American energy resources, we will not have a lower quality of life. We can have an even better quality of life, safer and more enjoyable, and with the sense that

we've done something not only for ourselves and our family but also for our Nation. It will be a patriotic thing.

PRESIDENT'S POPULARITY

MR. LEONE. Let me ask a more political question. You said about a year ago, I think, in an interview with Bill Moyers, that today the President is sort of a personification of problems. And I have a sense that you believe that's one of the difficulties with, one of the explanations behind your standing in the polls or the fact that people here in Jersey and elsewhere say Senator Kennedy's ahead right now, whatever it means at this stage. Do you think that's something you can overcome, yourself, in the coming months?

THE PRESIDENT. Yes, I think so.

When I made a speech in April of 1977 about energy, for instance, one of the lines that I put in the text to the American people was that just addressing this politically sensitive issue of a better energy policy would cost me 15 percentage points in the polls. The only mistake I made was that I underestimated how much popularity I would lose. There's no way to win when you address a difficult issue like SALT, Panama Canal treaties, energy, inflation, and so forth. There's no way to win. And I think that the best assurance that I have is the sound judgment and the fairness of the American people.

One of the great things about a political campaign is that it provides a forum for incumbents like me—as it did for Brendan Byrne when he ran for Governor this last time—to actually and accurately explain to the people who are going to vote what we have been doing, why we have taken these steps, why we have taken unpopular stands.

You know, it's easy for someone to get in office and not do anything because

you're afraid that you might go down in the popularity polls or because some special interest group may not like it. But I don't believe that we have ever avoided a difficult issue that we thought was best for our country, just to keep our popularity up or the polls high or to get votes.

And this series of very difficult issues—which we have addressed, I think, very well—when they're inventoried by the American people, I think, will repair a lot of the damage that has been caused to me and other incumbents. I think a perfect example is the one I used—Brendan Byrne, when he ran for reelection.

PRESIDENT'S LEADERSHIP QUALITIES

MR. LEONE. You're in a place where Byrne was way behind here, Carey in New York, Grasso in Connecticut. You've come here for encouragement, I guess.

It seems to me that the likelihood of potential Democratic challengers differing widely with you on important issues is not great. By and large they seem to be saying, "We basically agree. Jimmy Carter is well intentioned, we have not great policy differences, but he's not a strong leader." And the issue on which the campaigns seem likely to be joined, perhaps the only important one, is the question of leadership: "He hasn't been effective in moving Congress or moving the American people."

And I think you're going to have to answer the question in the course of this campaign, and I'd like you to let your imagination roam a little bit.

THE PRESIDENT. I don't have to imagine. Any objective analysis of my administration and its success with the Congress would stack up very well with any previous administration in this century, and that would include the best days of Lyndon Johnson's relationship with the

Congress immediately after the death of Jack Kennedy.

The difficulty of the legislation that I have put to the Congress, I think, is unequaled any time in my lifetime, but the percentage of the legislation that the Congress and I have passed together is as high as it has ever been. And I believe that's one of the issues that will be assessed.

Another one is what we've achieved. You know, I don't particularly want to sit here and brag, but I'm the first President in 40 years who has served without there being a single American killed in combat. We've kept our country at peace. We've also strengthened NATO and all our alliances overseas. We're now very rapidly restoring the quality of our own forces, keeping a strong defense.

I've moved into areas that have been avoided for a long time in the past. I'm not criticizing my predecessors. But the Egyptians and the Israelis have been at war for 30 years. They've been filled with hatred for centuries. And to see now Sadat and Begin sitting down, working out a peace agreement between them, because of action that we took in this country, is gratifying, indeed.

We've raised the banner of human rights around the world to make our country proud once again. We've opened up the continent of Africa to good relations, sound relations, based on basic human rights, majority rule, democracy, freedom, equality. We've also opened up, for the first time, a good relationship with one-fourth of the total population on Earth, in China, and at the same time we've not damaged our relationships with the people who live on Taiwan.

We've passed the Panama Canal treaties, which were condemned at first, but in the long run, I think, the American people will see this is one of the greatest

things that's ever happened to benefit our own country.

None of these issues were considered to be easy, and many of them were not politically attractive. And I could go down the list a lot longer, if we had a longer program. But I think those are the kinds of things that exhibit leadership, and I am perfectly willing to stand on my record. I look forward to 1980 with a great deal of anticipation and also confidence.

SUCCESS OF PRESIDENT'S PROPOSALS

MR. LEONE. I might ask—I think this is bound to come up in the campaign—what are the things you feel didn't go well—the income tax reform or welfare reform? How do you deal with those things that were a big part of the campaign in '76 and we don't have them today?

THE PRESIDENT. Well, if there's one characteristic I have, it's tenacity. You know, I don't give up, in spite of discouragement.

Last year, for instance, after a year and a half of tough debate, we only got about 65 percent of what we asked for in the energy package. We've come back this year, hopefully to get the other 30 or 35 percent. Last year we didn't get a word of oil. This year we're addressing the oil issue. We haven't gotten welfare reform yet. I think that we will get it. I can't say that it'll be exactly as we originally proposed, but I think that we'll get welfare reform.

Our major agenda items have pretty well been passed by the Congress. There's one on which we have failed, and that is tax reform. We need basic tax reform in this country, but the powerful special interest groups are so influential on Capitol Hill in Washington that it is almost impossible to have basic and good tax re-

form. And until the American people get aroused enough to let their individual Members of Congress in the House and Senate know that they demand equity and fairness, then the big shots in this country are going to continue to use their influence effectively and block basic tax reform.

With that one exception, however, I think we've had very good luck in the Congress, and the American people will benefit now and in the long run because of it.

PRESIDENT'S POLITICAL PHILOSOPHY

MR. LEONE. Let me ask you—neither you nor Senator Kennedy is an announced candidate yet, although both of you are around the country a lot talking like candidates these days. Politicians here in New Jersey and in this region say it'll be very tough for Carter to beat Kennedy; Kennedy has a mystique; there's a legend about it.

I was interested to see at the dedication of the Kennedy Library in Boston last week, you said that you felt in some ways you were closer to John F. Kennedy than Senator Ted Kennedy is. And I wonder if you could elaborate on that.

THE PRESIDENT. Well, philosophically, I think so. I don't believe that the Federal Government ought to do everything. I don't believe in establishing a whole big array of massive Federal Government spending programs to take care of the needs of our country. I believe in tight management; I believe in making the existing programs efficient. I believe in saving money; I believe in trying to have fiscal responsibility in managing the budget; and another, I believe that John Kennedy would have agreed with all those things.

In addition, I believe in a strong defense. I think the Nation can only be at

peace if we are strong, that the best single way to get our Nation back into war, with massive loss of life of our own young people, is if any potential adversary ever thinks our country is weak. I believe in a strong defense.

I'm not criticizing Senator Kennedy, but I think those are going to be two of the issues. There are some others, too. In general, there's no basic, deep, philosophical difference between me and him. His voting record on issues that we've put forward and where I've taken a public stand is very good.

And you talk about the outcome of the election. We had our first skirmish in Florida. We were predicted to suffer a massive and very embarrassing defeat. We got about a 2-to-1 victory there, and I think that's a fairly good indication of the kind of response we'll get. I'm not predicting that we'll win everywhere, but I've never backed down. And when and if I get in the race, I'll be there to stay, and as I said before, I feel very confident.

NATIONAL MORALE

MR. LEONE. Let me ask you one final question. In August you made a stirring speech about energy and talked about the American people suffering from a malaise and being unresponsive. I wonder what your own assessment is of the response over the last couple of months.

THE PRESIDENT. I think the response has been good. Among the people who've worked in the White House for 25 or 30 years, the professionals who stay there as Presidents change, that speech, which I think was July 15, got the most response of anything that a President has ever done, and the response was overwhelmingly positive. People said, "You're right. We do have a long way to go in this country to have basic confidence in each other,

in our Nation, respect for our government. What can I do to help?"

I think one thing that has caused people to take some positive action to help has been, for instance, the gasoline lines. It kind of shocked people to say, "You know, we do have a problem. What are we going to do about it?" And now there is a growing interest in it. The Congress positive action this year, which I predicted, I think will have a reassuring effect. And of course, the election, with the open debates, getting the American people deeply involved and much better educated on what has been going on in our country and what's got to be done in the future, all are good factors to bring about a restoration of confidence in our country.

We've got the greatest nation on Earth. I just want to make sure we keep it that way.

MR. LEONE. Well, Mr. President, it's nice having you here in New Jersey and talking to you about these problems that are of great concern to us. I want to thank you.

And on behalf of Date Line, New Jersey, this is Dick Leone. Good evening.

NOTE: The interview began at approximately 5 p.m. at the Meadowlands Racetrack. It was videotaped for broadcast at 8:30 p.m. on October 26 on New Jersey public television.

The transcript of the interview was released on October 26.

Eradication of Smallpox

White House Statement. October 26, 1979

President Carter today welcomed the official eradication of smallpox throughout the world, announced by the World Health Organization (WHO) in Nairobi today.

Over more than a decade, the WHO brought together in a sustained battle against smallpox a group of experts, health workers, and political officials from countries throughout the many regions where the disease was endemic. The leader of that WHO effort was Dr. Donald A. Henderson, who was then an officer of the U.S. Public Health Service working with the WHO. Henderson and his successors at the Center for Disease Control were imaginative and dedicated American contributors to this worldwide success.

In addition to eradicating what was long one of the most dread diseases known to mankind, this global campaign has produced financial savings for the United States. We invested an estimated \$27 million over the many years that some 300 persons from the Public Health Service filled assignments overseas related to smallpox control, and in direct financial assistance from AID and HEW. Now, routine smallpox vaccination is no longer necessary in this country, and there is no risk of smallpox to American travelers abroad. The \$27 million investment is returned every 3 months in savings.

"I am proud of the results of the smallpox eradication program, and I cite this program as a giant step toward the goal of rational planning for good health throughout the world in the future," the President stated.

Meeting With Chancellor Bruno Kreisky of Austria

White House Statement. October 26, 1979

President Carter met with Austrian Chancellor Bruno Kreisky in the Cabinet Room for an hour this morning. The two leaders exchanged views on a number of

international issues, including East-West relations and the Middle East. The President reiterated the U.S. commitment to the Camp David process, which can bring a comprehensive peace settlement to the area. The conversations were constructive and friendly.

Other participants in this morning's meeting between the President and the Chancellor included:

U.S. Side

Secretary of State Cyrus Vance
Zbigniew Brzezinski, Assistant to the President for National Security Affairs
Milton Wolfe, U.S. Ambassador to Austria
James Rentschler, NSC staff member

Austrian Side

Georg Lannkh, Private Secretary to the Chancellor
Karl Schober, Austrian Ambassador to the United States
Guenter Birbaum, Minister-Counselor of the Austrian Embassy

Aid for Kampucheans

Remarks Following a Meeting With Senators Jim Sasser, Max Baucus, and John C. Danforth on Their Trip to Southeast Asia. October 26, 1979

My first comment to the press and to the American people is one of thanks and appreciation on behalf of all of our country to Senators Sasser, Baucus, and Danforth, who have just returned from a visit to Thailand and Kampuchea to represent our Nation in the analysis of what can be done to alleviate the tragedy that is taking place in that country.

It's been estimated that almost half the people of Kampuchea have lost their lives in the last few years. And at the present

time, hundreds of thousands of people in that unfortunate country and some refugees that have crossed the Thai border are now at the point of death because of starvation.

Our country has been encouraging, through the United Nations and also through the International Red Cross, a means by which we could get food to those people, over the obstacles created by the Vietnamese and the Kampuchean authorities of all kinds. We have discussed this matter in the last few minutes. Senators Sasser and Baucus and Danforth have given me a report of what they observed there. They'll answer questions for you in a few minutes.

We are prepared as a nation—my own administration and the Congress—to proceed expeditiously in every possible way to alleviate the extant suffering. I will ask Dick Clark, former Senator now in charge of our refugee program, to represent me directly. The State Department and I will give him full authority and support throughout all the agencies of government to make his administration of relief to those people effective. As the Senators have just described to me, it's mandatory for effectiveness to deal with the starving people and deliver aid through the United Nations and also through the Red Cross, not on a unilateral basis.

We have had some discouraging word from the officials in Phnom Penh. We hope that this is a temporary circumstance and that because of world concern, that they would modify their positions and permit a land bridge to be formed so that food can be brought in through Thailand, over the border, to the people who are suffering so greatly, primarily by truck.

I might add one other thing, that I have agreed with the Senators that it would be important for them to talk

directly to Secretary-General Waldheim of the United Nations, to give him a firsthand report and also to seek his continuing support for the effort that all of us are joining in helping.

I want to say that the Thai Government has performed nobly in preparing and permitting a haven for the starving Kampucheans and are cooperating in every possible way to get food to the refugees who now are living on the borderline of death in their own country.

I'd like to turn the podium over to Senator Sasser, who was the leader of this group, and let him make a report to you. And then he and Senators Baucus and Danforth will answer questions that you might have.

Thank you very much, Jim Sasser, for a very fine and——

SENATOR SASSER. Thank you, Mr. President.

THE PRESIDENT. —a very fine and successful visit and also one that I think demonstrated a great degree of human courage.

NOTE: The President spoke at 2:27 p.m. to reporters assembled in the Briefing Room at the White House. Following his remarks, the Senators held a news conference on their trip.

St. Lawrence Seaway Navigation Clearance

Announcement of Extension of the Deadline. October 26, 1979

The White House announced today that the United States and Canadian Governments have agreed to extend the 1979 navigation clearance deadline in the St. Lawrence Seaway from midnight December 15 to midnight December 18. The 3-day extension of the shipping season is designed to help reduce the backlog of

grain awaiting shipment from Great Lakes ports.

The backlog developed this harvest season due to a bumper wheat crop and unprecedented export demands, which severely strained the Nation's grain transportation system. Two months of labor strife at the Port of Duluth in Minnesota also disrupted grain shipments and slowed total grain exports by as much as 10 million bushels a week.

The White House expressed gratitude to the Canadian Government and stated:

"We expect the additional Seaway shipping time to help relieve the current backlog of grain in Great Lakes ports. We are hopeful that the weather will allow shippers to take full advantage of the additional time to move grain through the Seaway."

Department of Justice

Nomination of Alice Daniel To Be an Assistant Attorney General. October 26, 1979

The President today announced that he will nominate Alice Daniel, of Washington, D.C., to be an Assistant Attorney General. She would replace Barbara A. Babcock, resigned, and her area of responsibility would be the Civil Division. Daniel has been General Counsel and Interim Director of the Legal Services Corporation in Washington since 1976.

She was born September 17, 1934, in New York City. She received a B.A. from Boston University in 1958 and an LL.B. from Columbia University School of Law in 1963.

Daniel was a teaching associate, then a research associate, at Columbia University School of Law from 1963 to 1966. She was an attorney with the New York City Investigations Commission from 1966 to 1967 and with the New York State Council on the Arts during 1967.

From 1967 to 1970, Daniel was an attorney with the California Legal Aid Society, and from 1970 to 1972, she was with the NAACP Legal Defense Fund. She was on the faculty of Hastings College of Law from 1972 to 1974 and was a director of the American Civil Liberties Union from 1974 to 1975. During 1975 she was deputy legal affairs secretary to the Governor of California.

Department of Justice

Nomination of John H. Shenefield To Be Associate Attorney General. October 26, 1979

The President today announced that he will nominate John H. Shenefield, of Arlington, Va., to be Associate Attorney General. He would replace Michael J. Egan, resigned. Shenefield has been Assistant Attorney General for the Antitrust Division since 1977.

He was born January 23, 1939, in Toledo, Ohio. He received an A.B. from Harvard University in 1960 and an LL.B. from Harvard Law School in 1965. He served in the U.S. Army from 1961 to 1962.

From 1965 to 1977, Shenefield was with the Richmond, Va., firm of Hunton and Williams. He was Deputy Assistant Attorney General early in 1977 and has been Assistant Attorney General since September 1977.

United Nations

Nomination of Richard W. Petree To Be Deputy U.S. Representative in the Security Council. October 26, 1979

The President today announced that he will nominate Richard W. Petree, of Falls Church, Va., to be Deputy Repre-

sentative of the United States in the Security Council of the United Nations, with the rank of Ambassador. He would replace Donald McHenry, who has been appointed U.S. Representative to the United Nations. Petree has been Alternate Representative of the United States for Special Political Affairs in the United Nations since 1978.

He was born June 4, 1924, in Jamestown, N.Y. He received an A.B. from the University of Colorado in 1948 and an M.A. from Harvard University in 1950. He served in the U.S. Navy from 1943 to 1946.

From 1946 to 1947, Petree was a personnel officer with the Department of the Army. He joined the State Department in 1950 as an intelligence research analyst. From 1957 to 1960, he was principal officer in Tokyo, and from 1960 to 1963, he was principal officer in Fukuoka.

Petree was an international relations officer from 1963 to 1967 and attended the National War College in 1967-68. From 1968 to 1972, he was posted in Addis Ababa as political officer, then counselor for political affairs.

From 1972 to 1973, he was Consul General in Naha. From 1973 to 1976, he was counselor for political affairs in Tokyo. From 1976 to 1978, he was Minister-Counselor for Political and Security Affairs at the U.S. Mission to the United Nations.

National Advisory Council on Women's Education Programs

Nomination of Carolyn L. Attneave To Be a Member. October 26, 1979

The President today announced that he will nominate Carolyn L. Attneave, of Seattle, Wash., to be a member of the

National Advisory Council on Women's Education Programs.

Attneave, 59, is a professor of psychology and adjunct professor of psychiatry and behavioral sciences at the University of Washington. She has also served as director of American Indian studies at the University of Washington. She has been a member of the American Psychological Association's ad hoc committee on minority affairs and is editor of the newsletter of the Society of American Indian Psychologists.

Department of Transportation

Nomination of William J. Beckham, Jr., To Be Deputy Secretary. October 26, 1979

The President today announced that he will nominate William J. Beckham, Jr., of Detroit, Mich., to be Deputy Secretary of Transportation. He would replace Alan Butchman, resigned. Beckham has been manager of North American government affairs for Ford Motor Co. since 1978.

He was born in Cincinnati, Ohio, on November 7, 1940. He attended Detroit Institute of Technology, Wayne State University, American University, and the University of Maryland, taking courses in political science.

Beckham worked as a Capitol Police officer at the U.S. Senate from 1962 to 1964. In 1964 he went to work for Senator Philip Hart's campaign in Detroit as a campaign assistant. In January 1965 he joined Senator Hart's staff in Washington as an aide responsible for correspondence to constituents.

From 1966 to 1970, Beckham served as an administrative aide in Senator Hart's Detroit office, where he was responsible for managing the office and establishing an additional office in Grand Rapids.

Beckham served as staff assistant in Senator Hart's Washington office from 1971 to 1973, responsible for monitoring and reviewing legislative and agency actions in the areas of labor, education, housing, and hunger and malnutrition, and for coordinating the activities of the Michigan offices.

From January 1973 to November 1973, Beckham served as director of the Equal Opportunities Subcommittee of the House Education and Labor Committee.

In November 1973 Beckham joined Detroit Mayor-elect Coleman Young's transition staff as director, and from January 1974 until 1977, he was chief executive assistant and deputy mayor of Detroit. From 1977 to 1978, he was Assistant Secretary of the Treasury for Administration.

United States Mint at Denver

*Nomination of Michael E. Witt To Be Assayer.
October 26, 1979*

The President today announced that he will nominate Michael E. Witt, of Aurora, Colo., to be Assayer of the Mint of the United States at Denver. He would replace Hildreth Frost, resigned. Witt has been Supervisor of the Survey Evaluation Section at Rocky Mountain Arsenal, Colo., since 1978.

He was born June 1, 1947, in Angola, Ind. He received a B.S. from the University of Florida in 1969 and a Ph. D. from Louisiana State University in 1973. He served in the U.S. Army from 1974 to 1976.

Witt has been with the Rocky Mountain Arsenal since 1974. From 1974 to 1976, while serving in the Army, he was Deputy Director of Product and Environ-

mental Assurance, Arsenal Quality Assurance Officer, and Acting Chief of the Material Analysis Laboratory Division. As a civilian, he has served as Chief of the Material Analysis Laboratory and as Supervisor of the Survey Evaluation Section.

United States Holocaust Memorial Council

Executive Order 12169. October 26, 1979

By virtue of the authority vested in me as President by the Constitution of the United States of America and in order to establish, in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App. I), a committee to begin the implementation of the recommendations of the President's Commission on the Holocaust for the establishment of a Holocaust Memorial, it is hereby ordered as follows:

1-1. *Establishment of the Council*

1-101. There is established a United States Holocaust Memorial Council. For the purpose of this Order, the "Holocaust" is the systematic and State-sponsored extermination of six million Jews and some five million other peoples by the Nazis and their collaborators during World War II.

1-102. The membership of the United States Holocaust Memorial Council shall consist of not more than 45 and not less than 25 members as follows:

(a) The President shall appoint between 15 and 35 members of the Council and shall designate one of these members to Chair the Council and another member to serve as Vice Chairman. The

Chairman may recommend to the President a member of the Council to serve as Vice Chairman.

(b) The President of the Senate and the Speaker of the House of Representatives are each invited to designate five members of their respective Houses to serve as members of the Council.

1-2. Functions of the Council.

1-201. The Council shall recommend to the President and to the Secretary of the Interior ways to implement the approved recommendations of the President's Commission on the Holocaust: (a) the erection of a memorial museum, (b) the establishment of an educational and research foundation, and (c) the establishment of a Citizens Committee on Conscience.

1-202. The Council shall recommend specific site locations within the Washington, D.C. metropolitan area. Criteria for choosing architectural design should be included in the site recommendations.

1-203. The Council shall propose a concept for the memorial museum, including general descriptions of the types and categories of exhibits to be displayed in the museum. Similarly, suggested functions and limitations for the educational and research foundation should be recommended.

1-204. The Council shall recommend the size, composition, and names of distinguished American citizens qualified to serve on the Citizens Committee on Conscience. It shall advise on the specific duties and limitations of such a Committee.

1-205. The Council shall also advise on the various ways to fund all of these recommendations. Funding proposals should provide that construction costs would be

raised primarily from private contributions.

1-206. In addition, the Council shall recommend appropriate ways for the Nation to commemorate "Days of Remembrance of Victims of the Holocaust."

1-207. The Council shall submit a final report to the President and to the Secretary of the Interior no later than June 30, 1980.

1-3. Administrative Provisions.

1-301. The Secretary of the Interior shall, to the extent permitted by law, provide the Council with administrative services, facilities, support, and funds necessary for the effective performance of the Council's functions.

1-302. Members of the Council who are not otherwise employed by the Federal Government may receive compensation for each day such member is engaged in the work of the Council at a daily rate to be determined by the Secretary of the Interior. Such rate shall not exceed the amount payable pursuant to the Federal Advisory Committee Act, as amended.

1-303. Members of the Council shall be entitled to travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5702 and 5703) for persons in the Government service employed intermittently.

1-4. General Provisions.

1-401. Notwithstanding the provisions of any other Executive Order, the functions of the President under the Federal Advisory Committee Act, as amended, except that of reporting to the Congress, which are applicable to the Council, shall be performed by the Secretary of the Interior in accordance with guidelines and procedures prescribed by the Administrator of General Services.

1-402. The Council shall serve as an interim body and shall terminate on July 31, 1980, unless sooner extended.

JIMMY CARTER

The White House,
October 26, 1979.

[Filed with the Office of the Federal Register,
10:50 a.m., October 29, 1979]

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

October 20

The President declared a major disaster for the State of California as a result of an earthquake occurring on October 15, which caused extensive property damage.

Following his visit to Boston, Mass., the President went to Camp David, Md.

October 22

The President returned to the White House from Camp David.

The President participated in a briefing by administration officials on the windfall profits tax given for community leaders in the East Room at the White House.

October 23

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Frank B. Moore, Assistant to the President for Congressional Liaison;
- the Democratic congressional leadership;
- members of the National Advisory Council on Economic Opportunity;

- Mrs. Carter, for lunch;
- Senator Patrick J. Leahy of Vermont;
- members of the President's Advisory Committee for Women.

In a ceremony in the Oval Office, the President received the first sheet of Christmas Seals, which marked the start of the 1979 Christmas Seal Campaign. Participants in the ceremony included Charles Schulz, National Christmas Seal chairman and creator of "Peanuts," Gordon Beck, president of the American Lung Association, and Jenny Chesser, 10, of Austell, Ga., Lorna Garrison, 10, of Washington, D.C., and Brian Owens, 10, of Kingsport, Tenn., representing the winners of the State Christmas Seal poster contests.

The President announced the members of the U.S. delegation to the independence ceremonies in Saint Vincent and the Grenadines, to be held October 26-29. They are:

- SALLY ANGELA SHELTON, U.S. Ambassador to Barbados, Grenada, and the Commonwealth of Dominica and Minister to Saint Lucia;
- ROBERT F. BOSSIE, a Manchester, N.H., attorney;
- PATRICIA ANNE FRANK, a Florida State senator; and
- PATRICK T. MCGAHN, JR., an Atlantic City, N.J., attorney.

The President announced the designation of Clark M. Clifford as Chairman of the Presidential Advisory Board on Ambassadorial Appointments. Clifford has been a member of this Board since last March. As Chairman, he replaces Reubin O'D. Askew, who has resigned from the Board.

October 24

The President met at the White House with:

- Dr. Brzezinski;
- the Cabinet;
- Mr. Moore;

Administration of Jimmy Carter, 1979

—Vice President Walter F. Mondale.

The President participated in a briefing by administration officials on the strategic arms limitation treaty given for community leaders from Kentucky, North Carolina, and West Virginia in the East Room at the White House.

The President has designated Zbigniew Brzezinski, the President's Assistant for National Security Affairs, to head the U.S. delegation to the 25th anniversary celebration of the Algerian revolution in Algiers on November 1. Dr. Brzezinski will be accompanied by Under Secretary of State for Political Affairs David D. Newsom. Other members of the delegation will be named at a later date.

October 25

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of the Treasury G. William Miller, Charles L. Schultze, Chairman of the Council of Economic Advisers, James T. McIntyre, Jr., Director of the Office of Management and Budget, Alfred E. Kahn, Advisor to the President on Inflation and Chairman of the Council on Wage and Price Stability, R. Robert Russell, Director, and John N. Gentry, Counselor on Labor-Management Relations, Council on Wage and Price Stability, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Landon Butler, Deputy Assistant to the President;
- members of the National Citizens' Coalition for the Windfall Profits Tax;
- Mr. Moore;
- Members of the House of Representatives to discuss hospital cost containment legislation.

The President transmitted to the Congress the 1978 annual report on Administration of the Radiation Control for Health and Safety Act of 1968.

October 26

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown, Hedley W. Donovan, Senior Adviser to the President, Lloyd N. Cutler, Counsel to the President, Hamilton Jordan, Assistant to the President, and Dr. Brzezinski;
- a group of editors and broadcasters from Minnesota (transcript will be printed next week).

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Washington State in the East Room at the White House.

The President transmitted to the Congress the 1978 annual report of the Federal Council on Aging.

The President left the White House for a weekend stay at Camp David.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted October 22, 1979

WILLIAM J. VANDEN HEUVEL, of New York, to be the Deputy Representative of the United States of America to the United Nations, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

GEORGE HERBERT PATRICK BURSLEY, of Maryland, to be a member of the National Transportation Safety Board for the term expiring December 31, 1984 (reappointment).

Administration of Jimmy Carter, 1979

NOMINATIONS—Continued

Submitted October 23, 1979

JUAN M. PEREZ-GIMENEZ, of Puerto Rico, to be United States District Judge for the District of Puerto Rico, vice a new position created by P.L. 95-486, approved October 20, 1978.

Submitted October 25, 1979

HAZEL REID ROLLINS, of the District of Columbia, to be Administrator of the Economic Regulatory Administration, vice David J. Bardin, resigned.

Submitted October 26, 1979

RICHARD WILSON PETREE, of Virginia, a Foreign Service officer of Class one, to be Deputy Representative of the United States of America in the Security Council of the United Nations, with the rank of Ambassador.

MICHAEL E. WITT, of Colorado, to be Assayer of the Mint of the United States at Denver, vice Hildreth Frost, Jr., resigned.

JOHN H. SHENEFIELD, of Virginia, to be Associate Attorney General, vice Michael J. Egan, resigned.

ALICE DANIEL, of the District of Columbia, to be an Assistant Attorney General, vice Barbara A. Babcock, resigned.

CAROLYN L. ATTNEAVE, of Washington, to be a member of the National Advisory Council on Women's Education Programs for a term expiring May 8, 1981, vice Mary Beth Peters, term expired.

WILLIAM J. BECKHAM, JR., of Michigan, to be Deputy Secretary of Transportation, vice Alan A. Butchman, resigned.

EDWARD ALLAN FRIEMAN, of New Jersey, to be Director of the Office of Energy Research, vice John M. Deutch, elevated.

CHECKLIST—Continued

Released October 22, 1979

Announcement: nomination of Juan M. Perez-Gimenez to be United States District Judge for the District of Puerto Rico

Released October 23, 1979

News conference: on the President's meeting with members of his Advisory Committee for Women to discuss the equal rights amendment—by Lynda Johnson Robb, Chair, and Ann Richards, member, President's Advisory Committee for Women

ACTS APPROVED BY THE PRESIDENT

Approved October 22, 1979

H.R. 1753----- Private Law 96-16
An act for the relief of Sergio and Javier Arredondo.

Administration of Jimmy Carter, 1979

ACTS APPROVED—Continued

Approved October 23, 1979

- H.R. 1301**----- Public Law 96-90
An act to amend title 18 of the United States Code to allow the transportation or mailing to a foreign country of material concerning a lottery authorized by that foreign country, and for other purposes.
- H.R. 898**----- Private Law 96-17
An act for the relief of Rodney L. Herold and others.

Approved October 25, 1979

- S. 567**----- Public Law 96-91
An act to amend title 28 of the United States Code to allow the United States attorney and assistant United States attorneys for the Eastern District of New York to reside within twenty miles of the district.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, November 2, 1979

Interview With the President

*Remarks and a Question-and-Answer Session
With Editors and Broadcasters From
Minnesota. October 26, 1979*

THE PRESIDENT. I'm grateful that you've come this afternoon. We had a previous meeting planned, and we had a conflict of schedules, and you couldn't come. I'm glad to have you here.

I want to reserve as much time as possible for your questions, not for statements from me.

ADMINISTRATION POLICIES

We are constantly at work trying to preserve the peace which our Nation enjoys. I think it's been 10 Presidents ago since we've had a time when no service people were killed in combat—a remarkable fact that I just learned this morning: 56 years ago; I think President Harding was the last one. I hope we can keep that posture. And it's dependent entirely, I think, on having a strong nation, united with resolved will and an adequate defense capability.

We want to get along well with the Soviet Union and meet with them on a peaceful, competitive basis. We are proceeding with SALT, which I think is the most important decision that's likely to be made by our Government while I serve in this office. We've strengthened NATO.

I think we've moved very firmly and

aggressively to encourage new friendships around the world. India now has very good relationships with us. Under Mrs. Ghandi, they were inclined strongly toward the Soviet Union. Our new opening with China, a fourth of the nations' populations, has been very successful so far. We've not damaged our relationship, so far as anyone can tell, with the people of Taiwan. And this is a fine balancing act, which I think has been fairly successful at this point. We've also had a chance to open up the possibilities for increased benefits with relations among the African nations and ourselves.

In the Mideast we've had some limited success so far in bringing a permanent peace to that region. We are continuing this effort, with a larger dependence at this time on direct negotiations between Egypt and Israel. We play a role; we will increase our role if desired by the two major participating parties. Both of them are bound by the Camp David accords, which extend in the future toward and including a comprehensive peace, involving, of course, the resolution of the very difficult question of the Palestinian rights.

In the domestic area we are trying to deal with the chronic inflation which has been on us now 10 or 11 years. A major factor here is the resolution of the energy question and the evolution within the Congress, in perhaps the most complicated and difficult legislative challenge the Congress has ever faced, and that is

an energy policy for our country. At the present time the inflation rate is comprised of about 4 percent energy, and the balance of it is nonrelated to energy. If it weren't for the energy factor alone, the inflation rate now would be the same as it was in 1978 and 1977.

I think we'll be successful this year in completing the major portion of the energy proposals that I presented to the Congress in April of 1977. This has not been an easy thing; it's been a constant challenge.

There are many other matters that I would be glad to discuss with you, concerning agriculture or social programs, health, education, housing, transportation, Federal-State-local relationships, improving the quality of life in our cities. But I think the best thing for me to do is to answer your questions. Perhaps those who haven't had an opportunity to ask questions earlier today would like to start, and then I'll open it to anyone else. Or if you've all had a chance to ask questions, then just use your own judgment.

QUESTIONS

NUCLEAR EXPLOSION IN SOUTH AFRICAN REGION

Q. President Carter, I was wondering now, what's the latest on the atom explosion in the area of South Africa?

THE PRESIDENT. A few weeks ago, we had an indication that somewhere in that region, covering literally thousands of square miles, there was an explosion. We have been and are continuing to try to follow up that initial observation. There is no certain answer yet that anyone can derive.

Q. Does it appear as though it's South Africa?

THE PRESIDENT. That's hard to say. There's a lot of ocean surrounding South Africa, and I don't think it would be

possible to pinpoint it any closer than a distance of literally hundreds of miles.

So, we don't really know, except just a general area where an indication was obtained. The people that got that indication feel quite sure, but followup checks have not been successful. This doesn't prove or disprove whether or not there was an actual explosion.

WINDFALL PROFITS TAX

Q. Mr. President, yesterday, sir, you expressed dissatisfaction with the windfall profits tax as it was, so far, in the Congress. What is the rockbottom level that you're willing to settle for, and what are some of the punitive measures that you are willing to take should the version that comes out of the Congress not please you?

THE PRESIDENT. I'd rather not describe the additional measures that I would take, because I'd like to keep all my options open.

The minimum thing that would satisfy me is the proposal that we put to the Congress at the very beginning, roughly \$275 billion in income from that source. I think, if anything, that figure ought to be higher, if the Congress makes a change, than lower.

The House lowered it some, a considerable amount, 12 to 15 billion dollars, and also limited the time of application from a permanent tax on the unearned profits of the oil companies to a 10-year period—where some of these projects are very long range in nature, and I think the permanent aspect of the tax is important. That was a major change the House made.

The Senate, however, slashed our proposal in half—the Senate Finance Committee did. So, we'll fight as hard as we can to restore the losses on the floor when the Senate debates and votes on this issue. And if we're not completely successful

there, we'll take our battle to the conference committee and then back to the House and Senate floors for the assessment of the conference committee decision.

But if any change is made in what we originally proposed, it ought to be stronger, rather than weaker, because of subsequent events that have occurred.

WAGE AND PRICE GUIDELINES

Q. Mr. President, I believe two out of three American people holding jobs are not members of labor unions. What would you like to see for them in the year 1980 for the guideline for wage increases?

THE PRESIDENT. The most important— Oh, I was preanticipating your question. I started to say that one of the most important things we could do is to pass the labor law reform legislation that was proposed by us to the Congress earlier in my administration.

We would like for all of the wage earners and business executives to comply with the voluntary wage and price guidelines that have been established by us. These have been and are being modified as we accumulate more information and more data. And of course, now we have what we call the national accord, a joint approach to this very sensitive question, where labor and business and the Government voluntarily work with one another, whereas previously, up until this month, the guidelines were imposed by the Government, in effect, on a reluctant labor and business community. This is a major step forward, and I think that the results will be good.

I'd like to add quickly that we've had excellent response on both prices and wages during this past year. Wage increases have been very compatible with those in previous years, in 1978, for instance. We've had good cooperation in almost every respect. On the items that can be put under the umbrella of our

price guidelines, we've had very good response from business.

The major things that have broken the inflation control effort and forced prices up have been: number one, energy; secondly, things like forest products and heavy demand for homes—we've had an almost 2-million-home-per-year building rate—and, of course, food, which is impossible, in my opinion, to have prices controlled.

But on items that are sold, we've had good response from the business community as well. I think the new accord will help us in the future to make our guidelines more effective. And I hope that the same guidelines would apply equitably between members of labor unions and those who are not.

PUBLIC WORKS AND WATER PROJECTS

Q. Mr. President, in the area of public works and water projects, there's a bill in the House that's nearing the floor and one in the Senate committee that deals with cost-sharing ratios for the local units of government that are different from what you've previously said are your guidelines. Does that make it veto material that they haven't adhered to your guidelines on a higher local share of the total project cost?

THE PRESIDENT. I can't answer that question. My recollection is that the proposal we made to the Congress had at least tacit approval from State leaders and others in the country before we presented it. Subsequently, an alternative was put forward.

I would have to assess the legislation in its entirety before I could decide whether to veto or not veto it. If it was a decided improvement over what we have now and would make water projects, including dams, be built on the basis of merit and not political porkbarrel considerations, then I would probably sign

Beckham served as staff assistant in Senator Hart's Washington office from 1971 to 1973, responsible for monitoring and reviewing legislative and agency actions in the areas of labor, education, housing, and hunger and malnutrition, and for coordinating the activities of the Michigan offices.

From January 1973 to November 1973, Beckham served as director of the Equal Opportunities Subcommittee of the House Education and Labor Committee.

In November 1973 Beckham joined Detroit Mayor-elect Coleman Young's transition staff as director, and from January 1974 until 1977, he was chief executive assistant and deputy mayor of Detroit. From 1977 to 1978, he was Assistant Secretary of the Treasury for Administration.

United States Mint at Denver

*Nomination of Michael E. Witt To Be Assayer.
October 26, 1979*

The President today announced that he will nominate Michael E. Witt, of Aurora, Colo., to be Assayer of the Mint of the United States at Denver. He would replace Hildreth Frost, resigned. Witt has been Supervisor of the Survey Evaluation Section at Rocky Mountain Arsenal, Colo., since 1978.

He was born June 1, 1947, in Angola, Ind. He received a B.S. from the University of Florida in 1969 and a Ph. D. from Louisiana State University in 1973. He served in the U.S. Army from 1974 to 1976.

Witt has been with the Rocky Mountain Arsenal since 1974. From 1974 to 1976, while serving in the Army, he was Deputy Director of Product and Environ-

mental Assurance, Arsenal Quality Assurance Officer, and Acting Chief of the Material Analysis Laboratory Division. As a civilian, he has served as Chief of the Material Analysis Laboratory and as Supervisor of the Survey Evaluation Section.

United States Holocaust Memorial Council

Executive Order 12169. October 26, 1979

By virtue of the authority vested in me as President by the Constitution of the United States of America and in order to establish, in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App. I), a committee to begin the implementation of the recommendations of the President's Commission on the Holocaust for the establishment of a Holocaust Memorial, it is hereby ordered as follows:

1-1. *Establishment of the Council*

1-101. There is established a United States Holocaust Memorial Council. For the purpose of this Order, the "Holocaust" is the systematic and State-sponsored extermination of six million Jews and some five million other peoples by the Nazis and their collaborators during World War II.

1-102. The membership of the United States Holocaust Memorial Council shall consist of not more than 45 and not less than 25 members as follows:

(a) The President shall appoint between 15 and 35 members of the Council and shall designate one of these members to Chair the Council and another member to serve as Vice Chairman. The

Chairman may recommend to the President a member of the Council to serve as Vice Chairman.

(b) The President of the Senate and the Speaker of the House of Representatives are each invited to designate five members of their respective Houses to serve as members of the Council.

1-2. Functions of the Council.

1-201. The Council shall recommend to the President and to the Secretary of the Interior ways to implement the approved recommendations of the President's Commission on the Holocaust: (a) the erection of a memorial museum, (b) the establishment of an educational and research foundation, and (c) the establishment of a Citizens Committee on Conscience.

1-202. The Council shall recommend specific site locations within the Washington, D.C. metropolitan area. Criteria for choosing architectural design should be included in the site recommendations.

1-203. The Council shall propose a concept for the memorial museum, including general descriptions of the types and categories of exhibits to be displayed in the museum. Similarly, suggested functions and limitations for the educational and research foundation should be recommended.

1-204. The Council shall recommend the size, composition, and names of distinguished American citizens qualified to serve on the Citizens Committee on Conscience. It shall advise on the specific duties and limitations of such a Committee.

1-205. The Council shall also advise on the various ways to fund all of these recommendations. Funding proposals should provide that construction costs would be

raised primarily from private contributions.

1-206. In addition, the Council shall recommend appropriate ways for the Nation to commemorate "Days of Remembrance of Victims of the Holocaust."

1-207. The Council shall submit a final report to the President and to the Secretary of the Interior no later than June 30, 1980.

1-3. Administrative Provisions.

1-301. The Secretary of the Interior shall, to the extent permitted by law, provide the Council with administrative services, facilities, support, and funds necessary for the effective performance of the Council's functions.

1-302. Members of the Council who are not otherwise employed by the Federal Government may receive compensation for each day such member is engaged in the work of the Council at a daily rate to be determined by the Secretary of the Interior. Such rate shall not exceed the amount payable pursuant to the Federal Advisory Committee Act, as amended.

1-303. Members of the Council shall be entitled to travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5702 and 5703) for persons in the Government service employed intermittently.

1-4. General Provisions.

1-401. Notwithstanding the provisions of any other Executive Order, the functions of the President under the Federal Advisory Committee Act, as amended, except that of reporting to the Congress, which are applicable to the Council, shall be performed by the Secretary of the Interior in accordance with guidelines and procedures prescribed by the Administrator of General Services.

the legislation. If it was of great danger to the level of expenditures in the future or would encourage unwarranted projects being built, then I would veto it.

Q. In the Minnesota area, it's the flood control projects, three of them, where you have asked for a doubling of the local effort versus what Congress has acted upon.

THE PRESIDENT. In general, the local and State officials have been amenable to that local and State effort. It gives them some authority or influence over the decisions, which they haven't had in the past. It's been almost exclusively a Federal Government bureaucracy and the administration and Congress decision. The costs are relatively low. But I think this would prevent projects being approved with the wild support of chambers of commerce and so forth, when they don't have to bear any of the cost at all at the local level. So, I think a proper sharing of responsibility and cost is the best approach, as we've put forward to the Congress.

But the thing I don't want to do is to participate in conjecture about what kind of bill might ultimately get to my desk after it goes through the tortuous legislative procedures and say I will or will not veto something that I haven't seen.

CANADIAN OIL EXPORTS

Q. Mr. President, you'll be traveling to Canada early next month. At that point will you be trying to restore some of the cutbacks we've experienced in Canadian crude oil to this country?

THE PRESIDENT. That will be on the agenda. We will be discussing environmental questions, fishing rights questions, the future supplies of oil and natural gas, maybe even some sharing of electric power that might be generated on each side of the border, and a clearer understanding of what we might experience in the future.

As you know, Canada, like our own Nation, has a very serious problem of being, in effect, two nations, one a major producing nation, and the other one a major consuming nation. And sometimes it's delineated geographically. On the east coast of Canada, there's a fairly substantial shortage of oil, as you know. On the western part of Canada, in the north, there's sometimes a surplus of oil.

My understanding from the Canadian authorities is that over a period of the next number of years, until they can hope to get tar sands and shale production, that they are going to have to be importing a little more oil than they have in the past.

So, I think for the Americans to believe that we'll have large supplies of oil coming from Canada in the future would be a fruitless hope. But that will be one of the issues Prime Minister Clark and I will discuss.

ENERGY CONSERVATION

Q. Mr. President, do you think the American people, in their daily lives and daily habits, are sufficiently aroused about the gravity of the energy shortage? Have they given up enough? What's going to excite them about getting involved in carpools?

THE PRESIDENT. Well, in the last few months, since the California gas lines and some on the east coast, there's been a new interest in and concern existing among the American people themselves. For instance, I think last year, in the winterization of homes we had about a 9-percent participation rate in getting tax credits for weatherizing homes among the families of our country.

I've been pleased the last few weeks, maybe the last few months, about the response of the American people. One indication of this is that we have measured about 1 mile per gallon higher efficiency among all the automobiles in the Nation during this summer than we had

anticipated, which shows that Americans are driving more carefully, trying to save gasoline, and also shifting, as rapidly as they are available, to more efficient automobiles.

I expect there's to be a large increase in the utilization of the tax credits to winterize homes. We've spot checked Government buildings around the Nation—and this has been done by the news media in some cases—and found a fairly surprising degree of compliance with the new thermostat control settings that I advocated.

So, to answer your question in one sentence, I think that in general, lately the American people's concern about energy has mirrored itself in increased conservation—not enough yet. I think more will come in the future.

One other point that's interesting is that for the last several years, the business community—industry, primarily—has practiced better conservation than before.

In 1973, for every 1-percent increase in the gross national product, energy consumption went up about 1 percent. Now, when the gross national product goes up 1 percent, energy consumption only goes six-tenths of a percent. So, that's a substantial saving that's been brought about just by business and industry attention to profits and losses. And now that intense interest in prices of energy and its adverse effect on a family budget is beginning to have a major effect, beneficially, on conservation.

HOUSING CONSTRUCTION AND FINANCING

Q. Mr. President, you mentioned that the cost of homes is one of the chief things that have risen, contributing to the inflation problem.

THE PRESIDENT. It's primarily the interest rates.

Q. Yes. Now, I have a letter here that was addressed to you by the president of the Minnesota AFL-CIO, who is one of

the main supporters of yours in Minnesota, and he's extremely critical of the Federal Reserve Board, particularly of Mr. Volcker, on raising interest rates all the time. In fact, he suggests you find a way of getting rid of Mr. Volcker. Do you have any comments on that?

THE PRESIDENT. Well, first of all, it's not possible to get rid of Mr. Volcker under the American law. And, secondly, the Federal Reserve has very wisely been isolated from political influence exerted by the White House or the Congress. It's an independent agency, and I think it ought to be independent.

Interest rates are almost directly related to the rate of inflation, and I think it would be expecting too much for the interest rates charges to be lower than the rate of inflation. The best way to get interest rates down is to lower inflation.

We've been effective in making alternative supplies of money available, which did not exist several years ago, for continued homebuilding in spite of high interest rates.

The interest rates have been fairly high, for instance, the last number of months, ever since—certainly all during this year—but the homebuilding rate in September was still near a 2-million-home-per-year mark. I think the highest it's ever been in history was a rate of about 2.3 million homes per year. We've sustained that level so far. What will happen in October, nobody can say.

Secretary Miller and the Home Loan Bank Board are now making a telephone survey for me around the Nation to see what is the degree of available money and how much has homebuilding been constrained because of the high interest rates. This is a matter of great concern to us.

I might say that in the first 2½ or so years that we've served, we have cut the unemployment rate among construction workers down by 40 percent, and I hope

to keep that—the building in our Nation—at a reasonable, sustained level. But I'm also concerned about the high inflation and the attendant high interest rates, and I'm sure that Mr. Volcker is, too.

Q. Mr. President, don't the interest rates, though, contribute to and inflame inflation?

THE PRESIDENT. Yes, that's absolutely right, because the interest rates, through some strange quirk in the regulations, which is certainly an exaggeration, are applied to the Consumer Price Index as though every month every homeowner in the country had to renegotiate their home loan on the basis of the higher rates, which means that this greatly exaggerates in the Consumer Price Index the effect of high interest rates on home loans.

Obviously, many people are now paying off home loans at an interest rate of 5 or 6 percent, but within the CPI, it's as though all the homeowners in our country had just borrowed their money this past month. So, that is an exaggerated figure. But when the CPI goes up because of high interest rates at our current level, it feeds back into everything else, including the cost-of-living adjustments and other things.

RELIEF EFFORTS FOR KAMPUCHEANS

Q. Mr. President, you recently compared the situation in Cambodia to the Holocaust. And if it is so—and I agree it is—might it be worse because it's in a smaller population of 8 million, while there it was the European community? How do you explain the reaction, or is it adequate, of the Vatican, the Christian world, and the Western democracies, and why are we so timid in pointing out to the world who is causing the holocaust?

THE PRESIDENT. I don't think we've been timid. Have you all met with Secretary Vance yet?

Q. Yes, this morning.

THE PRESIDENT. I can get for you—I

need not go into it now—just a calendar of what we have done, the voices that we've raised, our efforts in the United Nations, our condemnation, publicly and through diplomatic channels, of the authorities in Kampuchea over a period of months, beginning way back in 1978.

In the first place, it's hard to identify who is the government in Kampuchea—it's a very confused subject, the country is at war; secondly, the location of the people who are starving; and third, it's been very difficult to arouse the interest of the international community enough to force the combatant groups in Kampuchea to let food be delivered. There's no reason for us to deliver large supplies of food to a totalitarian government, who's responsible for the starvation, and have the food never get to the people who are starving. That was and has been an obstacle.

Only 5 days after we were successful in getting the United Nations, including the International Red Cross and UNICEF, to make a move, we made our pledge, and we've had our pledge on the line ever since I have known any way to get food to the starving people. We just arbitrarily said, "We'll provide a third of anything that goes to the Kampuchean starving people."

We still don't have a sure way to get the food to the people who are starving. It's been estimated that at least a third, maybe approaching a half, of the total population of Cambodia has already died, and they are still suffering very seriously.

My next meeting after this meeting with you is with the three United States Senators that have gone over there to try to convince the government in Phnom Penh to let 30,000 tons of food per month cross the Thai border and go into the area where the starving people exist, where they're trying to survive. We have food ready, on the way. We've already

allocated enough money to accommodate every possible means to deliver the food.

It's one of those horrible examples of, I think, partially a deliberate attempt to decimate a population in the form of genocide. And now, I think, that the world has been aroused, I think the conflicting military groups in Kampuchea, including the Vietnamese, have been convinced that they must open up an avenue to alleviate the suffering. And we are in the forefront and have been in the forefront of making food and money and transportation capabilities available.

MR. EISELE. Thank you, Mr. President.

THE PRESIDENT. Thank you. I'll take one more question and then——

PRESIDENT'S LEADERSHIP QUALITIES AND ACCOMPLISHMENTS

Q. Mr. President, the question of leadership is apparently going to be a very large one in the coming Presidential campaign. And some of your critics contend that one of the problems you got into early on was that you had no grand vision of national goals, no overarching idea of what direction the country ought to go in. And they say that that's because you were an engineer and you were engrossed in details, but couldn't deal in the grand picture, particularly here in Washington. How do you react to that?

THE PRESIDENT. You know, in many ways our country has been built by people like engineers. I think Thomas Jefferson was a scientist, for instance. I was a farmer like George Washington was. I don't think there's any exclusive kind of person who has visions or who has leadership, to the exclusion of other kinds of people. We've had haberdashers who were great leaders, we've had military generals who've been great leaders, we've had ex-Governors who were great—Presidents, I meant to say—who were great

Presidents. And I don't know how to respond to any particular categorization.

I think the fact that I was an engineer and have had some training in State government and also in science and also in agriculture—none of those things are debilitating experiences. [Laughter] I believe that any fair and accurate analysis of what we have proposed and accomplished would debunk that kind of allegation.

Before I was ever President, we had broad and extensive goals that we wanted to accomplish, and I think the difficulty that we've experienced with Congress originally has been because of the complexity of the proposals that we've put to them. I'll just give you two quick examples, one on the domestic scene.

We've never had an energy policy. For many years, back to Harry Truman, we've recognized that something needed to be done about energy. It's been in a crisis stage since 1973. This has been one of the most complicated and difficult political battles on the Hill that our country has ever seen. And I predict to you that before the end of this year we will have, almost in its totality, an adequate national energy policy. Had we had this earlier, we would have saved our Nation a great deal of suffering and threat to our very security.

In foreign affairs, we've had the same thing. You know, for 14 years Presidents have had the opportunity to complete a Panama Canal treaty and, for much longer than that, to open up China to trade and diplomatic relationships with our country, for even longer than that, to try to bring peace to the Mideast.

We've never flinched in any way from addressing an issue that I consider to be important to our Nation domestically or in foreign matters because of adverse political consequences. I can well under-

stand now why some of my predecessors did not bring these issues up. [*Laughter*]

When I made my TV speech to the people of our country, I think, April 20 of 1977, on energy, I said then that I predict that my public opinion polls would drop at least 15 percent because of the energy proposals that I would make. That was one of the worst underestimations—[*laughter*—I've ever made to the American people. But some of the things we've done have been very difficult, they've not been political winners, and we've been successful.

I might close by saying that the most difficult political undertaking I've ever had in my life, including a campaign for President, was getting the Panama Canal treaties ratified and the implementing legislation passed. When we began that effort, only 8 percent of the American people were in favor of any sort of Panama Canal treaty. And I think this will pay rich dividends for our country in the future. But it was obviously not politically attractive to do it.

So, I don't have any apology to make. We've still got problems. We haven't been 100 percent successful. But I think that when this Congress goes home, I predict to you that if you analyze what we proposed to the Congress versus what they passed, that there would not be a President in the last 20 years or more that's had a record as good as ours, and that would even include the relatively halcyon days of Lyndon Johnson's administration, immediately after the tragedy of John Kennedy's death.

We've got a good record, very difficult issues, an extremely fine, cooperative relationship between me and the Congress. And I think the facts—not just my voice, which certainly will be thought of as, per-

haps, biased—the facts will show that what I've told you is accurate.

NOTE: The interview began at 1:16 p.m. in the Cabinet Room at the White House. Albert Eisele is Press Secretary to Vice President Mondale.

The transcript of the interview was released on October 27.

Republic of Korea

Letter to Acting President Choi Kyu Ha Following the Death of President Park Chung Hee. October 27, 1979

Dear Mr. Acting President:

It is with a deep sense of shock and sorrow that I have learned of the death of President Park Chung-Hee. President Park was a firm friend of America, a staunch ally, and an able leader. In particular, his role in Korea's remarkable economic development will not be forgotten.

Let me assure you, as you assume your duties as Acting President, that the United States Government will continue to stand firmly behind its treaty commitments to the Republic of Korea. Our thoughts will be with you and the Korean people during this difficult time.

Sincerely,

JIMMY CARTER

NOTE: President Park was assassinated on October 26 by Kim Chae Kyu, Director of the Korean Central Intelligence Agency, at KCIA headquarters. Also killed during the shooting incident were five of President Park's aides.

On October 30 the White House announced that the President designated Secretary of State Cyrus R. Vance to lead the United States delegation to the funeral of President Park in Seoul on Saturday, November 3. Secretary Vance was to be accompanied by the President's son Chip and a delegation of leaders from the Congress, the executive branch, the military services, and the American public.

Providence, Rhode Island

*Remarks at the Northeast Summit on Energy.
October 29, 1979*

Governor Brendan Byrne, Governor Grasso, other members of this group, who are distinguished leaders throughout the northeastern part of our country:

I can't think of any more appropriate subject for a summit conference anywhere in our Nation and particularly in this part of our country than you have chosen. Summits are ordinarily called when there is a matter of grave significance to a nation or to a group of nations.

I had a summit meeting with President Brezhnev in Vienna not long ago to talk about the peace of our generation throughout the world and the control of nuclear weapons. There was an economic summit earlier this year in Tokyo, when the leaders of seven industrialized and democratic nations met to talk about the future of the Western World.

And today we are addressing a subject that is equally as important, because there are two things involved: One is the well-being of the people of our country, and the other is the security of our Nation. I don't make a statement like that lightly. When a President, the Commander in Chief of our Armed Forces, says that the security of our Nation is at stake, the words should be chosen carefully, and I choose them very carefully.

Our Nation has become overly dependent on foreign oil. This is a subject of grave importance to us.

In January of 1973, oil was selling freely around the world about \$2 a barrel; that's about 6 or 7 years ago. Now oil prices are more than 10 times as great; on the spot market, 20 times as great, about \$40 per barrel.

We rely on an uncertain source. We im-

port half the oil we use. Along with oil, we import inflation and unemployment. Next year we will send from our country to foreign oil suppliers \$70 billion. Think of the jobs and investment and a better life for the American people that could be bought with that kind of money.

Inflation is an all-pervasive burden on the American people. The driving force behind inflation is our overdependence on oil and the high prices paid for it. Four percentage points of our present inflation rate are directly attributable to one item—energy. If it weren't for the rapid increase in energy costs in the last 6 or 8 months, the inflation rate now would be the same as it was in 1978 or the same as it was in 1977.

The people of our country are losing confidence in the future, because they see that we rely on an undependable source which provides oil for a thirsty nation at uncontrollable prices. This is a very serious subject, and the fact that all of you would assemble here is proof that you agree with me about my expression of concern.

In April of 1977, about 90 days after I had been sworn in as President, I presented to the people and to the Congress an analysis of the energy question and presented also to the Congress a proposal for a comprehensive national policy on energy. Mine was a lonely voice. I referred to the energy problem as the moral equivalent of war. This statement was ridiculed by the press, discounted by many people in our country.

And after a year and a half the Congress, after one of the most divisive and bitter and difficult debates in the history of our Nation, finally passed last year about 65 percent of the energy package that I had presented to them—not one word, however, about oil; not one word.

So, here we sit, 7 years after the first oil embargo, 2½ years after a comprehensive package has been presented to the Congress, still needing vital action by our legislative branch of the Government, and our country's still vulnerable.

There have been some beneficial changes made, however. The American people are now becoming aroused, and the Congress is beginning to take action, even on oil. I'm not discouraged about the future.

One very bright light throughout all this process has been the awareness of the Northeastern Governors and those who work with them that this was indeed a serious problem. I have had strong allies among the men and women at this table from the very beginning, and the fact that you are here indicates that their influence has been all-pervasive throughout the northeastern part of our country. You saw the dangers early, and you began to act.

One of the things that has been a serious problem, politically and otherwise, has been the artificial controls on the prices of oil and natural gas, which have caused Americans to continue to depend upon oil to an unwarranted degree, to the exclusion of conservation, the shifting toward renewable supplies of energy like solar power, and the realization among our Nation that we did have a serious problem on hand.

The most important single action that every single person in this country can take is to save energy, to conserve energy, to stop wasting energy. This is something that can be done at the national level, State, local levels of government, in private industry, in every community, in every family, in the life of almost every person.

And I hope that everyone listening to my voice here in this room or on television or otherwise will make an assessment today with family members: "What

can I do as a patriotic American and to help my Nation, yes, but also to help my community, my family, and myself? What can I do to save energy in my home, going to and from work, to and from shopping, on my job?"

There are myriad different ways that Americans can save energy if we make up our minds that it's important enough to do it. And I might point out to you that this is not an unpleasant thing; it's not an unwarranted sacrifice; it will not even be an inconvenience. It will certainly not weaken our family structure, our communities, our States, our Nation. It can be an exciting and productive and positive action. It can bring families together in a closer unity. It can strengthen communities. It can strengthen our Nation. It's a patriotic gesture. It can be pleasant, not an unpleasant sacrifice.

The crux of the issue in conserving, meeting the needs of American families, developing new supplies of energy, is the windfall profits tax. The windfall profits tax is now being considered by the House and the Senate of the U.S. Congress.

The House has passed a reasonable windfall profits tax, not as strong as I advocated, not as strong as I would like. The revenues are not as great as what I proposed, and the House put a 10-year limit on the application of the tax. It should be permanent, and the lost revenues, below what I advocated, should be restored.

The Senate Finance Committee has reported out a framework only of a tax structure that can be built on the floor of the Senate, in the conference committee, and ultimately by the Congress.

The House would give back to the oil companies, as a portion of the unearned profits over a 10-year period, \$151 billion. The Senate Finance Committee would give back to the oil companies, in unearned profits, \$374 billion, at the present price of oil, as projected, and at the

present inflation rate. This could become a \$1 trillion giveaway to the oil companies.

I hope that every one of you will help me to convince the Congress that an adequate and acceptable windfall profits tax should be levied on the oil companies to take away a major portion of their unearned profits, because that would give us a reserve supply of money to be used for things that are crucial: first of all, to meet the needs of our American families, to pay the increasing cost of energy. The increasing costs are inevitable. The poor families of our Nation must have added financial help to pay those costs.

And the second need, of course, is to have a strong, consistent, permanent conservation program, to encourage Americans to do what's best for them, through tax credits, home audits, shifting away from the scarcer supplies of energy to more plentiful supplies of energy, the evolution of new kinds of energy from supplies which in our country are adequate—synthetic fuels from coal, geothermal supplies, biomass, low-level dams which have been abandoned in the past that can now be reconstituted—a heavy dependence upon insulation of homes, more efficient automobiles, research and development.

These things are all possible; in fact, in our country they're inevitable, provided we have adequate incentives. And those incentives financially must be derived and can be derived only from a windfall profits tax. It sounds so logical and so clearly to the advantage of our country that you might say, "Why the doubt; why the delay; why must the President continue to pound on this one subject for 2½ years, yet without success?"

I represent and lead, in effect, two different nations. One is the largest oil-consuming nation on Earth, and the other nation is one of the largest oil-producing nations on Earth. And in the past there

has been one strong all-pervasive voice on Capitol Hill, and that has been the oil companies' lobbies. Now, in the last couple of years, we've built up an effective countervoice as the American people have become aroused to protect their own interests.

The third quarter oil company profits are adequate proof of the need for a rapid passage of the windfall profits tax in an acceptable form for me and for you.

We must meet the needs of the poor families, particularly in the northern part of our Nation. In April of this year, I made two basic pledges. One was that this winter we would have an adequate supply of home heating oil. At that time we were far below the reserve supplies needed. We've been successful with that. Our goal was 240 million barrels in reserve supply in October. We have already passed that point. We will have adequate fuel oil supplies for homes during this winter. That's a notable achievement.

But the other part of that commitment was to provide, from Federal revenues, assistance for poor families, to help meet the rapidly increasing costs of home heating oil brought about by OPEC price rises. Very quickly now, \$250 million will be distributed throughout the country, particularly the Northeast, for Governors to allocate through their own mechanisms for poor families. This is a growth of a program that I established the first year I was President, with the help of the Congress. It's been effective so far.

We're advocating that this be increased substantially and that we add to the \$400 million from this program another \$1.2 billion to be paid out through other means to the poor families of this country. In addition to that, we've advocated \$2.4 billion per year for 10 years to have a permanent, stable, predictable program to meet these high needs of the poorer families in our midst.

These revenues will come ultimately from the windfall profits tax, but in order to expedite the process and not delay the payments until the windfall profits tax is passed, they'll be paid out of general revenue funds and then repaid when the windfall profits tax is collected from the oil companies.

I'd like to remind you again, however, that the best way, the cheapest way, the quickest way to cut down on costs, to make our Nation more energy-secure, and to reduce oil imports is conservation—conservation. Every family can help. It's one of the most important and patriotic challenges that we've ever faced.

If we could just insulate, for instance, all the buildings in our country adequately, we would, in effect, have another Prudhoe Bay supply of oil, equivalent to the oil that we are deriving now from the recent discoveries in Alaska.

The tax credits for insulation of homes was passed a year ago and already in an embryonic stage of use. Of this ability for families to take credit on the income taxes to insulate their own homes—which they should do anyhow—about 10 percent of the middle- and upper-class families, the ones who pay the most income taxes, are already participating. That percentage will undoubtedly grow.

I'd like to point out one other thing to you. We have established, to make sure that energy supplies are distributed quickly and equitably in your region, a fuel oil management group. The headquarters for this group will be in Boston. It's already been constituted. It's comprised of representatives from the Department of Energy, the Department of Agriculture, the Department of Transportation, and, to make sure that in cases of heavy snowfall or icing of waterways that we can overcome those difficulties rapidly, the Coast Guard and the Corps of Engineers.

The primary coordinating effort will be through the Governors, so that if a dis-

tribution problem should arise during this winter, this group is already in existence, planning carefully to avoid mistakes and to avoid interruptions in supply, but eager to correct defects in the distribution whenever they should become apparent.

Our Nation is in a state of transition, from a time when fuel was so cheap that we never gave it a thought to a time when fuel is becoming so expensive that we can think of little else. And it's very important that all of us—leaders with an effective voice and effective influence—unite.

The delays have been unwarranted. They've damaged our country. We should have had a national energy policy 5, 6 years ago. The challenges have not been easy to overcome. The questions have not been easy to answer. The problems have not been easy to solve. But it's too late to try to find scapegoats, to try to affix blame for delays. Now is the time for us to work together, to recognize that we have a common problem, a common challenge, that we face common questions.

All the Governors on this platform and I represent the same people. We're in it together. We need not fear the future. It may be that the early warnings and the increasing prices, which were inevitable in any case, have come at a time to restore our Nation's integrity and to improve our Nation's security.

We've been blessed beyond all other nations, even in the field of energy. In its totality, our country has about 24 percent of all the energy supplies known on Earth. The OPEC nations all put together have about 5 percent. But ours are in forms that have not yet been adequately tapped—hydroelectric power, wood, coal, oil, geothermal supplies, natural gas, shale, tar sands. They are ready to be tapped by a nation that can marshal its resources in an effective way, which can unite with one another and not be divided from one another as we grasp for some selfish advan-

tage in a time of transient shortage or transient inconvenience.

We've been blessed not only with reserve supplies of energy; we've been blessed with a form of government that makes us quickly sensitive to the needs and demands of the American people; and we've been blessed with the free enterprise system, which encourages innovation, dynamism, competition, and flexibility. So, we have everything on our side.

And with the passage of the proposals that I submitted to the Congress in April of 1977 and again in July of this year, our country will have the framework, with a comprehensive energy policy based on financing with the windfall profits tax, to meet this challenge successfully.

There is no reason for us to fear. We're going through a temporary time of inconvenience and rapid change. We were not adequately prepared for it by past action, but now we understand the problem much better.

My only plea to you in closing is this: that we not be divided one from another, that we not be confused or deluded, that we not dream of the restoration of past times when oil was plentiful and cheap. It'll never come back. The chances are, in the future, that oil will be less plentiful, and it's certain that oil will be more expensive. But we can accommodate this change, because God has given us such tremendous blessings in our free Nation, an opportunity to cooperate. And we should not be distracted by allegations of impropriety among those who occupy positions of leadership.

We all have the same motivations: to have a nation strong, competent, united, determined, concerned about those who are less fortunate than we, recognizing that we are a world leader, and recognizing that our Nation must be secure. All these goals can be achieved if we work together, and I have no doubt that you and I together and other Americans who share

our common purpose can assure, without further delay, that we will make the greatest nation on Earth even greater in the future.

Thank you very much.

NOTE: The President spoke at 9:20 a.m. in the Grand Ballroom at the Biltmore Plaza Hotel.

The summit was sponsored by the Coalition of Northeastern Governors.

Cranston, Rhode Island

Remarks at a Governor's Reception for Civic and Community Leaders. October 29, 1979

Governor Garrahy, Senator Pell, Senator Chafee, Congressman St Germain, my good friend John Pastore, ladies and gentlemen:

It's an honor for me to be here.

I think that one of the best things we can do is to learn. Senator Pastore is a man—a son of Cranston, a statesman from Rhode Island—who was elected Governor twice, elected to the U.S. Senate four times. He gave reelection a good name. *[Laughter]* He's truly an inspiration to me. *[Laughter]* And I want to thank him for being here, and all of you.

Harry Truman also said that anyone who pays too much to personal popularity or who makes decisions that affect the well-being of our Nation on the basis of public opinion polls is not worthy to be President of this country. It's nice to have both—*[laughter]*—to do what's right, to do what's correct, just, and also to be popular. He couldn't do it, and I've not found it possible either.

In April of 1977, when I went to you on television and to the Congress in a Joint Session, I pointed out in my evening television address that to present a comprehensive energy policy to the Congress for adoption would undoubtedly cost me 15 percentage points in the public opinion

polls. It was one of the few mistakes I've made. *[Laughter]* I grossly underestimated how unpopular that would prove to be.

But in the long run it has been the right thing to do, and the Congress, with your help, is now moving in a courageous way toward evolving for us, in law, a substantive and permanent and adequate national energy policy. It's long overdue. It'll give us a framework around which we can build our lives, around which State and local governments can cooperate with one another and with the Federal Government, and around which private citizens can make decisions that will be right for themselves, for their families, for their communities, and also for our Nation.

I'm very grateful that I had a chance this morning to come and speak to and meet with the Coalition of Northeastern Governors. They have, along with you, been in the forefront of exploring for new ways to accommodate rapid change. And we live in a country where rapid change is now and will be part of our lives, but we have got a country that is resilient. We're tough; we're strong; we still have a pioneer spirit. The American people respond when they have a clear guidance and an understanding and are told the truth about the problems that we face and the challenges that confront our Nation.

We have never failed in history to unite in a time of crisis when the well-being of our Nation was at stake. In the past we've had an advantage, however, in some ways. In the First World War we knew what the challenge was; we united. During the Great Depression, we knew what the challenge was. It was not quite so well defined, but we drew ourselves together in a common purpose and with a common spirit. We worked together, and we prevailed. In the Second World War the challenge was evident. The American people united in a com-

mon purpose, with a common commitment, with courage, and we prevailed.

And now there's a rapidly developing understanding that our Nation is challenged or threatened even again, and we are uniting finally. And when we do unite and work together toward a common purpose of having energy security, we will prevail. This is inherent in the character of American people.

We're different. One of the strengths of our country is our extreme diversity. We're a nation comprised of people from every nation on Earth. Hundreds of different languages are known by Americans. Wide-ranging ethnic heritages, customs, religious beliefs are preserved, because they are precious to us. Blood ties to other countries are precious to us. But at the same time, we put our differences apart or aside when our country is threatened, and we unite toward a common purpose.

We're a nation of immigrants, yes, we're even a nation of refugees, but that gives us strength, not weakness. And I'm very proud of what this has done in the last few weeks in our country. People are aroused to meet this challenge successfully.

One of the most important characteristics of American governmental system is our system of federalism—federalism, the coalition prescribed under our Constitution and laws for cooperation between a county official, a mayor, a Governor, a President, a Member of the Congress, because every mayor in this room, every county official in this room represents exactly the same people that I do. There's no difference of approach; there's no difference of responsibility.

And one of the most debilitating things in a time like this is for there to be an attempt made politically to benefit because our Nation is being challenged. It's not a time to grasp for selfish advantage. It's a time for us to put aside differences,

except in an open debate that's part of democracy, and work toward the future. We've done it in many ways.

Your Governor has been a superb example of what can be done. I remember when I was inaugurated President, the State in this country that had the highest unemployment rate was Rhode Island. The unemployment rate in Providence, Rhode Island, was more than 10 percent. Now it's less than 6 percent. The unemployment rate in the entire State of Rhode Island was 9½ percent. Now it's less than 6 percent.

There was a transformation taking place in your State and in your local communities that was very difficult. But because of good cooperation and the analysis of a common problem and the sharing of information, the tough arguments at times about how best to reach a goal, we have been successful jointly.

We've tried to organize the Federal Government to meet your needs more efficiently, when there was cooperation. I remember the devastating snowfall and ice storm that occurred in your State. It was one of the biggest burdens placed on their communities in years. But there was a good sharing, without recrimination, without blame, without casting stones, and we shared the responsibility along with the private citizens here and prevailed.

One great opportunity that we have as well now is to bring prosperity to our downtown urban areas in large cities and also middle- and small-sized cities. There is a sharing of responsibility here. The Department of Transportation has been working with your Governor and local officials to bring about a relocation of the Providence, Rhode Island, station complex and move it closer to your State Capitol. This will be a successful project that will give your downtown area a stimulus that will give you a better life for all people in this region in the years to come.

These are the kinds of cooperative efforts that pay rich dividends for us all.

I'd like just to mention two other things that extend far beyond Cranston or Providence or Rhode Island, even Washington. Ours is a strong nation. We are a nation at peace. I'm the first President in 56 years that has served so far without a single American being killed in combat overseas. This is not a personal triumph for me, but it's an indication that our Nation is a peace-loving nation. But we are a peace-loving nation that understands that peace can only be ours if we are strong, and we will stay strong.

There's not only a requirement for military strength, which we will maintain second to none, but there's also a requirement that the American people be strong, that we again have that word I used before—unity—and confidence in one another and a common purpose, because the best way that we can have peace is for any potential adversary to know that America is militarily strong, economically strong, politically strong, that we have the will and resolve to protect ourselves, but also that we are a nation which is morally strong, that our ethical standards are high, that the principles on which our Nation was founded still prevail.

I think we've had a remarkable demonstration of that just recently. When the Holy Father came here, Pope John Paul II, the reception that he received in our country was unanticipated and startling in its significance. I had a few minutes with him privately in the Oval Office, after we greeted the Members of the House and Senate, the Cabinet, the Supreme Court Justices, and others, and I asked if he was surprised. He said yes. And I said I was, too. "I knew that you'd be received with open arms and with friendship and hospitality in our country, but I never dreamed that you would have 1½ million people assembled in Grant Park in Chicago," the biggest group of

people ever assembled in the United States for any purpose, and the overwhelming response from people of all faiths to him and kind of an outpouring, a demonstration of the hunger for the characteristics of life which never change.

Things do change that cause us concern, but there are some things that never change—the strength of families, basic commitments to love, to understanding, to compassion, to unselfishness. Those never change.

And I'm very grateful that we live in a country of that kind that is strong, that can accommodate change, that can bear inconvenience, that can marshal our forces together when our Nation is tested, that can put aside personal differences of background and commitment and interest and unite for a common purpose, that has a system of government that can meld us together to serve the same people, and where our standards of morality and ethics are the underlying, girding strength that provides the basis for everything else which we hope to achieve. It makes me proud to be President of a country like that—my country and your country.

Thank you very much.

NOTE: The President spoke at 10:22 a.m. in the Narragansett Ballroom at the Cranston Hilton Hotel.

United States Ambassador to Swaziland

*Nomination of Richard C. Matheron.
October 29, 1979*

The President today announced that he will nominate Richard C. Matheron, of Bakersfield, Calif., to be Ambassador Extraordinary and Plenipotentiary of the United States to the Kingdom of Swaziland. He would replace Donald R. Norland, who has been transferred to another position. Matheron was Deputy Chief of

Mission in Addis Ababa from 1977 until earlier this year.

He was born April 13, 1927, in Oxnard, Calif. He received a B.A. from the University of California at Berkeley in 1948.

Matheron began his career with the State Department in 1949 and was posted in Paris, Saigon, and Rome. From 1959 to 1960, he was an intelligence research specialist at the State Department. In 1960–61 he took African studies at the University of California at Los Angeles.

From 1961 to 1964, Matheron was a political officer, stationed in Lagos, Yaounde, and Kinshasa. From 1964 to 1965, he was principal officer in Bukavu. In 1965–66 he attended the Armed Forces Staff College.

From 1966 to 1967, Matheron was Executive Secretary of the Agency for International Development in Saigon. He was at the State Department from 1967 to 1972 as an international relations officer, then a political-military officer. From 1970 to 1972, he was counselor for political affairs, then Deputy Chief of Mission in Ouagadougou.

From 1972 to 1974, he was Deputy Chief of Mission in Tananarive. He attended the National War College in 1974–75. From 1975 to 1977, he was a foreign service inspector.

President's Commission on the Accident at Three Mile Island

*Remarks on Receiving the Commission's
Final Report. October 30, 1979*

I've just met with Dr. Kemeny, the Chairman, and with the members and the staff of the Commission to investigate the accident at Three Mile Island. And I've received the Commission's final report, which has just been delivered to me this morning.

As I indicated when the Commission was formed, its task was one of the most important which has ever been assigned to a Presidential commission. Its findings and its recommendations will be studied very carefully by me, by the members of my administration, the Congress, the American public at large, members of the industry, and, I think, indeed, many leaders in foreign countries, who've been waiting to see what the Commission's analysis and recommendations would comprise.

They have fulfilled this extremely challenging task with the greatest degree of care and dispatch. Over a 6-month period they have met frequently. They've investigated thoroughly. The attendance at the meetings has been almost perfect, and each member, highly diverse among themselves, has been a great contribution to the overall recommendations.

The staff and the Commission members deserve the gratitude of the American people, and on behalf of our Nation, Chairman Kemeny, I want to thank you personally and, for all of us, for the great work you've done.

This accident at Three Mile Island brought home the need to assure that nuclear power is as safe as possible. This report will guide us all in learning about the accident itself and in assuring the higher degree of safety for our citizens.

Throughout my own Presidency, I've given a high priority to furthering the safety of nuclear energy. It has been and will continue to be one of the most critical tasks of our generation. The Commission has made many far-reaching recommendations to improve nuclear safety—I think, specifically, 44 different recommendations—and these far-reaching recommendations deserve our immediate and careful attention and study.

This is a complicated report. It's highly technical in nature in some respects and will require very careful assessment. Some of its recommendations can be carried out

by the industry, some by me through Executive order, some will require legislative recommendations and decisions by the Congress.

Our own assessment and our decisions on what to do cannot be made immediately, and we'll have to be very careful and very methodical in our recommendations to the public. After my advisers and I complete our analysis, then I will report to the Congress and to the Nation on further steps which are needed to improve and protect the public health and safety as it relates to nuclear power.

The Commission will now be disbanded, but I've asked the Commission members and, particularly, Chairman Kemeny to make themselves available to me in case there are followup questions that we need to have answered or additional consultations with them on specific recommendations included in the report.

This afternoon at 1:30, Dr. Kemeny and the members of the Commission and staff will have a definitive briefing for the press, but I wanted to express my thanks to him and to the Commission at this point. And he will be available to you and others during the afternoon to answer more specific questions.

Dr. Kemeny, thank you very much, on behalf of our country.

NOTE: The President spoke at 11:37 a.m. to reporters assembled in the Briefing Room at the White House.

Department of Education

Statement on the Nomination of Shirley Hufstedler To Be Secretary. October 30, 1979

Judge Shirley Hufstedler has one of the best minds in the country. To fill the position of first Secretary of the new Department of Education, I wanted a strong, creative thinker who could take a new, fresh look at the way we educate our

children. In Judge Shirley Hufstедler, we have found that person.

She is deeply committed to the quality of education and enjoys my full confidence and support. I am certain she will be an outstanding Secretary.

NOTE: Deputy Press Secretary Rex Granum read the President's statement at approximately 11:45 a.m. to reporters assembled in the Briefing Room at the White House, after announcing that the President will nominate Judge Hufstедler to be Secretary of Education.

Also included in the press release is a question-and-answer session with reporters.

Research Apprenticeships Program

*Announcement of the Program.
October 30, 1979*

The President today announced a program of apprenticeships in research laboratories for minority high school students, beginning in the summer of 1980. The program was developed by Jim McIntyre, Director of the Office of Management and Budget, and Frank Press, Director of the Office of Science and Technology Policy, together with Special Assistants to the President Louis Martin and Esteban Torres.

The objectives of this research apprenticeships program are to stimulate broader interest in minority communities in careers in science and engineering and to establish individual working relationships between students and active researchers. The program is designed to strengthen the Nation's and the Government's efforts to recruit and sustain minority students in science and engineering fields. The numerical goal for 1980 is to employ at least 1,000 students in summer jobs through this program. The goal for subsequent years is 2,000.

Participating agencies are the Department of Defense, the Department of Energy, the National Institutes of Health, the National Science Foundation, the Department of Agriculture, the National Aeronautics and Space Administration, and the Environmental Protection Agency.

Individual researchers who wish to participate in the program will submit a supplemental request to existing or pending research grants and contracts. The request will state the kinds of work experience which can be offered, the routes through which interested students will be sought in local or other high schools, and the special activities that will be organized to provide educational enrichment beyond the work itself.

The student and the researchers will be expected to submit a brief evaluation of the experience, to guide assessment and expansion of the program.

Department of Energy

Nomination of George W. Cunningham To Be an Assistant Secretary. October 30, 1979

The President today announced his intention to nominate George W. Cunningham, of Newbern, Tenn., to be Assistant Secretary of Energy for Nuclear Energy. Cunningham has been Deputy Chief of the U.S. Mission to the International Atomic Energy Agency in Vienna, Austria, since 1978.

He was born December 3, 1930, in Union City, Tenn. He received a B.S. in chemical engineering and an M.S. in metallurgy from the University of Tennessee and a Ph. D. in metallurgical engineering from Ohio State University.

From 1955 to 1966, Cunningham was with the Batelle Memorial Institute. From 1966 to 1978, he was with the Atomic

Energy Commission and its successor agencies, beginning as a metallurgical engineer and finally serving as Program Director of Nuclear Energy with the Energy Department.

Department of Energy

Nomination of Thomas E. Stelson To Be an Assistant Secretary. October 30, 1979

The President today announced his intention to nominate Thomas E. Stelson, of Atlanta, Ga., to be Assistant Secretary of Energy for Conservation and Solar Applications. He would replace Omi Walden, who is assuming the position of Adviser to the Secretary for Conservation and Solar Marketing. Stelson has been vice president for research of Georgia Institute of Technology's College of Engineering since 1974.

He was born August 24, 1928, in Iowa City, Iowa. He received bachelor's (1949), master's (1950), and doctoral (1952) degrees from Carnegie Institute of Technology.

From 1952 to 1971, Stelson was on the faculty at Carnegie-Mellon University, where he served as head of the department of civil engineering from 1959 to 1971 and Alcoa Professor from 1961 to 1971. From 1971 to 1974, he was dean and professor of civil engineering at Georgia Tech.

District of Columbia Law Revision Commission

Reappointment of Stephen I. Danzansky as a Member. October 30, 1979

The President today announced that he has reappointed Stephen I. Danzansky as

a member of the District of Columbia Law Revision Commission for a 4-year term.

Danzansky, 40, is a Washington attorney who has served on the board of directors of Self Determination for D.C. Metropolitan Commission and serves as special counsel to the Citizen Coalition for Planning and Zoning Reform of the District of Columbia.

Office of the Special Representative for Trade Negotiations

Nomination of Robert Hormats To Be a Deputy Special Representative. October 30, 1979

The President today announced that he will nominate Robert Hormats, of Chevy Chase, Md., to be Deputy Special Representative for Trade Negotiations. He would replace Alonzo McDonald. Hormats has been Senior Deputy Assistant Secretary of State for Economic and Business Affairs since 1977.

He was born April 13, 1943, in Baltimore, Md. He received an M.A. (1966), an M.A.L.D. (1967), and a Ph. D. (1969) from Fletcher School of Law and Diplomacy.

Hormats was a staff member, then senior staff member, on the National Security Council from 1969 to 1973. He was a guest scholar at the Brookings Institution and an international affairs fellow of the Council on Foreign Relations from 1973 to 1974. He also served as a senior consultant to the Commission on Critical Choices for Americans in 1973.

From 1974 to 1977, Hormats was senior staff member for international economic affairs at the National Security Council.

Office of the Special Representative for Trade Negotiations

Nomination of Michael B. Smith To Be a Deputy Special Representative.
October 30, 1979

The President today announced that he will nominate Michael B. Smith, of Potomac, Md., to be Deputy Special Representative for Trade Negotiations. He would replace Alan Wolff, resigned. Smith has been chief negotiator for textile matters of the United States since 1975.

He was born June 16, 1936, in Marblehead, Mass. He graduated from Harvard College in 1958.

Smith joined the Foreign Service in 1958 and was stationed in Tehran and N'Djamena, Chad. He was Staff Assistant to the Under Secretary for Economic Affairs from 1965 to 1966. From 1967 to 1968, Smith was deputy principal officer in Strasbourg, and from 1969 to 1970, he was principal officer in Lyon.

Smith was assigned to the White House in 1970 as Chief of Presidential Correspondence. In 1973 he was reassigned to the State Department as Deputy Chief of the Fibers and Textiles Division, and in 1974 he became Chief of the Division.

United States Ambassador to Burma

Nomination of Patricia M. Byrne.
October 30, 1979

The President today announced that he will nominate Patricia M. Byrne, of South Euclid, Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Socialist Republic of the Union of Burma. She would replace Maurice Bean, resigned. Byrne has been Ambassador to the Republic of Mali since 1976.

She was born June 1, 1925, in Cleveland, Ohio. She received an A.B. from Vassar College in 1946 and an M.A. from the Johns Hopkins University School of Advanced International Studies in 1947.

Byrne joined the Foreign Service in 1949 and was posted in Athens, Saigon, Izmir, Ankara, and at the State Department. She was a member of the U.S. Delegation to the 1961-62 Geneva Conference on Laos, and was political officer in Vientiane from 1962 to 1963.

She was at the State Department from 1964 to 1968 in positions including Chief for East Asia Personnel and Special Assistant to the Deputy Under Secretary for Administration. In 1968-69 she attended the National War College.

From 1969 to 1972, Byrne was political officer in Paris for Asian affairs, and from 1972 to 1975, she was Deputy Chief of Mission in Colombo. In 1975-76 she took the senior seminar in foreign policy at the Foreign Service Institute.

United States Coordinator for Refugee Affairs

Exchange of Letters on the Resignation of Ambassador at Large Dick Clark.
October 30, 1979

To Dick Clark

Fritz¹ had reported to me your pledge to remain neutral in the political campaign and to devote your efforts to assisting refugees and other suffering people. I consider this work to be of transcendent importance.

Therefore, I accept your resignation with regret, and appreciation.

JIMMY CARTER

¹ EDITOR'S NOTE: Vice President Mondale.

October 29, 1979

Dear Mr. President:

I am writing to advise you of my decision to resign from the Administration.

I do so with reluctance because of my respect for you personally, because of what you stand for, and what you have tried to accomplish. This decision is made all the more difficult because of my admiration for and friendship with Vice President Walter Mondale.

My original intention was to remain neutral in the Presidential Primary contest. Careful thought and further reflection have convinced me that such a position is untenable and unwise. I think you would agree with me that to remain uninvolved in a matter of such importance to the country is irresponsible. Consequently, I have made my choice. I will be joining Senator Edward Kennedy's Campaign Committee following my resignation.

It is with regret that I leave my present position as Coordinator of Refugee Affairs. It has been a rewarding job. Working with Secretary Vance has been a particular pleasure and a rare opportunity. In January, when the Secretary asked me to take this position, I was reluctant to do so, but he urged me to accept even if only for a few months in order to reorganize scattered jurisdiction and the hodgepodge of existing programs. That objective has now been completed:

—A new Office of Refugee Programs has been established in the Department of State with a Director at the Assistant Secretary level. Previous jurisdictions in the Bureau of International Organization Affairs, the Bureau of Human Rights and Humanitarian Affairs, and the Agency for International Development are now under that single authority.

—An Interagency Committee on Refugee Affairs has been established and is working effectively to coordinate all

existing refugee programs in the Government, both foreign and domestic.

—The Refugee Act of 1979 has passed the Senate (85-0) and will be voted on in the House in the next few days. It is the first comprehensive refugee legislation in the nation's history and will end existing inequities and inconsistencies in our refugee program.

—With your support, we have increased our refugee resettlement program to over 200,000 annually, and the appropriation for implementation has now passed both Houses. The authorization has passed the House and is to be taken up in the Senate in the next day or two.

—Much has been accomplished in achieving a greater burden sharing by the international community in dealing with Indochinese refugee problems.

In summary, those tasks assigned to me in January have now been accomplished with the support of others in the Administration and in the Congress. An effective Coordinator will be needed to give direction to these on-going programs, but I am confident that such a person can be found.

Therefore, I am resigning effective November 1, but will, of course, be available to assist in any way I can.

Again, thank you for your many kindnesses. It has been a privilege to work with you.

Sincerely,

DICK CLARK
Dick Clark

[The President, The White House, Washington, D.C.]

Alaska Public Lands Legislation

*Statement on Approval by the Senate Energy and Natural Resources Committee.
October 30, 1979*

I am pleased to note that the Senate Energy and Natural Resources Commit-

tee voted to report the Alaska lands bill earlier this afternoon. While the protections afforded by the committee's bill are not as substantial as those which I originally proposed and which I continue to support, the committee's action today is an important step.

I would like to commend Senator Jackson and the other members of his committee who have devoted their time and energy to this legislation. In particular, I would like to express my thanks to Senator Tsongas, who has led the effort in committee to strengthen the bill.

The passage of legislation protecting Alaska's priceless natural heritage is the highest environmental priority of my administration. The legislation I proposed to the Congress not only protects Alaska's cultural and natural heritage but also accommodates the need for balanced development of Alaska's natural resources. Earlier this year the House passed such a bill. I am hopeful that the Senate will as well.

Industrial Innovation Initiatives

Remarks Announcing a Program To Encourage Innovation. October 31, 1979

One of the most important responsibilities that I have as President is to make sure that in the 1980's, and also now, we have a strong and vital economy with adequate job opportunities and with the competitive position of our country maintained in world markets and also in giving our own people a better quality of life. We have additional problems in controlling inflation, solving our energy problem, dealing with housing needs, improving our agricultural communities, and many others in a list of important considerations for every American.

Since I've been in office, we've tried to

form a very close partnership with the different elements of American society, particularly in the private sector, and, in addition to that, to restore what we had begun to lose in a very serious fashion, and that is the innovative nature of the American free enterprise system and our initiatives that, in the past, have been one of our most precious resources of our country.

Today I'm announcing a program and sending a message to Congress which will significantly enhance our Nation's industrial innovative capacity and thereby help to revitalize America's industrial base. This program is the result of a thorough, 18-month analysis, and it's been conducted by the Domestic Policy Staff, by representatives from the private sector of our economy, and also, in particular, by the Department of Commerce. It represents the most wideranging initiative ever made to spur initiative and innovation and to unleash America's creative genius.

Industrial innovation, or the development and commercialization of new products and new processes, is an essential, but increasingly overlooked factor in a strong and growing American economy. This will help to ensure economic vitality, improve productivity, international competitiveness, the creation of jobs, and a better quality of life for every American.

Further industrial innovation is necessary if we are to solve some of our Nation's most pressing problems—restraining the cost of products and thereby reducing inflation, providing new energy supplies and better conserving existing supplies of energy, ensuring adequate food production for ourselves and for the world's population, protecting our environment and our natural resources, and improving health care for every American.

Our Nation's history, as you know, is filled with a rich tradition of industrial innovation. For over a century, America

has been the world's leader in developing new products, new processes, new technologies, and also new ways of assuring wide distribution of new products and their beneficial use by humanity.

We are still the world's leader, but our products are meeting with growing competition from abroad. Many of the world's leading industrial countries are now attempting to develop competitive advantages through their own innovative capability and an increasing concentration of their efforts in this realm of economic life. This is a challenge which we can no longer afford to ignore. To respond to this challenge, we must initiate our own policies to foster the Nation's competitive capability and entrepreneurial spirit in the decades ahead.

The actions that I'm announcing today meet this goal. First of all, they will loosen some of the stifling restraints that have been placed upon innovation by government. Secondly, they represent a first major step toward forging a public and private partnership which will rally cooperative efforts to spur industrial growth. Third, they will enhance our economic position, in enabling America's industry to develop and to market new processes and products, both here in our own country and also abroad.

These actions will be detailed to you shortly, and they include the development, for the first time in our history, of a uniform Government patent policy. This will foster the widest possible use of the results of Government-supported research and, at the same time, will protect the interests of the Government and, therefore, the population of our country at large.

We'll also include the widest possible dissemination in this country of technical information which is developed in Government laboratories, in universities and private industry through Government-

sponsored research, in other industrialized nations, and also buried in our own patent files. The derivation and promulgation of this available information throughout the American economic system will be enhanced greatly by this new proposal.

Programs to encourage the cooperative development of vitally needed resources and technologies are now largely ignored. We will establish two corporations for industrial development, specifically to assist small businesses. A lot of the innovation and initiative comes from small business. This will be a major target of our innovative processes and efforts, because small businesses do, quite often, have startup problems.

These actions, along with others that will be outlined as part of this program, will make a major difference in our Nation's ability to develop and to pursue industrial innovation.

I'd like to point out, however, that this will not solve the problem alone. This problem has arisen over a long period of years. It's recognized as being a serious problem by labor, by industry, and by government at all levels. There's no doubt about it. And it will take years to overcome the problem in its entirety. It will also require a sound economic climate. But the two are mutually supportive. More innovation will help the economic climate; a better economic climate will also help to encourage innovation.

Today's announcement does represent an important first step in dealing specifically with this problem of industrial innovation and more generally with similar types of economic problems that will be facing our country in the 1980's. With the cooperation of the private sector and the Congress, these problems of today, which are different in many ways and in major ways from those we've experienced before, can be solved. I'm committed to work toward their resolution.

Secretary Juanita Kreps will now provide some additional words about the program and answer questions from you.

Unfortunately for me and for our Nation, this is one of her last days in office. And I want to take this opportunity to commend her on her fine work on this program, typical of a superb performance that she has exhibited for us in this country as Secretary of Commerce, and I am particularly grateful to her for the great work that she's done in the last 34 months. She's already promised to make her advice and counsel and services available to us when she retires from this public job. But there's no way I can adequately express my personal thanks to her and the thanks on behalf of a grateful nation.

Secretary Juanita Kreps.

NOTE: The President spoke at 9:37 a.m. to reporters assembled in the Briefing Room at the White House.

Following the President's remarks, Secretary of Commerce Juanita M. Kreps, Frank Press, Director of the Office of Science and Technology Policy, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Jordan Baruch, Assistant Secretary of Commerce for Science and Technology, held a news conference on the program.

Industrial Innovation Initiatives

Message to the Congress on Administration Actions and Proposals. October 31, 1979

To the Congress of the United States:

Industrial innovation—the development and commercialization of new products and processes—is an essential element of a strong and growing American economy. It helps ensure economic vitality, improved productivity, international competitiveness, job creation, and an improved quality of life for every American. Further, industrial innovation is necessary if we are to solve some of the Nation's

most pressing problems—reducing inflation, providing new energy supplies and better conserving existing supplies, ensuring adequate food for the world's population, protecting the environment and our natural resources, and improving health care.

Our Nation's history is filled with a rich tradition of industrial innovation. America has been the world leader in developing new products, new processes, and new technologies, and in ensuring their wide dissemination and use. We are still the world's leader. But our products are meeting growing competition from abroad. Many of the world's leading industrial countries are now attempting to develop a competitive advantage through the use of industrial innovation. This is a challenge we cannot afford to ignore any longer. To respond to this challenge, we must develop our own policies for fostering the Nation's competitive capability and entrepreneurial spirit in the decades ahead. This Message represents an important first step in that direction.

I am today announcing measures which will help ensure our country's continued role as the world's leader in industrial innovation. These initiatives address nine critical areas:

- Enhancing the Transfer of Information
- Increasing Technical Knowledge
- Strengthening the Patent System
- Clarifying Anti-trust Policy
- Fostering the Development of Small Innovative Firms
- Opening Federal Procurement to Innovations
- Improving Our Regulatory System
- Facilitating Labor/Management Adjustment to Technical Change
- Maintaining a Supportive Climate for Innovation.

INITIATIVES

1. *Enhancing the Transfer of Information.* Often, the information that underlies a technological advance is not known to companies capable of commercially developing that advance. I am therefore taking several actions to ease and encourage the flow of technical knowledge and information. These actions include establishing the Center for the Utilization of Federal Technology at the National Technical Information Service to improve the transfer of knowledge from Federal laboratories; and, through the State and Commerce Departments, increasing the availability of technical information developed in foreign countries.

2. *Increasing Technical Knowledge.* We have already made significant efforts to assure an adequate investment in the basic research that will underlie future technical advances. This commitment is reflected in a 25 percent growth in funding during the first two years of my Administration. I am taking some additional steps that will increase Federal support for research and development:

First, I will establish a program to cooperate with industry in the advancement of generic technologies that underlie the operations of several industrial sectors. This activity will broaden the \$50 million initiative I announced in May to further research in automotive research. Second, in order to help harness the scientific and technological strength of American universities, I have directed a significant enhancement in support of joint industry-university research proposals. This program will be modeled on a successful program at the National Science Foundation, and I have set a target of \$150 million in Federal support for it.

3. *Strengthening the Patent System.* Patents can provide a vital incentive for innovation, but the patent process has become expensive, time-consuming, and

unreliable. Each year, fewer patents are issued to Americans. At my direction, the Patent and Trademark Office will undertake a major effort to upgrade and modernize its processes, in order to restore the incentive to patent—and ultimately develop—inventions. I will also seek legislation to provide the Patent and Trademark Office with greater authority to re-examine patents already issued, thereby reducing the need for expensive, time-consuming litigation over the validity of a patent.

For over thirty years the Federal agencies supporting research and development in industry and universities have had conflicting policies governing the disposition of pertinent rights resulting from that work. This confusion has seriously inhibited the use of those patents in industry. To remove that confusion and encourage the use of those patents I will support uniform government patent legislation. That legislation will provide exclusive licenses to contractors in specific fields of use that they agree to commercialize and will permit the government to license firms in other fields. If the license fails to commercialize the inventories, the government will retain the right to recapture those rights. I will also support the retention of patent ownership by small businesses and universities, the prime thrust of legislation now in Congress, in recognition of their special place in our society.

4. *Clarifying Anti-trust Policy.* By spurring competition, anti-trust policies can provide a stimulant to the development of innovations. In some cases, however, such as in research, industrial cooperation may have clear social and economic benefits for the country. Unfortunately, our anti-trust laws are often mistakenly viewed as preventing all cooperative activity.

The Department of Justice, at my direction, will issue a guide clearly explaining its position on collaboration among firms

in research, as part of a broader program of improved communication with industry by the Justice Department and the Federal Trade Commission. This statement will provide the first uniform anti-trust guidance to industrial firms in the area of cooperation in research.

5. *Fostering the Development of Small Innovative Firms.* Small innovative firms have historically played an important role in bringing new technologies into the marketplace. They are also an important source of new jobs. Although many of the initiatives in this Message will encourage such companies, I will also implement several initiatives focused particularly on small firms.

First, I propose the enhancement by \$10 million of the Small Business Innovation Research Program of the National Science Foundation. This program supports creative, high-risk, potentially high-reward research performed by small business. Further, the National Science Foundation will assist other agencies in implementing similar programs, with total Federal support eventually reaching \$150 million per year.

Second, in order to experiment with ways to ease the ability of small firms to obtain start-up capital, I will help establish two Corporations For Innovation Development to provide equity funding for firms that will develop and market promising high-risk innovations. These not-for-profit firms will be established with State or regional capital and the Federal government will provide each with matching loan funds up to \$4 million.

6. *Opening Federal Procurement to Innovations.* The Federal government is the Nation's largest single purchaser of goods and services. Through its purchases, the Federal government can influence the rate at which innovative products enter the market.

For that reason, I am directing the

Office of Federal Procurement Policy to introduce procurement policies and regulations that will remove barriers now inhibiting the government from purchasing innovative products. Special attention will be given to substituting performance for design specifications and, wherever feasible, selection will be on the basis of costs over the life of the item, rather than merely the initial purchase price.

7. *Improving our Regulatory System.* During my Administration, I have already taken a number of actions to help assure that regulation does not adversely affect innovation. Working with the Congress, I have moved successfully toward deregulation of airlines and other industries, and I expect the pressure of competition to trigger innovative new ways to cut costs and improve service. In environmental, health and safety regulation, I have emphasized the use of cost-impact analysis, where appropriate, to take account of the burdens on industry in the regulatory process. To provide better coordination between the regulatory agencies, I have created the Regulatory Council, composed of the heads of 35 regulatory agencies. This Council is working to reduce inconsistencies and duplications among regulations, to eliminate needless rule-making delays, to reduce paperwork, and to minimize the cost of compliance.

I am today proposing additional steps to improve our regulatory system. First, the Administrator of EPA will intensify his efforts, wherever possible, to use performance standards in regulations, specifying only the required goal, rather than the means of achieving it. Second, all Executive Branch environmental, health and safety regulatory agencies will prepare a five-year forecast of their priorities and concerns. This information will give industry the time to develop compliance technology. Third, all administrators of Federal executive agencies responsible for clearance of new products will be directed

to develop and implement an expedited process for projects having a strong innovative impact or exceptional social benefit, and to do so without jeopardizing the quality of the review process.

8. *Facilitating Labor and Management Adjustments to Technical Change.* Although innovation can increase the number of workers employed within an industry over the long term, or even create an entire new industry, individual innovations may occasionally cause workers to be displaced.

In order to assure adequate time for workers and management to adjust to changes caused by innovations, I am directing the Secretaries of Labor and Commerce to work jointly with labor and management to develop a Labor/Technology Forecasting System. The System would develop advance warning of industrial changes and permit timely adjustments.

9. *Maintaining a Supportive Federal Climate.* The initiatives announced in this Message are only the first steps in our efforts to ensure American technological strength. We must also develop and maintain a climate conducive to industrial innovation. The Federal government must take the lead in creating that climate. And the Federal government's efforts must be continuing ones. I am committed to these goals.

I am charging the National Productivity Council with the continuing tasks of monitoring innovation, developing policies to encourage innovation and assisting the Departments and agencies in implementing the policies announced today. I am also establishing a Presidential award for technological innovation to make clear to this Nation's inventors and entrepreneurs that we place the highest national value on their contributions.

Each of the initiatives I have just proposed supports an important component in the innovation process. In combina-

tion, these initiatives should make a major difference in our Nation's ability to develop and pursue industrial innovation. However, these incentives will not by themselves solve our current difficulties in encouraging needed innovation. In our economic system, industrial innovation is primarily the responsibility of the private sector. The manager of the firm must decide whether to develop and market innovative new products or whether to find and employ new ways of making existing products. Although the Federal government can establish a climate that encourages innovative activity, it is the private sector that finally determines whether innovation will take place.

In addition, the steps outlined in this Message must be viewed in the context of our current severe inflation problem. With costs rising at an abnormally high rate, managers naturally have a disincentive to spend the sums needed for adequate industrial innovation. I understand and fully appreciate that changing certain of our tax laws could provide additional incentives for investment in innovation. Indeed, my approval of adjustments in the capital gains tax in the Revenue Act of 1978 has alleviated some shortages of venture capital. Many of the suggested alterations of our tax system are intertwined with other economic challenges—such as fighting inflation. While it might be possible to make changes in the tax code that would promote innovation, these changes should not be viewed in isolation from other aspects of our economy. I will therefore evaluate tax laws affecting industrial innovation at the time that I consider my fiscal policies for Fiscal Year 1981.

CONCLUSION

Innovation is a subtle and intricate process, covering that range of events from the inspiration of the inventor to the

marketing strategy of the eventual producer. Although there are many places in the chain from invention to sale where we have found modification of Federal policy to be appropriate, there is no one place where the Federal government can take action and thereby ensure that industrial innovation will be increased. We have therefore chosen a range of initiatives, each of which we believe to be helpful. In aggregate, we expect them to have a significant impact. Nonetheless, they represent only an early skirmish in what must be a continuing battle to maintain the technological strength of the American economy. I pledge myself to this task and ask the Congress to join me in meeting our common challenge.

JIMMY CARTER

The White House,
October 31, 1979.

Small Business Administration

Memorandum From the President.
October 31, 1979

Memorandum for A. Vernon Weaver

Subject: The Small Business Administration's (SBA) Membership on the Regulatory Council

When I established the Regulatory Council last year I directed that it be the focal point of efforts to assess the cumulative impact of regulation and to coordinate Federal regulatory activity. I hope that many of the improvements in government regulations that the Council is instituting will be of direct benefit to our nation's small businesses.

Government regulation sometimes poses special problems for small business. The Small Business Administration has done a great deal to make us aware of these problems and has worked closely with regulatory agencies to resolve them. This

is an appropriate time to acknowledge formally the importance of the Small Business Administration's role in the Administration's regulatory reform effort by including SBA as a Council member.

I am pleased to grant your request for membership and I look forward to SBA's participation in the work of the Regulatory Council.

JIMMY CARTER

NOTE: The text of the memorandum was released on November 1.

Panama Canal Commission

Appointment of Fernando Manfredo as Deputy Administrator. November 1, 1979

The President today announced the appointment of Fernando Manfredo as Deputy Administrator of the Panama Canal Commission. Mr. Manfredo, formerly the Panamanian Minister of Presidencia, has been engaged in Panama Canal treaty implementation activities for Panama during the past year.

Mr. Manfredo has been active in local Panamanian civic and business organizations and served as adviser to many private and government organizations in the Republic of Panama.

Death of Mamie Eisenhower

Statement by the President.
November 1, 1979

Rosalynn and I share the sadness of a loving nation at the death of Mamie Eisenhower and send our deepest sympathy to her family.

A warm and gracious First Lady, she carried out her public and private duties, despite a lifetime of fragile health, in a way that won her a special place in the

heart of Americans and of people all over the world. To generations of Americans, in war and peace, she embodied sincerity and traditional values.

As we have missed the General-President whose triumphant life she shared, we will miss this gentle lady.

President's Environmental Youth Awards

*Remarks on Presenting the Awards.
November 1, 1979*

THE PRESIDENT. Hello, everybody. Doug Costle¹ is testifying and is on the way over here, but Barbara Blum and others are present who can represent the Environmental Protection Agency very well.

As President I want to say how grateful I am to all of you for coming, and particularly for the young people who will win the awards. One of the gratifying things about this program is that over 200,000 young Americans have been given awards for outstanding work in protecting the quality of life of American people.

Their projects pay rich dividends as they are conducted and concluded, but they also lay a groundwork for advanced scientists, for Members of Congress, my own administration, and Presidents to see how we can, through these processes, have a better way of preserving our precious heritage and environmental quality.

There's another aspect, I think, that's equally important for now and the future. When a 3-year-old American or an 18-year-old American or anyone in between takes on a project, sometimes they can add a sense of innovation and a freshness of thought that a more senior American would never contribute. And they lay the

groundwork for themselves, in their own lives, to continue this work in years ahead.

I've read down the list of awards and seen the diversity of projects that have been concluded. Some of them are quite exciting and quite productive already.

And at this time Barbara Blum will read the citations, the awards will be given out, and I'd like to congratulate each one of the recipients of the awards personally.

Barbara?

Ms. BLUM. Thank you, Mr. President. I'd just like to echo what Jimmy Carter has said. It's been a great pleasure to work with the youth of this country in his Environmental Youth program and to bring people into the environmental movement and into caring that have never been there before to care and are just beginning to be our future.

Mr. President, today we have four young men who represent the Cub Scout Pack 981 in Annapolis, Maryland. For several weeks they studied aquatic life in marshes in the Chesapeake Bay area—one of the most important areas of our country—and they culminated their studies by doing something pretty creative: They floated popcorn on the water and then followed the popcorn as if it were an oil spill to see the movement of the waters. I think that was very creative.

[At this point, Ms. Blum, Deputy Administrator of the Environmental Protection Agency, introduced Scott M. Laurie, Christopher R. Petchler, Kevin E. Kovelant, and John Woerner to the President, who presented each with an award.]

Next we have something else pretty special—everybody's really pretty special today—but we have three young men from Cincinnati, Ohio, who, as part of the Civil Air Patrol—and they represent a group of children who, with their own money, took courses in radiation monitoring. There is a nuclear facility that's about to open in their area, and now they're

¹ Administrator, Environmental Protection Agency.

going to be prepared in case of an emergency to do monitoring, both air and water.

[Ms. Blum introduced Robert H. Green and Lizbeth A. and Anthony J. Etienne to the President, who presented each with an award.]

Mr. President, this next young woman that we have here today was selected by her very own classmates at Rosemead High School. She is representing them today. Their class made four movies. They made movies on energy, on the environment, on pollution problems. They were the actors, they were the scriptwriters, they were the producers, and they were the distributors of this. They showed the films to civic groups and other schools, and they have made quite a contribution there in educating other people their age and older.

[Ms. Blum introduced Mary Jane Roddy to the President, who presented her with an award.]

Mr. President, next we have some high school students from Lakeland, Florida. They've done something pretty special too. They tested the water quality in the lakes around Lakeland—and we who are from the South know how many there are there—in order to determine, for the area development commission, the quality of the water and the wildlife that was present in the area. And as such, they've done as much for clean drinking water for Florida as any adults ever have in the history of the State.

[Ms. Blum introduced James F. Skinner, Cindi Parker, and Randolph L. Barber to the President, who presented each with an award.]

Mr. President, next we have two campers, summer campers, from the National Wildlife Federation Camp. They spent the whole summer session studying the open areas, studying the woodlands, mapping, compassing, and they also studied the interdependence of animals in the meadows and the forest habitats. And doing this, and through their camping experiences, they have been provided a real

understanding, that they're sharing with their classmates now, on how the natural environment affects the social and historical environments, too.

[Ms. Blum introduced Kimberly Shafer and Nathan Liepold to the President, who presented each with an award.]

And next, as you can well see, we have a Cub Scout, an Explorer Scout, and a Boy Scout. They're representing a coming together of your youth program, Mr. President, and the Boy Scouts of America. There will be 500 young men and women who are going to be participating in promoting energy conservation, at your request and call for energy conservation—5 million within the next year. And these young people are representative of those 5 million people.

[Ms. Blum introduced Michael Birlew, Kevin Ward, and Tana Landgraf to the President, who presented each with an award.]

THE PRESIDENT. I think the entire audience and the news media can see the contributions that these young people have already made and the wide difference among their projects. They've taken this as an initiative on their own, some acting as individuals, some acting as part of very fine organizations, some at summer camps, some within their own home community, some in the ocean, some in the woods, some in the South, some in the North. And they are representative of literally tens of thousands of young people who participated in this youth environment project to make sure that Americans at their age and of all ages know how important it is to preserve the quality of life for our people.

And on behalf of our Nation, I'd like to again express my deep thanks to them, individually and collectively, and also to express my thanks for all those tens of thousands that they represent by coming here to the White House to receive these awards. Thank you very much for being

here. I'm very proud of what these young people have done and what they mean to us now and in the future.

Thank you again, everybody. Now go home and go back to work.

NOTE: The President spoke at 12:10 p.m. in the Rose Garden at the White House.

Council on Environmental Quality

Nomination of Robert H. Harris To Be a Member. November 1, 1979

The President today announced that he will nominate Robert H. Harris, of Fairview, W. Va., to be a member of the Council on Environmental Quality. He would replace Charles Warren, resigned. Harris has been associate director of the toxic chemicals program at the Environmental Defense Fund since 1973.

He was born October 16, 1941, in Fairmont, W. Va. He received a B.S. in civil engineering from West Virginia University in 1963, an M.S. in environmental health engineering from California Institute of Technology in 1965, and a Ph. D. in environmental sciences and engineering from Harvard University in 1971.

From 1971 to 1973, Harris was an assistant professor of civil engineering at the University of Maryland, teaching courses in microbiology, ecology of polluted waters, and introduction to environmental engineering. He was also an associate with Ralph Nader's Corporate Accountability Research Group from 1972 to 1973.

Harris was a visiting associate research biochemist at the University of California at Berkeley from 1978 until earlier this year, on leave from EDF, doing research on environmental carcinogens. He is the author of numerous publications and has

served as a consultant on environmental matters.

United States Ambassador to Morocco

Nomination of Angier Biddle Duke. November 1, 1979

The President today announced that he will nominate Angier Biddle Duke, of New York City, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Kingdom of Morocco. He would replace Richard B. Parker, who has resigned. Duke has been president of the National Committee on American Foreign Policy since 1976.

He was born November 30, 1915, in New York City. He attended Yale University. He served in the U.S. Army, then the U.S. Air Force from 1941 to 1945.

Duke joined the Foreign Service in 1949 and served as second secretary and consul in Buenos Aires until 1951. He was special assistant to the Ambassador in Madrid from 1951 to 1952 and served as Ambassador to El Salvador from 1952 to 1953.

From 1955 to 1960, Duke was president of the International Rescue Committee, and from 1956 to 1958, he also served as vice president of CARE.

He returned to Government service in 1961 as Chief of Protocol for the White House, with the rank of Ambassador, serving in that position until 1965 and again in 1968. From 1965 to 1968, he was Ambassador to Spain. From 1968 to 1969, Duke was Ambassador to Denmark.

From 1974 to 1976, he was commissioner of civic affairs and public events of the city of New York. He has served as chairman of the New York State Council on Ethnic Affairs since earlier this year.

Department of Housing and Urban Development

Nomination of Victor Marrero To Be Under Secretary. November 1, 1979

The President today announced his intention to nominate Victor Marrero, of the Bronx, New York, to be Under Secretary of Housing and Urban Development. He would replace Jay Janis, who has been appointed Chairman of the Federal Home Loan Bank Board. Marrero has been a commissioner of the New York State Division of Housing and Community Renewal and vice chairman of the New York State Housing Finance Agency since 1978.

He was born September 1, 1941, in Santurce, P.R. He received a B.A. from New York University in 1964 and a J.D. from Yale Law School in 1968.

From 1968 to 1969, Marrero was assistant to New York Mayor John V. Lindsay. From 1970 to 1973, he was assistant administrator and neighborhood director with the South Bronx Model Cities Office, and from 1972 to 1973, he was district manager of the South Bronx Office of the Mayor's Office for Neighborhood Government.

In 1973 Marrero was executive director of the New York City Department of Planning. From 1974 to 1975, he was special counsel to Comptroller Harrison J. Goldin. In 1975 he was first assistant counsel to Gov. Hugh L. Carey. From 1976 to 1977, he was chairman of the New York City Planning Commission.

Marrero is a founder and first chairman of the Puerto Rican Legal Defense and Education Fund and of the South Bronx Community Housing Corp. He is a public member of the Federal Home Loan Bank Board Savings and Loan Advisory Committee.

Financial Institutions Deregulation Legislation

White House Statement on Senate Approval of the Legislation. November 2, 1979

The President applauds the Thursday night Senate action which would give an important break to small savers. The bill approved by the Senate contains major recommendations that the President submitted to Congress in May.

The President proposed and now, under the leadership of Banking Committee Chairman Senator William Proxmire, the Senate has agreed that major deregulatory reforms in the financial area are needed: the phaseout of federally imposed deposit interceilings that limit the interest that savers earn on their savings accounts, the reversal of an appellate court decision that would have prohibited the proconsumer automatic transfer system, and the validation nationwide of proconsumer NOW accounts and share draft accounts at credit unions.

"The Senate has taken a significant step," the President said, "to provide equity for savers in our country and to assist depository institutions in competing more effectively for funds." The President urged that the House-Senate conference committee members "act promptly to return to both Houses for final approval legislation that will provide this critically important relief to small savers."

Will Rogers Day, 1979

Proclamation 4698. November 2, 1979

*By the President of the United States
of America*

A Proclamation

November 4, 1979, is the one hundredth anniversary of the birth of America's lead-

ing philosopher-humorist, Will Rogers.

His commentary on people and events in public life amused us all—and made us a little wiser, too. He judged people with penetrating insight, but with kindness and affection.

He once said, “I never tell jokes. I just watch the government and report the facts.” The wit and the wisdom exemplified by that comment made this Nation a better place in which to live.

In recognition of his contribution to the enrichment of our lives, the Ninety-Sixth Congress, by House Joint Resolution 3, has requested the President to designate November 4, 1979, as Will Rogers Day.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim Sunday, November 4, 1979, as Will Rogers Day.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of November, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 11:39 a.m., November 2, 1979]

Wright Brothers Day, 1979

Proclamation 4699. November 2, 1979

*By the President of the United States
of America*

A Proclamation

The age of aviation began on December 17, 1903, near Kitty Hawk, North Carolina, when two bicycle makers, Wilbur and Orville Wright, made the first successful flight in an airplane. This achievement brought little acclaim to the Wright Brothers at the time. Today, however, we know it as one of the most important events in our modern world.

The spirit of the Wright Brothers lives on. The same American ingenuity and persistence has recently been displayed again in the first successful man-powered flight across the English Channel. In June of this year, Bryan Allen pedaled for almost three hours to propel the Gossamer Albatross, a 60-pound polyester-bodied aircraft designed by Paul MacCready, a distance of 22 miles.

The same spirit has led to the phenomenal development of aviation since the Wright Brothers' first successful flight 76 years ago. Aviation is one of the most important industries in America today, both for jobs and services provided. United States aircraft manufacturers currently have orders for over 1,000 jet transports, and scheduled traffic for United States domestic and international flights this year will exceed 300 million passengers for the first time.

To commemorate the historic achievements of the Wright Brothers, the Congress, by a joint resolution of December 17, 1963 (77 Stat. 402, 36 U.S.C. 169), designated the seventeenth day of December of each year as Wright Brothers Day and requested the President to issue a proclamation annually inviting people of the United States to observe that day with appropriate ceremonies and activities.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby call upon the people of this Nation, and their local and national governmental officials, to observe Wright Brothers Day, December 17, 1979, with appropriate ceremonies and activities, both to recall the accomplishments of the Wright Brothers and to provide a stimulus to aviation in this country and throughout the world.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of November, in the year of our Lord nineteen hundred seventy-nine, and of the In-

dependence of the United States of America the two hundred and fourth.

JIMMY CARTER

Aid for Kampucheans

Proclamation 4700. November 2, 1979

By the President of the United States of America

A Proclamation

Thirty-seven years ago, a holocaust began that was to take the lives of more than six million human beings. The world stood by silently, in a moral lapse whose enormity still numbs the human mind.

We now face, once again, the threat of avoidable death and suffering for literally millions of people, and this time we must act swiftly to save the men, women, and children who are our brothers and sisters in God's family.

The International Committee of the Red Cross and the United Nations' Children's Fund recently appealed jointly for \$111 million in aid to help the millions of Kampucheans, formerly known as Cambodians, who are facing death from starvation during the next six months. We must respond to this appeal, and we must also respond to the related needs for food, medicine, and shelter for Kampuchean refugees who are fleeing to Thailand.

A major program has been launched by the American government to support this relief effort, but it is too important to be left to the government alone. I am certain that the American people, as individuals and families, through churches, schools, voluntary organizations, and businesses, will want to be a part of this emergency humanitarian response to a desperate and terrible need.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby call upon all Americans to give generously to the voluntary relief agency of their choice to alleviate this terrible suffering, asking specifically that the donation be earmarked for Kampuchean relief. Further, I hereby designate each Saturday and Sunday in November until Thanksgiving as days for Americans in their synagogues, churches, and other places of worship to donate to this cause, and I call upon leaders of the religious community to take whatever measures are needed to publicize and facilitate these donations.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of November, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

October 28

The President returned to the White House from Camp David, Md.

October 29

The President met at the White House with:

- Vice President Walter F. Mondale;
- Members of the House of Representatives to discuss hospital cost containment legislation.

The President participated in a briefing

Administration of Jimmy Carter, 1979

by administration officials on energy given for community leaders in the East Room at the White House.

In the evening, the President attended a dinner meeting in the State Dining Room, to discuss energy legislation with a bipartisan group of Congressmen.

October 30

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Nelson H. Cruikshank, Counselor to the President on Aging;
- members of the Ad Hoc Leadership Council of Organizations on Aging;
- singer Joan Baez, to discuss relief efforts for Indochina refugees.

The President participated in a briefing by administration officials on the strategic arms limitation treaty given for community leaders from Illinois and Mississippi in the East Room at the White House.

The President announced the appointment of Moon Landrieu, Secretary of Housing and Urban Development, as a member of the Advisory Commission on Intergovernmental Relations for a 2-year term.

October 31

The President met at the White House with:

- David L. Aaron, Deputy Assistant for National Security Affairs;
- Vice President Mondale, Secretary of Health, Education, and Welfare Patricia R. Harris, Secretary of Housing and Urban Development Moon Landrieu, Secretary of Labor Ray Marshall, Secretary of Transportation Neil Goldschmidt, James T. McIntyre, Jr., Director of the Office of Management and Budget, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Alonzo L. McDonald,

Jr., Assistant to the President, to discuss domestic policies;

- Frank B. Moore, Assistant to the President for Congressional Liaison;
- Stansfield Turner, Director of Central Intelligence, and Mr. Aaron;
- Mr. McIntyre.

November 1

The President met at the White House with:

- Mr. Aaron;
- Senator Thad Cochran of Mississippi;
- Mr. Moore;
- members of the National Commission for Employment Policy;
- Representative Dan Rostenkowski of Illinois.

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Maryland in the East Room at the White House.

November 2

The President met at the White House with:

- Mr. Aaron;
- Mr. Moore;
- Hedley W. Donovan, Senior Adviser to the President;
- Senator Donald W. Riegle, Jr., of Michigan.

The President left the White House for a weekend stay at Camp David.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted October 30, 1979

RICHARD CAVINS MATHERON, of California, a Foreign Service officer of Class one, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Swaziland.

Administration of Jimmy Carter, 1979

NOMINATIONS—Continued

Submitted October 31, 1979

PATRICIA M. BYRNE, of Ohio, a Foreign Service officer of Class one, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Socialist Republic of the Union of Burma.

ROBERT D. HORMATS, of Maryland, to be a Deputy Special Representative for Trade Negotiations, with the rank of Ambassador, vice Alonzo Lowry McDonald, Jr., resigned.

MICHAEL BRACKETT SMITH, of Maryland, to be a Deputy Special Representative for Trade Negotiations, with the rank of Ambassador, vice Alan William Wolff, resigned.

Submitted November 1, 1979

EDWARD DEAN PRICE, of California, to be United States District Judge for the Eastern District of California, vice a new position created by P.L. 95-486, approved October 20, 1978.

HORACE T. WARD, of Georgia, to be United States District Judge for the Northern District of Georgia, vice a new position created by P.L. 95-486, approved October 20, 1978.

DAVID K. WINDER, of Utah, to be United States District Judge for the District of Utah, vice a new position created by P.L. 95-486, approved October 20, 1978.

SIDNEY A. DIAMOND, of Arizona, to be Commissioner of Patents and Trademarks, vice Donald W. Banner, resigned.

Submitted November 2, 1979

ANGIER BIDDLE DUKE, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Morocco.

ROBERT H. HARRIS, of Maryland, to be a member of the Council on Environmental Quality, vice Charles Hugh Warren, resigned.

United Nations Pledging Conference on Refugee Relief

Appointment of the U.S. Delegation.
November 3, 1979

Following are the members of the U.S. Delegation to the United Nations Pledging Conference on Refugee Relief:

Representative

SECRETARY OF STATE CYRUS VANCE

Deputy Representative

AMBASSADOR DONALD MCHENRY, U.S. Representative to the United Nations

Alternate Representatives

HON. MATTHEW NIMETZ, Counselor, Department of State

AMBASSADOR WILLIAM VANDEN HEUVEL, U.S. Deputy Representative to the United Nations

Congressional Advisers

SENATOR CLAIBORNE PELL

SENATOR MAX BAUCUS

SENATOR JOHN DANFORTH

SENATOR JACOB JAVITS

SENATOR JAMES SASSER

REPRESENTATIVE JOHN ANDERSON

REPRESENTATIVE ELIZABETH HOLTZMAN

REPRESENTATIVE CLARENCE LONG

REPRESENTATIVE LESTER WOLFF

REPRESENTATIVE C. W. "BILL" YOUNG

REPRESENTATIVE CLEMENT ZABLOCKI

Governors

GOV. RICHARD D. LAMM

GOV. WILLIAM G. MILLIKEN

GOV. ROBERT D. RAY

GOV. RICHARD A. SNELLING

Senior Advisers

HON. MARJORIE CRAIG BENTON, U.S. Representative to the Executive Board of the U.N. Children's Fund

HON. BEVERLY CARTER, Ambassador at Large and Coordinator for State and Local Governments

REV. THEODORE HESBURGH

HON. RICHARD HOLBROOKE, Assistant Secretary of State for East Asian and Pacific Affairs

HON. CHARLES WILLIAM MAYNES, Assistant Secretary of State for International Organization Affairs

HON. LEO PERLIS, AFL-CIO

AMBASSADOR RICHARD W. PETREE, U.S. Representative to the U.N. Security Council

Emergency Energy Conservation Act of 1979

Remarks on Signing S. 1030 Into Law.
November 5, 1979

THE PRESIDENT. This is a very good occasion in the evolution of an acceptable energy policy for our country. We face at all times the possibility of an emergency shortage, a very severe reduction in supplies of gasoline and diesel fuel for the transportation of the people of America. And I want to thank very much the key Members of the House and Senate—there's no way to name them all—who've been instrumental in passing this Emergency Energy Conservation Act of 1979, quite often referred to as the gas rationing bill.

This has been a difficult issue because of the necessity for evolving a fair allocation of gasoline and diesel fuel if our Nation does face a severe shortage. Majority Leader Byrd in the Senate and Majority Leader Jim Wright in the House, Senator Jackson, Senator Johnston, Senator Domenici, John Dingell in the House, and Tim Wirth, Bud Brown, Toby Moffett, and many others have helped to make this legislation possible.

I'm very grateful to have the opportunity as President now to evolve a gas and diesel fuel rationing proposal which will be presented to the Congress and to the public over the next few months. This is an important responsibility. Charlie Duncan, the Secretary of Energy, is here. It'll primarily be his Department which will build on the previous proposal, and to provide additions or corrections to it to accommodate the desires of the American people, as expressed by the Congress.

This has not been an easy piece of legislation to pass. *[Laughter]* I don't think anyone standing behind me would disagree with that fact. It's been a laborious and detailed negotiation, and if we do face a severe shortage, then I have adequate authority. If the shortage is prospective in nature, the prospect of a severe shortage, then with the concurrence of the Congress, the time for the implementation of the rationing plan can be abbreviated.

I'm very happy that this has been accomplished. We now face additional major decisions in the House and Senate. This week, for instance, the Senate will vote on the energy security corporation: legislation which will permit our Nation to strengthen our defenses, to avoid a direct threat to our Nation's security, with a heavy emphasis of conservation as a first step, on a short-term basis; and increasing emphasis in the middle term of gasohol and other more readily available energy measures; and then in the longer run, geo-

thermal supplies, solar energy, and synthetic fuels.

Without the energy security corporation, it would be almost impossible to have synthetic fuels and other supplies developed on a competitive basis; we'll have an almost complete domination of energy supply opportunities in our country by just a few major oil companies. So, the passage of the energy security corporation this week by the Senate is crucial to provide competition, to let our Nation have adequate energy supplies, and also, of course, to implement a major additional conservation effort—all of these factors to contribute to our Nation's security.

I might say in closing that I'm very grateful to the men and the women of the House and Senate who have labored so long over this legislation. I'd like to sign the bill now, and then I'd like to call on a couple of people to say a word for their colleagues in the House and Senate.

[At this point, the President signed the bill.]

I will try to do a good job working with Charlie Duncan to justify your confidence in us and present to you a rationing program that will be acceptable, adequate, fair, and which would bring joy to the eyes of all of us.

I'd like to call on John Dingell to say a word.

REPRESENTATIVE DINGELL. Mr. President, thank you for the kind words you said about my colleagues and I in the House who did work very hard on this, as you know. It was a bipartisan undertaking at the end. *[Laughter]*

SENATOR DOMENICI. We just straightened it out for you.

THE PRESIDENT. And there were some bipartisan obstructions at the beginning. *[Laughter]*

REPRESENTATIVE DINGELL. As a matter of fact, you're correct. *[Laughter]*

But, Mr. President, the men you see standing behind you, and I won't mention

their names, but people like Toby and Phil and Bill and Bud and Jim Broyhill and a number of my colleagues who are not here and our distinguished colleagues in the Senate, who are well known to you, worked very hard on this, and we think we gave you a good bill.

You are working hard on the energy program of the Nation, and I think you provided very real leadership. And this is just one more evidence of what you have accomplished. And although it is a major stride forward, many very large strides remain, and we all look forward to working with you, because the country needs it.

Thank you, Mr. President.

THE PRESIDENT. Thank you very much, John.

Mr. Domenici?

SENATOR DOMENICI. Thank you, Mr. President.

When I first came to the Senate 7 years ago, if you'd told me that gasoline rationing was as critically important to have as a standby program as this bill is, I would have said it's impossible. But indeed it is.

If you'd also have told me 7 months ago that it was possible to get unanimous action of the House and Senate, Republicans and Democrats, House and Senate, all together with one bill that pleases the White House, I would have said that's totally fanciful. [Laughter] But here it is. And it's a real indication of teamwork, Mr. President, not only with the White House but with the House and both parties and the recognition of the very serious situation we're in in the country. It's going to take this kind of teamwork to get out of the problem we're in, and I expect to be part of that team.

THE PRESIDENT. Well, you've proven that already, Senator.

Charlie Duncan, would you like to come forward and say a word? Charlie's the one that's got to do all the work. [Laughter]

SECRETARY DUNCAN. One part of the rationing bill that's very important, in my judgment, is the conservation portion of it and the State plans. It's a national problem that lends itself to local initiatives, and I think we've built that into this legislation, and that's a very appropriate thing to do.

THE PRESIDENT. I apologize for not mentioning that myself. I think the crux of this bill is that the first opportunity for conservation programs to be evolved, as wisely decided by the Congress, is at the State level. And the Federal program would only go into effect if it was considered necessary in the absence of an adequate authority or action on the part of the States. I thank you, Charlie, for pointing that out.

Well, my gratitude to all of you. I think we've done the Nation a great service.

Thank you very much.

NOTE: The President spoke at 9:35 a.m. at the ceremony in the Cabinet Room at the White House.

As enacted, S. 1030 is Public Law 96-102, approved November 5.

Indochinese Refugees in the United States

Announcement of Federal Emergency Assistance to Affected School Districts.
November 6, 1979

The administration has asked the Congress to approve the reprogramming of \$6 million in FY 1980 funds for the Office of Education in order to provide emergency assistance to school districts which have been most affected by the influx of Indochinese refugee children.

In letters to the chairmen of the Senate and House Appropriations Committees' Subcommittees on Labor, Health, Educa-

tion, and Welfare, HEW Secretary Patricia Harris requested the reprogramming as an immediate and temporary measure to provide immediate help to these school districts.

The funds would be reprogrammed from five areas in the Special Projects and Training appropriation of the Office of Education. Secretary Harris' letters explain that the supplemental appropriation request for refugee activities which will be submitted in January, with the President's 1981 budget, will include \$6 million to restore the funds proposed for reprogramming.

Since the President's decision in June to double the number of new Indochinese refugees entering the United States, an estimated 20,000 refugee children have arrived. An additional 45,000 are expected by the end of the current school year.

There is a critical need for educational assistance, because many of the new group of Indochinese refugees have no proficiency in English and lack other basic skills. Many of the refugee children require several types of special educational services.

Because many of the refugees are resettling in only a few States and localities, the impact on some school districts has been substantial. Because States and local agencies have already determined their budgets for the 1979-80 school year, they have limited flexibility to divert resources to serve the Indochinese refugee children.

The administration sent legislation to the Congress earlier this year that would provide aid on a comprehensive, on-going basis to refugees and to local governments and school districts that need assistance in dealing with refugee programs. The President urges passage of that bill to provide a sound foundation for future aid in this area.

Census 1980

Proclamation 4701. November 6, 1979

*By the President of the United States
of America*

A Proclamation

Our Constitution requires that there be a census of the people in the United States once every ten years. The Twentieth Decennial Census will be taken beginning April 1, 1980.

It is vitally important to everyone that this census be a complete and accurate report of the Nation's population and resources. Its results determine the representation of the States in the House of Representatives, the redrawing of congressional boundaries, and State and local redistricting. They also provide the basis for distributing large amounts of funds under various Federal programs among the States and communities.

The census is also important for a broader purpose. Americans are a free and mobile people. Significant and rapid changes take place in our country. To better understand ourselves and make intelligent decisions for the future, we depend greatly on our census.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby declare and make known that under the law it is the duty of every person to participate in the census by answering all questions in the census schedule applying to him or her and the family to which he or she belongs, and to the home being occupied.

Every person in the United States can be sure that there will be no improper use of the information given in the census. Answers cannot be released in any way which will harm the individual. By law individual information collected will not be

used for purposes of taxation, investigation, or regulation, or in connection with military or jury service, the compulsion of school attendance, the regulation of immigration, or with the enforcement of any national, State, or local law or ordinance.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of November, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 3:14 p.m., November 6, 1979]

Department of Transportation

Nomination of Susan J. Williams To Be an Assistant Secretary. November 6, 1979

The President today announced that he will nominate Susan J. Williams, of McLean, Va., to be Assistant Secretary of Transportation for Governmental and Public Affairs. She would replace Terrence Bracy, resigned. Williams has been serving as Acting Assistant Secretary of Transportation since last July.

She was born July 31, 1940, in Philadelphia, Pa. She received a B.A. from Upsala College.

From 1962 to 1965, Williams was an editor at the Center for Applied Linguistics, and from 1965 to 1973, she was an education consultant to the Department of Health, Education, and Welfare.

From 1962 to 1965, Williams was an official assistant to D.C. Delegate Walter Fauntroy. From 1977 to 1979, she was Director of Congressional Relations for the Transportation Department, and from March to July 1979, she was Deputy Assistant Secretary for Governmental and Public Affairs.

Williams was a founder and vice

chairman of the Northern Virginia Democratic Women's Political Caucus. She is vice chairman of the Commission for Children of Fairfax County, Va.

National Council on the Handicapped

Nomination of Howard A. Rusk To Be a Member and Designation as Chairman. November 6, 1979

The President today announced his intention to nominate Howard A. Rusk as a member of the National Council on the Handicapped and to designate him as Chairman on confirmation.

Rusk, 78, has been a professor and chairman of the Department of Rehabilitation Medicine at New York University School of Medicine since 1946. He has served as a consultant on rehabilitation to the United Nations Secretariat and to the city of New York. He is the author of several books and has received numerous awards and honors.

The National Council on the Handicapped was established in November 1978 by Public Law 95-602 to establish general policies regarding Federal activities affecting the handicapped and review the activities of the Rehabilitation Services Administration and the National Institute of Handicapped Research.

National Institute of Handicapped Research

Nomination of Margaret Joan Giannini To Be Director. November 6, 1979

The President today announced that he will nominate Margaret Joan Giannini, of Pelham Manor, N.Y., to be Director of

the National Institute of Handicapped Research, a new position.

Giannini is a professor in the Department of Pediatrics and director of the Mental Retardation Institute at New York Medical College.

She was born May 27, 1921, in Camden, N.J. She graduated from Boston University and Temple University and received an M.D. from Hahnemann Medical College in 1945. She did her internship at New York Medical College in 1945-46 and was a resident in pathology in 1946-47 and in pediatrics in 1947-48.

From 1948 to 1950, Giannini was a practicing pediatrician. She has been a professor of pediatrics at New York Medical College since 1950 and director of the Mental Retardation Institute since 1956.

Giannini has also served as attending pediatrician at Metropolitan Hospital Medical Center and as a pediatric consultant for the city of New York's Bureau for Handicapped Children. She was inter-regional adviser in mental retardation to the United Nations Department of World Technical Cooperation in 1978. She has served as president of the American Association on Mental Deficiency.

The First Lady's Trip to Thailand

Remarks on Her Departure From the White House. November 7, 1979

THE PRESIDENT. I would like to say to my wife, Rosalynn, and to Surgeon General Richmond, to Mrs. Young, who is our National Chairman for the Year of the Child, that I'm deeply grateful to them for their willingness to go to Thailand, to observe at first hand the consequences of the horrible tragedy that is occurring there.

It's imperative that our Nation exert its

moral leadership as an example to the entire world of the true feelings of Americans, as we have observed with deep concern and with horror the unprecedented loss of life, because of starvation and persecution, of the people of Cambodia, many of whom have now fled into Thailand. It's important that we maintain our commitment and our concern to all the starving people there, regardless of their political affiliation, regardless of the circumstances under which they suffer.

Secondly, I would like for the Surgeon General and my wife and others in the group to assess the bureaucratic obstacles that exist. This is an international effort, but our Nation plays a major role in shaping the means by which relief—food, medical care—can be delivered to the starving and suffering people who have crossed the border into Thailand. And I would hope that when they come back, they can report accurately what can be done to remove any such obstacles from the delivery of this care. We recognize that the warring parties in Kampuchea have provided an unwarranted obstacle to the delivery of food, and I would hope they would explore every possibility for the breaking down of these obstacles.

The third thing I've asked Rosalynn to do is to deliver to Prime Minister Kriangsak and the Royal Family of Thailand a personal message of appreciation and admiration for the courage and the generosity of the Thais in receiving literally hundreds of thousands of refugees into a country already somewhat impoverished, already having exhibited great generosity in the past.

This tragedy, where almost one-half the total population of Kampuchea has died, is of unbelievable proportions, and it's important that the world and the people of the United States maintain their intense interest and their intense commitment until the tragedy is relieved. Our

country has already committed a major share of the total international effort. We are ready to do more. We have no political motives. We have one single commitment, and that is to stop the suffering and the starvation among these unfortunate people. This trip, we hope, will increase both the public and private commitment to alleviate suffering there.

Rosalynn and Jean and Dr. Richmond, our hearts and our prayers go with you. And we look forward to this weekend, when you return, for a means by which our Nation can be re-inspired to assist in every possible way the people who are suffering so deeply.

Would you like to say just a word?

MRS. CARTER. This is a tragic situation, and our whole country is concerned. I want to go also to see what every American can do to help.

Thank you very much.

NOTE: The President spoke at 7:26 a.m. on the South Lawn of the White House.

Indochinese Refugees in the United States

Announcement of Improved Health Screening and Medical Care for U.S.-Bound Refugees. November 7, 1979

The Public Health Service (PHS) has assigned 11 public health professionals to Southeast Asia to improve health screening and medical care for U.S.-bound refugees.

The professionals, six of whom are physicians, are assisting the Intergovernmental Committee for European Migration with screening and the World Health Organization with providing medical care. They have been sent within the past month to locations in Thailand, Indonesia, Malaysia, Hong Kong, and Singapore.

Earlier this year, the President announced that the United States would

double to 14,000 the number of Indochinese refugees allowed to enter the country each month. Assignment of the public health professionals will help assure continued success in avoiding any significant outbreak of communicable disease among resettled refugees in this country.

The Public Health Service, in cooperation with the Immigration and Naturalization Service, the Department of State, and voluntary refugee resettlement agency representatives abroad, is also taking steps to assure that adequate records are kept for all medical screening procedures, findings, and treatments, and establish a system for collecting and analyzing data to measure the incidence of disease and health and immunization status.

In addition, PHS has increased its staff at affected U.S. ports of entry and has instituted systems for forwarding medical records to the refugees' destinations. In this country PHS is assessing the health status of refugees and helping them find a continuing source of health care in their new communities.

Federal Emergency Management Agency

Nomination of Richard J. Green To Be an Associate Director. November 7, 1979

The President today announced that he will nominate Richard J. Green, of Bricktown, N.J., to be an Associate Director of the Federal Emergency Management Agency, a new position. Green has been Deputy Assistant Director of the National Science Foundation since 1972.

He was born April 15, 1928, in Newark, N.J. He received a B.S. in biology from Holy Cross College in 1949 and an M.S. in physics from Fordham University in 1955.

From 1955 to 1957, Green was program manager for Pratt & Whitney Aircraft. From 1957 to 1961, he was supervisor of nuclear and aerospace lubricants development for Mobil Oil Company. From 1961 to 1962, he was chief of aircraft maintenance and armament for the U.S. Air Force.

From 1963 to 1966, Green was an executive assistant at the National Aeronautics and Space Administration, where he worked on joint NASA-Defense Department matters in the Office of the Administrator. From 1966 to 1970, he was manager of the Apollo Lunar Surface Experiments program for NASA.

From 1970 to 1972, Green was operations deputy at the National Science Foundation. Since 1972 he has been Deputy Assistant Director of NSF, where he has planned and directed the National Solar and Geothermal Energy Research and Development programs and managed the Research Applied to National Needs program.

Energy Security Corporation and Synthetic Fuels Program

*White House Statement on Senate Action on Legislation.
November 7, 1979*

The President this afternoon expressed his pleasure at the Senate's actions in approving the initiation of a strong synthetic fuels program and the establishment of an energy security corporation.

"While there is much more work to be done and further action in the House to be completed," the President said, "the Senate's actions ensure that there will be a strong synthetic fuels program and a significant institution to carry it out. I congratulate Chairman Jackson, Senator Johnston, and Senator Domenici for their able and dedicated work.

"The critical conservation and gasohol titles of the Senate Energy Committee bill remain to be passed, and the administration will continue its close cooperation with congressional leaders in support of this important legislation. The uncertain nature of our energy supplies does not need to be reemphasized; but today's action, together with the continued steady progress of the energy mobilization board and the windfall profits tax, is a step toward regaining control of our Nation's future."

Welfare Cash Assistance Reform Legislation

*Statement on House of Representatives Approval of the Legislation.
November 7, 1979*

I want to commend Speaker Tip O'Neill, Congressmen James Corman and Charles Rangel, and the other Members of the House of Representatives for the passage this evening of my cash assistance reform proposal.

This is a crucial step forward in the Nation's 10-year effort to provide vitally needed reform of the welfare system.

When enacted, this proposal will

- lift 2 million families above the poverty line,
- provide added income for 1.6 million elderly Americans by providing cash payments instead of food stamp eligibility,
- tighten and streamline administrative requirements resulting in savings of hundreds of millions of dollars, and,
- provide fiscal relief for States with the heaviest welfare costs.

I look forward to speedy House consideration of the companion jobs legislation, which is critically important to our

reform program, and to Senate action on my entire welfare reform package.

Even in this period of necessary fiscal stringency, we must not fail to do what we can for those who are most in need.

Visit of Prime Minister John M. Lynch of Ireland

*Remarks at the Welcoming Ceremony.
November 8, 1979*

THE PRESIDENT. *An Taoiseach* [Prime Minister], welcome to you.

This is a wonderful occasion for our Nation to welcome to our country the Prime Minister of the Republic of Ireland, the President of the European Community, and a great friend of the United States. In all three of these roles, Mr. Prime Minister, you're welcome to the United States of America.

You represent a nation which is the ancestral home of 20 million American citizens, so we are bound to you in many ways. We are bound to you because we share common goals, the goals of democracy and freedom, the goals of peace, the goals of mutual trade and common benefit and respect for basic human rights, not only in our own nations but throughout the world.

It's a great pleasure to have you here, because your friendship is continuing a longstanding relationship between our two countries. More than 200 years ago, before we had a country, as a matter of fact, the people of Ireland proved to be our friends. Benjamin Franklin visited Dublin as an emissary of the colonies to ask for the support and encouragement of the people of Ireland and for our own independence and our own freedom. Your people gave us that support and that encouragement. We're grateful to you. Since then we've shared a mutual understand-

ing and a mutual sympathy for the ideals and aspirations and hopes and dreams of the people of this Nation and the people of yours.

You come here representing not only a great nation but carrying a great and powerful international voice. The soldiers representing your country are now serving to preserve the peace in the Congo, in Cyprus, in Lebanon, in a benevolent action, and also actions requiring a great deal of personal courage, which has always been a characteristic of the Irish people.

You come here representing leadership in the councils of Europe, and we have benefited greatly from close personal consultations with you on matters that affect the entire European community because you occupy the Presidency of that great body of sovereign nations.

We share other things in common not quite so pleasant. We both have experienced the adverse consequences of terrorism, of a threat of violence, of murders perpetrated and murders threatened against innocent people. Those who advocate violence and terrorism violate the laws of God and the laws of man.

I look forward to our discussions this morning, again this evening, and tomorrow, because we have so many ways in which our two nations in harmony can promote the common aspirations of our people, a quest for a peaceful and a just society for the people of your nation, for the people of the United States, and the entire world.

Mr. Prime Minister, on behalf of all Americans, but particularly on behalf of all of those of us who bear Irish blood in our veins, we welcome you from a great country to a great country. Thank you for coming.

THE PRIME MINISTER. I would like to thank you, Mr. President, for your very kind words, for your gracious tribute to my country, for each contribution towards

building this great United States of America and to its contribution towards keeping world peace by having our soldiers serve with U.N. forces in different parts of the world—in the Congo, in the Middle East, in Lebanon, in Cyprus—and indeed, such is our commitment, even though it does impose a strain on us, we are very glad and willing to give it.

My wife and I were very, very delighted to have received earlier this year your invitation, Mr. President, to come and visit you formally, and we certainly looked forward with much anticipation to this visit today, as we do to our visits to many of your other great American cities in the course of the next 7 or 8 days.

I am very proud to be here as the head of a government which has always had warm and friendly relations with the elected leaders of the United States. I trust that these relations and our political ties will be strengthened in some way as a result of this visit.

I'm deeply aware that I represent people, people that always have had special, close bonds, both material and spiritual, with the people of America. We in Ireland, as you know, are your closest friends in Europe and, may I add, certainly amongst your best friends anywhere. We look with pride and affection on the ties that bind our two countries together. Our history, both histories, have many common strands. Perhaps nowhere is this better illustrated than here in the White House, which has served no fewer than 12 U.S. Presidents of Irish descent.

The architect of the house was one James Hoban, who sailed to America from Ireland in 1785. He is said to have adapted his design for the White House from the house called Leinster House in Dublin, which is the seat of the Irish Parliament. Indeed, Hoban probably inspired the very name of the White House, because when, in 1814, it was demolished

by fire, he advised in the course of his restoration that all the exterior walls be painted white.

Another aspect of my visit to your country, as you have observed, Mr. President, is that I am currently a President of the European Council, that is, President of the Council of Heads of State or Government of the European Economic Communities. As you know, this Presidency changes every 6 months amongst the member countries, and now there are nine. Next year we will have 12 [10], with the accession of Greece, and perhaps in a few more years we will be 12, with the accession of Spain and Portugal.

The Community is already the largest trading bloc in the world. One of the Community's primary aims is the advance of economic equality throughout its member states. As the Community strengthens economically, its political influence increases. That influence is being and will be used to promote peace and stability throughout the whole world.

A recent example of this type of activity was the completion by the Irish Presidency, on behalf of the Community, of the second Lomé Convention, which provides for aid for 58 developing countries in Africa, in the Caribbean, and in the Pacific.

I recall that my last visit to the White House was in January 1973, just after Ireland had acceded to the European Economic Community. And I can say that our accession has brought prosperity to our farms, our industries, and our businesses, and has added a whole new dimension to Ireland's role in the world.

In 1979 in the Community we have passed two milestones along the road to a more united Europe. One was the introduction of the European monetary system, and the second was the holding of the world's first truly international elections, the free elections to the new European

Parliament.

The peoples of the United States and Europe possess a common heritage in the fields of culture, literature, and the arts. We also share a belief in fundamental rights and freedoms, the dignity of the individual, and the sanctity of human life.

I was very glad this morning to hear you, Mr. President, denounce again the taking of human life for no matter what purpose by terrorists, abhorring as we all do the activities of those terrorists and those who help them to carry out their vile and horrific deeds.

But apart from having these things in common, we have at the same time, in both America and Europe, a fascinating variety of people and lifestyles. I am sure you will join with me, Mr. President, in hoping that the political institutions which we have will take account of this diversity.

Finally, I want to take advantage of this occasion to express to you, Mr. President, my sincere thanks for your generous statement in August 1977 on the situation in Northern Ireland, in which you pledged the complete support of the United States for the people of Northern Ireland in their quest for a peaceful and just society. In the words of your own Declaration of Independence, written over two centuries ago, "Governments derive their powers from the consent of the governed." And that's of utmost importance. This principle is one to which we, in Ireland, are dedicated today and one on which we consider that progress in Northern Ireland must be based.

On behalf of the Government of Ireland, Mr. President, I wish to express our best wishes to you and to the continued prosperity and happiness of your great nation. To the people who came to witness this ceremonial this morning, I say thanks on behalf of the people of Ireland, and to all of you Americans, President

downwards, as we say in Ireland, *Bail ó Dhia ort féin agus ar do chuid oibre*, may God bless you and bless your work.

Thank you.

NOTE: The President spoke at 10:45 a.m. on the South Lawn of the White House.

Visit of Prime Minister Lynch of Ireland

*Remarks to Reporters Following a Meeting.
November 8, 1979*

THE PRIME MINISTER. Ladies and gentlemen, the President has invited me to say a few words on the outcome of our talks this morning. And I think we can say they were very, very comprehensive, and there was a recognition of the problems that we and the United States have in common as well as the problems that we, as members of the EEC, have also with the United States. There was a high degree of accord.

We recognized the need to move forward towards solving world problems like inflation and oil supply and felt that action taken, so far as we can, in consort would be for the mutual advantage not only of our two countries, not only of U.S. and the EEC but of the world generally.

We mentioned, of course, the degree of investment that is now taking place, and has been for some years, by American industrialists in Ireland, the favorable climate in which they operate there, and naturally, I expressed that that degree of investment would continue. And may I say, the President didn't demur, because I was able to satisfy him—even though he didn't need being satisfied—that this was to the advantage of the United States as well as to us in Ireland, because by locating in Ireland, thereby gaining access to the Common Market communities of 260 million people, access to markets that otherwise mightn't be available to them.

We spoke, of course, at some length on the problems in Northern Ireland, and we discussed, even though we haven't knowledge of the contents, the proposed initiative and the document to be published by the British in relation to finding a *modus vivendi* between the two communities in the north of Ireland and naturally expressed our interest in it and hoped that it would lead to a greater degree of co-operation and harmony and, ultimately, peace between those two communities in the north and to North Ireland as a whole.

We emphasized—reemphasized, shall I say, in the case of the President, on his part—that he endorsed again what he said in 1977—I referred to it publicly on the lawn earlier this morning—and emphasized also the need that terrorism should be put down no matter where it raises its head, especially in the north of Ireland, and those who support terrorists must certainly be deterred from doing so.

Perhaps I may jump the gun to some extent by saying that at the end of our talks, I suggested to the President that sometime he might find it possible to visit Ireland, and the President said he certainly would be interested. So, we're looking forward to that day, and I hope that we can give the President of the United States the kind of a warm welcome that I have received from the people of the United States and from the Chief Executive of the United States.

Thank you, Mr. President.

THE PRESIDENT. I think the Prime Minister has covered very well the attitude and the tone of our remarks and also the substantive nature of them. There are no bilateral differences between ourselves and Ireland. The discussions were exclusively devoted to the common purposes that we espouse and the harmony with which we work to resolve differences that exist between our two countries together, compared to the rest of the world.

I might say, especially, that we appreciate the extremely close working relationship with Prime Minister Jack Lynch in his role as President of the European Council, the community of nations in Europe. It's important to point out that we have no role to play in their deliberations. But our consultation with him on issues of mutual interest—the implementation of the Multilateral Trade Negotiations, the implementation of the agreement on energy conservation that was concluded in Tokyo, and other matters that are of common interest to all the people of Europe and our Nation—have been very productive.

It's important also to point out that a President of the United States represents more Irish people than the Prime Minister of Ireland, and I'm constantly aware of my duties to Ireland, Mr. Prime Minister. It would be almost impossible for a President to ignore those duties to your country and to the people who love your country.

We are very delighted, again, to have you here, and we will be discussing in great depth the problems in the Middle East, the need for a worldwide peace, for the control of nuclear weapons, for the control of terrorism, for the bringing of peace to Africa, and the honoring of human rights throughout the world.

And I would like to say again what I said this morning, that we will do everything we possibly can to prevent American citizens' assistance to the terrorists in Ireland, who do so much to obstruct the realization of the hopes and dreams of all the Irish people, no matter what their religious background or convictions might be, for a prosperous and a peaceful Ireland for all.

Thank you very much.

NOTE: The Prime Minister spoke at 12:20 p.m. on the South Grounds of the White House.

Visit of Prime Minister Lynch of Ireland

Press Statement. November 8, 1979

The President met today with Prime Minister Jack Lynch of Ireland. Prime Minister Lynch, in addition to being the Head of Government of Ireland, is for the last half of 1979 also the President of the European Council of Heads of State or of Government of the Nine countries of the European Community.

The President and the Prime Minister reviewed the close relations between their two countries and discussed a number of key world issues which are of particular concern to the European Community, with which the United States enjoys close cooperation, based on common interests and values.

The President and the Prime Minister also discussed at length the tragic communal problems in Northern Ireland. They condemned support for organizations engaged directly or indirectly in campaigns of violence which only delays the day when peace and reconciliation can come to Northern Ireland. They noted with interest the proposal of the British Government to convene a Conference of the principal political parties in Northern Ireland and shared the hope that progress could be made towards a form of administration acceptable to both parts of the community there. The President reaffirmed his statement of August, 1977 looking to support for American investment in Northern Ireland when the violence is ended.

The official visit of Prime Minister and Mrs. Lynch to Washington and to several other American cities demonstrates the great friendship between the two nations, and also the great respect of the American Government and people for a country which in recent years has enjoyed rapid economic growth and taken its place

among the industrialized nations of the world. The Prime Minister spoke of the contribution of American investment to this growth and reiterated his Government's continuing support for such investment.

The Prime Minister invited the President to visit Ireland at a mutually agreeable date and the President accepted the invitation with pleasure.

United States Ambassador to Sri Lanka and the Republic of Maldives

**Nomination of Donald R. Toussaint.
November 8, 1979**

The President today announced that he will nominate Donald R. Toussaint, of McLean, Va., to be Ambassador Extraordinary and Plenipotentiary of the United States to the Democratic Socialist Republic of Sri Lanka and to serve concurrently as Ambassador to the Republic of Maldives. He would replace W. Howard Wriggins, who is retiring. Toussaint has been Deputy Chief of Mission in Manila since 1978.

He was born May 21, 1927, in Oakland, Calif. He received a B.A. (1947) and Ph. D. (1956) from Stanford University, an M.A. from Yenching University in Peking in 1949, and a graduate diploma from the Institut d'Études Politiques in Paris in 1952. He served in the U.S. Navy from 1945 to 1946.

From 1947 to 1949, Toussaint was a teacher at Yenching University, and in 1950-51 he was a teaching assistant at Stanford. From 1952 to 1953, he was director of the overseas development program of Stanford's Hoover Institute, and in 1953-54 he was an instructor with the University of Maryland overseas program.

Toussaint joined the Foreign Service in

1956 and served as a foreign affairs officer at the State Department. He took Indonesian language training in 1958–59 and was a political officer in Jakarta from 1959 to 1960. From 1960 to 1961, he was consular and administrative officer in Medan, and from 1961 to 1964, he was economic officer in Jakarta.

From 1964 to 1968, Toussaint was at the U.S. Mission to the United Nations, as adviser, then senior adviser for political and security affairs. He attended the Imperial Defense College in London in 1969–70 and was counselor for political affairs in Tehran from 1970 to 1972. From 1972 to 1975, he was Deputy Chief of Mission in Jakarta.

In 1975–76 Toussaint attended the senior seminar in foreign policy. He was Deputy Assistant Secretary of State for International Organization Affairs from 1976 to 1977 and deputy coordinator of the United Nations Conference on Science and Technology from 1977 to 1978.

Visit of Prime Minister Lynch of Ireland

Toasts at the State Dinner. November 8, 1979

THE PRESIDENT. Prime Minister and Mrs. Lynch, Jack and Máirín, we're delighted to welcome you to the White House again, the first time in your role as the head of a great nation. I know that everyone here who is of Irish descent feels particularly at ease, because—as Jack pointed out to the group of enthusiastic welcomers this morning—the architect of the White House was a very famous Irishman, trained in Dublin, from Kilkenny, named James Hoban. And those of you who have visited Ireland know that this White House bears a very strange and not accidental resemblance to the home of the Irish Parliament. So, we're very delighted

to have you here in an Irish home where many Irish Presidents have served.

Jack Lynch is famous in Ireland for many things: first of all, as an athlete who was noted for his prowess on the playing fields. And he's also famous as a political leader, a man of quiet courage, a gentle man, a man who's a moderate leader, who's strong and courageous.

Our country has benefited greatly from many famous Irishmen as well—Daniel Boone, John Wayne, Bing Crosby, John L. Sullivan, and, in a more modern day, George Meany, Tip O'Neill, and many others that I don't have the time to name. Many assembled in this room are proud of their Irish blood. And I think that one of the most famous, George M. Cohan, expressed it very well when he said that he was “a real live nephew of my Uncle Sam,” and later in the same song, “I'm proud of all the Irish blood that's in me.” This could be kind of a theme song of many Americans.

Once, when an American visited Dublin, the former mayor, Mayor Briscoe said, “On behalf of 30 million Irishmen, I welcome you to Dublin.” And he later said, “I'm talking about 5 million in Ireland and 25 million in the United States.” [Laughter] Both figures were slight exaggerations, but we do have 20 million Americans here who are Irish or of Irish descent, and on St. Patrick's Day, Mr. Prime Minister, there are at least 200 million—[laughter]—Americans who are Irish.

Americans are particularly proud of Ireland and what you have done. Not many people, not enough people know that Ireland has the fastest growing economy in Europe—a nation which is now a better and better place to live for young and old; a nation playing a growing leadership role in the councils of Europe and indeed the entire world; a nation which has benefited, as have we, with

rapidly increasing American investments; a nation who still sends missionaries and priests to the United States, to Georgia, and to many other parts of the world: a nation that is committed to peace enough to be a demonstrator of courage, whose soldiers now serve in a sacrificial way in the Congo, in Cyprus, in Lebanon; a nation that has indeed found its leadership role in Europe and throughout the world.

Those who know history understand that Ireland was the nurturer of the seed of Western civilization throughout the Dark Ages and has meant so much to our country—in the past, in the present, and will in the future—in our heritage, our belief in freedom, our culture, our love of arts. And we are all proud that Ireland has now been recognized in every nation as occupying a legitimate and well-deserved role of leadership in the political, cultural life of Europe and the world.

Ireland is also a nation which has suffered from bloodshed and division. Ireland is not alone in modern day suffering. I talked to my wife not too long ago, at 6 o'clock our time, which was 6 o'clock in the morning in Thailand. She's now, about 7:30, arrived at one of the refugee camps that she'll be visiting all during this day, our night, and she'll be exploring ways where our great and prosperous and blessed country can help those who suffer from starvation and persecution.

A little earlier this evening I had to cancel my planned, long-planned trip to Canada, because Americans are suffering from international terrorism in being held against their will, and my responsibility is to protect the lives of Americans in foreign countries and here at home.

Our guest, the Prime Minister of the great nation of Ireland, represents the kind of leadership necessary in a world that's still plagued with suffering and with threats, with violence to the laws of man and God, and with terrorism. He's a man of quiet strength. As I said earlier,

as on the playing fields, in his leadership role he's a man of gentleness. He has a firm voice of reason, and because of his quiet strength, Ireland and we and the other nations who look to him for leadership benefit greatly.

I would like for all of you to join me in a toast to Prime Minister and Mrs. Jack Lynch, our friends, to the Irish everywhere, and to the indomitable spirit of their lovely land, which is also our lovely land. To the Irish and to our notable guest of this evening.

THE PRIME MINISTER. *Mr. President, Miss Lillian—glad to see you here, delighted you have come—Ambassadors, ladies and gentlemen:*

When I see the President of the United States using as a script two sides of a small envelope—[laughter]—it ill-behooves me to take out my script here this evening. [Laughter] There are a few points in it that perhaps I would like to refer to it in order to get across to you. And I'd, first of all, like to thank you, Mr. President, for your gracious welcome, for your kind words about my country, about my wife, and about me.

I just want to recall an occasion, oh, some 30 years ago, when a very well-known American came to Ireland, and he had performed admirably in the Berlin Olympics of 1936, I think it was. His name was Jesse Owens. And he had won the 100, the 220, the relay, and the long jump; he had four Olympic gold medals. And I introduced Jesse Owens as a great athlete, as a gentleman, and a lot of other things. And when he got up to address the assembly—it was some kind of an athletic seminar—he said, "Thank you, Mr. Lynch, for saying exactly what I had written down for you." [Laughter] Your President has said things about me that I mightn't have written for him, but I know they were too profuse, but certainly about my country, he said nothing that I wouldn't have wanted him to say anyway.

But we have had a gracious welcome here. My wife, Máirín, and I have been especially touched by the warmth of that welcome, and I think the spirit of it emphasized the spirit of America through the ages. Just over 400 years ago, the population of the United States, that is, the area occupied by the United States, was less than the population of my country now. And into this territory people have flowed from all over the world, people of Europe, from Africa, and of Asia, and they have made their home here. And you in America have provided them with the hospitality which all the bounty of nature has made possible and, as well, the virtue of good and just government has secured.

In Europe today, we face the problems that the United States faced many, many years ago. Europe is now integrating, as the States once did. And although the times are not the same, the European Community now has a comity of nations, each acutely conscious of its own sovereignty, but each willing to compromise in the interests of the greater good, as the States once did in America and still do today. But we have our problems in the process of this evolution, problems in which you have given an example for the rest of us to overcome.

I think the United States can be truly said as the world's outstanding example of unity in diversity. And the words in your motto, "E Pluribus Unum," describe not just aspiration but attainment. And we outside the States, those of us in Ireland and in other countries in Europe, look on your achievement with pride and genuinely with pride, since so many of our forebears were part of that achievement. But to you Americans belong the real pride, because you must live every day with the burden and with the responsibility which America's power brings in the world today.

As the President has said, Ireland cur-

rently holds the Presidency of the European Community, and in that capacity we represent fellow Europeans at numerous international conferences, including the United Nations. We in Europe see ourselves as a community in an interdependent world, as a potent and growing force, building on our relations with both developing and developed countries in a friendly and a cooperative spirit.

In pursuing this policy, the EEC's relationship with the United Nations is particularly significant. You, Mr. President, have said—and we welcome what you'd said in this respect—that you see European strength and unity not as a threat, but as a boon. The plain truth is that Europe and the United States need each other. Interdependence is not just an empty phrase; it describes a fact.

I don't have to go into the problems that we face together in the world of today: the depletion of resources, the abuse of human rights, the increase in armaments and nuclear proliferation, starvation and global confrontation. We both—not just as a small nation, like Ireland is—but we both, in our capacity as a member of the European Community, with the United States, have to face up to these problems.

We have the problems of new technology, and we're moving into worlds where none of us has ever been: the shift in the balance of trade involving the developing countries—and we must look after them as well—and the demographic changes which can alter the whole structure of a society. And all these problems can be dealt only in a coordinated way, and certainly I can see much damage being done in a return to an old-fashioned protectionism or economic nationalism. You, Mr. President, have expressed time and time again the value to the West and the developing world of Multinational Trade Negotiations designed to avoid just such dangers.

We think that in Ireland we have a special role to play in symbolizing the common interests between the United States and Europe, as well as the great potential still to be tapped in an even closer cooperation between the two continents.

Our island is roughly 200 miles wide, 300 miles long. We're close to the European mainland. We're the closest European country to the United States of America. In fact, there are so many parishes on the west coast of Ireland that describe themselves as the nearest parish to the United States—[laughter]—that one outbids the other—I don't know yet which is. But I think in my part of the country, in the southwest of Cork, we can claim that we really are the closest parish to the United States. [Laughter]

Mr. President, your having spoken from the back of an envelope, as I said, I'd better not have any more recourse to my script, except to say that we are glad we have this opportunity of being here, of being your official guests, glad of the opportunity of representing the European Economic Community here in Washington on this occasion.

Back at home we have some progress to report; we have difficulties. We went into these difficulties today with the President, with the Secretary of State, with the Foreign Relations Committee of the House and of the Senate. I believe one is Foreign Relations and the other is Foreign Affairs; I forget which is which.

But I was glad to see my old friend Tip O'Neill there this afternoon, a man who has given a great lead as far as insight and understanding of the Irish situation is concerned. We welcome that. You, Mr. President, in August 1977, similarly showed the same interest and the same concern.

We're doing fairly well in Ireland. We are proceeding economically. Our population is increasing—which is unusual in

Europe at the present time—perhaps not as much as we would like, as there's a story about a lady who, having had six children, people were wondering why she didn't have the seventh. Somebody said to her, "Well, you've produced six beautiful children, terrific assets, a compliment to the nation, and why don't you go ahead?" She said, "No, nothing doing as far as I'm concerned. I read the other day that every seventh child born into the world is a Chinese." [Laughter]

Notwithstanding that admonition, our population is, happily, growing. And more and more of our population are staying at home, with the result that there will be less Hobans, less O'Neills, perhaps even Carters. I think there are about 120 Carters in the Irish telephone directory. There are a few Lynchs. There was a Lynch who in some way contributed to the Declaration of Independence. But there will be less Lynchs coming to the United States in the future. We thank God for that. We thank our association with Europe, and as well, we thank American investment in our country.

Mr. President, I am delighted to be with you. I'm delighted to be your guest. I'm delighted that your mother has come along to join us, because she proved so popular in Ireland that people like me who—[laughter]—we were getting worried about our own particular position, vis-a-vis the electorate. In fact, your son told us today, Miss Lillian, that you want to go back there sometime soon and for a longer period. We hope you do. And the next time you come, will you please bring your son? We'd like to have him as well. [Laughter]

Mr. President, ladies and gentlemen, I'd like you to join me now in a toast, a toast to the President, Mrs. Carter, and the people of this great nation, the United States of America. As I said on the White House lawn today, "*Bail ó Dhia ort féin agus ar do chuid oibre,*"

may God's blessing be with you and with your work. To the President of the United States, Mrs. Carter, and the people of the United States.

THE PRESIDENT. I wish I had time to recognize all the great Irish leaders who are here. I'm very delighted that Mr. George Meany is present and Tip O'Neill; Joe Garrahy, Governor; Brendan Byrne, Governor; Leonard Bernstein, right in front of me here; and my mother, who's a real honorary citizen of Ireland. And I've asked my mother, in the absence of my wife, to join us in the receiving line. We look forward to meeting every one of you.

Thank you very much.

NOTE: The President spoke at 7:50 p.m. in the East Room at the White House.

Energy Security Corporation and Synthetic Fuels and Conservation Programs

White House Statement on Senate Approval of Legislation. November 9, 1979

The President this morning expressed his pleasure with the Senate's actions in approving a strong synthetic fuels and conservation program and the establishment of an energy security corporation.

While refinements in the bill will have to be made, the most important elements of the President's program are intact and strong. The President said, "The Senate has ensured that there will be a strong synthetic fuels program and a significant institution to carry it out. The bill's conservation program is a strong, substantial initiative. I congratulate Chairman Jackson, Senator Johnston, and Senator Domenici for their able and dedicated work.

"My administration will continue its close cooperation with congressional lead-

ers in support of this legislation. The uncertain nature of our energy supplies cannot be overemphasized; but this action, together with the continued steady progress of the energy mobilization board and the windfall profits tax, is a step toward regaining control of our Nation's future."

Strategic Arms Limitation Treaty

White House Statement on Approval of the Treaty by the Senate Foreign Relations Committee. November 9, 1979

The President is deeply gratified by the vote of the Senate Foreign Relations Committee to favorably report the SALT II treaty to the Senate floor. We are particularly grateful for the thoroughness with which the committee has explored all aspects of the treaty.

The President would like to express special appreciation to Senators Church and Javits for their leadership during the extended hearings and markup of SALT II.

It is the President's hope that all Senators will explore the SALT II treaty and related issues with the same intensity as the members of the Senate Foreign Relations Committee. We believe after such study Senators will reach the conclusion that SALT II is in the best interests of the United States and will vote to ratify the treaty.

American Hostages in Iran

White House Statement. November 9, 1979

The seizure of more than 60 Americans in our Embassy in Tehran has provoked strong feelings here at home. There is outrage. There is frustration. And there is deep anger.

There is also pride in the courage of those who are in danger and sympathy for them and for their families. But the most important concern for all Americans at this moment is safety of our fellow citizens held in Tehran.

The President shares these feelings. He is pursuing every possible avenue in a situation that is extremely volatile and difficult. His efforts involve many countries and individuals. Many of these efforts must of necessity be conducted without publicity, and all require the calmest possible atmosphere.

The President knows that no matter how deeply we may feel, none of us would want to do anything that would worsen the danger in which our fellow Americans have been placed.

He calls on all Americans, public officials and private citizens alike, to exercise restraint, and to keep the safety of their countrymen uppermost in their minds and hearts. Members of the families of the American hostages with whom the President met this morning have asked to join with him in this appeal. The President expects every American to refrain from any action that might increase the danger to the American hostages in Tehran.

NOTE: Press Secretary Jody Powell read the statement to reporters assembled in the Briefing Room at the White House.

The President had met with the members of the families at the State Department.

United States Assistance to Central America and the Caribbean

***Message to the Congress Transmitting
Proposed Legislation. November 9, 1979***

To the Congress of the United States:

Many of our neighbors in Central America and the Caribbean are in crisis—

crisis marked by economic problems, terrorism, and popular frustration. The resolution of these problems in ways that will preserve the independence and security of these countries, while expanding democracy and supporting human rights, is very much in the national interest of the United States.

Prompt and effective U.S. assistance is vital.

—Nicaragua's economy has been crushed by bitter and prolonged strife. We have been asked to help, and we are doing so. But more is needed to restore public confidence, private initiatives, and popular well-being.

—The Governments in El Salvador and Honduras have pledged democracy and moderation. These and other Central American countries are embarked on accelerated development efforts of direct benefit to the poor. Assistance in these efforts is essential in creating the conditions under which democratic institutions can grow and thrive.

—The countries of the Eastern Caribbean are young and struggling democracies. They need help now for nation-building and for economic development.

I am therefore today proposing action to expand our support for development and security in Central America and the Caribbean. This will augment our existing development and security assistance programs in these regions, which in turn complement the contributions of several other governments and international agencies.

I have directed that, subject to normal congressional notification procedures, funds be reprogrammed for use in Central America and the Caribbean. These include:

—\$5 million from the fiscal year 1980 Economic Support Funds for development projects in Central American countries other than Nicaragua.

—\$10 million from fiscal year 1979 and fiscal year 1980 development assistance funds for public works and high employment impact projects in the Caribbean. These projects are an important part of our fiscal year 1979–80 contributions of \$66.9 million budgeted for the Caribbean Development Group, chaired by the World Bank.

We are also reprogramming Food for Peace funds to increase food assistance in the area, especially in Nicaragua. We will also likely be reprogramming \$5 to \$10 million in Foreign Military Sales credits and International Military Education and Training funds for the Caribbean, and similar amounts for such programs in Central America. We are still working out the final details of these proposed reprogrammings and will fully inform the appropriate congressional committees of our proposed actions.

Reprogramming, however, is not enough. The enclosed bill would provide \$80 million in flexible Economic Support funding, \$75 million to assist in the reconstruction of the Nicaraguan economy and \$5 million for early-impact development projects in other Central American countries.

I strongly urge rapid congressional action on this bill.

Such action will demonstrate that the United States can be relied upon to support democratic aspirations, the rebuilding of broken economies, and the security of our friends in this nearby region. Our additional funds for Central American development should substantially augment existing programs. Furthermore, we hope that other nations and international institutions will increase their efforts to accelerate the social and economic development of Central America.

With your help we can make clear where we stand.

JIMMY CARTER

The White House,
November 9, 1979.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

November 5

The President returned to the White House from Camp David, Md.

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Senators J. Bennett Johnston of Louisiana, Mark O. Hatfield of Oregon, and Pete V. Domenici of New Mexico;
- Mr. and Mrs. William Fisher of Carnegie, Pa., and Mr. and Mrs. Marvin Porterfield of Martinsburg, W. Va., hosts of meetings the President had in their homes with private citizens on July 12 and 13;
- Joe Reed, president of the Alabama Democratic Black Caucus, and black civic and community leaders from Alabama;
- Senator Alan K. Simpson of Wyoming.

The White House announced that the President is and has been closely monitoring and receiving regular reports on

efforts to obtain the release of the American Embassy staff in Tehran, who are being detained by Iranian students. A meeting of high-level officials was held this morning in the White House to review the situation and to consider further approaches which might be appropriate.

The White House announced that in reaction to the killing of 5 people and the wounding of 12 others during a demonstration of the Workers' Viewpoint Organization in Greensboro, N.C., on November 3, the President has spoken with Attorney General Benjamin Civiletti, and he has directed that he cooperate fully with local officials and that the Department of Justice pursue its own investigation under Federal law to do everything possible to bring the perpetrators to justice.

November 6

The White House announced that the President met with senior foreign policy advisers this morning to discuss the situation in Iran. The United States has been given assurances by the authorities in Iran that the safety and well-being of Americans will be protected. The United States expects that these assurances will be honored. The White House further announced that in the meantime, the administration is doing everything possible to secure the release of the Embassy staff. The administration does not consider public comment on these efforts to be appropriate or helpful while they are in progress.

The President met at the White House with:

- Dr. Brzezinski;
- Frank B. Moore, Assistant to the President for Congressional Liaison;
- U.S. Ambassador to Saudi Arabia John C. West;
- Vice President Walter F. Mondale;

—James T. McIntyre, Jr., Director of the Office of Management and Budget;

—Secretary of State Cyrus R. Vance, Ambassador Robert S. Strauss, Personal Representative of the President to the Middle East peace negotiations, and Sol M. Linowitz, whom the President has designated as Ambassador Strauss' successor in that position;

—the National Security Council;

—former Attorney General Ramsey Clark and William G. Miller, Senate Intelligence Committee staff member, who are acting as the President's emissaries in efforts to secure the release of the American Embassy staff.

The President transmitted to the Congress the 1978 annual report of the Director of the National Cancer Program, and the 1976, 1977, and 1978 annual reports of the Department of Health, Education, and Welfare on Occupational Safety and Health.

November 7

The President met at the White House with:

- Dr. Brzezinski;
- the Democratic congressional leadership;
- Mr. Moore;
- former Senator Muriel Humphrey of Minnesota;
- Secretary of the Interior Cecil D. Andrus, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, Anne Wexler, Assistant to the President, and representatives of national environmental groups;
- Mayor Carl Officer of East St. Louis, Ill.;
- Senator J. James Exon of Nebraska.

The President participated in the briefing by administration officials on the strategic arms limitation treaty given for civic and community leaders from Connecticut, New Jersey, Oregon, and Puerto Rico in the East Room at the White House.

November 8

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of the Treasury G. William Miller, Charles L. Schultze, Chairman of the Council of Economic Advisers, Alfred E. Kahn, Advisor to the President on Inflation, Mr. Eizenstat, and Mr. McIntyre;
- Members of the House of Representatives;
- Mr. Moore;
- Senator Howell Heflin of Alabama;
- Senator Daniel Patrick Moynihan of New York;
- Members of the House of Representatives.

The White House announced that the President will postpone his visit to Canada to remain at the White House and continue to closely monitor the situation in Iran and direct efforts to secure the release of the Americans there. The visit to Canada will be rescheduled to a mutually convenient date early next year. The President's decision to postpone this visit is not based on new developments or any expectation of an immediate change in the situation in Iran. Rather, it is based upon his desire to remain in Washington, where his foreign policy advisers are immediately available and so that he can

continue to monitor closely and direct the situation there.

November 9

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary Vance, Deputy Secretary of State Warren M. Christopher, Secretary of Defense Harold Brown, Hedley W. Donovan, Senior Adviser to the President, Hamilton Jordan, Assistant to the President, Lloyd N. Cutler, Counsel to the President, and Dr. Brzezinski;
- Mr. Moore.

The President transmitted to the Congress the 1978 annual report on the Administration of the National Sickle Cell Anemia, Cooley's Anemia, Tay-Sachs, and Genetic Diseases Act.

The President declared a major disaster for the Territory of American Samoa as a result of flooding, mudslides, and landslides, beginning on October 28, which caused extensive property damage.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted November 6, 1979

JOSE A. CABRANES, of Connecticut, to be United States District Judge for the District of Connecticut, vice **John O. Newman**, elevated.

ROBERT J. McNICHOLS, of Washington, to be United States District Judge for the Eastern District of Washington, vice a new position created by P.L. 95-486, approved October 20, 1978.

MARGARET JOAN GIANNINI, of New York, to be Director of the National Institute of Handicapped Research (new position).

NOMINATIONS—Continued

Submitted November 6—Continued

SUSAN J. WILLIAMS, of Virginia, to be an Assistant Secretary of Transportation, vice Terrence L. Bracy, resigned.

Submitted November 7, 1979

RICHARD J. GREEN, of New Jersey, to be an Associate Director of the Federal Emergency Management Agency (new position).

GEORGE FUMICH, JR., of Virginia, to be an Assistant Secretary of Energy (Fossil Energy), vice Robert D. Thorne, resigned.

Submitted November 9, 1979

DONALD R. TOUSSAINT, of Virginia, a Foreign Service officer of Class one, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Socialist Republic of Sri Lanka and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Maldives.

**CHECKLIST OF WHITE HOUSE
PRESS RELEASES**

The following listing contains releases of the White House Press Office which are not included in this issue.

Released November 6, 1979

Announcement: nomination of Jose A. Cabranes to be United States District Judge for the District of Connecticut

Announcement: nomination of Robert J. McNichols to be United States District Judge for the Eastern District of Washington

Biographical data: Sol M. Linowitz, designated as the successor to Ambassador Robert S. Strauss, Personal Representative of the President to the Middle East peace negotiations

An act to amend the Foreign Assistance Act of 1961 to authorize special Caribbean hurricane relief assistance.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, November 16, 1979

Iranian Students in the United States

Announcement on Actions To Be Taken by the Department of Justice. November 10, 1979

The President has directed the Attorney General to identify any Iranian students in the United States who are not in compliance with the terms of their entry visas, and to take the necessary steps to commence deportation proceedings against those who have violated applicable immigration laws and regulations.

As an initial measure, the Immigration and Naturalization Service of the Department of Justice will issue a notice requiring all Iranian students to report their present location and status immediately to the nearest INS office, and will take additional steps to locate and identify such students to determine legal status. For students found to be in illegal status, deportation proceedings will be conducted in accordance with constitutional due process requirements.

Oil Imports From Iran

Remarks Announcing Discontinuance of United States Imports. November 12, 1979

We continue to face a grave situation in Iran, where our Embassy has been seized and more than 60 American citizens con-

tinue to be held as hostages in an attempt to force unacceptable demands on our country. We're using every available channel to protect the safety of the hostages and to secure their release.

Along with the families of the hostages, I have welcomed and I appreciate the restraint that has been shown by Americans during this crisis. We must continue to exhibit such constraint, despite the intensity of our emotions. The lives of our people in Iran are at stake.

I must emphasize the gravity of the situation. It's vital to the United States and to every other nation that the lives of diplomatic personnel and other citizens abroad be protected and that we refuse to permit the use of terrorism and the seizure and the holding of hostages to impose political demands.

No one should underestimate the resolve of the American Government and the American people in this matter. It is necessary to eliminate any suggestion that economic pressures can weaken our stand on basic issues of principle. Our position must be clear. I am ordering that we discontinue purchasing of any oil from Iran for delivery to this country.

These events obviously demonstrate the extreme importance of reducing oil consumption here in the United States. I urge every American citizen and every American business to redouble efforts to curtail the use of petroleum products. This action will pose a real challenge to our

country. It will be a test of our strength and of our determination.

I've directed Secretary Duncan to work with the Congress and with other Federal, State, and local officials, and with leaders of industry to develop additional measures to conserve oil and to cope with this new situation. We will strive to ensure equitable and fair distribution of petroleum products and to ensure a minimum of disruption of our Nation's economy.

These American measures must be part of an effective international effort, and we will consult with our allies and with other oil-consuming nations about further actions to reduce oil consumption and oil imports.

America does face a difficult task and a test. Our response will measure our character and our courage. I know that we Americans shall not fail.

Thank you very much.

NOTE: The President spoke at 2:01 p.m. to reporters assembled in the Briefing Room at the White House.

Oil Imports From Iran

Proclamation 4702. November 12, 1979

IMPORTS OF PETROLEUM AND PETROLEUM PRODUCTS

By the President of the United States of America

A Proclamation

The Secretary of the Treasury in a memorandum dated November 12, 1979, and the Secretary of Energy in consultation with the Secretaries of State and Defense, have informed me that recent developments in Iran have exacerbated the threat to the national security posed by imports of petroleum and petroleum products. Those developments underscore the

threat to our national security which results from our reliance on Iran as a source of crude oil. The Secretaries have recommended that I take steps immediately to eliminate the dependence of the United States on Iran as a source of crude oil.

I agree with these recommendations and that the changes proposed are consistent with the purposes of Proclamation 3279, as amended.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by the Constitution and the laws of the United States, including Section 232 of the Trade Expansion Act of 1962, as amended, (19 U.S.C. 1862) do hereby proclaim that:

SECTION 1. Section 1 of Proclamation 3279, as amended, is further amended by the addition of a new paragraph (e) to read as follows:

Sec. 1(e). Notwithstanding any other provision of this Proclamation, no crude oil produced in Iran (except crude oil loaded aboard maritime vessels prior to November 13, 1979) or unfinished oil or finished products refined in possessions or free trade zones of the United States from such crude oil, may be entered into the customs territory of the United States.

SEC. 2. Section 11 of Proclamation No. 3279, as amended, is further amended in paragraph (1) to read as follows:

(1) The term "imports", when applied to crude oil other than that produced in Iran, includes both entry for consumption and withdrawal from warehouse for consumption, but excludes unfinished oil and finished products processed in the United States territories and foreign trade zones from crude oil produced in the United States.

IN WITNESS WHEREOF, I have hereunto set my hand this 12th day of November, in the year of our Lord nineteen hundred and seventy-nine and of the Independence of the United States of

America the two hundred and fourth.

Hospital Cost Containment Legislation

*Letter to the Members of the House of
Representatives. November 13, 1979*

You will have an opportunity this week to help our fight against inflation by passing Hospital Cost Containment legislation that can save Americans more than \$40 billion over the next five years. I urge you to join in this effort.

For more than two years, the Congress has been considering cost containment legislation. Many legitimate concerns have been raised by Members as well as by the hospital industry. Recently, the Ways and Means and Commerce Committees have approved legislation which responds to those concerns in a fair, reasonable and balanced way. The legislation which you will be voting on is *not* the same legislation that was proposed in the last Congress. And, thus, it is not the same legislation against which so many of the objections to cost containment have been directed.

The modifications which have now been made to the original cost containment bill minimize the Federal government's involvement and place the highest priority on voluntary actions by the hospitals:

- The bill recognizes the request for a priority voluntary effort initiated by the nation's hospitals two years ago. Only if the hospitals fail to meet their own voluntary national goal would the stand-by Federal program go into effect.

- The bill exempts states with successful cost containment programs. States

which do not yet have such programs are provided specific incentives to establish and implement them.

- All small hospitals—those with less than 4,000 admissions a year—would be exempt from the bill's coverage.

- The bill will not result in new regulatory burdens on hospitals. Hospitals will have to provide only one additional line of information (wages for non-supervisory personnel) on the Medicare cost forms which they currently submit to the Federal government.

- The bill permits a complete pass-through of the increases in the price of goods and services that hospitals purchase. Thus, hospitals are not penalized because of inflation in the general economy.

- The stand-by Federal program cannot be put into effect over the objection of either House of Congress.

- The bill contains a sunset provision to limit the program to a maximum of five years.

This modified cost containment legislation will have a significant impact in reducing the hospital industry's inflation rate, which over the past decade has increased twice as fast as the inflation rate in the overall economy. Hospital inflation has been at such high levels because of a lack of competition within the industry. Without the type of consumer marketplace which exists in other sectors of the economy, hospitals generally have no incentive to reduce waste or inefficiency and to curb costs. The Federal government itself now contributes 40% to all hospital costs and has an obligation to the American people to assure that Federal tax dollars are not wasted.

While ensuring continued high-quality care, the legislation before you can bring efficiency and businesslike practices to the hospital industry. And it can do so with a minimum of Federal involvement and red tape.

Of equal importance, no other bill before the Congress will have such a direct effect on reducing the cost of living for all Americans. A vote for this bill will clearly and properly be seen by the public as a vote to reduce inflation. It will also be seen as a measure of Congress's commitment in working to fight inflation.

We cannot now afford to turn our backs on the solution developed by two House Committees after several years of difficult work. The time for delay and additional study is past. The time for positive action against inflation is now. I urge you to take that action by voting for Hospital Cost Containment legislation.

Sincerely,

JIMMY CARTER

NOTE: This is the text of identical letters addressed to each Member of the House of Representatives.

Aid for Kampucheans

Remarks at a White House Meeting on Relief Efforts and the First Lady's Trip to Thailand. November 13, 1979

THE PRESIDENT. I'm very grateful that all of you have come to the White House to talk about one of the most important issues that faces humanity and will face it in our lifetime. It's a rare occasion in human memory when there has been a possibility of holocaust, threatening to destroy an entire race of people. It happened, perhaps, in the time of the Armenians, earlier in this century, and later, of course, among Jews and others in the time of Hitler, and now among the people of Cambodia, or Kampuchea, as it's presently known.

There also is a rare occasion when in the life of a great nation its government and its people can react in an unselfish, dynamic, and effective way to alleviate extraordinary human suffering, such as

the case, again, with the refugees and the starving people of the Cambodian region.

I was very pleased that the three Senators, then my wife and Dr. Richmond, Mrs. Young and her group, and now a group of Congresswomen and others have been to that region to dramatize the need for action, and also to bring back tangible recommendations on how the suffering might be alleviated more effectively.

It's a difficult issue to resolve. There are major obstacles to overcome: obstacles of war, over which we have no control in that long-troubled part of the world; the issue of diplomatic bridges that are very hard to cross; and also, of course, are very serious problems in administration, in dealing with the bureaucratic needs, to derive help from those eager to give and actually to deliver it effectively to those who are most in need.

Rosalynn and Senators Danforth, Baucus, and Sasser, Dr. Richmond, and others have brought back very specific recommendations on what might be done. I'm not going to try to preempt their reports to you. They can make their reports much better than can I. I'm one of those who's listening, and, like you, I am eager to act in accordance with the best interests of those who are crying out for assistance.

There are three basic areas of response: One is the United States Government itself—and the Congress has reacted very well in approving almost \$70 million worth of aid. And I will go to the Congress for additional aid if it's necessary. Second is an appeal to private organizations, volunteer organizations of all kinds, represented by many of you here. And that's a resource of assistance which is eager to be tapped and which has already done yeoman's work, even before governmental help could be effective. And the third recommendation is concerning international relationships.

And I would like to caution you about that: This is a judgment and a decision that we can't make in this room.

And one of the vivid reports that Rosalynn brought back to me was that quite often a United States initiative is counterproductive in the eventual carrying out of a recommendation. If the initiative comes from one of the less developed nations of the world or comes directly from the United Nations or, perhaps, comes from other countries than we, it's much more effective.

So, I would like to urge you to restrain your own inclinations to give public condemnation or public advice on what the Vietnamese ought to do, what the warring parties in Kampuchea ought to do, what the United Nations ought to do. Let that be handled through diplomatic channels. I can assure you that I will not permit these efforts to be abandoned or ignored. But I think that the public calling for action might be the very thing that would prevent that action being carried out. That's my only caution to you.

And I have a second one—I forgot. I think the more all of us forgo credit for action to be taken, the more effective the effort will be. There is a great yearning, I know, within the United States Government, within the Red Cross, within UNICEF, within Catholic charities, within the Protestant churches, within benevolent groups, to want to give aid and then have that assistance be publicly acknowledged and recognized. That is a human trait, but the more we can subjugate those natural, human desires for quiet giving and close cooperation with others, with a minimum of jealousy and a minimum of grasping for recognition, the more effective we'll all be.

I'm sure that's a cautionary word that you don't need, because there's an overwhelming unselfishness and benevolent attitude among this group. And you've taken the initiative, and there's been no

evidence of a grasping for recognition. But in the future, this is going to be a long, slow, tedious process, and that needs to be recognized and avoided.

The last point I'd like to make is this: The Thai people and the Thai Government both deserve every possible recognition, expression of gratitude, and thanks. They are a poor country. Many of the Thai people suffer terribly from poverty, disease, and hunger. It's not a popular political thing to bring in enormous numbers of refugees from an alien and antagonistic country, who's been historical enemies on occasion, and still not arouse the condemnation of the Thais, who themselves suffer. And this has been a very great demonstration of both kindness and also courage, political courage.

I know that this is something that you'll want to help with. The Thais are not able to accept literally hundreds of thousands of refugees into their country and feed those refugees on their own. And we've got to be especially generous to the Thais in our thanks and in our direct help and the recognition of what they are contributing.

I look forward with great eagerness to the summary of your recommendations. I will be getting it through the National Security Council and through my wife, who always has easy access to me. And I think that her involvement is one that can be of help to you as well. She'll be working with the wives of Senators and other Members of Congress, and female Members of Congress. She will also be working with any of you who want her to help in providing an avenue to the public and also an avenue directly to me.

But I'm very grateful to all of you for being willing to come. I think this will be one of the most important meetings ever taking place in the White House. And I'm grateful that I am President of people like you.

Thank you very much.

REVEREND HESBURGH. *Mrs. Carter, Mrs. Vance, ladies and gentlemen:*

Just short of 3 weeks ago, on October 24, this same group of leaders from our various religious faiths and from the various private voluntary organizations met in Washington to discuss what we might do together and in concert to meet the tragedy in Cambodia. The purpose was to consult how the American people, how the American Government, and how the United Nations might best respond to avoid what appeared to be a growing holocaust, already half accomplished, if you will.

We called on the voluntary agencies, first of all, to increase their efforts and to work together to help the Cambodians. We urged Americans to provide them all with financial support. And in a special letter to the President, we urged greater United States Government efforts in order to assist, as quickly and as effectively as possible, this people in great need.

We met that same day at the White House with the President, and never was a letter answered more quickly. Hardly before the letter was in his hands, he granted us all of the various requests we had for increased aid and said he was willing to do whatever else might be necessary to do to avert this holocaust.

I think today, in the light of the appeal made by United Nations Children's Fund, UNICEF, the International Committee of the Red Cross, the appeals by all of our various voluntary agencies for more than \$300 million for Cambodian relief, and after the generous and immediate response of the President of the United States voiced by our Secretary of State, Mr. Vance, at the Pledging Conference of the United States on Monday, November 5—when many of you were present, and I too—it seemed to us that the time was now appropriate to update our October 24 meeting in an effort to relieve the

growing misery of the Cambodians.

It was again against this same background as our last meeting that I, as chairman of the Overseas Development Council, and cochaired by the Reverend Paul McLeary, who is chairman of the American Council on Voluntary Agencies, that we invited this group again, on very short notice, to this second consultation to exchange information on the situation in Thailand and Cambodia after other relief is taking place there.

In this second consultation we have four things we would like to do: first, to find out what the various agencies are now doing; second, what they are planning to do for the near-term future; third, what fundraising efforts have been undertaken to date; and fourth, what are the various bottlenecks and needs that we have to move forward quickly and efficiently. There is, of course, a fifth topic which I'm sure will emerge from our discussion with Mrs. Carter, and that is how can we improve and institutionalize exchange of information among ourselves and coordination of the various activities—governmental and nongovernmental and inter-governmental—here and overseas.

It seems to me that the vigor of the pluralistic American response to this Cambodian tragedy is most welcome, but it does raise for all of us a great challenge to work together and, as the President just said, to work together without seeking praise in so doing.

I would like to say that the visit to Cambodia and Thailand in October by Senators Danforth, Sasser, and Baucus, who are here with us this morning, on my left, your right, and also the various Governors and the Congresswomen and, most particularly, of our First Lady, Mrs. Carter—all of this has heightened and increased the consciousness of Americans for the need of all of the generous action we might put forward to alleviate this growing tragedy.

May I say, Mrs. Carter, in introducing

you, that we are looking forward to hearing the report from you and your colleagues on the situation with respect to Cambodian refugees in Thailand, and any other recommendations or questions you may have of this group, which represents, I think, the cream of the private voluntary effort. After your comments we will be hearing from all of these various agencies active in Cambodia on the questions posed earlier, and we are looking forward later in the day to discussing our conclusions further with you.

Mrs. Carter, it's with real pride and great satisfaction that I'd like to present you.

MRS. CARTER. Thank you very much. I'm very pleased to have you all here today. I welcome you.

And I did go to Cambodia. And I'm very happy to have this opportunity to report to you about my trip, and also to thank you for what you have done already and for what you continue to do, and to work with you on ways that we can better help those who are suffering in this area of the world.

As the President has said, I went to Thailand on his behalf to express the profound concern of the people of our country for the tragedy that is unfolding in Indochina. My visit was very brief, but I think I can say positively that it was one of the most significant events of my life. I came away filled with admiration for the representatives of your organizations who are there struggling with this massive problem of relief for thousands and thousands of human beings who are starving and homeless and ill and bereaved. And I came away also, as Jimmy said, filled with gratitude for the efforts of the people of Thailand and for the Government of Thailand.

And I'm sure that every person in this room knows what faces us in the coming weeks. The problem is one that is not going away anytime soon. We will be faced

with it for a long time. While our international efforts have brought vast improvements—and I saw in the refugee camp at Sakeo some beginnings of hope for those few who have been brought back from the very edge of death. The camp, since the time that the Senators was there, has really made progress; in fact, some people told us that a miracle had happened in the last few weeks. The camp is only about 3 weeks old, but people are being fed and are being taken care of in that camp now. And you will have a further report on that from some of those who went with me.

But the picture in the near future looks very bleak, because a wave of new refugees are expected to come across the border into Thailand from Kampuchea—a number estimated anywhere from 100,000 to 250,000, maybe 300,000—that are now right at the border, that are expected to come now that the dry season is here and the fighting has begun again. They will be pushed over into Thailand.

And for those of us who have seen with our own eyes the dimension of the problem and the terrible suffering and starvation, the thought of so many more people in the same situation who will be coming into Thailand is almost more than you can bear, when you are there and look at it.

I'd like to tell you briefly about my trip. I was accompanied by some of those here that are here at that head table, who will be reporting to you also. Some of us worked together; some of us dispersed so that we could gather more information, because we were only there for a few hours, a day, 2 days.

We went to the refugee camps in Thailand, Kampuchea, that I have already talked about, Sakeo. We witnessed the disease, the dislocation of persons, suffering, starvation. We saw many, young and old. We saw children separated from their parents, afflicted with malaria and malnutrition.

In the camp at Ubon, for refugees from

Laos, conditions were substantially better. There are approximately 37,000 persons there. That camp is 4 or 5 years old. They eat well, but they don't go out of the camp. They have been there, some for 3 or 4 years, waiting to resettle abroad. And although the living conditions are so much better than Sakeo, they are still not anything that you would call good.

It is sad to see them with no purpose. They at first thought they might go back into Laos. Now they know they won't, or don't want to. And they're waiting to be resettled, some of them with feeling that they've been forgotten by the world, because the focus has been on the Kampuchians, the focus has been on the boat people. And these people really feel forgotten. I was touched by them. And one of the girls that worked with me said that one of the main problems they have with these people is mental depression, just existing day to day for 4 or 5 years, waiting to see what happens to them.

At the transit center, the refugee transit center in Bangkok, we saw overcrowded and humiliating conditions where refugees awaiting final processing for immigration must endure. These were things that I don't think I'll ever forget. These were people who have already been chosen to go to other countries and have to wait in an unbelievable place, some for a month and a half or 2 months. We try to process ours, the ones that are coming to the United States, much earlier, but still the conditions are unbearable.

While we were there in Bangkok, we had candid discussions with representatives of the international volunteer organizations to discuss their goals, their frustrations, and the need for better coordination. We did have a very good meeting, and everybody, I think, vented their frustrations, and everybody decided

that there was a great need for coordination.

We met with the King and Queen of Thailand to discuss the whole spectrum of the refugee problem and the need for further sites, because we must have further sites for this 200,000 to 300,000 that are expected to come into Thailand from Cambodia—and they're expected to come in in the next 3 or 4 weeks. The situation is urgent.

We had a long discussion with Prime Minister Kriangsak, a fruitful discussion, about the political and foreign policy risks that are facing the Thai Government because of their policies. It is important that the international community provide visible and demonstrable political, economic, and security support to the Thais.

As we flew back to Washington, we got together on the airplane and worked on our report for the President, which stresses the urgency of the situation, and we did lay out some specific recommendations. We will give you that report this morning. In fact, you have in your brochure a folder with our recommendations in it.

We need your careful consideration of our recommendations. We need your creative ideas for how to implement them, your support, and your consensus. I do not know when I have ever felt a sense of urgency more about cutting redtape and unblocking logjams and moving ahead.

I think I can say with some assurance that the American people are ready to help. They are already mobilizing help, as you here indicate and as I have seen and heard through my mail and telephone calls and with people in the whole country concerned about this problem. But they need to know how to help, and they need to know now. They need to know where to turn; they need to know that now. They need to know what is needed,

and it's our responsibility to give the people of our country specific information about ways they can reach out to their fellow man. We cannot lose time. Time is—the situation is urgent.

I understand that most of you who are here have prepared briefing papers about your programs and your problems. I know that you will be addressing yourselves to this issue throughout the day, and I look forward to being with you again at the end of the afternoon so that I can have a report for the things that you talk about during the day.

But now I want to call on the members of my traveling party, who've brought back new information which might be helpful to you. And then I would like to share—after we get through with the reports we will look at the recommendations, and I can tell you then some of the steps that we are already taking to implement some of these recommendations.

First I want to call on Dr. Richmond for his report. Dr. Richmond is the Surgeon General, and he traveled with me to Thailand.

NOTE: The President spoke at 10:07 a.m. in the State Dining Room at the White House. Attending the meeting were representatives and officials of Federal and international agencies and various humanitarian organizations.

Aid for Kampucheans

Memorandum From the President.
November 13, 1979

Presidential Determination No. 80-5

Memorandum for the Secretary of State
Subject: Determination pursuant to Section 2(c)(1) of Migration and Refugee Assistance Act of 1962, as amended, (The "Act"), authorizing the use of \$2,000,000 of funds made available from the United States Emergency Refugee and Migration Assistance Fund

In response to the urgent financial needs of the Relief Program within Kampuchea, I hereby determine that it is important to the national interest that up to \$2,000,000 from the United States Emergency Refugee and Migration Assistance Fund be made available through the Department of State for transfer to the United Nations Children's Fund for this purpose.

The Secretary of State is requested to inform the appropriate committees of Congress of this Determination and the obligation of funds under this authority.

This Determination shall be published in the FEDERAL REGISTER.

JIMMY CARTER

Superior Court of the District of Columbia

*Nomination of Iraline Barnes To Be an
Associate Judge. November 13, 1979*

The President today announced that he will nominate Iraline Barnes as an Associate Judge of the Superior Court of the District of Columbia. Ms. Barnes, 32, is a graduate of Howard University and the University of Michigan Law School. She would replace Judge W. Byron Sorrell, who retired in August.

Following law school, Ms. Barnes served as a law clerk for Superior Court Judge Eugene Hamilton. She then worked as a trial attorney for the Civil Division of the Justice Department and as an assistant United States attorney for the District of Columbia. Since June 1978 she has served as an Administrative Judge for the Board of Surface Mining and Reclamation Appeals at the Department of the Interior.

National Advisory Committee on Oceans and Atmosphere

*Appointment of Five Members.
November 13, 1979*

The President today announced the appointment of five persons as members of the National Advisory Committee on Oceans and Atmosphere. They are:

MICHAEL R. NAESS, of Houston, Tex., senior executive vice president and director and chief operating officer of the Services Group, Zapata Corp., Houston, Tex.;

JACK R. VAN LOPIK, dean of Louisiana State University's Center for Wetland Resources and a professor in the Department of Marine Sciences;

JAMES M. WADDELL, JR., of Beaufort, S.C., a South Carolina State senator and chairman of the South Carolina Coastal Council;

DON WALSH, director of the Institute for Marine and Coastal Studies at the University of Southern California and a professor of ocean engineering;

ROBERT M. WHITE, administrator of the National Research Council, formerly chairman of the National Academy of Sciences' Climate Research Board, and president of the Joint Oceanographic Institutions.

Marine Mammal Commission

*Appointment of Two Members.
November 13, 1979*

The President today announced the appointment of two persons as members of the Marine Mammal Commission. They are:

MURRAY L. JOHNSON, a Tacoma, Wash., surgeon and research biologist who is curator of mammals for the Puget Sound Museum of Natural History and collaborator in mammalogy with the U.S. National Park System;

ROGER S. PAYNE, of Lincoln, Mass., a research zoologist with the New York Zoological Society's Center for Field Biology and Conservation, whose principal research interest is the behavior of whales.

Woodrow Wilson International Center for Scholars

Appointment of Four Members of the Board of Trustees. November 13, 1979

The President has appointed four persons as members of the Board of Trustees of the Woodrow Wilson International Center for Scholars in the Smithsonian Institution. They are:

THEODORE C. BARREAUX, of Alexandria, Va., vice president in charge of the Washington office of the American Institute of Certified Public Accountants;

MAX M. KAMPELMAN, a partner in the Washington, D.C., law firm of Fried, Frank, Harris, Shriver, and Kampelman;

JESSE H. OPPENHEIMER, a partner in the San Antonio, Tex., law firm of Oppenheimer, Rosenberg, Kelleher & Wheatley, active in civic affairs in San Antonio;

ANNE FIROR SCOTT, an assistant professor of history at Duke University and author of several books on women in American life.

Blocking Iranian Government Property

Executive Order 12170. November 14, 1979

Pursuant to the authority vested in me as President by the Constitution and the laws of the United States including the International Emergency Economic Powers Act, 50 U.S.C.A. sec. 1701 *et seq.*, the National Emergencies Act, 50 U.S.C. sec. 1601 *et seq.*, and 3 U.S.C. sec. 301,

I, JIMMY CARTER, President of the United States, find that the situation in Iran constitutes an unusual and extraordinary threat to the national security, foreign policy and economy of the United States and hereby declare a national emergency to deal with that threat.

I hereby order blocked all property and interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of

Iran which are or become subject to the jurisdiction of the United States or which are in or come within the possession or control of persons subject to the jurisdiction of the United States.

The Secretary of the Treasury is authorized to employ all powers granted to me by the International Emergency Economic Powers Act to carry out the provisions of this order.

This order is effective immediately and shall be transmitted to the Congress and published in the **FEDERAL REGISTER**.

JIMMY CARTER

The White House,
November 14, 1979.

[Filed with the Office of the Federal Register,
9:16 a.m., November 14, 1979]

Blocking Iranian Government Property

*Announcement on the President's Action.
November 14, 1979*

The President has today acted to block all official Iranian assets in the United States, including deposits in United States banks and their foreign branches and subsidiaries. This order is in response to reports that the Government of Iran is about to withdraw its funds. The purpose of this order is to ensure that claims on Iran by the United States and its citizens are provided for in an orderly manner.

The order does not affect accounts of persons other than the Government of Iran, the Central Bank of Iran, and other controlled entities. The precise amounts involved cannot be ascertained at this time, but there is no reason for disturbance in the foreign exchange or other markets.

The President is taking this action pursuant to the International Emergency Economic Powers Act, which grants the

President authority "to deal with any unusual and extraordinary threat to the national security, foreign policy, or economy of the United States."

Blocking Iranian Government Property

Message to the Congress Reporting on the U.S. Action. November 14, 1979

To the Congress of the United States:

Pursuant to Section 204(b) of the International Emergency Economic Powers Act, 50 U.S.C.A. § 1703, I hereby report to the Congress that I have today exercised the authority granted by this Act to block certain property or interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran.

1. The circumstances necessitating the exercise of this authority are the recent events in Iran and the recent actions of the Government of Iran.

2. These events and actions put at grave risk the personal safety of United States citizens and the lawful claims of United States citizens and entities against the Government of Iran and constitute an extraordinary threat to the national security and foreign policy of the United States.

3. Consequently, I have ordered blocked all property and interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran which are or become subject to the jurisdiction of the United States or which are or come within the possession of persons subject to the jurisdiction of the United States. I have authorized the Secretary of the Treasury to employ all powers granted to me by the International Emergency Economic Powers Act to carry out the blocking.

4. Blocking property and property interests of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran will enable the United States to assure that these resources will be available to satisfy lawful claims of citizens and entities of the United States against the Government of Iran.

5. This action is taken with respect to Iran for the reasons described in this report.

Convention on the Inter-American Institute for Cooperation on Agriculture

*Message to the Senate Transmitting the
Convention. November 14, 1979*

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, the Convention on the Inter-American Institute for Cooperation on Agriculture (the Convention) which was signed at Washington on March 6, 1979. For the information of the Senate, I also transmit the report of the Department of State with respect to the Convention.

The Convention is a revision of the 1944 Convention on the Inter-American Institute of Agricultural Sciences. It clarifies the 1944 Convention and strengthens and broadens the mandate of the Inter-American Institute of Agricultural Sciences (the Institute).

Membership in the Institute under the Convention is open to states which are members of the OAS and the existing Institute, or other American states whose admission is accepted by the Inter-American Board of Agriculture.

Under the Convention, the Institute will consist of three principal organs—the Inter-American Board of Agriculture, the Executive Committee, and the General Directorate. The Inter-American Board of Agriculture will be the highest organ of the Institute and will consist of one representative from each Member State. The new Convention stipulates that such representatives should preferably be persons connected with agriculture or rural development. This Board will be responsible for setting policy and budgetary priorities of the Institute.

To reflect the changed responsibilities of the Institute, its name has been changed to the Inter-American Institute for Cooperation on Agriculture.

The Convention will enter into force when two-thirds of the states parties to the 1944 Convention have deposited instruments of ratification. Correspondingly, the 1944 Convention will cease to be in force for those states for which the new Convention is in force.

I recommend that the Senate give early and favorable consideration to the Convention and advice and consent to ratification.

Trade Sanctions Against Zimbabwe-Rhodesia

*Memorandum From the President.
November 14, 1979*

Presidential Determination No. 80-6

Memorandum for the Secretary of State

*Subject: Maintenance of Sanctions
Against Zimbabwe-Rhodesia Under Section 408(b) of the Department of State Authorization Act, Fiscal Years 1980 and 1981*

Pursuant to Section 408(b) of the Department of State Authorization Act, Fiscal Years 1980 and 1981 (93 Stat. 405), I hereby determine that it is in the national interest of the United States to continue sanctions against Zimbabwe-Rhodesia at this time.

You are requested, on my behalf, to report this determination promptly to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate.

You are further requested to report to me immediately upon the conclusion of the present Constitutional Conference on Zimbabwe-Rhodesia being held in London, describing the conclusions of that conference and your recommendations for action by the United States with respect to the termination of sanctions.

This determination shall be published in the FEDERAL REGISTER.

JIMMY CARTER

[Filed with the Office of the Federal Register, 4:25 p.m., November 20, 1979]

JUSTIFICATION FOR PRESIDENTIAL DETERMINATION UNDER SECTION 408(b) OF THE DEPARTMENT OF STATE AUTHORIZATION ACT, FISCAL YEARS 1980 AND 1981 CONCERNING SANCTIONS AGAINST ZIMBABWE-RHODESIA

PROBLEM

Section 408(b) of the Department of State Authorization Act, Fiscal Years 1980 and 1981, requires that sanctions against Zimbabwe-Rhodesia be terminated by November 15, 1979, unless the President determines that it would not be in the national interest of the United States and so reports to the Congress.

JUSTIFICATION

Encouraging progress has been made in recent months toward a peaceful resolu-

tion of the conflict in Zimbabwe-Rhodesia; however, the negotiations presently being conducted by the United Kingdom with the parties have not yet been concluded, and differences still remain. A termination of sanctions at this stage could lead all the parties to harden their positions and would jeopardize the chances for a successful settlement for Zimbabwe-Rhodesia.

The British Government has not yet concluded negotiations that would end the rebellion in Rhodesia. They have stated that this will occur when the British Governor arrives in Salisbury and assumes authority. At the present time, the great bulk of British sanctions remain in force and none of our major allies has taken action to terminate sanctions.

The negotiations are now at a critical stage. We hope they will be rapidly and successfully concluded. While the talks continue, it would be premature for the United States to alter its position on sanctions. We would, however, be prepared to lift sanctions when a British Governor assumes authority in Salisbury and a process leading to impartial elections has begun. Our policy will continue to be that no party should have a veto over fair settlement proposals.

This issue will be kept under continuous review and the President will promptly notify the Congress when conditions warrant the lifting of sanctions.

Budget Deferrals

Message to the Congress. November 15, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report six new deferrals totalling \$511.1 million and two revisions to previously transmitted deferrals increasing the amount deferred by

\$14.9 million. These items affect programs in the Departments of Commerce, Justice, State and Transportation; the International Communication Agency; the Railroad Retirement Board; and the President's Commission on Pension Policy.

The details of the deferrals are contained in the attached reports.

JIMMY CARTER

The White House,

November 15, 1979.

NOTE: The attachments detailing the deferrals are printed in the FEDERAL REGISTER of November 20, 1979.

American Federation of Labor and Congress of Industrial Organizations

Remarks at the 13th Constitutional Convention. November 15, 1979

THE PRESIDENT. *President Meany, Secretary-Treasurer Lane Kirkland, men and women of the greatest labor movement in the world:*

It's always good to be among old friends and, today especially, to be among such strong and sure American patriots. I might say that the strength and the accomplishments of your great organization teach us a lesson which I am sure that our Nation will remember in the months ahead. Over the years, you have certainly learned the advantages of reelecting your president, and I hope you'll remember this. [Laughter]

MR. MEANY. I'll buy that.

THE PRESIDENT. President Meany said, "I'll buy that." [Laughter]

I think it's accurate to say that President Meany, your president, and Presidents who live in the White House have not always agreed completely. Mr. Meany, you cannot deny that statement. [Laughter] And all of us presidents, labor

and government, must realize and we must confess that we are not perfect and sometimes we make mistakes. But together we work for our country and sometimes, most of the time, with notable success.

I've reflected for several weeks about what I would say to you this afternoon about our mutual goals, our legislative successes together, our national accord, and our solid working relationship. With great pride I had intended to point out our accomplishments during the last 34 months: increasing the strength of our Nation, a nation that has stayed at peace; rebuilding our urban centers; continuing our fight against inflation; our progress in expressing our deep compassion for the downtrodden and the weak throughout our society and throughout the world; a dramatic breakthrough in minimum wage law legislation; putting America back to work so that we now have the greatest number of our citizens employed and the greatest percentage of our labor force employed than ever before in the history of the United States, and we can be proud of that achievement together.

It's a great record. It's a record that we have made together. It's one which we can improve in the months ahead. For instance, this country still needs and we are determined to get strong labor law reform. But I must leave these subjects for Ray Marshall to discuss with you, and I am sure that he will carry out this assignment magnificently. He has the approach and the attitude of a working man, and in my judgment he's one of the truly great Secretaries of Labor who have ever served. I am certainly proud that he is a member of the Carter Cabinet.

But today we have other important matters to consider. For a brief time this afternoon I want to speak with you and all Americans about some fundamental principles upon which our Nation was founded and which we must never forget. To some,

these ideals may seem at times to be old-fashioned or outmoded. But we've been clearly reminded in recent days that these principles mean just as much to us now as they have ever meant during any time of critical decision in the history of our Nation.

These fundamentals have old names to which we must continually give new meaning—names like “strength,” “courage,” “patriotism,” “independence,” “the love of freedom,” “human rights,” “justice,” “concern for the common good.”

This is the 12th day that more than a hundred innocent human beings, some 60 of whom are members of the United States diplomatic mission, have been held hostage in our Embassy in Iran. For a rare time in human history, a host government has condoned and even encouraged this kind of illegal action against a sovereign territory and official diplomatic relations of another nation. This is an act of terrorism—totally outside the bounds of international law and diplomatic tradition.

In this time of trial, our deep concern is for the lives of these brave hostages, our Nation's loyal citizens and faithful representatives. Every American feels anger and outrage at what is happening to them, just as every American feels concern for their safety and pride in their great courage. This crisis calls for firmness, and it calls for restraint. And I'm proud that this situation has brought forth calm leadership by officials and private citizens throughout this country.

Firmness does require patience, and it requires perseverance. Firmness also means measured action, deliberate actions that clarify the real issues, reduce the likelihood of violence, protect our interests, and ensure justice.

The United States has done nothing and will do nothing that could be used to justify violent or imprudent action by anyone. While we are pursuing all avenues

of diplomatic resolution, we're also acting unilaterally as appropriate—with restraint, yes, but without hesitation.

First, in order to discourage violence and possible bloodshed here, which when televised and transmitted back to Iran might threaten the safety of the hostages, I've discouraged the issuing of permits for demonstrations on Federal properties here in Washington. Consistent with our laws and pursuant to my own powers and responsibilities, I have also encouraged local and State officials to take similar legal action.

Second, I've directed our immigration authorities to review the visas of some 50,000 Iranian students, who are guests here in our country. Our Nation is fully committed to the enhancement of human rights, the protection of legal rights, and the enhancement of civil justice. All provisions of the United States Constitution will be honored. All foreign nationals who are here lawfully may continue here with their work or their studies. But those who are here illegally will be processed promptly and lawfully for deportation back to their own country.

Third, I want to remove any question that our principles might be compromised by our supposed need for Iranian oil. Early this week, therefore, I ordered an immediate halt to any purchases or shipments of Iranian oil to the United States of America.

I'm determined to make clear that we will never allow any foreign country to dictate any American policy.

Fourth, in order to protect our economic interests and to ensure that claims on Iran by the United States or by United States citizens are settled in an orderly manner, we've legally frozen official Iranian property and financial assets. The order does not affect any accounts other than those of the Government of Iran, the Central Bank of Iran, or other government-controlled entities.

Yesterday I further instructed Secretary of State Vance and Ambassador McHenry to oppose any discussion of Iran's problems in the United Nations Security Council as long as American hostages are being held. Only after the hostages are released will we be willing to address Iran's concerns and, then, under the provisions of international law and under the charter of the United Nations. The members of the United Nations Security Council, I am pleased to announce to you, have agreed unanimously with our own proposal.

It's important for all of us to remember that we will not compromise our fundamental principles of justice no matter how grave the provocation nor how righteous our indignation. At the same time, we will continue to use our influence around the world to obtain the same kinds of human rights for people everywhere.

In this instance, we are upholding an important principle on behalf of the entire world community. It's a clear tenet of international law and diplomatic tradition that the host government is fully responsible for the safety and well-being of the property and the legal representatives of another country. Less than a year ago—and this is a fact not generally known or recognized—less than a year ago, 70,000 American citizens were in Iran. As you know, thousands of people were killed during the upheavals there, but almost miraculously and because of the good work of Cyrus Vance and others, our people were brought home safely. I thank God for it. Despite the turmoil, each succeeding Iranian Government—and they were being changed, as you know, quite rapidly—protected the citizens of other countries.

Foreign visitors are often vulnerable to abuse. An embassy is not a fortress. There are no embassies anywhere in the world that can long withstand the attack of a

mob if the mob has the support of the host government itself. We had received repeated assurances of protection from the highest officials in the Iranian Government, even a day or two before the mob was incited to attack and before that protection was withdrawn at the last minute. The principle of inviolability of embassies is understood and accepted by nations everywhere, and it's particularly important to smaller nations which have no recourse to economic or military power. This is why the United Nations Security Council has also unanimously supported our demand for the release of the American hostages.

In accordance with this principle, as recognized and observed by all civilized countries, the Iranian Government and its leaders are fully responsible for the safety and well-being of our representatives in Iran, in Tehran, and they will be held accountable for that responsibility. It is unthinkable that any responsible government in today's modern world could regard the seizure and the holding of the diplomatic officials of another nation as a realistic means to advance any cause whatsoever. Terrorism is not an acceptable means to resolve disputes between individuals or between nations.

No act has so galvanized the American public toward unity in the last decade as has the holding of our people as hostages in Tehran. We stand today as one people. We are dedicated to the principles and the honor of our Nation. We've taken no action which would justify concern among the people or among the Government of Iran. We have done nothing for which any American need apologize. The actions of Iranian leaders and the radicals who invaded our Embassy were completely unjustified. They and all others must know that the United States of America will not yield to international terrorism or to blackmail.

These difficult days have reminded us of basic facts and principles which are fundamental to the existence of us as a people. We will honor all constitutional protections and international law and custom, and we will not let our freedom and our security be jeopardized.

The developments in Iran have made it starkly clear to all of us that our excessive dependence on foreign oil is a direct, physical threat to our freedom and security as Americans. That's why we must all join together in the battle for an energy-secure America. This struggle demands the deliberate and the conscientious participation of every single citizen. Unfortunately, our dependence on foreign oil has been growing for the last 5 or 6 years, especially, when it should have been diminishing. As a nation we have become dependent on the undependable and addicted to the unaffordable.

At Camp David this summer, one man summed up the significance of our energy problems better than any other person there. It was Lane Kirkland. He said to me, "Mr. President, the issue is freedom."

That is exactly the issue today. That's why I've been calling on the Congress and encouraging the American people for the last 2½ years to recognize the danger of excessive dependence on foreign oil. That's why I've ordered phased decontrol of oil prices to make conservation pay and to stimulate domestic energy sources.

This is an extremely important, a vital issue. Do not be misled by political demagoguery. I and every other public official in this country have an obligation to speak the truth and to deal responsibly with the hard facts, and they are hard facts. We cannot close down all nuclear powerplants, burn less coal, refuse to build oil refineries, refuse to explore for new oil sources, oppose the production of synthetic fuels, and at the same time encourage the waste of energy by artificially hold-

ing down its price in order to encourage more consumption. This is a ridiculous combination of proposals, which could only be put forward in an election campaign. America knows better.

I am very pleased that our national energy program is now moving steadily through the Congress, after enormous difficulty there and sharp debate. Now more than ever before, it's essential that we have an energy security corporation and a windfall profits tax in order to take care of the poor, encourage production, build a better transportation system. Armed with these new programs, our technology, our creativity, our abundance, our vision, our firm will, America can finally control its own resources, and we can continue to control our own destiny.

Our love of freedom will not be auctioned off for foreign oil. Hundreds of thousands of our forebears gave their very lives for our freedom. Our freedom is not for sale—now or ever in the future.

Every important victory that this Nation has ever won—with Americans struggling together—has made us stronger as a nation. So will it be with the energy problem. There's a clear choice for Americans to make: We can either keep pouring out billions and billions and billions of dollars to foreign countries to import oil—which also buys us inflation, unemployment, and national dependency and insecurity—or we can take some of that money and invest it in America to hire American workers, to unleash American ingenuity, to develop American resources, to promote American energy that Americans own and control. That's the way to approach the energy problem, and that's what we must do together.

There are millions and millions of people who can help directly with this challenge, and there are hundreds of thousands of jobs involved. Next year we anticipate that we will send overseas \$70 billion to pay for foreign oil. Just think

how many fine things we could do in America with that much money.

So, in the last few days we have been reminded once again of our essential need of energy security so that we can continue to protect the basic principles of our country, and together that's what we must achieve, both for ourselves and, even more importantly, for our children and grandchildren. America must always be militarily strong and economically strong, and that America will always be.

One final comment I'd like to make: America must also maintain its moral and its ethical strength. We are not a selfish people. History has recorded many times America's great generosity, as it does today in Thailand and Kampuchea, formerly known as Cambodia. Even as we face problems of great economic concern here in our own country, we are sparing no effort to help those who are suffering and starving in every way we can.

Compassion enhances American strength. It's one of our deepest values, one to which we will always cling and remain true. Concern for human life and justice is as vital as military power to our special place in the family of nations. Human rights is a compelling idea of our lifetime. Our hearts and our aid will continue to go to those who are suffering, who are starving, or who are deprived of freedom. In this time of tension and turmoil I'm proud that our commitment to American strength and to American principles is unshakable.

And now, in closing, I want to turn aside from our national and international preoccupations for just a moment.

A few weeks ago, with the White House sparkling in the sunlight behind him, Pope John Paul II asked God to bless America's quest for freedom, social justice, and peace. When his moving speech was done, he turned with a great insight to a man seated in front of him, on the front row. While millions around the world watched,

the Holy Father clasped the hands of a great American, and he said, and I quote, because I was right there listening, "I know about you, and I know that you have done much good in your life for the working people of the United States and the people of other nations." That man was George Meany.

It was a moving moment, and as President I was especially proud to be an American. No American has fought harder for economic justice for union members and also for millions who've never carried a union card than your leader has, George Meany. No American has believed more deeply in human dignity, not only for workers but for all the helpless and the dispossessed people, the poor and sometimes forgotten people still beyond the reach of the benefits of our own great national bounty. And no American has loved his country more, not only for the democracy at home but for the beacon of freedom and basic human rights which we will continue to keep shining throughout the world.

Mr. Meany, on behalf of the American people, thank you. May God bless all of you.

MR. MEANY. Thank you.

NOTE: The President spoke at 2:25 p.m. in the Sheraton Washington Hotel ballroom.

Later in the day, the President attended a reception for international guests of the AFL-CIO constitutional convention, which was held on the State Floor at the White House.

Department of Transportation

Nomination of William B. Johnston To Be an Assistant Secretary. November 15, 1979

The President today announced that he will nominate William B. Johnston, of Clifton, Va., to be an Assistant Secretary of Transportation. He would replace Chester Davenport, who has resigned.

Johnston has been Associate Director of the White House Domestic Policy Staff since 1977.

He was born August 25, 1945, in Washington, D.C. He received a B.A. from Yale University in 1967.

From 1973 to 1975, Johnston was a consultant to the Ford Foundation, and from 1975 to 1976, he was a consultant to the Labor Department.

From 1972 to 1976, Johnston was a research associate at the Center for Social Policy Studies. In 1976 he was on the national issues staff of the Carter Presidential campaign and worked on the Carter transition team.

Federal Emergency Management Agency

Nomination of William H. Wilcox To Be an Associate Director. November 15, 1979

The President today announced that he will nominate William H. Wilcox, of Harrisburg, Pa., to be an Associate Director of the Federal Emergency Management Agency, a new position. His area of responsibility would be response and recovery.

Wilcox has been Administrator of the Federal Disaster Assistance Administration since 1978.

He was born June 9, 1919, in Philadelphia, Pa. He received a B.A. from the University of Connecticut and an M.P.A. from Wayne University. He served in the Armed Forces from 1942 to 1945.

From 1954 to 1971, Wilcox was executive director of the Greater Philadelphia Movement. He also served as chairman of the Philadelphia Committee on City Policy and as a member of the Executive Board of Gaudenzia House.

From 1971 to 1978, Wilcox was secretary of community affairs of the Common-

wealth of Pennsylvania. While in State government, he coordinated various State disaster recovery activities, including activities related to the Johnstown Flood of 1977. He also served as the State fuel allocation officer and directed a statewide home weatherization program for the elderly and low-income families.

United States-Japan Economic Relations Group

Joint Announcement. November 15, 1979

President Carter and Prime Minister Ohira announced today that the following persons had agreed to serve on the U.S.-Japan Economic Relations Group: Ambassador Robert S. Ingersoll (U.S. chairman), A. W. Clausen, Hugh T. Patrick, Edson W. Spencer, Ambassador Nobuhiko Ushiba (Japanese chairman), Akio Morita, Shuzo Muramoto and Kiichi Saeki.

This Group was established by President Carter and Prime Minister Ohira at their bilateral May 2 meeting in Washington, when they agreed that a small group of distinguished persons drawn from private life would submit recommendations to the President and the Prime Minister concerning actions to maintain a healthy bilateral economic relationship between the United States and Japan.

On June 25, during President Carter's bilateral Summit meetings with Prime Minister Ohira in Tokyo, it was agreed that the co-chairmen of the Group would be former Ambassadors Robert Ingersoll and Nobuhiko Ushiba. Since their selection in late June, the co-chairmen have been considering potential nominees for the Group. The selections by the President and the Prime Minister reflect the recommendations of their respective co-chairmen.

Thank you very much.

REVEREND HESBURGH. *Mrs. Carter, Mrs. Vance, ladies and gentlemen:*

Just short of 3 weeks ago, on October 24, this same group of leaders from our various religious faiths and from the various private voluntary organizations met in Washington to discuss what we might do together and in concert to meet the tragedy in Cambodia. The purpose was to consult how the American people, how the American Government, and how the United Nations might best respond to avoid what appeared to be a growing holocaust, already half accomplished, if you will.

We called on the voluntary agencies, first of all, to increase their efforts and to work together to help the Cambodians. We urged Americans to provide them all with financial support. And in a special letter to the President, we urged greater United States Government efforts in order to assist, as quickly and as effectively as possible, this people in great need.

We met that same day at the White House with the President, and never was a letter answered more quickly. Hardly before the letter was in his hands, he granted us all of the various requests we had for increased aid and said he was willing to do whatever else might be necessary to do to avert this holocaust.

I think today, in the light of the appeal made by United Nations Children's Fund, UNICEF, the International Committee of the Red Cross, the appeals by all of our various voluntary agencies for more than \$300 million for Cambodian relief, and after the generous and immediate response of the President of the United States voiced by our Secretary of State, Mr. Vance, at the Pledging Conference of the United States on Monday, November 5—when many of you were present, and I too—it seemed to us that the time was now appropriate to update our October 24 meeting in an effort to relieve the

growing misery of the Cambodians.

It was again against this same background as our last meeting that I, as chairman of the Overseas Development Council, and cochaired by the Reverend Paul McLeary, who is chairman of the American Council on Voluntary Agencies, that we invited this group again, on very short notice, to this second consultation to exchange information on the situation in Thailand and Cambodia after other relief is taking place there.

In this second consultation we have four things we would like to do: first, to find out what the various agencies are now doing; second, what they are planning to do for the near-term future; third, what fundraising efforts have been undertaken to date; and fourth, what are the various bottlenecks and needs that we have to move forward quickly and efficiently. There is, of course, a fifth topic which I'm sure will emerge from our discussion with Mrs. Carter, and that is how can we improve and institutionalize exchange of information among ourselves and coordination of the various activities—governmental and nongovernmental and inter-governmental—here and overseas.

It seems to me that the vigor of the pluralistic American response to this Cambodian tragedy is most welcome, but it does raise for all of us a great challenge to work together and, as the President just said, to work together without seeking praise in so doing.

I would like to say that the visit to Cambodia and Thailand in October by Senators Danforth, Sasser, and Baucus, who are here with us this morning, on my left, your right, and also the various Governors and the Congresswomen and, most particularly, of our First Lady, Mrs. Carter—all of this has heightened and increased the consciousness of Americans for the need of all of the generous action we might put forward to alleviate this growing tragedy.

May I say, Mrs. Carter, in introducing

you, that we are looking forward to hearing the report from you and your colleagues on the situation with respect to Cambodian refugees in Thailand, and any other recommendations or questions you may have of this group, which represents, I think, the cream of the private voluntary effort. After your comments we will be hearing from all of these various agencies active in Cambodia on the questions posed earlier, and we are looking forward later in the day to discussing our conclusions further with you.

Mrs. Carter, it's with real pride and great satisfaction that I'd like to present you.

MRS. CARTER. Thank you very much. I'm very pleased to have you all here today. I welcome you.

And I did go to Cambodia. And I'm very happy to have this opportunity to report to you about my trip, and also to thank you for what you have done already and for what you continue to do, and to work with you on ways that we can better help those who are suffering in this area of the world.

As the President has said, I went to Thailand on his behalf to express the profound concern of the people of our country for the tragedy that is unfolding in Indochina. My visit was very brief, but I think I can say positively that it was one of the most significant events of my life. I came away filled with admiration for the representatives of your organizations who are there struggling with this massive problem of relief for thousands and thousands of human beings who are starving and homeless and ill and bereaved. And I came away also, as Jimmy said, filled with gratitude for the efforts of the people of Thailand and for the Government of Thailand.

And I'm sure that every person in this room knows what faces us in the coming weeks. The problem is one that is not going away anytime soon. We will be faced

with it for a long time. While our international efforts have brought vast improvements—and I saw in the refugee camp at Sakeo some beginnings of hope for those few who have been brought back from the very edge of death. The camp, since the time that the Senators was there, has really made progress; in fact, some people told us that a miracle had happened in the last few weeks. The camp is only about 3 weeks old, but people are being fed and are being taken care of in that camp now. And you will have a further report on that from some of those who went with me.

But the picture in the near future looks very bleak, because a wave of new refugees are expected to come across the border into Thailand from Kampuchea—a number estimated anywhere from 100,000 to 250,000, maybe 300,000—that are now right at the border, that are expected to come now that the dry season is here and the fighting has begun again. They will be pushed over into Thailand.

And for those of us who have seen with our own eyes the dimension of the problem and the terrible suffering and starvation, the thought of so many more people in the same situation who will be coming into Thailand is almost more than you can bear, when you are there and look at it.

I'd like to tell you briefly about my trip. I was accompanied by some of those here that are here at that head table, who will be reporting to you also. Some of us worked together; some of us dispersed so that we could gather more information, because we were only there for a few hours, a day, 2 days.

We went to the refugee camps in Thailand, Kampuchea, that I have already talked about, Sakeo. We witnessed the disease, the dislocation of persons, suffering, starvation. We saw many, young and old. We saw children separated from their parents, afflicted with malaria and malnutrition.

In the camp at Ubon, for refugees from

Laos, conditions were substantially better. There are approximately 37,000 persons there. That camp is 4 or 5 years old. They eat well, but they don't go out of the camp. They have been there, some for 3 or 4 years, waiting to resettle abroad. And although the living conditions are so much better than Sakeo, they are still not anything that you would call good.

It is sad to see them with no purpose. They at first thought they might go back into Laos. Now they know they won't, or don't want to. And they're waiting to be resettled, some of them with feeling that they've been forgotten by the world, because the focus has been on the Kampuchians, the focus has been on the boat people. And these people really feel forgotten. I was touched by them. And one of the girls that worked with me said that one of the main problems they have with these people is mental depression, just existing day to day for 4 or 5 years, waiting to see what happens to them.

At the transit center, the refugee transit center in Bangkok, we saw overcrowded and humiliating conditions where refugees awaiting final processing for immigration must endure. These were things that I don't think I'll ever forget. These were people who have already been chosen to go to other countries and have to wait in an unbelievable place, some for a month and a half or 2 months. We try to process ours, the ones that are coming to the United States, much earlier, but still the conditions are unbearable.

While we were there in Bangkok, we had candid discussions with representatives of the international volunteer organizations to discuss their goals, their frustrations, and the need for better coordination. We did have a very good meeting, and everybody, I think, vented their frustrations, and everybody decided

that there was a great need for coordination.

We met with the King and Queen of Thailand to discuss the whole spectrum of the refugee problem and the need for further sites, because we must have further sites for this 200,000 to 300,000 that are expected to come into Thailand from Cambodia—and they're expected to come in in the next 3 or 4 weeks. The situation is urgent.

We had a long discussion with Prime Minister Kriangsak, a fruitful discussion, about the political and foreign policy risks that are facing the Thai Government because of their policies. It is important that the international community provide visible and demonstrable political, economic, and security support to the Thais.

As we flew back to Washington, we got together on the airplane and worked on our report for the President, which stresses the urgency of the situation, and we did lay out some specific recommendations. We will give you that report this morning. In fact, you have in your brochure a folder with our recommendations in it.

We need your careful consideration of our recommendations. We need your creative ideas for how to implement them, your support, and your consensus. I do not know when I have ever felt a sense of urgency more about cutting redtape and unblocking logjams and moving ahead.

I think I can say with some assurance that the American people are ready to help. They are already mobilizing help, as you here indicate and as I have seen and heard through my mail and telephone calls and with people in the whole country concerned about this problem. But they need to know how to help, and they need to know now. They need to know where to turn; they need to know that now. They need to know what is needed,

and it's our responsibility to give the people of our country specific information about ways they can reach out to their fellow man. We cannot lose time. Time is—the situation is urgent.

I understand that most of you who are here have prepared briefing papers about your programs and your problems. I know that you will be addressing yourselves to this issue throughout the day, and I look forward to being with you again at the end of the afternoon so that I can have a report for the things that you talk about during the day.

But now I want to call on the members of my traveling party, who've brought back new information which might be helpful to you. And then I would like to share—after we get through with the reports we will look at the recommendations, and I can tell you then some of the steps that we are already taking to implement some of these recommendations.

First I want to call on Dr. Richmond for his report. Dr. Richmond is the Surgeon General, and he traveled with me to Thailand.

NOTE: The President spoke at 10:07 a.m. in the State Dining Room at the White House. Attending the meeting were representatives and officials of Federal and international agencies and various humanitarian organizations.

Aid for Kampuchians

Memorandum From the President.
November 13, 1979

Presidential Determination No. 80-5

Memorandum for the Secretary of State

Subject: Determination pursuant to Section 2(c)(1) of Migration and Refugee Assistance Act of 1962, as amended, (The "Act"), authorizing the use of \$2,000,000 of funds made available from the United States Emergency Refugee and Migration Assistance Fund

In response to the urgent financial needs of the Relief Program within Kampuchea, I hereby determine that it is important to the national interest that up to \$2,000,000 from the United States Emergency Refugee and Migration Assistance Fund be made available through the Department of State for transfer to the United Nations Children's Fund for this purpose.

The Secretary of State is requested to inform the appropriate committees of Congress of this Determination and the obligation of funds under this authority.

This Determination shall be published in the FEDERAL REGISTER.

JIMMY CARTER

4:24 p.m., November 20, 1979]

Superior Court of the District of Columbia

*Nomination of Iraline Barnes To Be an
Associate Judge. November 13, 1979*

The President today announced that he will nominate Iraline Barnes as an Associate Judge of the Superior Court of the District of Columbia. Ms. Barnes, 32, is a graduate of Howard University and the University of Michigan Law School. She would replace Judge W. Byron Sorrell, who retired in August.

Following law school, Ms. Barnes served as a law clerk for Superior Court Judge Eugene Hamilton. She then worked as a trial attorney for the Civil Division of the Justice Department and as an assistant United States attorney for the District of Columbia. Since June 1978 she has served as an Administrative Judge for the Board of Surface Mining and Reclamation Appeals at the Department of the Interior.

National Advisory Committee on Oceans and Atmosphere

*Appointment of Five Members.
November 13, 1979*

The President today announced the appointment of five persons as members of the National Advisory Committee on Oceans and Atmosphere. They are:

MICHAEL R. NAESS, of Houston, Tex., senior executive vice president and director and chief operating officer of the Services Group, Zapata Corp., Houston, Tex.;

JACK R. VAN LOPIK, dean of Louisiana State University's Center for Wetland Resources and a professor in the Department of Marine Sciences;

JAMES M. WADDELL, JR., of Beaufort, S.C., a South Carolina State senator and chairman of the South Carolina Coastal Council;

DON WALSH, director of the Institute for Marine and Coastal Studies at the University of Southern California and a professor of ocean engineering;

ROBERT M. WHITE, administrator of the National Research Council, formerly chairman of the National Academy of Sciences' Climate Research Board, and president of the Joint Oceanographic Institutions.

Marine Mammal Commission

*Appointment of Two Members.
November 13, 1979*

The President today announced the appointment of two persons as members of the Marine Mammal Commission. They are:

MURRAY L. JOHNSON, a Tacoma, Wash., surgeon and research biologist who is curator of mammals for the Puget Sound Museum of Natural History and collaborator in mammalogy with the U.S. National Park System;

ROGER S. PAYNE, of Lincoln, Mass., a research zoologist with the New York Zoological Society's Center for Field Biology and Conservation, whose principal research interest is the behavior of whales.

Woodrow Wilson International Center for Scholars

Appointment of Four Members of the Board of Trustees. November 13, 1979

The President has appointed four persons as members of the Board of Trustees of the Woodrow Wilson International Center for Scholars in the Smithsonian Institution. They are:

THEODORE C. BARREAUX, of Alexandria, Va., vice president in charge of the Washington office of the American Institute of Certified Public Accountants;

MAX M. KAMPELMAN, a partner in the Washington, D.C., law firm of Fried, Frank, Harris, Shriver, and Kampelman;

JESSE H. OPPENHEIMER, a partner in the San Antonio, Tex., law firm of Oppenheimer, Rosenberg, Kelleher & Wheatley, active in civic affairs in San Antonio;

ANNE FIROR SCOTT, an assistant professor of history at Duke University and author of several books on women in American life.

Blocking Iranian Government Property

Executive Order 12170. November 14, 1979

Pursuant to the authority vested in me as President by the Constitution and the laws of the United States including the International Emergency Economic Powers Act, 50 U.S.C.A. sec. 1701 *et seq.*, the National Emergencies Act, 50 U.S.C. sec. 1601 *et seq.*, and 3 U.S.C. sec. 301,

I, **JIMMY CARTER**, President of the United States, find that the situation in Iran constitutes an unusual and extraordinary threat to the national security, foreign policy and economy of the United States and hereby declare a national emergency to deal with that threat.

I hereby order blocked all property and interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of

Iran which are or become subject to the jurisdiction of the United States or which are in or come within the possession or control of persons subject to the jurisdiction of the United States.

The Secretary of the Treasury is authorized to employ all powers granted to me by the International Emergency Economic Powers Act to carry out the provisions of this order.

This order is effective immediately and shall be transmitted to the Congress and published in the FEDERAL REGISTER.

JIMMY CARTER

The White House,
November 14, 1979.

[Filed with the Office of the Federal Register,
9:16 a.m., November 14, 1979]

Blocking Iranian Government Property

*Announcement on the President's Action.
November 14, 1979*

The President has today acted to block all official Iranian assets in the United States, including deposits in United States banks and their foreign branches and subsidiaries. This order is in response to reports that the Government of Iran is about to withdraw its funds. The purpose of this order is to ensure that claims on Iran by the United States and its citizens are provided for in an orderly manner.

The order does not affect accounts of persons other than the Government of Iran, the Central Bank of Iran, and other controlled entities. The precise amounts involved cannot be ascertained at this time, but there is no reason for disturbance in the foreign exchange or other markets.

The President is taking this action pursuant to the International Emergency Economic Powers Act, which grants the

President authority "to deal with any unusual and extraordinary threat to the national security, foreign policy, or economy of the United States."

Blocking Iranian Government Property

Message to the Congress Reporting on the U.S. Action. November 14, 1979

To the Congress of the United States:

Pursuant to Section 204(b) of the International Emergency Economic Powers Act, 50 U.S.C.A. § 1703, I hereby report to the Congress that I have today exercised the authority granted by this Act to block certain property or interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran.

1. The circumstances necessitating the exercise of this authority are the recent events in Iran and the recent actions of the Government of Iran.

2. These events and actions put at grave risk the personal safety of United States citizens and the lawful claims of United States citizens and entities against the Government of Iran and constitute an extraordinary threat to the national security and foreign policy of the United States.

3. Consequently, I have ordered blocked all property and interests in property of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran which are or become subject to the jurisdiction of the United States or which are or come within the possession of persons subject to the jurisdiction of the United States. I have authorized the Secretary of the Treasury to employ all powers granted to me by the International Emergency Economic Powers Act to carry out the blocking.

4. Blocking property and property interests of the Government of Iran, its instrumentalities and controlled entities and the Central Bank of Iran will enable the United States to assure that these resources will be available to satisfy lawful claims of citizens and entities of the United States against the Government of Iran.

5. This action is taken with respect to Iran for the reasons described in this report.

JIMMY CARTER

The White House,
November 14, 1979.

Convention on the Inter-American Institute for Cooperation on Agriculture

*Message to the Senate Transmitting the
Convention. November 14, 1979*

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, the Convention on the Inter-American Institute for Cooperation on Agriculture (the Convention) which was signed at Washington on March 6, 1979. For the information of the Senate, I also transmit the report of the Department of State with respect to the Convention.

The Convention is a revision of the 1944 Convention on the Inter-American Institute of Agricultural Sciences. It clarifies the 1944 Convention and strengthens and broadens the mandate of the Inter-American Institute of Agricultural Sciences (the Institute).

Membership in the Institute under the Convention is open to states which are members of the OAS and the existing Institute, or other American states whose admission is accepted by the Inter-American Board of Agriculture.

Under the Convention, the Institute will consist of three principal organs—the Inter-American Board of Agriculture, the Executive Committee, and the General Directorate. The Inter-American Board of Agriculture will be the highest organ of the Institute and will consist of one representative from each Member State. The new Convention stipulates that such representatives should preferably be persons connected with agriculture or rural development. This Board will be responsible for setting policy and budgetary priorities of the Institute.

To reflect the changed responsibilities of the Institute, its name has been changed to the Inter-American Institute for Cooperation on Agriculture.

The Convention will enter into force when two-thirds of the states parties to the 1944 Convention have deposited instruments of ratification. Correspondingly, the 1944 Convention will cease to be in force for those states for which the new Convention is in force.

I recommend that the Senate give early and favorable consideration to the Convention and advice and consent to ratification.

JIMMY CARTER

The White House,

Trade Sanctions Against Zimbabwe-Rhodesia

*Memorandum From the President.
November 14, 1979*

Presidential Determination No. 80-6

Memorandum for the Secretary of State
Subject: Maintenance of Sanctions
Against Zimbabwe-Rhodesia Under Sec-
tion 408(b) of the Department of State
Authorization Act, Fiscal Years 1980 and
1981

Pursuant to Section 408(b) of the Department of State Authorization Act, Fiscal Years 1980 and 1981 (93 Stat. 405), I hereby determine that it is in the national interest of the United States to continue sanctions against Zimbabwe-Rhodesia at this time.

You are requested, on my behalf, to report this determination promptly to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate.

You are further requested to report to me immediately upon the conclusion of the present Constitutional Conference on Zimbabwe-Rhodesia being held in London, describing the conclusions of that conference and your recommendations for action by the United States with respect to the termination of sanctions.

This determination shall be published in the FEDERAL REGISTER.

JIMMY CARTER

[Filed with the Office of the Federal Register, 4:25 p.m., November 20, 1979]

JUSTIFICATION FOR PRESIDENTIAL DETERMINATION UNDER SECTION 408(b) OF THE DEPARTMENT OF STATE AUTHORIZATION ACT, FISCAL YEARS 1980 AND 1981 CONCERNING SANCTIONS AGAINST ZIMBABWE-RHODESIA

PROBLEM

Section 408(b) of the Department of State Authorization Act, Fiscal Years 1980 and 1981, requires that sanctions against Zimbabwe-Rhodesia be terminated by November 15, 1979, unless the President determines that it would not be in the national interest of the United States and so reports to the Congress.

JUSTIFICATION

Encouraging progress has been made in recent months toward a peaceful resolu-

tion of the conflict in Zimbabwe-Rhodesia; however, the negotiations presently being conducted by the United Kingdom with the parties have not yet been concluded, and differences still remain. A termination of sanctions at this stage could lead all the parties to harden their positions and would jeopardize the chances for a successful settlement for Zimbabwe-Rhodesia.

The British Government has not yet concluded negotiations that would end the rebellion in Rhodesia. They have stated that this will occur when the British Governor arrives in Salisbury and assumes authority. At the present time, the great bulk of British sanctions remain in force and none of our major allies has taken action to terminate sanctions.

The negotiations are now at a critical stage. We hope they will be rapidly and successfully concluded. While the talks continue, it would be premature for the United States to alter its position on sanctions. We would, however, be prepared to lift sanctions when a British Governor assumes authority in Salisbury and a process leading to impartial elections has begun. Our policy will continue to be that no party should have a veto over fair settlement proposals.

This issue will be kept under continuous review and the President will promptly notify the Congress when conditions warrant the lifting of sanctions.

Budget Deferrals

Message to the Congress. November 15, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report six new deferrals totalling \$511.1 million and two revisions to previously transmitted deferrals increasing the amount deferred by

\$14.9 million. These items affect programs in the Departments of Commerce, Justice, State and Transportation; the International Communication Agency; the Railroad Retirement Board; and the President's Commission on Pension Policy.

The details of the deferrals are contained in the attached reports.

JIMMY CARTER

The White House,

November 15, 1979.

NOTE: The attachments detailing the deferrals are printed in the FEDERAL REGISTER of November 20, 1979.

American Federation of Labor and Congress of Industrial Organizations

Remarks at the 13th Constitutional Convention. November 15, 1979

THE PRESIDENT. *President Meany, Secretary-Treasurer Lane Kirkland, men and women of the greatest labor movement in the world:*

It's always good to be among old friends and, today especially, to be among such strong and sure American patriots. I might say that the strength and the accomplishments of your great organization teach us a lesson which I am sure that our Nation will remember in the months ahead. Over the years, you have certainly learned the advantages of reelecting your president, and I hope you'll remember this. [Laughter]

MR. MEANY. I'll buy that.

THE PRESIDENT. President Meany said, "I'll buy that." [Laughter]

I think it's accurate to say that President Meany, your president, and Presidents who live in the White House have not always agreed completely. Mr. Meany, you cannot deny that statement. [Laughter] And all of us presidents, labor

and government, must realize and we must confess that we are not perfect and sometimes we make mistakes. But together we work for our country and sometimes, most of the time, with notable success.

I've reflected for several weeks about what I would say to you this afternoon about our mutual goals, our legislative successes together, our national accord, and our solid working relationship. With great pride I had intended to point out our accomplishments during the last 34 months: increasing the strength of our Nation, a nation that has stayed at peace; rebuilding our urban centers; continuing our fight against inflation; our progress in expressing our deep compassion for the downtrodden and the weak throughout our society and throughout the world; a dramatic breakthrough in minimum wage law legislation; putting America back to work so that we now have the greatest number of our citizens employed and the greatest percentage of our labor force employed than ever before in the history of the United States, and we can be proud of that achievement together.

It's a great record. It's a record that we have made together. It's one which we can improve in the months ahead. For instance, this country still needs and we are determined to get strong labor law reform. But I must leave these subjects for Ray Marshall to discuss with you, and I am sure that he will carry out this assignment magnificently. He has the approach and the attitude of a working man, and in my judgment he's one of the truly great Secretaries of Labor who have ever served. I am certainly proud that he is a member of the Carter Cabinet.

But today we have other important matters to consider. For a brief time this afternoon I want to speak with you and all Americans about some fundamental principles upon which our Nation was founded and which we must never forget. To some,

these ideals may seem at times to be old-fashioned or outmoded. But we've been clearly reminded in recent days that these principles mean just as much to us now as they have ever meant during any time of critical decision in the history of our Nation.

These fundamentals have old names to which we must continually give new meaning—names like “strength,” “courage,” “patriotism,” “independence,” “the love of freedom,” “human rights,” “justice,” “concern for the common good.”

This is the 12th day that more than a hundred innocent human beings, some 60 of whom are members of the United States diplomatic mission, have been held hostage in our Embassy in Iran. For a rare time in human history, a host government has condoned and even encouraged this kind of illegal action against a sovereign territory and official diplomatic relations of another nation. This is an act of terrorism—totally outside the bounds of international law and diplomatic tradition.

In this time of trial, our deep concern is for the lives of these brave hostages, our Nation's loyal citizens and faithful representatives. Every American feels anger and outrage at what is happening to them, just as every American feels concern for their safety and pride in their great courage. This crisis calls for firmness, and it calls for restraint. And I'm proud that this situation has brought forth calm leadership by officials and private citizens throughout this country.

Firmness does require patience, and it requires perseverance. Firmness also means measured action, deliberate actions that clarify the real issues, reduce the likelihood of violence, protect our interests, and ensure justice.

The United States has done nothing and will do nothing that could be used to justify violent or imprudent action by anyone. While we are pursuing all avenues

of diplomatic resolution, we're also acting unilaterally as appropriate—with restraint, yes, but without hesitation.

First, in order to discourage violence and possible bloodshed here, which when televised and transmitted back to Iran might threaten the safety of the hostages, I've discouraged the issuing of permits for demonstrations on Federal properties here in Washington. Consistent with our laws and pursuant to my own powers and responsibilities, I have also encouraged local and State officials to take similar legal action.

Second, I've directed our immigration authorities to review the visas of some 50,000 Iranian students, who are guests here in our country. Our Nation is fully committed to the enhancement of human rights, the protection of legal rights, and the enhancement of civil justice. All provisions of the United States Constitution will be honored. All foreign nationals who are here lawfully may continue here with their work or their studies. But those who are here illegally will be processed promptly and lawfully for deportation back to their own country.

Third, I want to remove any question that our principles might be compromised by our supposed need for Iranian oil. Early this week, therefore, I ordered an immediate halt to any purchases or shipments of Iranian oil to the United States of America.

I'm determined to make clear that we will never allow any foreign country to dictate any American policy.

Fourth, in order to protect our economic interests and to ensure that claims on Iran by the United States or by United States citizens are settled in an orderly manner, we've legally frozen official Iranian property and financial assets. The order does not affect any accounts other than those of the Government of Iran, the Central Bank of Iran, or other government-controlled entities.

These difficult days have reminded us of basic facts and principles which are fundamental to the existence of us as a people. We will honor all constitutional protections and international law and custom, and we will not let our freedom and our security be jeopardized.

The developments in Iran have made it starkly clear to all of us that our excessive dependence on foreign oil is a direct, physical threat to our freedom and security as Americans. That's why we must all join together in the battle for an energy-secure America. This struggle demands the deliberate and the conscientious participation of every single citizen. Unfortunately, our dependence on foreign oil has been growing for the last 5 or 6 years, especially, when it should have been diminishing. As a nation we have become dependent on the undependable and addicted to the unaffordable.

At Camp David this summer, one man summed up the significance of our energy problems better than any other person there. It was Lane Kirkland. He said to me, "Mr. President, the issue is freedom."

That is exactly the issue today. That's why I've been calling on the Congress and encouraging the American people for the last 2½ years to recognize the danger of excessive dependence on foreign oil. That's why I've ordered phased decontrol of oil prices to make conservation pay and to stimulate domestic energy sources.

This is an extremely important, a vital issue. Do not be misled by political demagoguery. I and every other public official in this country have an obligation to speak the truth and to deal responsibly with the hard facts, and they are hard facts. We cannot close down all nuclear powerplants, burn less coal, refuse to build oil refineries, refuse to explore for new oil sources, oppose the production of synthetic fuels, and at the same time encourage the waste of energy by artificially hold-

ing down its price in order to encourage more consumption. This is a ridiculous combination of proposals, which could only be put forward in an election campaign. America knows better.

I am very pleased that our national energy program is now moving steadily through the Congress, after enormous difficulty there and sharp debate. Now more than ever before, it's essential that we have an energy security corporation and a windfall profits tax in order to take care of the poor, encourage production, build a better transportation system. Armed with these new programs, our technology, our creativity, our abundance, our vision, our firm will, America can finally control its own resources, and we can continue to control our own destiny.

Our love of freedom will not be auctioned off for foreign oil. Hundreds of thousands of our forebears gave their very lives for our freedom. Our freedom is not for sale—now or ever in the future.

Every important victory that this Nation has ever won—with Americans struggling together—has made us stronger as a nation. So will it be with the energy problem. There's a clear choice for Americans to make: We can either keep pouring out billions and billions and billions of dollars to foreign countries to import oil—which also buys us inflation, unemployment, and national dependency and insecurity—or we can take some of that money and invest it in America to hire American workers, to unleash American ingenuity, to develop American resources, to promote American energy that Americans own and control. That's the way to approach the energy problem, and that's what we must do together.

There are millions and millions of people who can help directly with this challenge, and there are hundreds of thousands of jobs involved. Next year we anticipate that we will send overseas \$70 billion to pay for foreign oil. Just think

how many fine things we could do in America with that much money.

So, in the last few days we have been reminded once again of our essential need of energy security so that we can continue to protect the basic principles of our country, and together that's what we must achieve, both for ourselves and, even more importantly, for our children and grandchildren. America must always be militarily strong and economically strong, and that America will always be.

One final comment I'd like to make: America must also maintain its moral and its ethical strength. We are not a selfish people. History has recorded many times America's great generosity, as it does today in Thailand and Kampuchea, formerly known as Cambodia. Even as we face problems of great economic concern here in our own country, we are sparing no effort to help those who are suffering and starving in every way we can.

Compassion enhances American strength. It's one of our deepest values, one to which we will always cling and remain true. Concern for human life and justice is as vital as military power to our special place in the family of nations. Human rights is a compelling idea of our lifetime. Our hearts and our aid will continue to go to those who are suffering, who are starving, or who are deprived of freedom. In this time of tension and turmoil I'm proud that our commitment to American strength and to American principles is unshakable.

And now, in closing, I want to turn aside from our national and international preoccupations for just a moment.

A few weeks ago, with the White House sparkling in the sunlight behind him, Pope John Paul II asked God to bless America's quest for freedom, social justice, and peace. When his moving speech was done, he turned with a great insight to a man seated in front of him, on the front row. While millions around the world watched,

the Holy Father clasped the hands of a great American, and he said, and I quote, because I was right there listening, "I know about you, and I know that you have done much good in your life for the working people of the United States and the people of other nations." That man was George Meany.

It was a moving moment, and as President I was especially proud to be an American. No American has fought harder for economic justice for union members and also for millions who've never carried a union card than your leader has, George Meany. No American has believed more deeply in human dignity, not only for workers but for all the helpless and the dispossessed people, the poor and sometimes forgotten people still beyond the reach of the benefits of our own great national bounty. And no American has loved his country more, not only for the democracy at home but for the beacon of freedom and basic human rights which we will continue to keep shining throughout the world.

Mr. Meany, on behalf of the American people, thank you. May God bless all of you.

MR. MEANY. Thank you.

NOTE: The President spoke at 2:25 p.m. in the Sheraton Washington Hotel ballroom.

Later in the day, the President attended a reception for international guests of the AFL-CIO constitutional convention, which was held on the State Floor at the White House.

Department of Transportation

Nomination of William B. Johnston To Be an Assistant Secretary. November 15, 1979

The President today announced that he will nominate William B. Johnston, of Clifton, Va., to be an Assistant Secretary of Transportation. He would replace Chester Davenport, who has resigned.

Johnston has been Associate Director of the White House Domestic Policy Staff since 1977.

He was born August 25, 1945, in Washington, D.C. He received a B.A. from Yale University in 1967.

From 1973 to 1975, Johnston was a consultant to the Ford Foundation, and from 1975 to 1976, he was a consultant to the Labor Department.

From 1972 to 1976, Johnston was a research associate at the Center for Social Policy Studies. In 1976 he was on the national issues staff of the Carter Presidential campaign and worked on the Carter transition team.

Federal Emergency Management Agency

Nomination of William H. Wilcox To Be an Associate Director. November 15, 1979

The President today announced that he will nominate William H. Wilcox, of Harrisburg, Pa., to be an Associate Director of the Federal Emergency Management Agency, a new position. His area of responsibility would be response and recovery.

Wilcox has been Administrator of the Federal Disaster Assistance Administration since 1978.

He was born June 9, 1919, in Philadelphia, Pa. He received a B.A. from the University of Connecticut and an M.P.A. from Wayne University. He served in the Armed Forces from 1942 to 1945.

From 1954 to 1971, Wilcox was executive director of the Greater Philadelphia Movement. He also served as chairman of the Philadelphia Committee on City Policy and as a member of the Executive Board of Gaudenzia House.

From 1971 to 1978, Wilcox was secretary of community affairs of the Common-

wealth of Pennsylvania. While in State government, he coordinated various State disaster recovery activities, including activities related to the Johnstown Flood of 1977. He also served as the State fuel allocation officer and directed a statewide home weatherization program for the elderly and low-income families.

United States-Japan Economic Relations Group

Joint Announcement. November 15, 1979

President Carter and Prime Minister Ohira announced today that the following persons had agreed to serve on the U.S.-Japan Economic Relations Group: Ambassador Robert S. Ingersoll (U.S. chairman), A. W. Clausen, Hugh T. Patrick, Edson W. Spencer, Ambassador Nobuhiko Ushiba (Japanese chairman), Akio Morita, Shuzo Muramoto and Kiichi Saeki.

This Group was established by President Carter and Prime Minister Ohira at their bilateral May 2 meeting in Washington, when they agreed that a small group of distinguished persons drawn from private life would submit recommendations to the President and the Prime Minister concerning actions to maintain a healthy bilateral economic relationship between the United States and Japan.

On June 25, during President Carter's bilateral Summit meetings with Prime Minister Ohira in Tokyo, it was agreed that the co-chairmen of the Group would be former Ambassadors Robert Ingersoll and Nobuhiko Ushiba. Since their selection in late June, the co-chairmen have been considering potential nominees for the Group. The selections by the President and the Prime Minister reflect the recommendations of their respective co-chairmen.

The Group will hold its first meeting in mid-December, with the objective of submitting timely recommendations to the President and the Prime Minister.

Mr. Ingersoll was formerly Ambassador to Japan (1972-73), Assistant Secretary of State for East Asian and Pacific Affairs (1974), and Deputy Secretary of State (1974-1976). Chairman of the Japan Society since September 1978, Mr. Ingersoll has been a member of many international business committees and councils, including the Advisory Council on U.S.-Japan Relations and the Emergency Committee for American Trade. He is also Deputy Chairman of the Board of Trustees of the University of Chicago.

Mr. Ushiba, a graduate of the Faculty of Law of Tokyo Imperial University, entered the Japanese Foreign Service in 1932. He has served in various capacities abroad and in Tokyo, including Ambassador to Canada (1961-64), Vice Minister of Foreign Affairs (1967-70), and Ambassador to the United States (1970-73). Mr. Ushiba was named State Minister for External Economic Relations in November 1977 and served as Ambassador for the Multilateral Trade Negotiations from December 1978 until recently.

Mr. Spencer is chairman and chief executive officer of Honeywell, Inc. He was a Rhodes Scholar 1948-50 and has been with the Honeywell firm since 1954. From 1959-65 he was their Far East regional manager in Tokyo. He is a director of Northwest Bancorporation and International Harvester.

Professor Patrick is a professor of Economics at Yale University. He holds the Ph. D. degree in economics from the University of Michigan and has several times in his career been granted fellowships for study in Japan. On the faculty of Yale since 1960 and a member of the interuniversity Japan Economic Seminar, he is the author of numerous scholarly publications

and co-editor of "Asia's New Giant," a definitive study of the Japanese economy published in 1976.

Mr. Clausen is president and chief executive officer of BankAmerica Corporation and its wholly-owned subsidiary, Bank of America N.T. & S.A. He has been associated with Bank of America since 1949 before his election to his present position in 1969. A graduate of Carthage College, he received his LL.B. from the University of Minnesota and is a graduate of the Harvard Advanced Management Program. He is a member of the Policy Committee of The Business Roundtable, a member of the Business Council, director of the U.S.-U.S.S.R. Trade and Economic Council and of the National Council for United States-China Trade and co-chairman of the Japan-California Association, as well as a member of the Japan-U.S. Advisory Council.

Mr. Muramoto is president of Dai-Ichi Kangyo Bank Ltd. He graduated from the economic department of Tokyo University and entered Dai-Ichi Bank where he has served as Senior Managing Director and Deputy President. From 1971-76 he has been Deputy President of Dai-Ichi Kangyo Bank Ltd.

Mr. Morita is chairman and chief executive officer of Sony Corporation. After graduating from the science department of Osaka University, he established Tokyo Tsushin Kogyo Ltd. (to become Sony Co. in 1958) and became its executive manager. He has been Deputy President, and President and Chief Operating Officer of Sony Corporation.

Mr. Saeki has been president of Nomura Research Institute from 1965 to the present. A graduate of Tokyo University, he has served as staff member of the Economic Stabilization Board, director of a division of the Agency for Economic Research and Planning, and president of the National Defense College, Defense Agency.

Hospital Cost Containment Legislation

Statement by the White House Press Secretary on House of Representatives Disapproval of the Legislation. November 15, 1979

Let me say a word about hospital cost containment.

The President asked specifically that I say that the action of the House of Representatives is a blow to the fight against inflation. He asked me to say in addition that the action in the House was a victory for a highly financed, special-interest lobby, and a defeat for the common good. He asked that I point out that the action of the House today will add literally tens of billions of dollars to the Federal deficit in the coming years, and tens of billions of dollars to the cost of living for Americans who are already having difficulty making ends meet.

However, he also asked that I say that the ballgame is not yet over and that we intend to continue to fight to contain hospital costs, which have increased 1,000 percent since 1960, and that we expect that hospital cost containment legislation will yet be passed either as a separate bill or as part of a national health insurance plan, one of which is now being considered by the Senate Finance Committee.

NOTE: Press Secretary Jody Powell read the statement at 5:25 p.m. to reporters assembled in the Briefing Room at the White House.

The press release also includes a transcript of the question-and-answer session which followed the statement.

White House Conference on Libraries and Information Services

Remarks at a Meeting of the Conference. November 16, 1979

Chairman Charles Benton, Library Director Juanita Brightwell, other distin-

guished leaders who represent one of the finest aspects of American life:

I really appreciate the book concerning the duties of a trustee for libraries. In the future I may be looking for my old job back. *[Laughter]* So, Juanita, if you can keep it open for me for 5 years I'll really appreciate it. *[Laughter]*

I'm delighted to be here with you this morning. It's been one of the developments in my own administration to which I've looked forward with great anticipation. I don't have a text. I don't feel that I need one to talk to you.

I had a quick introduction to Washington, to Washington society life, and to newspaper coverage of the First Family. The first stories that came out, as a matter of fact, were about Amy's reading habits at the table of an official banquet when the President of Mexico came to see us. She read a book throughout the banquet dinner. When I defended Amy I had several of my Cabinet members ask for permission to do the same at the next banquet. *[Laughter]* As a matter of fact, we have had to put a restraint on that—but since I was a little boy, my own family has had the habit of reading at the table. We have a lively conversation and read simultaneously, and Amy is just carrying on one of the Carter family traditions. I hate to admit this, being an outdoor type and an athletic type, but my family never had to ask me what I wanted for Christmas, because they always knew that I would reply "books."

And when I first went home from the Navy, as Charles pointed out, my first public position was as the trustee of the Sumter County Library Board. I still have my library card. It's Number 5, and I use it whenever I'm home.

This morning I would like to talk to you about some of the elements of libraries that are important to a young boy growing up in an isolated community. Students in our public schools, business leaders and

employees of business who are fairly narrowly restricted in their ability to get a continuing formal education, and those who occupy positions of leadership with rapidly varying and challenging responsibilities from day to day—in all those elements of life libraries and access to books and other information play an important role.

Times change very fast. Information available to the world is exploding more rapidly than it can be accommodated, and the function of libraries is to collect information, to collate information, to assess information, to store information, and to let information be available to those who need it.

There are many people in our modern society who are isolated in some form or another—the deaf, the blind, the immobile, the afflicted, those who live in isolated communities are obvious examples, but there are others. Those who have a particular life's career in a fairly narrowly defined area, but who desire constantly to stretch their minds and to stretch their hearts and to know more about the world around them, other people, opportunities for a more gratifying existence, are in the same category as those who are physically isolated. Libraries can play this role to make available to people, in a special occasion for an unexpected event, an opportunity for study.

Science, business, politics, government is an area where rapid information is crucial in dealing with challenges of the day, where long-time study to prepare for an event is impossible, because events that are important cannot be predicted. And there, the instant access to information and the calm and reasoned guidance of a qualified librarian can make the difference between the success or failure, even, of a life.

A President in particular is faced with

varied responsibilities. And my access to the Library of Congress and my access to books is one of the most important elements of my life. Amy reads, sometimes two or three books a day. She and I have both had rapid reading lessons since I've been President. I read two or three books a week, sometimes more, and in addition to that have instant access to the broad-ranging information which is available here in Washington and, obviously, in many other communities in our country.

The Library of Congress was started, as you know, when the Government decided to buy the book collection of President Thomas Jefferson. He withdrew from formal schooling when his life was in the formative stage and began private study—with a tutor, yes, but heavily dependent not on classroom instructions, but on his access to a varied gamut of books. And I would guess that one of the most well educated Presidents who has ever served had limited formal schooling, and that was President Harry Truman. His education came primarily from books, history books and others from his local library.

I'm not at all criticizing or playing down the importance of formal education, but no matter how broad an educational experience has been in a person's life, sometimes determined by the state of a person's birth or the wealth of a family or opportunities that all can't share—no matter how broad a formal education might be, libraries are still important if that person desires to continue in education throughout one's life. This need for knowledge about history or current events is particularly important in a democracy, where the strength of a nation depends to a major degree on a well-informed public.

One of the most important responsibilities that I have had on my own shoulders is to make sure that in controversial events that the public has a maximum access to knowledge about that

event. In the past our country has made some serious mistakes in war, in morality, in the functioning of government. In the few years before I became President this was especially true. And in almost every instance, if those circumstances are analyzed, the errors or mistakes were made because the public was excluded from the process of making decisions of our own government.

An enlightened public, openly debating a controversial issue, sometimes creates confusion. It's much easier to negotiate in utmost secrecy than to let the Congress and the public know the terms of the negotiation and the progress being made. But when the controversial issues can be examined from a broad range of points of view, a nation or a government or a President is much more likely, ultimately, to avoid mistakes and to make the right decision that can preserve our own Nation's security, our well-being, and also peace throughout the world.

I'd like to add just one more comment. We've made good progress in the last number of years in promoting the science of libraries, of information, of communication. Each generation is inclined to think we've gone as far as we can with television, instantaneous transmission of messages and photographs, satellite relay stations, but I would guess that the progress we make in the future, in the next 10 years, the next hundred years, will be just as rapid and just as startling as that we've made in the past.

There must be a flexibility built into a government's structure and also in the minds and hearts of American people outside the government, where most of the responsibility must lie. I'm convinced that the new Department of Education will have a greatly expanded and much more effective role in emphasizing the importance of books, of learning, and par-

ticularly of libraries. I'm determined that this will be the case.

But I believe that this White House Conference and those who attend it and those who will listen to your voice or whom you can influence when you get home will have a much more broad-reaching effect than anything a President can do or a Cabinet Secretary can do or the Federal Government can do.

In a local Lions Club, a local church, a local Rotary Club, a League of Women Voters, Jaycees, in any organization, in a local radio station, television station, newspaper, there are avenues for you to reach a broad range of Americans who don't presently know the advantages of libraries. Many people, because of ignorance or because they've forgotten the joy of learning, don't have access to the opportunities that you can offer.

And I hope if you don't do anything else at this conference, that you will learn from one another how best to present the opportunities of library use and then take that message home and distribute it with the greatest degree of enthusiasm and commitment. When people are reminded, they'll respond. And the joys of books and the joys of visual presentations, the joys of movies, slides, paintings, lectures, debates, instruction, music, drama are all parts of a library program. And I hope that you will broaden your own concept of what libraries can do as a result of this conference.

I'm very grateful that you would come to Washington, in sometimes a sacrificial way, to participate in learning more about how your own career and your own interests can be made more effective. As we spread the word about libraries and learning and democracy and understanding and communication and progress and harmony and peace through your own work, through your work you can remem-

ber that you've got a friend in the White House.

Thank you very much.

NOTE: The President spoke at 9:40 a.m. in the International Ballroom at the Washington Hilton Hotel.

In his opening remarks, the President referred to Charles Benton, Chairman of the National Commission on Libraries and Information Science.

Iranian Situation and United States Energy Conservation

Remarks at a White House Briefing for State Governors. November 16, 1979

First of all, let me welcome you here to the White House and express my appreciation for your willingness to join in with me in perhaps one of the most difficult and complicated challenges which our Nation has ever faced in peacetime.

I deeply appreciate the letter I got from Governor Bowen and Governor Lamm expressing your support for what we are trying to do, and also suggesting on your own behalf that the Governors would espouse and pursue a fast-track conservation program, that you are dedicated to the sharing of information and new ideas among yourselves and with other agencies of government, both local and Federal, that you will work with the private sector as much as possible to encourage long-range conservation measures. And I understand as well that you intend to have a major conservation conference sometime before too long.

This kind of support from you is very important to me. Governor Brown in California and others immediately expressed your approval and your willingness to help in putting into effect the pro-

hibition against the acceptance of Iranian oil to our country, and the overwhelming sense that I have is that we have a nation which is united, eager to do the best we can under difficult circumstances, and highly supportive of what we are attempting to accomplish in Iran.

I've just gotten a report that there are maybe 80,000 Iranians demonstrating outside our Embassy in a highly emotional state, and we are trying as best we can to protect the honor of our country and to protect the lives of the hostages, who are courageous, dedicated, and who deserve every protection that we can give them.

I would like to add one word of caution, if you don't mind, and I hope that you'll relay it to the people back home who listen to your voice. I've had a large number of expressions of support for us, sympathy for our hostages, and the expression of strong condemnation for what is going on in Iran by Iranians, particularly those who live in our country, who have lived here for years as responsible citizens. And it would be a serious mistake for us to deprive them of their rights or deprive them of their citizenship or deprive them of our friendship.

There is an inclination in a time of crisis to condemn every person who has connections with Iran, but I hope that you will caution all Americans, as I'm trying to do now, not to abuse the fine tens of thousands of Iranians who live in our country and who have a voice to speak out, as they have to me directly; and also to recognize that in Iran it's the radicals and the militants and the irresponsible elements there who are responsible for the tragedy which we are trying to prevent.

We are trying to act with circumspection, but also with firmness. Ours is not a country that responds or ever will re-

spond to intimidation or blackmail; we will not honor in any possible way the threats or actions of terrorists. I've tried to act moderately, but without deviation from the principles on which our Nation was founded, and which make us justifiably proud. A few of the things that we have done I'm sure you understand, and on some you've had to join in with me.

I have discouraged the issuing of permits for demonstrations on any Federal property, where the demonstrations might result in violence or abusive acts or perhaps bloodshed or loss of life, because I think the transmission of television or other photographs or reports of those instances might very well result in a danger to the lives of Americans who are being held hostage.

In addition, as you know, I have issued instructions that we will not accept the shipment of any Iranian oil to our country. I did that to make it vividly clear that our country is not subject to the threat of an embargo or a threat of any other kind.

I don't know the ultimate results of that decision in international oil markets. The high likelihood is that supplies to our country will be reduced. That's something that I am perfectly willing to face, particularly since I have leaders like you marching shoulder to shoulder with me to face that eventuality. The American people cannot underestimate the importance of the strictest possible conservation matters and actions at this moment.

There is no reason to panic, fortunately. Because of actions that you and I and others have taken in the past few months, we have a fairly good supply of crude oil, gasoline, home heating oil on hand, and we'll be able to see the trends in the weeks ahead. But an early and a permanent commitment to the sharpest possible reduction in waste of energy of all kinds will be helpful. And a preparation for con-

tingency plans within your own States, and working in harmony with us, will be a very important element.

I've asked the Immigration and Naturalization Service to examine the visas of Iranian students and others who are here. If they are here legally, they'll be encouraged to stay, or permitted to stay if they choose to pursue their studies or to pursue their work. If they are here illegally, their papers will be processed completely in accordance with our Constitution and laws and the proprieties that we must observe, and they will be deported if they aren't complying with those laws or constitutional provisions.

In order to protect our own economy and the rights and privileges of American business leaders and others, our banks, American citizens, I have frozen the assets of Iran which are directly or indirectly related to the government ownership or control. This is so that debts owed by Iran to us will be paid, and so that we will not have an adverse effect on our economy because of the forfeiture of those debts, because of impoundment in Iran of our assets or properties.

And the last action that I've taken that I'll mention, in order to save time, is that I have discouraged any meeting of or debate in the United Nations Security Council of the Iranian problem. This was requested by Iran, but my own decision has been that this would not be appropriate as long as they are holding hostages in our Embassy there. And I'm proud to say that the United Nations Security Council unanimously has condemned the Iranian Government for what it has condoned or permitted. And they have also unanimously rejected any proposal by Iran for debate or discussion of this issue while the hostages are being held.

This is a serious matter, as you know. It's not a reason for panic. It's not reason to abandon the principles or laws or proprieties in our own country. We do not want to be guilty of the same sort of improper action which we are condemning in Iran. And it's, to repeat myself, not a cause for us to abuse any Iranian citizen who's in our country. If there are those here who act improperly, the laws are adequate to care for them. If they are here illegally, our deportation processes will be carried out in a completely proper and predictable way.

I'm grateful that less than 2 weeks ago the Congress passed and I signed an energy emergency act which gives us the ability, working together, to care for the needs of our country if we have a serious shortage or threatened shortage of energy. State conservation measures have been assessed, and with your help, I think the law is adequate in that respect. The gas rationing authority given to me is a step in the right direction, but still not adequate, and we hope to have it improved in the future.

We are now preparing a gasoline rationing plan. As soon as this very complicated procedure is completed, it will be revealed to the public and to the Congress. And we would welcome, Dick,¹ your committee working with Charlie Duncan in the preparation of the gasoline rationing proposal. It cannot be implemented, except with congressional action, unless we have a 20-percent shortage. And this, as you know, would wreak havoc in our national economy, if we had to wait that long.

So, we do have problems with it, but we have a fairly adequate means by which Governors can take the initiative, in each one of your own States, to implement very

strict conservation measures. I don't know what the future will bring, but whether it's a slight shortage, a permanent shortage, a serious shortage, or further disruption in supplies, there is no doubt in anyone's mind in this room, I'm sure, that we versa, a permanent consultative inter-relationship between Governors and other officials and the Federal Government, and the closest possible partnership in dealing with an unpredictable and potentially serious situation.

We've been working on this matter for 2½ years. I first made the proposals for an energy policy for our Nation in April of 1977. After 18 months of work, the Congress passed a partial energy package about a year ago, in November of 1978. And we are on the verge, I believe, of taking additional substantive steps.

There is no way that all of you could approve of every element of the energy plan. No one does. It's the result of an enormous effort to compromise and to work together, because, in effect, I lead two energy nations. One is the greatest consuming nation on Earth, by far, and the other one is one of the greatest energy producing nations on Earth. And the inherent conflicts that exist under those circumstances certainly has now been very carefully assessed and, I think, will be successfully addressed.

Hard feelings have erupted and, in most cases, have been assuaged. And I think the Congress is well on the way now toward completing their work for a comprehensive energy proposal. We are determined not to violate any laws. We're determined not to encroach on the prerogatives and responsibilities of the State and local governments. We're determined to enhance and not to reduce the effectiveness and the independence of the free enterprise

¹ Governor Lamm.

system of our country. We would like to have the Federal Government role minimized, and to the extent that individual citizens, families, businesses, local and State governments can act responsibly and aggressively with the maximum degree of innovation in conserving energy and producing new energy sources, then to that degree the Federal role can be minimized.

Again, I'm grateful that you would come here. This afternoon you'll have a fairly complete description and an elaboration on some of the items that I've covered with you. Charlie Duncan, John Sawhill, Secretary Vance, William Miller, the Secretary of Treasury, will all be here to discuss these matters with you and to answer your questions.

But I think for just a few minutes before I leave, you might want to comment or ask a question yourselves.

NOTE: The President spoke at 1:04 p.m. in the East Room at the White House.

Department of Commerce

Nominations of Philip M. Klutznick To Be Secretary and Luther H. Hodges, Jr., To Be Deputy Secretary. November 16, 1979

I have two announcements.

First of all, as I suspect you already know, the President will nominate Philip M. Klutznick, a Chicago attorney and businessman, former U.S. Representative, with the rank of Ambassador, to the U.N. Economic and Social Council, as Secretary of Commerce. Mr. Klutznick has had a great deal of experience in the two most important areas of concern to the Commerce Department—trade, particularly in its international aspects, and economic development. If you don't already have his biography, you will by the time this briefing is over. And I think it outlines very

clearly his long-term and broad experience in both of those areas.

In addition, the President will nominate Luther Hodges, Jr., to serve in the new position of Deputy Secretary in the Department of Commerce. That position will be created when, as we expect shortly, the reorganization bill goes into effect, creating a new Department of Commerce and Trade.

NOTE: Press Secretary Jody Powell read the announcements at the regular news briefing for reporters, which began at approximately 4:45 p.m. in the Briefing Room at the White House.

National Family Week, 1979

Proclamation 4703. November 16, 1979

By the President of the United States of America

A Proclamation

We are a nation of families. This country was settled and built by families of all kinds. A source of strength in our past, families are America's hope for the future. All families are important, but the extended family, the foster family and the adoptive family play a special role by relieving the isolation of those who lack the comfort of a loving nuclear family.

Families are the most universal and enduring element in human existence. A family is a reservoir of shared experiences, shared joys and sorrows and, most of all, shared love that spans generations and distances.

As we come together at this Thanksgiving season, we gather with our families to express our gratitude. Our family circles expand to welcome and include others in the warmth of the holiday season. It is a time for all of us to cherish

those we love and to celebrate family life.

We must continue this attention to families all year round, however. Through the coming White House Conference on Families, our new Office on Families, and through new approaches that would encourage more adoptive and foster parents, governments and citizens together can learn to become better family advocates of the American family. We must nurture the family as it has nurtured us.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, in accordance with a joint resolution of Congress, do hereby proclaim the week of November 18, 1979, as National Family Week and call upon all the American people to observe this week with appropriate activities in their homes and communities.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of November, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 2:57 p.m., November 16, 1979]

National Council of Negro Women

*Remarks at a White House Reception.
November 16, 1979*

I'm sure none of you have husbands whose wives come in late. [Laughter]

It's a wonderful opportunity for me and Rosalynn to have you here in the White House. This is an exciting time for us. I know from experience that you have been part of the tremendous improvements that have been made in American life.

All the Presidents have lived in this house except George Washington, who was the first one.

And nothing could be accomplished in our Nation, through government, if it weren't for dedicated and courageous people who know how to work together for the improvement of the lives of those who are not quite so fortunate as the leaders, like yourselves.

One of my favorite women has said that without volunteers, America would not have a soul. And when Rosalynn said that, I listened very carefully. [Laughter] And I would say that without the 27 organizations represented here this afternoon, America would not have a major part of its soul.

Your president and I have a lot in common. Dorothy's from the South; so am I. She left the South; so did I. I'm intending to go back; I don't know about her. Her mother and my mother were nurses. She and I spent a lot of time, have been a lot of times to Baptist churches. [Laughter] She and I both have had a long day. Right, Dorothy? And we have one more thing in common. She's been your president, and she's been reelected, and I'm looking forward to next year to—[laughter]—

The most important thing about all of you in the National Council of Negro Women is that where your hearts are and where your hands are are where the people live who need help and a better life. Your founder, Mary McCloud Bethune, had two things in mind—jobs and education. And that's been the root of the changes that have benefited the lives of those in our country who have felt the burden of discrimination.

You have felt discrimination because of two things—one, because you're women; one, because you're black. We've made great progress in both areas, but we've got a long way to go. And I hope that all of

you will help not only with the racial discrimination that still exists in some areas of our life but also will help to get the equal rights amendment passed for this country.

The thing that I appreciate about you is that you're not just confining your influence to a few things. You look around you, close by, to make families stronger. You look down at the little ones around you and say, "I want these children to have a better education than I had a chance to have." You look up and remember that our inspiration comes from God and that there are some things in this world that never change, and they're the most precious things of all. And you look outside of your own homes to make better communities and a better nation. And you help with things like the elderly, things like jobs, better transportation, better housing. Whenever there's a need, your minds and your hearts and your hands have been dedicated to meeting that need. And you're also dedicated to peace.

We've got to have a SALT agreement completed this year, because as you well know, if a nation goes to war, the poor and the black have always been the first ones to go. And I believe that one of the most important things that all of you could do is to induce the Members of the Senate of the United States to ratify the SALT agreement, because we do not want to have a hundred million American citizens killed by nuclear weapons. And that's an important task for us all.

I appreciate your going to the Hill today. When you speak, the Congress listens. And you have talked to them today about a very important consideration for matters overseas.

Before I came in this house as President, we had very little interest or involvement in the affairs of Africa. We have

changed that.

I pointed out earlier that you're not afraid to speak out, and as you know, I chose an Ambassador to the United Nations that was not afraid to speak out. Andrew Young spelled out the policy not only for our country, but his voice was heard, and his advice was followed, and his policies were adopted by many other nations on Earth.

And now we have a growing commitment to Africa to guarantee that racial discrimination is wiped out, that majority rule exists, and that we never again in the future have to face the burdens of apartheid, which is a disgrace for the human race. We are now making progress in Namibia. Meetings are going on this week that give us some hope for the independence and the autonomy of that country. And in Zimbabwe-Rhodesia, as you know, we are also seeing good progress.

When I came into office, we had the so-called Byrd amendment, which forced us to trade with an unacceptable government in what was then known as Rhodesia. The Congress eliminated the Byrd amendment, and sanctions were imposed by us, by Great Britain, and by other countries. We've seen the benefits of it, because the pressure of those sanctions have caused the reluctant parties to come by now and negotiate what we hope will be a time of freedom for the new nation of Zimbabwe-Rhodesia.

Some of the Members of the Congress want the sanctions to be lifted, but I think we ought not to lift those sanctions until we have a British Governor-General in Zimbabwe-Rhodesia and we have the electoral process well underway. And if you'll help me, we're going to hold those sanctions off until we get those two things done.

The last thing I want to say is this.

We've had some accomplishments in our country in the last 34 months and in the last 34 years, but there are many areas where black voices and black women's voices are not yet heard adequately. Eleanor Holmes Norton is doing a good job in the equal employment area, and government is trying to eliminate the legal bases for discrimination. But still the judiciary, the Federal judiciary, has a lot to say about it.

I've tried to seek your advice, and others like you all over the country, and start appointing black judges, because they don't serve for 4 years, they don't serve for 8 years, they serve for a lifetime. And again, we've got a long way to go. But I'm very proud to say that I have already appointed more black judges in this country than all other Presidents who've lived in this house put together—because Dorothy would never let me forget about it. *[Laughter]*

And so, I'm very grateful to you, as President, for being my partner. This is the greatest nation on Earth. And if we have disappointments and if we have differences sometimes, if we have debates and divisions and if we have times when we have temporary inconveniences and delays in realizing the full desires of our lives, we ought to recognize that, underneath, our country is the strongest and the best and the freest country on Earth.

We've got a lot to be thankful for. God's blessed us. And if we work together, as you have done so well, then we'll make the greatest nation on Earth even greater in the future.

Thank you very much. God bless you for all being here.

NOTE: The President spoke at 6:07 p.m. in the East Room at the White House.

In his remarks, the President referred to Dorothy Height, president of the council.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

November 10

The President met at the White House with Zbigniew Brzezinski, Assistant to the President for National Security Affairs.

November 13

The President met at the White House with:

- Dr. Brzezinski;
- Frank B. Moore, Assistant to the President for Congressional Liaison.

The White House announced that the President has canceled his trip to Pennsylvania to continue to closely monitor the situation in Iran. While he regretted that the situation in Iran required the cancellation, his decision was not based on any expectation of an immediate change in the situation there.

November 14

The President met at the White House with:

- Secretary of State Cyrus R. Vance and Dr. Brzezinski;
- the Republican congressional leadership;
- Mr. Moore;
- James T. McIntyre, Jr., Director of the Office of Management and Budget, and Robert A. Frosch, Administrator of the National Aeronautics and Space Administration, to discuss the fiscal year 1981 budget;
- Vice President Walter F. Mondale;
- Mr. McIntyre.

Administration of Jimmy Carter, 1979

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Minnesota in the East Room at the White House.

November 15

The President met at the White House with:

- Dr. Brzezinski;
- Mr. Moore.

The President attended an interfaith service at the National Cathedral in Washington, D.C., for the hostages in the American Embassy in Iran.

November 16

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary Vance, Secretary of Defense Harold Brown, Hamilton Jordan, Assistant to the President, Hedley W. Donovan, Senior Adviser to the President, Lloyd N. Cutler, Counsel to the President, and Dr. Brzezinski;
- Mr. Moore;
- Mr. Donovan;
- Mr. McIntyre.

The White House announced that the President has canceled both his trip to Florida and vacation on Sapelo Island, Ga., in order to continue to closely monitor the situation in Iran. The President regrets that the continuing situation in Iran requires the cancellation of his trip to Florida.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

NOMINATIONS—Continued

Submitted November 13, 1979

THEODORE COMPTON LUTZ, of Virginia, to be Urban Mass Transportation Administrator, vice Richard Stephen Page, resigned.

IRALINE GREEN BARNES, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of 15 years, vice W. Byron Sorrell, retired.

Submitted November 14, 1979

SHIRLEY MOUNT HUFSTEDLER, of California, to be Secretary of Education (new position).

Submitted November 16, 1979

WILLIAM B. JOHNSTON, of Virginia, to be an Assistant Secretary of Transportation, vice Chester Davenport, resigned.

WILLIAM H. WILCOX, of Pennsylvania, to be an Associate Director of the Federal Emergency Management Agency (new position).

CHECKLIST OF WHITE HOUSE PRESS RELEASES

The following listing contains releases of the White House Press Office which are not included in this issue.

Released November 13, 1979

Transcript: remarks and a question-and-answer session at a briefing on hospital cost containment legislation—by Vice President Walter F. Mondale and Alfred E. Kahn, Advisor to the President on Inflation

News conference: on relief efforts for Kampucheans—by Rev. Theodore M. Hesburgh, Chairman of the Select Commission on Immigration and Refugee Policy and chairman of the board of the Overseas Development Council, James P. Grant, president, Overseas Development Council, and Matthew Nimetz, Acting Coordinator for Refugee Affairs, Department of State

Released November 14, 1979

News conference: on blocking Iranian Government property—by Secretary of the Treasury G. William Miller

News conference: on the approval of H.R. 4955, authorizing supplemental appropriations for migration and refugee assistance for fiscal year 1980 and 1981—by Ambassador

CHECKLIST—Continued

Released November 14—Continued

Henry D. Owen, Special Representative of the President for International Economic Summits

Released November 16, 1979

News conference: on the White House briefing for State Governors to discuss the Iranian situation and U.S. energy conservation—by Charles W. Duncan, Jr., Secretary, and John C. Sawhill, Under Secretary, Department of Energy

Biographical data: Philip M. Klutznick, nominated to be Secretary of Commerce

Announcement: nomination of Luther H. Hodges, Jr., to be Deputy Secretary of Commerce

**ACTS APPROVED BY
THE PRESIDENT**

Approved November 13, 1979

H.R. 4955----- Public Law 96-110
An act to authorize additional appropriations for migration and refugee assistance for the fiscal years 1980 and 1981 and to authorize humanitarian assistance for the victims of the famine in Cambodia.

Approved November 15, 1979

S. 1281----- Public Law 96-111
An act to revitalize the pleasure cruise industry by clarifying and waiving certain restrictions in the Merchant Marine Act, 1936, and the Merchant Marine Act, 1920, to permit the entry of the steamship vessel United States, steamship vessel Oceanic Independence, steamship vessel Santa Rosa, and the steamship vessels Mariposa and Monterey into the trade.

Approved November 16, 1979

S. 640----- Public Law 96-112
Maritime Appropriation Authorization Act for Fiscal Year 1980.

ACTS APPROVED—Continued

Approved November 16—Continued

H.R. 998----- Public Law 96-113
An act to amend the Agricultural Adjustment Act of 1938, as amended, to exempt State prison farms from paying of marketing quota penalties.

H.R. 2196----- Public Law 96-114
Congressional Award Act.

H.J. Res. 68----- Public Law 96-115
A joint resolution to authorize the President to issue a proclamation designating the week beginning on November 18, 1979, as "National Family Week".

H.R. 5279----- Public Law 96-116
An act to provide for the distribution within the United States of the International Communication Agency film entitled "Reflections: George Meany".

H.J. Res. 199----- Public Law 96-117
A joint resolution to amend the Act of October 21, 1978 (92 Stat. 1675; Public Law 95-498).

S. 838----- Public Law 96-118
An act to authorize appropriations for fiscal years 1980, 1981, and 1982 to carry out cooperative programs with the States for the conservation of anadromous fish, and for other purposes.

H.J. Res. 428----- Public Law 96-110
A joint resolution designating December 1979 as "National Child Abuse Prevention Month".

S. 1728----- Public Law 96-120
An act to designate the United States Federal Courthouse Building located at 655 East Durango, San Antonio, Texas, as the "John H. Wood, Jr., Federal Courthouse".

S. 1160----- Public Law 96-121
An act to authorize appropriations for the Federal Fire Prevention and Control Act of 1974, and for other purposes.

H.R. 3319----- Private Law 96-18
An act for the relief of Jose Quintana Dominguez Sendejas.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, November 23, 1979

American Hostages in Iran

White House Statement. November 17, 1979

We welcome this announcement that some of the Americans held in the Embassy in Tehran will be released. We are thankful the ordeal may be over for them and that they may be soon reunited with their families.

We strongly urge that the authorities in Iran now move to secure the safe release of all those still being held. Their ordeal is not over. The United States Government will continue to work in every channel open to it to achieve that end.

American Hostages in Iran

Statement Requesting Special Prayers for the Hostages During the Thanksgiving Holiday Weekend. November 17, 1979

As we approach our traditional day of national thanksgiving, the hearts of all Americans are heavy with concern for the safety of those held hostage in Iran.

We join with people of all faiths throughout the world who adhere to fundamental principles of human rights and international law. We are united with

them in seeking an end to acts of terrorism against innocent people.

On Thanksgiving Day and during the holiday weekend, I ask all Americans to make a special prayer at churches and synagogues and places of public meeting.

Let us seek God's guidance in our search for peace and human brotherhood and pray for the safe return of those whose lives are threatened. May we come with gratitude for our abundant blessings and humility before the heavy burden of world responsibility that our blessings and power have brought.

American Hostages in Iran

White House Statement. November 19, 1979

Three of our hostages in Tehran have been released and have left Iran. After a brief period of rest and care, they will be reunited with their families here in the United States.

The remaining hostages must also be released. Their detention is without justification. The Government of Iran is responsible for achieving their immediate and safe release, and the United States has the right to expect that Iran will do so.

The specter has been raised of other American diplomatic hostages being placed on trial. Such a step would be a further flagrant violation of elementary human rights, religious precepts, and international law and practice. Worldwide outrage at the detention of the hostages would be greatly heightened by any attempt to put these diplomatic personnel on trial.

NOTE: On November 18, three persons were released from the American Embassy and flown to the U.S. Air Force hospital in Wiesbaden, Federal Republic of Germany. On the following day, the Iranian captors released 10 more persons, who joined their colleagues in Wiesbaden before they all were returned to the United States.

Regulation of Small Businesses and Organizations

*Memorandum From the President.
November 16, 1979*

Memorandum for the Heads of Executive Departments and Agencies

The Administration has made a firm commitment to strengthen the small business sector of our economy. In furtherance of that commitment, I want you to make sure that Federal regulations will not place unnecessary burdens on small businesses and organizations. Regulatory programs are important to the safety and health of the Nation; their goals, however, can sometimes be achieved in ways that minimize the burden on small businesses and organizations.

I want you to take the following steps:

- Ensure that any new rules and regulations issued by your agency will be applied whenever possible in a flexible manner, taking into account the size and nature of the regulated businesses and orga-

nizations while fulfilling the social and economic goals of the underlying statutes.

- As you review existing regulatory and reporting requirements, take particular care to determine where, within statutory limits, it is possible to tailor those requirements to fit the size and nature of the businesses and organizations subject to them.

- Identify those rules and regulations in the semiannual agenda required by Executive Order 12044, and in the Regulatory Council's *Calendar of Federal Regulations*, for which flexible alternatives and plans for implementation are being considered.

- Assign responsibility for overseeing the examination and implementation process to the agency official you designated in accordance with my June 14, 1978 memorandum on the White House Conference on Small Business, and ensure that that official works closely with your agency's representative to the Regulatory Council.

- Report the results of the above examination and plans for implementation by December 15 to the Office of Advocacy of the Small Business Administration. The Small Business Administration will work closely with the Regulatory Council and the Office of Management and Budget to ensure that agency-specific actions are consistent with and supportive of the government-wide regulatory reform program.

These measures will continue our progress toward achieving important regulatory goals without unnecessarily burdening the small businesses and organizations that are such a vital force in our Nation's life.

JIMMY CARTER

NOTE: The text of the memorandum was released on November 19.

Regulation of Small Businesses and Organizations

Letter to the Heads of the Independent Regulatory Agencies. November 16, 1979

Dear Mr. Chairman:

This Administration has made a firm commitment to strengthen the small business sector of our economy. Today I have directed the Heads of Executive Departments and Agencies to take a series of steps to ensure that federal regulatory programs do not place unnecessary burdens on small businesses and organizations. I believe it is essential that we minimize the regulatory burden on small businesses and organizations where it is possible to do so without undermining the goals of our social and economic programs.

With the cooperation of the independent regulatory commissions in this effort to bring relief to small businesses, we can effectively respond to public concerns by showing flexibility in our regulatory policy where it is warranted and possible. I, therefore, am asking you, as Chairman of your agency, to consider taking actions similar to those contained in my memorandum of November 16 on this subject to the Heads of Executive Departments and Agencies.

Sincerely,

JIMMY CARTER

NOTE: The text of the letter was released on November 19.

Regulation of Small Businesses and Organizations

Announcement on the President's Directive to Executive Departments and Agencies. November 19, 1979

The President has directed executive departments and agencies to ensure that their regulatory programs, while achiev-

ing their goals, do not place unnecessary burdens on small businesses and organizations. This action followed his decision on October 31 to add the Small Business Administration to the Regulatory Council in order to strengthen that Council's capacity to meet the concerns of small business.

The President expressed his appreciation to Senators John Culver and Gaylord Nelson and Congressmen Andy Ireland, Marty Russo, and Neal Smith, sponsors of specific small business legislation now before Congress, for their leadership in helping America's small business men and women.

The President's memorandum to department and agency heads today directs them to take the following steps:

- Ensure that new regulations take into account the size and nature of the regulated businesses while achieving intended social and economic goals of regulations.

- Determine where existing regulatory and reporting requirements can be tailored to fit the size and nature of the businesses and organizations subject to them.

- Identify those rules and regulations in the semiannual agenda required by Executive Order 12044 and in the Regulatory Council's Calendar of Federal Regulations for which flexible alternatives are being considered.

- Report the results of this process to the Office of Advocacy of the Small Business Administration by December 15.

The review of existing rules and development of implementation plans will be undertaken with the assistance of the Regulatory Council and the Office of Management and Budget. All actions under the directive must be consistent with the laws under which the agencies operate.

The President also sent a letter to the heads of independent agencies today requesting that they consider a similar review of existing and new regulations within their agencies.

District of Columbia Retirement Reform Act

*Statement on Signing S. 1037 Into Law.
November 19, 1979*

I have approved S. 1037, a bill which will provide a sound financial basis and important benefit reforms in the retirement systems for police, firefighters, teachers, and judges of the District of Columbia.

We have long recognized that these retirement systems face an ever-growing unfunded liability and need to be actuarially based to meet future commitments to District employees. Unlike previous administrations, mine has accepted the Federal share of the responsibility and costs for solving the District's current pension problems.

Last year, however, Congress enacted legislation that, in my view, overstated Federal responsibility. Accordingly, I withheld my approval of that legislation. At the same time, I expressed my desire to work with the Congress and the District of Columbia to develop acceptable retirement funding and reform legislation. I believe that S. 1037 reflects a laudable compromise among all the interested groups and achieves that objective.

Last year's legislation identified the Federal financial responsibility to the D.C. police, firefighters, teachers, and judges retirement systems as the entire unfunded liability attributable to employees who retired before home rule took effect on January 2, 1975. That was excessive. In contrast, S. 1037 defines the Federal share as 80 percent of the funded liability for those employees who retired on the basis of years of service and 33⅓ percent for disability retirees before home rule. Under this, the Federal Government will make annual payments of up to \$52 million to the Dis-

trict retirement systems over the next 25 years.

S. 1037 also provides many desirable reforms in service and disability benefits. They should do much to curb past abuses and provide more reasonable benefit levels. While I continue to believe that these reforms should apply to current as well as future employees, they represent a major improvement over the present statutory provisions. Coupled with the strengthened fiscal, managerial, and reporting requirements in the bill, they will contribute significantly to a sound future for the District's retirement system.

NOTE: As enacted, S. 1037 is Public Law 96-122, approved November 17.

Exclusions From the Federal Labor-Management Relations Program

Executive Order 12171. November 19, 1979

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 7103(b) of Title 5 of the United States Code, and in order to exempt certain agencies or subdivisions thereof from coverage of the Federal Labor-Management Relations Program, it is hereby ordered as follows:

1-1. *Determinations.*

1-101. The agencies or subdivisions thereof set forth in Section 1-2 of this Order are hereby determined to have as a primary function intelligence, counter-intelligence, investigative, or national security work. It is also hereby determined that Chapter 71 of Title 5 of the United States Code cannot be applied to those agencies or subdivisions in a manner con-

sistent with national security requirements and considerations. The agencies or subdivisions thereof set forth in Section 1-2 of this Order are hereby excluded from coverage under Chapter 71 of Title 5 of the United States Code.

1-102. Having determined that it is necessary in the interest of national security, the provisions of Chapter 71 of Title 5 of the United States Code are suspended with respect to any agency, installation, or activity listed in Section 1-3 of this Order. However, such suspension shall be applicable only to that portion of the agency, installation, or activity which is located outside the 50 States and the District of Columbia.

1-2. *Exclusions.*

1-201. The Information Security Oversight Office, General Services Administration.

1-202. The Federal Research Division, Research Services, the Library of Congress.

1-203. Agencies or subdivisions of the Department of the Treasury:

- (a) The U.S. Secret Service.
- (b) The U.S. Secret Service Uniformed Division.
- (c) The Office of Special Assistant to the Secretary (National Security).
- (d) The Office of Intelligence Support (OIS).
- (e) The Office of the Assistant Secretary (Enforcement and Operations) (OEO).
- (f) The Office of Criminal Enforcement, Bureau of Alcohol, Tobacco, and Firearms.
- (g) The Office of Investigations, U.S. Customs Service.
- (h) The Criminal Investigation Division, Internal Revenue Service.

1-204. Agencies or subdivisions of the

Department of the Army, Department of Defense:

- (a) Office of Assistant Chief of Staff for Intelligence.
- (b) U.S. Army Intelligence and Security Command.
- (c) U.S. Army Foreign Science and Technology Center.
- (d) U.S. Army Intelligence Center and School.
- (e) U.S. Army Missile Intelligence Agency.
- (f) Foreign Intelligence Office, U.S. Army Missile Research and Development Command.

1-205. Agencies or subdivisions of the Department of the Navy, Department of Defense:

- (a) Office of Naval Intelligence.
- (b) Naval Intelligence Command Headquarters and Subordinate Commands.
- (c) Headquarters, Naval Security Group Command.
- (d) Naval Security Group Activities and Detachments.
- (e) Fleet Intelligence Center, Europe and Atlantic (FICEURLANT).
- (f) Fleet Intelligence Center, Pacific (FICPAC).
- (g) Units composed primarily of employees engaged in the operation, repair, and/or maintenance of "off line" or "on line" cryptographic equipment.
- (h) Units composed primarily of employees of Naval telecommunications activities in positions which require a cryptographic authorization.

1-206. Agencies or subdivisions of the Department of the Air Force, Department of Defense:

- (a) Office of Space Systems, Office of the Secretary of the Air Force.

- (b) Office of Special Projects, Office of the Secretary of the Air Force.
 - (c) Engineering Office, Space and Missile Systems Organization (Air Force Systems Command).
 - (d) Program Control Office, Space and Missile Systems Organization (Air Force Systems Command).
 - (e) Detachment 3, Space and Missile Systems Organization (Air Force Systems Command).
 - (f) Defense Dissemination Systems Program Office, Space and Missile Systems Organization (Air Force Systems Command).
 - (g) Satellite Data System Program Office, Space and Missile Systems Organization (Air Force Systems Command).
 - (h) Project Office at El Segundo, California, Office of the Secretary of the Air Force.
 - (i) Project Office at Patrick Air Force Base, Florida, Office of the Secretary of the Air Force.
 - (j) Project Office at Fort Myer, Virginia, Office of the Secretary of the Air Force.
 - (k) Air Force Office of Special Investigations.
 - (l) U.S. Air Force Security Service.
 - (m) Foreign Technology Division, Air Force Systems Command, Wright-Patterson Air Force Base.
 - (n) 1035 Technical Operations Group (Air Force Technical Applications Center), Air Force Systems Command, and subordinate units.
 - (o) 3480 Technical Training Wing, Air Training Command, Goodfellow Air Force Base, Texas.
- 1-207. The Defense Intelligence Agency, Department of Defense.
- 1-208. The Defense Investigative Service, Department of Defense.
- 1-209. The Office of Enforcement and

the Office of Intelligence, including all domestic field offices and intelligence units, of the Drug Enforcement Administration, Department of Justice.

1-210. Offices of the Assistant Secretary for Defense Programs, Department of Energy.

1-211. Offices within the Agency for International Development:

- (a) The Immediate Office of the Auditor General.
- (b) The Office of Inspections and Investigations.
- (c) The Office of Security.
- (d) The Office of the Area Auditor General/Washington.

1-3. *Units outside the 50 States and the District of Columbia.*

1-301. The Drug Enforcement Administration, Department of Justice.

National Science Board

Message to the Congress Transmitting a Report. November 19, 1979

To the Congress of the United States:

I am pleased to submit to the Congress the Eleventh Annual Report of the National Science Board, *Science Indicators—1978*. This report is the fourth in a series examining important aspects of the state of American science and technology.

Science and technology play a vital role in maintaining our Nation's economic well-being and make fundamental contributions toward the solution of many of our social problems. As this report illustrates, the United States continues to rank high internationally in most areas of science.

Science Indicators—1978 also addresses the balance between fundamental or long-term research and shorter-term applied research and development. Proper investment in basic research is crucial to using and maintaining the Nation's scientific and technical talent. My 1980 budget reflects this Administration's desire to increase support of scientific research and development as an investment in the Nation's future.

This report should be of interest to all those concerned with the Nation's scientific effort. I commend *Science Indicators—1978* to the attention of the Congress and those in the scientific endeavor.

JIMMY CARTER

The White House,
November 19, 1979.

NOTE: The report is entitled "Science Indicators 1978—Report of the National Science Board, 1979" (Government Printing Office, 263 pages).

United States Ambassador to Equatorial Guinea

Nomination of Mabel Murphy Smythe.
November 20, 1979

The President today announced that he will nominate Mabel Murphy Smythe, of Newtown, Conn., to be Ambassador Extraordinary and Plenipotentiary of the United States to the Republic of Equatorial Guinea. Smythe is currently Ambassador to the United Republic of Cameroon and would serve concurrently as Ambassador to Equatorial Guinea. Smythe has been Ambassador to Cameroon since 1977.

She was born April 3, 1918, in Montgomery, Ala. She received a B.A. from Mount Holyoke College in 1937, an M.A. from Northwestern University in 1940,

and a Ph. D. from the University of Wisconsin in 1942.

Smythe was an assistant professor at Lincoln University from 1942 to 1945, a professor at Tennessee Agricultural and Industrial State University in 1945–46, and a professor at Brooklyn College in 1946–47. From 1951 to 1953, she was an instructor at Shiga University in Japan.

In 1953 she was deputy director of research for the NAACP Legal Defense and Education Fund. She was an instructor at New Lincoln (High) School from 1954 to 1959 and principal of that school from 1959 to 1969. From 1970 to 1977, she was director of research and publications from the Phelps-Stokes Fund, and from 1972 to 1977, she also served as vice president of the fund.

Smythe has served as a member of the Advisory Commission on International Educational and Cultural Affairs and the Advisory Council on African Affairs at the State Department. She is a consultant and the author of numerous articles and several books.

European Office of the United Nations

*Nomination of Gerald B. Helman To Be the
U.S. Representative.* November 20, 1979

The President today announced that he will nominate Gerald B. Helman, of Ann Arbor, Mich., to be Representative of the United States to the European Office of the United Nations, with the rank of Ambassador. He would replace William vanden Heuvel, who has been transferred to another position. Helman has been Deputy Assistant Secretary of State for International Organization Affairs since 1977.

He was born November 4, 1932, in Detroit, Mich. He received an A.B. (1953) and LL.B. (1956) from the University of Michigan. He practiced law in Michigan in 1956.

In 1956 Helman joined the Foreign Service, and he was posted at the State Department and in Milan, Vienna, and Barbados. From 1968 to 1973, he was counselor for political-military affairs at USNATO in Brussels. In 1973-74 he was a Woodrow Wilson Fellow at Princeton University.

From 1974 to 1976, Helman was Deputy Director of the Office of NATO and Atlantic Political-Military Affairs at the State Department. From 1976 to 1977, he was Director of the Office of United Nations Political Affairs in the Bureau of International Organization Affairs at State.

International Atomic Energy Agency

Nomination of the U.S. Representative and Alternate Representatives to the 23d Session of the General Conference.
November 20, 1979

The President today announced that he will nominate Under Secretary of Energy John M. Deutch to be United States Representative to the 23d session of the General Conference of the International Atomic Energy Agency, to be held in New Delhi, India, from December 4 to 11.

The President also announced that he will nominate Gerard C. Smith and Roger Kirk as Alternate Representatives on this delegation. Smith is U.S. Representative to the International Atomic Energy Agency, Ambassador at Large, and U.S. Special Representative for Non-

Proliferation Matters. Kirk is Deputy Representative of the United States to the International Atomic Energy Agency.

American Hostages in Iran

White House Statement. November 20, 1979

There are reports that the American citizens being illegally held as hostages in Tehran with the support of the Iranian Government might soon be put through some sort of "trial." This would be a flagrant violation of international law and basic religious principles, and the Government of Iran would bear full responsibility for any ensuing consequences. The United States is seeking a peaceful solution to this problem through the U.N. and every other available channel. This is far preferable to the other remedies available to the United States. Such remedies are explicitly recognized in the Charter of the United Nations. The Government of Iran must recognize the gravity of the situation it has created.

Department of Justice

Nomination of Charles B. Renfrew To Be Deputy Attorney General.
November 20, 1979

The President today announced that he will nominate Charles B. Renfrew, of San Francisco, Calif., to be Deputy Attorney General. He would replace Benjamin Civiletti, who has been appointed Attorney General. Renfrew has been a U.S. district judge for the Northern District of California since 1972.

He was born October 31, 1928, in Detroit, Mich. He received an A.B. from Princeton University in 1952 and a J.D.

from the University of Michigan Law School in 1956.

From 1956 to 1972, Renfrew was with the San Francisco firm of Pillsbury, Madison & Sutro, as an associate from 1956 to 1965 and a member from 1965 to 1972.

United States Space Policy

*Announcement of the President's Decisions
Concerning Land Remote-Sensing Activities.
November 20, 1979*

The President today announced the designation of the Commerce Department's National Oceanic and Atmospheric Administration (NOAA) to manage all operational civilian remote-sensing activities from space. This designation is one of several policy decisions announced today after a review of civilian space policy mandated by a Presidential directive in October 1978.

Early in his administration the President directed a comprehensive review of space policy. The review, completed in May 1978, resulted in a Presidential directive that established a national space policy framework. It created a Policy Review Committee on Space, chaired by the Director of the Office of Science and Technology Policy, Frank Press. One of the tasks of the Policy Review Committee has been to assess the Nation's future civil space remote-sensing requirements. That review was the basis for the policy decisions announced today.

Designation of a single agency, NOAA, to manage all civil operational satellite activities will lend itself to further integration and potential cost saving in the future. NOAA's experience in successfully operating and managing three generations of weather satellites prepares it to assume the responsibility for land re-

mote-sensing in addition to its ongoing atmospheric and oceanic activities. NOAA's first action will be to develop a transition plan, in coordination with other appropriate agencies, for moving to a fully integrated satellite-based land remote-sensing program.

Initially, our operational land remote-sensing efforts will rely on experience derived from the LANDSAT program. LANDSAT was begun in 1972 by the National Aeronautics and Space Administration (NASA) as a satellite effort specifically designed to observe surface features of the Earth.

The President's decision establishes a three-part framework to serve remote-sensing activities:

- Integration of civilian operational activities under NOAA;
- Joint or coordinated civil/military activities where both parties' objectives can be best met through this approach;
- Separate defense activities which have no civilian counterpart.

Other space policy decisions developed by this review and announced today are:

—The Commerce Department will seek ways to further private sector opportunities in civil land remote-sensing activities, through joint ventures with industry, a quasi-government corporation, leasing, etc., with the goal of eventual operation of these activities by the private sector.

—We will continue the policy of providing LANDSAT data to foreign users and promoting development of complementary and cooperative nationally operated satellite systems so as to increase benefits for all nations.

—The Department of Commerce will establish and chair a Program Board for continuing Federal coordination and regulation of civil remote-sensing activities. The involved Federal organizations will

be represented (i.e., the Departments of Defense, Interior, Agriculture, State, Transportation, and Energy, and NASA, the Central Intelligence Agency, the Agency for International Development, and the Environmental Protection Agency). The National Governors' Association and the National Conference of State Legislatures will be invited to participate.

—Separate weather programs for the military and civil sectors will be maintained under the Departments of Defense and Commerce, because of their differing needs. We will continue procurement of current spacecraft until development of a new system design is justified. Future polar-orbiting satellite development and procurement will be jointly undertaken by Defense, Commerce, and NASA to maximize technology-sharing and minimize cost.

—Ocean observations from space can meet common civil and military data requirements. Accordingly, if we decide to develop ocean satellites, joint Defense/Commerce/NASA management of the program will be pursued.

Death of Steven J. Crowley

Statement by the President.
November 21, 1979

Marine Corporal Steven J. Crowley's death is a tragic loss and a stark reminder of the dangers the men and women of our Armed Forces face in the service of their Nation.

On behalf of all Americans, I extend

my heartfelt sympathy to Steven Crowley's family and to the U.S. Marine Corps.

NOTE: Corporal Crowley, of Port Jefferson, N.Y., was killed during a mob attack on the American Embassy in Islamabad, Pakistan.

Aid for Ugandan Refugees

Memorandum From the President.
November 19, 1979

Memorandum for the Secretary of State
Subject: Determination pursuant to Section 2(c)(1) of the Migration and Refugee Assistance Act of 1962, as amended, (the "Act") authorizing the use of \$1 million of funds made available from the United States Emergency Refugee and Migration Assistance Fund

In order to respond to a special appeal by the United Nations High Commissioner for Refugees on behalf of refugees and displaced persons in Uganda, I hereby determine, pursuant to Section 2(c)(1) of the Act; that it is important to the national interest that up to \$1 million from the United States Emergency Refugee and Migration Assistance Fund be made available through the Department of State for transfer to the United Nations High Commissioner for Refugees.

The Secretary of State is requested to inform the appropriate committee of the Congress of this Determination and the obligation of funds under this authority.

This Determination shall be published in the **FEDERAL REGISTER**.

JIMMY CARTER

NOTE: The memorandum was announced on November 21.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

November 17

The President met at the White House with Zbigniew Brzezinski, Assistant to the President for National Security Affairs.

The President left the White House to spend the Thanksgiving holiday at Camp David, Md.

November 19

The President transmitted to the Congress the 1978 annual report of the National Cancer Advisory Board.

November 20

In the afternoon, the President returned to the White House from Camp David to discuss with his advisers the situation concerning the American hostages in Iran. Following the meeting, the President returned to Camp David.

November 21

The White House announced that the President telephoned Gen. Mohammad Zia-ul-Haq, President of Pakistan, to express his concern for ensuring the continued safety of Americans in Islamabad. The President also expressed the appreciation of the American Government for the action on the part of the Pakistani military to rescue the American Embassy staff besieged during a mob attack on the Embassy in Islamabad.

November 23

The President met with his foreign policy advisers at Camp David.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted November 20, 1979

WILLIAM GARTON BOWDLER, of Florida, a Foreign Service officer of the Class of Career Minister, to be an Assistant Secretary of State.

GERALD BERNARD HELMAN, of Michigan, a Foreign Service officer of Class one, to be the Representative of the United States of America to the European Office of the United Nations, with the rank of Ambassador.

MABEL MURPHY SMYTHE, of Connecticut, now Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Cameroon, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Equatorial Guinea.

The following-named persons to be the Representative and Alternate Representatives of the United States of America to the Twenty-third Session of the General Conference of the International Atomic Energy Agency:

Representative:

JOHN M. DEUTCH, of Massachusetts

Alternate Representatives:

GERARD C. SMITH, of the District of Columbia

ROGER KIRK, of the District of Columbia

CHECKLIST OF WHITE HOUSE PRESS RELEASES

All releases of the White House Press Office have been included in this issue.

Administration of Jimmy Carter, 1979

**ACTS APPROVED BY
THE PRESIDENT**

Approved November 17, 1979

S. 1037----- Public Law 96-122
District of Columbia Retirement Reform
Act.

Approved November 20, 1979

H.J. Res. 440----- Public Law 96-123
A joint resolution making further continuing
appropriations for the fiscal year 1980, and
for other purposes.

H.R. 5811-----Public Law 96-124
An act to allow the Interest Rate Modifica-
tion Act of 1979, passed by the Council of the
District of Columbia, to take effect immedi-
ately.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, November 30, 1979

National Child Abuse Prevention Month, 1979

Proclamation 4704. November 26, 1979

*By the President of the United States
of America*

A Proclamation

America's children are our most precious resource, and in this final month of the International Year of the Child I urge all Americans to consider what they can do to prevent child abuse and neglect.

The needs of children are best met in families where provisions can be made for the special needs and limitations of all family members. Even loving parents sometimes fail to provide adequate supervision, or find themselves in situations where needs are not met or emotions are difficult to control.

I urge communities and helping organizations to work with families to alleviate conditions that result in the abuse and neglect of children. I especially urge all those who feel unable to cope with problems to seek out help.

Our Nation's children are our Nation's future. We all share in the responsibility for making sure they grow up in a healthful environment. I appeal to public agencies, private organizations and the business community to support needed social,

educational and health services in their communities to strengthen families during the critical child-rearing years.

Working together, with sensitivity and concern, we can reduce the incidence and lifelong damage of child abuse.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim the month of December, 1979, as National Child Abuse Prevention Month.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of November, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

Office of Personnel Management

*Nomination of J. Jackson Walter To Be
Director of the Office of Government
Ethics. November 26, 1979*

The President today announced that he will nominate J. Jackson Walter, of Tallahassee, Fla., to be Director of the Office of Government Ethics, a new position.

Walter is currently at the Office of Government Ethics and was previously

assistant secretary of the Florida Department of Labor and Employment Security.

He was born November 6, 1940, in Abington, Pa. He received an A.B. from Amherst College in 1962 and an LL.B. from Yale Law School in 1966.

From 1970 to 1976, Walter practiced law, concentrating on land development and regulatory matters. From 1976 to 1978, he was executive director of the Florida Department of Business Regulation. From 1978 to 1979, he was secretary of that department.

President's Management Improvement Council

Appointment of Richard C. Leone as a Member. November 26, 1979

The President today announced the appointment of Richard C. Leone, of Princeton, N.J., to be a member of the President's Management Improvement Council.

Leone, 39, is a consultant and writer on financial and economic affairs and public policy. He is author of a forthcoming book, "Financing Government in the United States," and serves as an adviser on financial management and economic development to the U.S. Conference of Mayors.

Iranian Aliens

Executive Order 12172. November 26, 1979

DELEGATION OF AUTHORITY WITH RESPECT TO ENTRY OF CERTAIN ALIENS INTO THE UNITED STATES

By virtue of the authority vested in me as President by the Constitution and laws of the United States, including the Immi-

gration and Nationality Act, as amended, 8 USC 1185 and 3 USC 301, it is hereby ordered as follows:

SECTION 1-101. Delegation of Authority. The Secretary of State and the Attorney General are hereby designated and empowered to exercise in respect of Iranians holding nonimmigrant visas, the authority conferred upon the President by section 215(a)(1) of the Act of June 27, 1952 (8 USC 1185), to prescribe limitations and exceptions on the rules and regulations governing the entry of aliens into the United States.

SEC. 1-102. Effective Date. This order is effective immediately.

Department of the Interior and Related Agencies Appropriations Bill

Remarks on Signing H.R. 4930 Into Law. November 27, 1979

THE PRESIDENT. This morning we are gathered here to sign into law the Interior appropriations bill, which has a special significance above and beyond its meeting the needs of the Interior Department. It does provide the first budgetary commitment to the long-range evolution of synthetic fuels, but I think of even more personal importance, this bill, for the first time, will provide real help for the poor and the elderly people of our Nation in meeting the rapidly increasing costs of energy.

We have already distributed to the States \$250 million to help the poor and the elderly meet their increasingly high

energy bills—\$250 million. This bill will provide an additional \$1,350 million, a total of \$1.6 billion this winter. We will expedite the distribution of these funds, and I want to congratulate the Congress on taking this action in a rapid and effective way.

I've asked the Congress, from the windfall profits tax, to provide, on a permanent basis for the next 10 years, \$2.4 billion each year to help the poor and the elderly to meet their rising energy bills.

The last 3 weeks have been a trying time in the history of our country. It has been made vividly obvious to everyone in the United States that our Nation is overly dependent on the import of foreign oil. In 1980 it's estimated that we will purchase from foreign countries 3 billion barrels of oil. In order to pay for this, we'll send overseas \$70 billion of American money. Along with oil that we import, we also import inflation and unemployment.

In July, after the Iranian revolution had interrupted for a few months our own supply of imported oil, I went to the American people for the sixth time since my inauguration as President and called on the Congress to take rapid action on five different elements of meeting our energy needs: First was an appeal to the Congress to give me full authority to implement a gasoline rationing plan when and if it's needed; second was an appeal to provide low-income assistance for energy cost increases for the poor and the elderly, which I will sign into law in just a few minutes; third was to pass a windfall profits tax, to provide for the well-being of the American public, and to derive this income, which is needed, from the unearned profits of the oil companies of this country.

The House has passed an adequate windfall profits tax bill. The Senate is now in the process of debating this bill on the floor and will be voting on a series of

amendments. I hope the strongest possible windfall profits tax will be forthcoming from the Congress.

The House and the Senate have acted on the energy mobilization board, legislation which will permit us to expedite decisions on projects that will provide better energy production in our country. The differences between the two Houses must now be resolved in conference.

And the fifth request that I made to the Congress was to implement for us an ability to proceed rapidly with the development of synthetic fuels, solar energy, including gasohol, and strong conservation matters. This legislation has now been passed in its entirety by the Senate. It's been passed partially by the House, and my hope is that this action can now be completed by both Houses and signed into law.

Any delay in implementing this complete package of energy proposals will be a deep disappointment to the American people. Time is of the essence, and I can say from the bottom of my heart as President that it involves the security of our Nation. Failure to pass adequate energy legislation to reduce our dependence on foreign oil is a clear and present danger to the security of the United States.

We stand here as a sober and determined group, the President and the key Members of Congress. We are working as hard as we can to meet the energy needs of our country. There are only two actions which we can take to resolve this difficulty: One is to enhance conservation, the saving of energy, the elimination of waste of energy; and on the other hand, the increased production of energy in our own country.

This is a complicated and difficult matter, but I want to congratulate again the Members of the House and Senate for the action that they've already taken and to encourage them to join in with me in an

expeditious action on the remaining three items that are so crucial to our Nation.

I'd like now to call on Senator Robert Byrd to say a word representing the Senate, if he will, and then I'll call on the representative of the House and then one of our fine Governors, who will help to administer this program for the poor and the elderly. And then I'll sign the legislation.

Senator Byrd?

SENATOR BYRD. Mr. President, the legislation that you are about to sign represents a commitment on the part of the Congress with respect to a comprehensive synfuels program. It also represents a commitment on the part of the Congress to aid the elderly and the poor in the face of rising energy costs.

I would only want to pay special tribute, Mr. President, to Senator Javits, who is the author of the amendment in the Senate to add \$1.2 billion in aid to the elderly and to the poor. I also want to express my deep appreciation to Ted Stevens, who is the ranking minority member on the Senate appropriations subcommittee for the Department of the Interior. And also, I want to thank Dee Huddleston, who acted as chairman of the subcommittee. And certainly I would want to express my heartfelt gratitude to Sid Yates, Congressman Yates, who is chairman of the House conferees, because without the cooperation and the understanding that marked the conference, we would not have been able to send to your desk a bill for you to sign.

You're very right in saying that in the face of world developments, we have to do something and do it expeditiously, to deal with our reliance on unreliable sources of foreign oil. The Senate has passed an energy mobilization board bill. It has passed an omnibus energy bill, establishing an energy security corporation. And in that legislation, of course, is included

conservation provisions; a synthetic fuels program provision is in that bill. And we now are in the process of getting conferees appointed so that these Senate and House conferees, once they're named, can meet in conference to iron out the areas of differences.

So, we're working. And I assure you that we're going to do all that we can to get those conference reports back to each House as soon as possible—and that won't be easy, as we have seen in the past. I've never seen anything so contentious as the subject of energy when it reaches the Senate floor.

THE PRESIDENT. I've noticed that. [Laughter]

SENATOR BYRD. And if I were to take off my jacket and my shirt, I could show you some scars—[laughter]—that you may remember were inflicted upon me when I helped to break the spirit of a filibuster a couple of years ago.

But in any event, we applaud you for your leadership in this vital area, and we're going to do the best we can in the Senate to do our part.

Thank you very much for inviting us.

THE PRESIDENT. Thank you very much, Bob.

I met earlier this morning with the Speaker of the House, who had to go back to the Hill to get the House work under-way today. And of course, Jamie Whitten, who's the chairman of the appropriations committee, has worked in a yeoman's way to get this legislation to my desk. Many others have been involved. I'd like to call on Congressman Natcher, however, to speak for the House at this time.

REPRESENTATIVE NATCHER. Thank you very much, Mr. President.

As you will recall, on the House side we started with a House joint resolution. This is important legislation, and legislation which, of course, will be a milestone in programs where we have people in need

and people that are suffering. We passed this bill, Mr. President, in the House by 185 majority, and as you know, that's quite a feat. Ordinarily in the House, legislation like this will pass with a vote 20 or 30 majority, but we passed it on a vote of 185 majority.

We succeeded through the efforts of Sid Yates, my chairman, Jamie Whitten of Mississippi, and the appropriations committee, permitting this legislation to go through on the Senate Interior appropriation bill. This is the way it should have happened; it expedited the legislation. And, Mr. President, we are now down to the point where you are signing. And I want to commend you and to say thank you for presenting to the Congress this legislation.

Thank you very much.

THE PRESIDENT. Thank you very much, Congressman Natcher.

Perhaps more than—certainly more than most payments that will go out to people who are urgently in need, the Governors of this country are deeply involved. They've helped to draft the legislation; they've helped to administer the programs that are already in existence; they've already received the \$250 million that has been disbursed; and they will be playing a major role in the rapid disbursement of these funds to the poor and the elderly. And I've asked Governor Ella Grasso of Connecticut to say a word for the Governors.

GOVERNOR GRASSO. Thank you, Mr. President.

I think that you have shown us one more time that a majority is one who truly believes. And I want to thank you for your insistence and your determination and your leadership in making the fulfillment of this very real need of crisis intervention moneys a reality. And I congratulate the Members of Congress, as well, for

moving with such dispatch to be of help: help to needy families, help to the working poor, and help to the elderly.

The enactment of this legislation, in a very real sense, changes a season of concern into a winter of new hope, and for that, Mr. President, we are most grateful. And we join with you in a continuing pledge of conservation, so that our resources may be fully and properly utilized and we may reach that day, under your leadership, of true energy independence.

Thank you.

THE PRESIDENT. Thank you very much.

If anyone has the uncontrollable urge to speak—[laughter]—otherwise, I will proceed to sign the bill.

[At this point, the President signed the bill.]

Thank you very much, everyone.

NOTE: The President spoke at 9:30 a.m. at the ceremony in the Cabinet Room at the White House.

As enacted, H.R. 4930 is Public Law 96-126, approved November 27.

Jobs for the Hardcore Unemployed

*Announcement of Administration Programs.
November 27, 1979*

The White House announced today that, for the first time, five Federal agencies and departments have agreed to fill a specific percentage of the jobs created by their economic development programs with the hardcore unemployed. Under these agreements reached through the White House Interagency Coordinating Council, headed by Presidential Assistant Jack Watson, approximately 80,000 permanent, private sector jobs will be made available to the unemployed through economic development projects funded in FY 1980.

The five agencies entering into this agreement with the Department of Labor (DOL) are: the Economic Development Administration (EDA), the Community Services Administration (CSA), the Department of Transportation (DOT), the Department of Housing and Urban Development (HUD), and the Farmers Home Administration (FmHA). Their efforts to direct a greater number of jobs created by Federal economic development programs to the hardcore unemployed are central to the employment initiatives announced by the White House last April. These initiatives are among the President's administrative actions aimed at the persistent problem of high unemployment in both rural and urban areas.

Programs covered by the agreements include HUD's \$675 million Urban Development Action Grant program, for which a 10-percent employment goal has been established; EDA's proposed \$3 billion (including \$1.8 billion in loan guarantees) public works and business development activities, with a 10- to 15-percent goal; the Urban Mass Transportation Administration's new \$200 million (\$80 million appropriated by Congress) Urban Initiatives program, with a 10- to 15-percent goal; CSA's \$35 million title VII program, with a 25-percent goal; and FmHA's \$1.2 billion Business and Industrial Loan program, with a 20-percent goal.

In addition to the 80,000 private sector jobs that will result from this agreement, approximately 100,000 private sector jobs will be made available to the hardcore unemployed under the new Private Sector Initiatives program of the recently re-enacted Comprehensive Employment and Training Act. This effort is also consistent with the President's goals of targeting Federal resources to those with the greatest need and utilizing existing programs and resources more effectively.

The White House also announced that 14 local jurisdictions will receive 2-year grants, under the Targeted Jobs Demonstration program, to link already funded economic development projects with Federal employment and training efforts. The demonstration program is another component of the President's Employment Initiatives. Funded at \$3 million, the demonstration program is an interagency effort involving DOL, HUD, EDA, CSA, DOT, and the Small Business Administration.

Fund recipients under the program are Portland, Oreg., Buffalo, N.Y., New York City, Seattle, Wash., Browning, Mont., San Antonio, Tex., Metcalfe, Miss., Portland, Maine, Wilmington, Del., Milwaukee, Wis., Paterson, N.J., Lynn, Mass., Genesee County, Mich., and Philadelphia, Pa. Each recipient is to develop practical and effective strategies for placing the hardcore unemployed in the greatest feasible number of jobs created by Federal economic development and transit-related activities. Techniques will be explored to ensure that a maximum number of the business opportunities which result from economic development and transit projects go to small, minority, and community businesses. An interagency work group will monitor the demonstration effort, and HUD has lead administrative responsibility.

Interagency Committee on Emergency Medical Services

*Appointment of Two Members.
November 27, 1979*

The President today announced the appointment of two persons as members of the Interagency Committee on Emergency Medical Services. They are:

ALLEN JOSEPH HERBERT, a Ruston, La., physician in family practice and clinical assistant professor of family medicine and pediatrics at Louisiana State University School of Medicine;

MARVIN J. MOORE, of Fort Worth, Tex., community relations director for Trinity Emergency Medical Services, a system serving eight counties. He is a freelance broadcaster and producer and is active in community affairs.

President's Advisory Committee for Women

Appointment of Freddie Lang Groomes as a Member. November 27, 1979

The President today announced the appointment of Freddie Lang Groomes as a member of the President's Advisory Committee for Women.

Groomes is assistant to the president, director of university human affairs, and assistant professor of counseling and human systems at Florida State University. She was a member of the Florida Governor's Commission on the Status of Women from 1973 to 1978 and chaired the commission from 1977 to 1978. She is national president of the American Association for Affirmative Action.

Personal Representative of the President

Nomination of Sol M. Linowitz for the Rank of Ambassador While Serving in the Position. November 27, 1979

The President today nominated Sol M. Linowitz for the rank of Ambassador while he serves as Personal Representative of the President.

Linowitz replaces Robert S. Strauss, who has resigned as Personal Representa-

tive of the President, effective November 29, 1979.

Miami Conference on the Caribbean

Remarks by Videotape to the Conference in Miami, Florida. November 26, 1979

Good evening.

Even though I cannot be with you in person this evening, I want to use this conference to reaffirm my commitment and that of the United States to economic development and democracy in the Caribbean. We ourselves are part of the Caribbean community, and we know that development and democracy are key to realizing the strength of the region and meeting its challenges.

The Caribbean today is passing through a time of rapid change, and our mutual challenge is to steer a course economically, socially, and politically that will lead to a better life for all our people.

Twenty years ago only three island nations in the Caribbean were independent. Today there are 13 such sovereign nations, and that number is likely to increase by as many as 5 in the next few years. Behind these numbers is a stirring history. Its beginning was an unpleasant story, marked by lonely struggles against slavery, colonialism, and, too often, indifference by the outside world. But the drive of the Caribbean peoples toward freedom and modern development is primarily a proud story, one of courage, imagination, and determination in the face of hardship.

Today, however, with independence largely won, the Caribbean still faces many problems. Perhaps the most serious problems are economic. Spiraling oil prices, unstable commodity markets, uneven growth, inflation, and unemploy-

ment are certainly not unique to the Caribbean. But these global trends have struck the small countries of the Caribbean with special severity. They add a major burden to the always imposing challenge of the building and development of independent nations. And economic deprivation creates vulnerabilities to extremism and to foreign intervention.

In facing these problems, the Caribbean has some significant advantages. In addition to its beauty and climate, vigorous political institutions and talented human resources provide special opportunities. From the resurgent social democracy of the Dominican Republic to the established parliamentary traditions of some English-speaking peoples, free institutions have fostered development within a stable framework.

The awarding of this year's Nobel Prize to the distinguished development economist, W. Arthur Lewis from Trinidad,¹ exemplifies the achievements and contributions of the island's peoples.

Citizens of the United States and the Caribbean stand together with a common pride in our achievement. We stand for the rights of people to be free of oppression, free from arbitrary abuse, and free to participate in a nation's political life.

These rights of freedom are precious. Whatever the claimed justification, we will not be silent when these rights are abused. We stand with those who are genuinely committed to economic development. We stand with those who espouse social justice and human rights and who work to translate them from abstract goals into real programs. We stand with those who are genuinely committed to international relations based on mutual respect.

As President, I've sought consistently to implement these principles and to

strengthen relations in the nation and in the region. We negotiated canal treaties with Panama, in keeping with our determination to forge new and better relationships with developing countries. We've worked with 30 countries and 15 international institutions to establish a Caribbean group which has expanded and coordinated the flow of aid to the region and will support efforts in the future to design, fund, and implement regionally integrated development activities.

My administration has increased direct economic assistance to the Caribbean, nearly doubling bilateral aid obligations over the past 2 years. As actual disbursements reflect these increases, we will be contributing more than ever before to generate employment and to help basic human needs. This is particularly true for the newly independent countries of the eastern Caribbean.

We've come rapidly to the assistance of countries like the Dominican Republic and Dominica, friends in need of emergency aid to rebound from natural disasters. We've repeatedly shown our eagerness to support political freedom and democratic processes. But such governmental action, no matter how important, is still not enough. And that's why your meeting is so important.

The United States has vast untapped resources of technology, skills, and good will. I will use my office and my influence to help mobilize the people of the United States to work with the people of the Caribbean for common goals, social and economic development, and democracy.

In the United States, our universities, our agricultural and labor organizations, business and industry, churches and other benevolent institutions, State and local governments, and individual private citizens can all play a vital role in estab-

¹ Sir Arthur is a native of Saint Lucia.

lishing mutually advantageous relationships with our friends in the Caribbean. We can all benefit from improvements in education, agriculture, tourism, industry, trade, health, transportation, employment opportunities, and personal friendships among our people.

The answers for the future are in the Caribbean's own talents and traditions, not in the false promises of foreign models. Solutions will not emerge by blaming our problems on our own friends. To seek freedom, justice, independence, and a better life, one needs to work closely with those who genuinely share the goals of development and democracy. I hope that all the other basin States of Venezuela and Colombia, Mexico and Central America, will play a vigorous role in this effort.

The Caribbean group is an excellent example of the benefits of a multilateral effort. Closer cooperation between the Caribbean community and the Central American Common Market and, perhaps also, the Andean Pact could be another step toward greater progress. Like the Caribbean, Central America is experiencing a period of profound change. Unlike the Caribbean, where nations are struggling to defend democratic institutions while they modernize, many of the nations of Central America are seeking to develop democratic institutions which had not previously existed. Nevertheless, both regions have much in common and also much to learn from each other.

Few societies can more genuinely speak of a common destiny than ours, for the United States and the Caribbean, the ties of history and geography are continuously renewed by what can only be described as one of the most intense people-to-people relationships in the world today. It's a relationship filled with exciting possibilities that are waiting to be

explored. As leaders and molders of opinion, we have a special responsibility to build understanding, to defend the region's democratic institutions, and to promote development of social and economic justice.

On behalf of the United States, I pledge our continuing respect and support for all these efforts.

Thank you very much.

NOTE: The President spoke at 2:15 p.m. in the Cabinet Room at the White House. His remarks were videotaped for use at the conference on November 28.

The transcript of the remarks was released on November 28.

Diplomatic Relations

*Remarks on Receiving Diplomatic Credentials
From Foreign Ambassadors.
November 28, 1979*

This morning I have received the credentials of the Ambassadors of several nations. This is a very important and a very solemn occasion for me whenever I have this opportunity. There is a vivid reminder in this ceremony of the importance of diplomatic relationships.

In looking down this row of representatives, who are quite distinguished in their own right, the differences among us are apparent. We represent countries with different backgrounds, different political systems, different customs, heritage, commitments, goals, opportunities, different levels of income, different alliances with widely varying countries. The only way to bridge the inherent gaps between countries and to maintain peace and proper relationships is through the honoring of the integrity of diplomatic immunity.

It's extremely important that mob violence be controlled and that international terrorism not be permitted to reign. All

countries are afflicted at times with mob violence and terrorism. The tragedy of the occurrences in Iran is that in a departure from accepted custom and tradition down through the centuries, in this instance the Government itself has both condoned and encouraged the seizure of an American Embassy and our personnel through mob violence and through terrorism.

The inviolability of embassies is absolutely indispensable in easing tensions and resolving problems that exist among nations and in searching for a common ground of peace and communication among people. This is vital to every country. It's particularly vital to those countries who are small and who are weak and who do not have military power or economic power to exert in defending one's own institutions and one's own rights.

In this principle, the attitude of our own country, our efforts to have our hostages released and to restore the integrity of our diplomatic institutions, is an effort not only for the rights and benefits of the United States but for the rights and benefits of all nations.

Some of the countries represented here, almost all of them, have strongly supported the condemnation of the Iranian Government's actions in seizing our Embassy and holding our hostages captive. We need the help of all countries. The rule of law is only as strong as the efforts of those who are committed to defend it. We are very grateful for the help of those nations who have joined us in this effort.

The harming of innocent people is condemned by every law of mankind and by every law of God, no matter what religious principles or economic or political principles prevail in a country. We are determined to work as peacefully as possible to achieve the release of our hos-

tages as early as we possibly can and, of course, commensurate with that, to defend and to protect the unchanging principles on which our Nation and other nations are founded.

My hope is that all countries represented here and those others who have representatives in our Capital City will join with us in bringing a quick and peaceful resolution to the problem which afflicts not only the United States but all countries.

Again, all of the diplomats here are welcome. I'm very grateful that you've brought your families with you, and we are also honored to have your presence here in Washington. Good luck to all of you.

Thank you very much.

NOTE: The President spoke at 11:58 a.m. in the Oval Office, where he received diplomatic credentials from Ambassadors Rafael Solis Cerda of Nicaragua, Redha Malek of Algeria, Nicholas F. Parkinson of Australia, Ricardo Midence Soto of Honduras, Budimir Loncar of Yugoslavia, and Peter Hermes of the Federal Republic of Germany.

The Cyprus Conflict

Letter to the Speaker of the House and the Chairman of the Senate Foreign Relations Committee. November 28, 1979

Dear Mr. Speaker: (Dear Mr. Chairman:)

In accordance with the provisions of Public Law 95-384, I am submitting the following report on progress made during the past 60 days toward the conclusion of a negotiated solution of the Cyprus problem.

In my last Cyprus report to the Congress, dated September 25, I noted that the recess in the intercommunal talks continues despite persistent and intensive

efforts by UN Secretary General Waldheim and his staff to bring the two parties back to the conference table. I regret to report that in the intervening 60 days these efforts have still not borne fruit.

The United States shares the view that only sustained intercommunal talks can lead to a just and lasting settlement of the Cyprus problem. We believe that the continuing good-offices efforts of the Secretary General are the most promising way to achieve a serious negotiation. I am pleased that our November 1978 proposals provided impetus for the current UN initiative. We have strongly supported that initiative since it began, and we shall continue to do so. In part due to our support, the Secretary General and his staff are making progress toward finding a formula on the basis of which the talks might resume.

The current session of the UN General Assembly is creating opportunities to explore avenues of progress on the Cyprus question. Secretary Vance had meetings with President Kyprianou in New York on September 26 and October 4. Other U.S. officials are in contact with principals in the Cyprus dispute, and with interested third parties, to prepare for the General Assembly debate on Cyprus. We hope that after the General Assembly completes its discussion of Cyprus, both sides will find it possible to resume the intercommunal negotiations. It is essential that they not allow the quest for short-term advantage to erode their mutual objective of finding a settlement which meets the basic needs of all people on the island.

The long and tortuous history of the Cyprus problem demonstrates that peaceful progress has never been easy. The obstacles, while formidable, are not insurmountable. We continue to believe that progress is achievable, and we are vigorously seeking it. Toward that end, we

remain in close touch with all parties to the Cyprus dispute, the United Nations, our European allies, and other states which have a legitimate role to play and which desire to contribute to the achievement of our common goal.

Sincerely,

JIMMY CARTER

NOTE: This is the text of identical letters addressed to Thomas P. O'Neill, Jr., Speaker of the House of Representatives, and Frank Church, chairman of the Senate Foreign Relations Committee.

Milk Price Support Bill

*Statement on Signing H.R. 4167 Into Law.
November 28, 1979*

I have today signed H.R. 4167, which will support milk prices at between 80 and 90 percent of parity for the next 2 years. This is the latest in a series of important steps my administration has taken to ensure that dairy farmers have the economic incentive they need to produce ample supplies of milk and thereby reduce inflationary pressure.

For most of the last 2 years, supplies of dairy products have been tight and prices high, at least partly as a result of decisions made before this administration came into office that held returns to dairy farmers to very low levels. The result was a cutback in dairy herds, which made it impossible for the industry to respond to strengthened economic incentives in 1977 and 1978. The industry has now overcome the effects of these low returns, and we can expect good production this year and next.

There is currently some concern that milk production could exceed demand sometime during the next 2 years. It may become necessary to give the Secretary of

Agriculture authority to adjust the future rate of increase in support levels should supplies become excessive.

I recognize that the dairy outlook is unusually uncertain this year. Secretary Bergland has been in constant touch with key Members of Congress and with leaders of the dairy industry throughout the development of this legislation. They have assured the Secretary that they will work with the Department of Agriculture to monitor dairy developments and to seek legislative action if it appears government stocks will reach excessive levels.

I am pleased with this administration's record of support for sound dairy programs. Our dairy programs work and work well, because they serve both producers and consumers. With this law, we will be continuing this important effort for another 2 years.

NOTE: As enacted, H.R. 4167 is Public Law 96-127, approved November 28.

United States-United Kingdom Agreement on Atomic Energy for Mutual Defense Purposes

*Message to the Congress Transmitting an Amendment to the Agreement.
November 28, 1979*

To the Congress of the United States:

I am pleased to transmit to the Congress, pursuant to Section 123d of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2153), the text of an amendment to the Agreement Between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland for Cooperation on the Uses of Atomic Energy for Mutual Defense Purposes of July 3, 1958, as amended, and my written approval, authorization and

determination concerning the agreement. The joint classified and unclassified memoranda submitted to me by the Secretaries of Energy and Defense which provide a summary analysis of the amendment are also enclosed.

The amendment extends for five years (until December 31, 1984) those provisions which permit the transfer of non-nuclear parts, source, by-product special nuclear material and other material for nuclear weapons and special nuclear material for fueling military propulsion reactors.

In my judgement, the proposed amendment meets all statutory requirements. The United Kingdom intends to continue to maintain viable nuclear forces. In light of our previous close cooperation and the fact that the United Kingdom has committed its nuclear forces to NATO, I have concluded that it is in our security interest to continue to assist them in maintaining a credible nuclear force.

I have approved the amendment and authorized its execution and urge the Congress give it favorable consideration.

JIMMY CARTER

The White House,
November 28, 1979.

United States-United Kingdom Agreement on Atomic Energy for Mutual Defense Purposes

*Memorandum From the President.
November 28, 1979*

Memorandum for the Secretary of Defense, the Secretary of Energy

Subject: Proposed Amendment to the US-UK Agreement for Cooperation on the Uses of Atomic Energy for Mutual Defense Purposes

I have reviewed your joint letter to me of November 2, 1979, recommending approval of a proposed Amendment to the Agreement Between the Government of the United States of America and the Government of the United Kingdom for Cooperation on the Uses of Atomic Energy for Mutual Defense Purposes. I note from your joint recommendation that the United Kingdom is participating with the United States pursuant to an international agreement by substantial and material contributions to the mutual defense and security. The proposed Amendment will permit cooperation which will further improve our mutual defense posture and be in support of NATO.

I hereby:

- approve the program outlined in the proposed Amendment to the 1958 Agreement;
- determine that cooperation under the proposed Amendment will promote and will not constitute an unreasonable risk to the common defense and security; and
- authorize the execution of the proposed Amendment for the Government of the United States in a manner specified by the Secretary of State.

JIMMY CARTER

Veterans' Disability Compensation and Survivors' Benefits Amendments of 1979

*Statement on Signing H.R. 2282 Into Law.
November 28, 1979*

It is a great pleasure to sign into law H.R. 2282, the Veterans' Disability Compensation and Survivors' Benefits Amendments of 1979. This bill increases by 9.9 percent the rates of compensation for

service-disabled veterans and their survivors.

Benefits to disabled veterans and their survivors are a reflection of our deep gratitude to those men and women injured or killed in the service of their country. My administration has consistently supported periodic increases in benefits for them as the cost of living rises. In keeping with that policy I have recommended and the Congress has enacted increased compensation each year since I took office.

My budget last January proposed an increase in compensation benefits, effective this fiscal year. I am pleased that H.R. 2282 accomplishes this by substantially increasing benefits for about 2½ million service-disabled veterans and their survivors, retroactive to October 1, 1979.

NOTE: As enacted, H.R. 2282 is Public Law 96-128, approved November 28.

Department of Defense

*Nomination of Togo D. West, Jr., To Be
General Counsel. November 28, 1979*

The President today announced that he will nominate Togo D. West, Jr., of Washington, D.C., to be General Counsel of the Department of Defense. He would replace Deanne Siemer, who has resigned. West has been Special Assistant to the Secretary of Defense since earlier this year.

He was born June 21, 1942, in Winston-Salem, N.C. He received a B.S.E.E. (1965) and a J.D. (1968) from Howard University.

West was a law clerk with the firm of Covington & Burling in 1967 and 1968 and was law clerk to Judge Harold R. Tyler of the U.S. District Court for the

Southern District of New York in 1968 and 1969. He was a judge advocate in the Military Justice Division of the U.S. Army in 1969 and 1970.

From 1970 to 1973, West was attorney-adviser to the Assistant Secretary of the Army for Manpower and Reserve Affairs. He was an associate with Covington & Burling from 1973 to 1975 and in 1976 and 1977. From 1975 to 1976, he was Associate Deputy Attorney General. From 1977 to 1979, he was General Counsel to the Department of the Navy.

National Labor Relations Board

Nomination of William A. Lubbers To Be General Counsel. November 28, 1979

The President today announced that he will nominate William A. Lubbers, of Bethesda, Md., to be General Counsel of the National Labor Relations Board (NLRB). He would replace John Irving, who has resigned. Lubbers has been with the NLRB since 1952 and has served as Executive Secretary since 1978.

He was born September 21, 1924, in Cedar Grove, Wis. He received a B.A. from the University of Wisconsin in 1948 and an LL.B. from the University of Wisconsin Law School in 1950. He served in the U.S. Army from 1943 to 1945.

In 1950 Lubbers was an organizer with the American Federation of State, County & Municipal Employees, and from 1951 to 1952, he was with the Wage Stabilization Board, in the Office of Case Analysis, then the Office of the General Counsel.

Lubbers joined the NLRB in 1951 as staff counsel on the staff of member Abe Murdock. From 1957 to 1977, he was on the staff of member John H. Fanning, as staff counsel, supervisory staff counsel,

and Deputy Chief Counsel. From 1977 to 1978, he was Solicitor of the NLRB.

United States International Trade Commission

Nomination of Michael J. Calhoun To Be a Member. November 28, 1979

The President today announced that he will nominate Michael J. Calhoun, of Washington, D.C., to be a member of the United States International Trade Commission for a term expiring December 16, 1988. He would replace Joseph Parker, whose term is expiring. Calhoun has been assistant minority counsel for international trade of the House Ways and Means Committee since 1976.

He was born November 11, 1947, in Columbia, S.C. He received a B.A. from Princeton University in 1970 and a J.D. from Harvard Law School in 1974. He took a postgraduate law program in international economics at the London School of Economics in 1975.

From 1974 to 1976, Calhoun was an associate with the Washington law firm of Covington & Burling.

United States International Trade Commission

Nomination of Robert E. Baldwin To Be a Member. November 28, 1979

The President today announced that he will nominate Robert E. Baldwin, of Madison, Wis., to be a member of the United States International Trade Commission for a term expiring June 16, 1981. He would replace Italo Ablondi, who has resigned. Baldwin has been a consultant to the World Bank in Washington, D.C.,

since 1978 and is a former chairman of the economic department at the University of Wisconsin.

He was born July 12, 1924, in Niagara Falls, N.Y. He received an A.B. from the University of Buffalo in 1945 and a Ph. D. in economics from Harvard University in 1950.

Baldwin was on the faculty of the University of Buffalo from 1945 to 1946, Harvard University from 1950 to 1957, and the University of California from 1957 to 1964. He was Chief Economist in the Office of the Special Trade Representative from 1963 to 1964 and a professor of economics at the University of Wisconsin from 1964 to 1967.

From 1967 to 1968, Baldwin was a research professor with the Brookings Institution, and in 1969-70 he had a Ford Faculty Research Fellowship. He returned to the faculty of the University of Wisconsin in 1970 and served as F. W. Taussig research professor there in 1974 and chairman of the economics department from 1975 to 1978. In 1974-75 he was on a research contract for the Labor Department's Bureau of International Labor.

Baldwin has served as a consultant to the U.N. Conference on Trade and Development and is on the board of editors of several economic journals.

THE PRESIDENT'S NEWS CONFERENCE OF NOVEMBER 28, 1979

SITUATION IN IRAN

THE PRESIDENT. For the last 24 days our Nation's concern has been focused on our fellow Americans being held hostage in Iran. We have welcomed some of them home to their families and their friends.

But we will not rest nor deviate from our efforts until all have been freed from their imprisonment and their abuse. We hold the Government of Iran fully responsible for the well-being and the safe return of every single person.

I want the American people to understand the situation as much as possible, but there may be some questions tonight which I cannot answer fully, because of my concern for the well-being of the hostages.

First of all, I would like to say that I am proud of this great Nation, and I want to thank all Americans for their prayers, their courage, their persistence, their strong support and patience. During these past days our national will, our courage, and our maturity have all been severely tested, and history will show that the people of the United States have met every test.

In the days to come, our determination may be even more sorely tried, but we will continue to defend the security, the honor, and the freedom of Americans everywhere. This Nation will never yield to blackmail. For all Americans, our constant concern is the well-being and the safety of our fellow citizens who are being held illegally and irresponsibly hostage in Iran.

The actions of Iran have shocked the civilized world. For a government to applaud mob violence and terrorism, for a government actually to support and, in effect, participate in the taking and the holding of hostages is unprecedented in human history. This violates not only the most fundamental precepts of international law but the common ethical and religious heritage of humanity. There is no recognized religious faith on Earth which condones kidnaping. There is no recognized religious faith on Earth which condones blackmail. There is certainly no

religious faith on Earth which condones the sustained abuse of innocent people.

We are deeply concerned about the inhuman and degrading conditions imposed on the hostages. From every corner of the world, nations and people have voiced their strong revulsion and condemnation of Iran and have joined us in calling for the release of the hostages.

Last night, a statement of support was released and was issued by the President of the United Nations General Assembly, the Security Council, on behalf of all of its members. We expect a further Security Council meeting on Saturday night, at which more firm and official action may be taken to help in obtaining the release of the American hostages. Any claims raised by government officials of Iran will ring hollow while they keep innocent people bound and abused and threatened.

We hope that this exercise of diplomacy and international law will bring a peaceful solution, because a peaceful solution is preferable to the other remedies available to the United States. At the same time, we pursue such a solution with grim determination. The Government of Iran must recognize the gravity of the situation, which it has itself created, and the grave consequences which will result if harm comes to any of the hostages.

I want the American people to know and I want the world to know that we will persist in our efforts, through every means available, until every single American has been freed. We must also recognize now, as we never have before, that it is our entire Nation which is vulnerable, because of our overwhelming and excessive dependence on oil from foreign countries. We have got to accept the fact that this dependence is a direct physical threat to our national security, and we must join

together to fight for our Nation's energy freedom.

We know the ways to win this war: more American energy and the more efficient use of what we have. The United States Congress is now struggling with this extremely important decision. The way to victory is long and difficult, but we have the will, and we have the human and the natural resources of our great Nation.

However hard it might be to see into the future, one thing tonight is clear: We stand together. We stand as a nation unified, a people determined to protect the life and the honor of every American. And we are determined to make America an energy-secure nation once again. It is unthinkable that we will allow ourselves to be dominated by any form of overdependence at home or any brand of terrorism abroad. We are determined that the freest nation on Earth shall protect and enhance its freedom.

I'd be glad to answer questions.

QUESTIONS

WORLD REACTION TO IRANIAN SITUATION

Q. Mr. President, the Ayatollah Khomeini said the other day—and I'm using his words—he doesn't believe you have the guts to use military force. He puts no credibility in our military deterrent. I'm wondering, how do we get out of this mess in Iran and still retain credibility with our allies and with our adversaries overseas?

THE PRESIDENT. We have the full support of our allies, and in this particular instance, we have no adversaries overseas. There is no civilized country on Earth which has not condemned the seizure and the holding of the hostages by Iran.

It would not be advisable for me to ex-

plore publicly all of the options open to our country. As I said earlier, I'm determined to do the best I can through diplomatic means and through peaceful means to ensure the safety of our hostages and their release. Other actions which I might decide to take would come in the future, after those peaceful means have been exhausted.

But I believe that the growing condemnation of the world community on Iran will have a beneficial effect.

SHAH OF IRAN

Q. Mr. President, why did you reverse your policy and permit the Shah to come into this country when, one, medical treatment was available elsewhere; two, you had been warned by our chargé that the Americans might be endangered in Tehran; and three, the Bazargan government was so shaky that it was questionable whether he could deliver on the promise to protect our Embassy? And last of all, in view of the consequences, do you regret the decision?

THE PRESIDENT. No. The decision that I made, personally and without pressure from anyone, to carry out the principles of our country, to provide for the means of giving the Shah necessary medical assistance to save his life, was proper. At the same time, we notified the Government of Iran. We were assured by the Prime Minister and the Foreign Minister that our Embassy would be protected, and it was protected for several days, in spite of threats from outside.

Then peremptorily, after Khomeini made an aggravating speech to the crowds in the street and withdrew protection from the Embassy, it was attacked successfully. The Embassy was protected by our people for the length of time possible without help from the host government.

No embassy on Earth is a fortress that can withstand constant attacks by a mob, unless a host government comes to the rescue of the people within the embassy.

But I took the right decision. I have no regrets about it nor apologies to make, because it did help to save a man's life, and it was compatible with the principles of our country.

EFFECT ON U.S. POLITICAL ACTIVITIES

Q. Mr. President, we appear to be in a rather dangerous period of international tension and volatility, especially in the Islamic world, and it comes at a time when we're about to embark on our quadrennial election campaign, with all that that will bring. Have you given any thought to whether, following examples of other national emergencies, it may be wise to try to mute the political fallout of this by trying to bring opponents in and outside of your party into some kind of emergency coalition for this purpose?

THE PRESIDENT. We have attempted to keep the political leaders in our Nation informed, both publicly and through other channels. We have given frequent briefings, for instance, on the Hill, both to the Members of the Senate and to the House. We have encouraged all of those who have become announced candidates for President to restrain their comments, which might be misconstrued overseas, and to have a maximum degree of harmony among those who might be spokesmen for our country.

I myself, in order to stay close to the scene here, where constantly changing events could be handled by me as President, have eliminated the major portion of political-oriented activities.

I don't think the identity of the Islamic world is a factor. We have the deepest respect and reverence for Islam and for

all those who share the Moslem faith. I might say that, so far as I know, all the Islamic nations have joined us in condemning the activities and the actions of the Government of Iran. So, I don't think religious divisions are a factor here at all.

But I will have to continue to restrict my own political activities and call on those who might be opposing me in the future for President to support my position as President and to provide unity for our country and for our Nation in the eyes of those who might be looking for some sign of weakness or division in order to perpetuate their abuse of our hostages.

SECURITY FOR EMBASSIES

Q. What can the U.S. do now, what can it do to prevent future incidents of the nature of Iran? How can you satisfy the public demand to end such embarrassment?

THE PRESIDENT. Well, this is an unprecedented and unique occurrence. Down through history, we have had times when some of our people were captured by terrorists or who were abused, and there have obviously been instances of international kidnaping which occurred for the discomfort of a people or a government. So far as I know, this is the first time that such an activity has been encouraged by and supported by the government itself, and I don't anticipate this kind of thing recurring.

We have taken steps already, in view of the disturbances in the Middle East and the Persian Gulf region, to guard our people more closely, to provide them with higher degree of security, and to make arrangements with the host governments to provide assistance, if it's needed, in the fastest possible way.

Many other nations have reduced severely the number of persons overseas. I

think one of the points that should be made is that a year ago, we had 70,000 Americans in Iran—70,000. There were literally thousands of people who were killed in the Iranian revolution, from all nations. We were able to extract Americans from Iran safely. It was a superb demonstration of cooperation and good conduct on the part of the State Department and other American officials.

So, there will be disturbances in the future, but I think we are well protected as we possibly can be, without withdrawing into a shell, from protecting American interests in nations overseas.

My own experience, so far, has been that the leaders of nations have recommitment themselves to provide security for embassies of all countries. I think we've learned a lesson from this instance. But, because it is so unique, in the high degree of irresponsibility of the Iranian Government leaders, I don't believe that we'll see another reoccurrence of it any time soon.

HENRY KISSINGER

Q. Mr. President, former Secretary of State Kissinger has criticized your administration's handling of the situation in Iran. He has suggested that it came about because, partly because of the perceived weakness in American foreign policy, and that it has further damaged America's image as a result.

How do you respond?

THE PRESIDENT. I would rather not respond. There's no reason for me to get into a public debate at this time with former Secretary Kissinger about who is or who is not responsible for the events that took place in Iran.

Obviously, what has occurred could not have been predicted. And for 30 years, our country has had a relationship with a fairly stable government there. The changes took place very rapidly. So far as I know, no one on Earth predicted them.

And I think it's not becoming at this moment and not conducive to better American understanding to get involved in answering allegations that I or someone else may have been culpable and may have caused a further aggravation of a very difficult situation.

Q. Mr. President, just one followup. What role did the former Secretary play in your decision to permit the Shah into the country?

THE PRESIDENT. None. I did not hear at all from the Secretary, former Secretary Kissinger, nor did he contact Secretary Vance at any time during the days when we were deciding that the Shah should come into the United States for medical care to save his life. In previous weeks and months since the Shah was deposed, Secretary Kissinger and many others let it be known that they thought that we should provide a haven for the Shah. But Secretary Kissinger played no role in my decision to permit the Shah to come in for medical treatment.

SHAH OF IRAN

Q. Mr. President, speaking of the Shah, if he is well enough to travel, would you like him to leave the country?

THE PRESIDENT. That's a decision to be made by the Shah and by his medical advisers. When he decided to come to our country, with my permission, I was informed then, and I have been informed since, that as soon as his medical treatment was successfully completed, that his

intention was to leave. And I have not encouraged him to leave. He was free to come here for medical treatment, and he will leave on his own volition.

U.S. RELATIONS WITH ISLAMIC NATIONS

Q. Mr. President, yes, I would like to follow up Mr. Schorr's [Daniel Schorr, *Des Moines Register*] question. The consequences of the crisis in Iran is drifting the United States into almost a cold war with the Islamic countries. Watching TV news for 25 days, Americans soon will believe the whole Moslem world is hating them. Moreover, they are not told that the Shiites are a very minor minority among the population of the Islamic world, because the most majority is Sunni. Don't you think you get any help from any Islamic country, and what will your policy be towards the Islamic countries under these circumstances?

THE PRESIDENT. Well, the premise of your question is completely wrong. We're not approaching any sort of cold war with the Islamic countries. So far as I know, every Islamic country has condemned Iran for its capture of our hostages, and has been very supportive. This includes Moslem nations which, in the past, have not been close friends of ours—Iraq, Libya, and others. So, I don't see this as confrontation at all between our Nation and the Islamic world.

It's certainly not part of the Islamic faith to condone, as I said earlier, blackmail or the persecution or harm of innocent people or kidnapping or terrorism.

So, I think that we have a very good relationship with the people and the governments of the Islamic world, and I don't think it's deteriorated in this instance. In some ways, we've been drawn closer to these people, because they see

what has occurred in Iran as something of a disgrace for their own religious faith, and they don't see this as typical of what Moslems believe.

I might add, also, that this is not typical of the Shiite faith, either. It's the misguided actions of a few people in Iran who are burning with hatred and a desire for revenge, completely contrary to the teachings of the Moslem faith.

U.S. REACTION TO IRANIAN SITUATION

Q. Mr. President, there's a feeling of hostility throughout the country toward Iran, because of the hostages. Senator Long said that the taking of our Embassy in Iran, in his words, is an act of war. There are rumors, since denied, that our Navy has been called up for service. I ask you, as our Commander in Chief, is war possible, is war thinkable?

THE PRESIDENT. It would be a mistake for the people of our country to have aroused within them hatred toward anyone; not against the people of Iran, and certainly not against Iranians who may be in our country as our guests. We certainly do not want to be guilty of the same violation of human decency and basic human principles that have proven so embarrassing to many of the Iranian citizens themselves.

We obviously prefer to see our hostages protected and released completely through peaceful means. And that's my deepest commitment, and that will be my goal. The United States has other options available to it, which will be considered, depending upon the circumstances. But I think it would not be well-advised for me to speak of those specifically tonight.

IRANIAN STUDENTS IN THE UNITED STATES

Q. Mr. President, we have had 55,000 Iranian students in this country. We've

been very good to them, very hospitable. Even the new Finance Minister of Saudi Arabia was a student who once demonstrated in Washington against law and order. Shouldn't we be very careful in letting any of these students come in here? Shouldn't we screen them in the future and make them agree that they will not demonstrate?

THE PRESIDENT. Well, it's very difficult for an Iranian citizen or a student to get a visa at the American Embassy in Iran at this time [*Laughter*] And I think the influx of Iranians to our country now would be minimal.

I'm determined to enforce the law about Iranian students. Some of them have violated the law. They are now being screened; they are being assessed in their commitment and the legality of their presence here. We have already finished this procedure with more than 22,000. About 17,000 have proven to be here completely legally and are indeed full-time students. Among the other 5,000, about several hundred have already departed; others are now having to prove that, contrary to the earliest evidence, they do indeed have a right to be in our country. If they are here illegally, they will be expelled.

There is one exception to that rule: If a citizen of Iran can prove that if he or she returned to Iran that they would be executed or abused because of their political beliefs, they can seek asylum here. And if that asylum, in our judgment, is justified, we will provide it for them.

But this procedure is going forward in accordance with American law, in accordance with American fairness, in accordance with the full principles of the United States Constitution.

DEADLINE FOR RELEASING AMERICAN
HOSTAGES

Q. Mr. President, can this crisis go on indefinitely, or ought the Ayatollah Khomeini understand that at some point the American people may demand and other nations may expect that you move forward to resolve it by whatever means you find necessary?

THE PRESIDENT. It would not be possible or even advisable for me to set a deadline about when or if I would take certain action in the future. This is an ever-present consideration on my mind. I'm carrying out all of the duties that normally fall on a President's shoulder, which are adequate, but I never forget one moment that I'm awake about the hostages whose lives and whose safety depend on me. And I am pursuing every possible avenue to have the hostages released.

Any excessive threats or any excessive belief among the Iranians that they will be severely damaged by military action, as long as these negotiations are proceeding and as long as legalities can be followed, might cause the death of the hostages, which we are committed to avoid. So, that's one of the questions that I cannot answer: to set down a certain deadline beyond which we would take extra action, that might result in the harm or the death of the hostages.

We are proceeding, I guarantee you, in every possible way, every possible moment, to get the hostages freed and, at the same time, protect the honor and the integrity and the basic principles of our country. That's all I can do, but I am doing it to the best of my ability, and I believe we will be successful.

U.S. STRENGTH ABROAD

Q. Mr. President, many Americans view the Iranian situation as one in a succession of events that proves that this country's power is declining. How can you assure Americans tonight that our power is not declining abroad, and how are you reassessing priorities for the eighties in terms of foreign policy?

THE PRESIDENT. The United States has neither the ability nor the will to dominate the world, to interfere in the internal affairs of other nations, to impose our will on other people whom we desire to be free, to make their own decisions. This is not part of the commitment of the United States.

Our country is the strongest on Earth. We're the strongest militarily, politically, economically, and I think we're the strongest morally and ethically. Our country has made great strides, even since I've been in office. I've tried to correct some of the defects that did exist. We have strengthened the military alliances of our country, for instance. NATO now has a new spirit, a new confidence, a new cohesion, improving its military capabilities, much more able to withstand any threat from the east, from the Soviet Union or the Warsaw Pact, than it was before.

We've espoused again the principles that unite Americans and make us admired throughout the world, raising the banner of human rights. We're going to keep it high. We have opened up avenues of communication, understanding, trade, with people that formerly were our enemies or excluded us—several nations in Africa, the vast people and the vast country of the People's Republic of China. In doing so, we've not alienated any of our previous friends.

I think our country is strong within itself. There is not an embarrassment now about our Government, which did exist in a few instances in years gone by. So, I don't see at all that our country has become weak. We are strong, and we are getting stronger, not weaker. But if anybody thinks that we can dominate other people with our strength, military or political strength or economic strength, they are wrong. That's not the purpose of our country.

Our inner strength, our confidence in ourselves, I think, is completely adequate. And I believe the unity that the American people have shown in this instance, their patience, is not at all a sign of weakness. It is a sign of sure strength.

INVESTIGATION OF THE SHAH

Q. Mr. President, serious charges have been placed against the Shah concerning the repression of his own people and the misappropriation of his nation's funds. Is there an appropriate vehicle to investigate those charges, and do you foresee a time when you would direct your administration to assist in that investigation?

THE PRESIDENT. I don't know of any international forum within which charges have ever been brought against a deposed leader who has left his country. There have been instances of changing governments down through the centuries in history, and I don't know of any instance where such a leader, who left his country after his government fell, has been tried in an international court or in an international forum.

This is a matter that can be pursued. It should be pursued under international law, and if there is a claim against the Shah's financial holdings, there is nothing to prevent other parties from going into the courts, in accordance with the law of a nation or internationally, and seeking a redress of grievances which they claim.

But as I said earlier, I don't think there's any forum that will listen to the Iranians make any sort of claim, justified or not, as long as they hold against their will and abuse the hostages, in complete contravention to every international law and every precept or every commitment or principle of humankind.

BROOKS JACKSON [Associated Press]. Thank you, Mr. President.

THE PRESIDENT. Thank you very much.

NOTE: President Carter's fifty-third news conference began at 9 p.m. in the East Room at the White House. It was broadcast live on radio and television.

Crude Oil Transportation System

Letter to the Speaker of the House and the President of the Senate. November 29, 1979

Dear Mr. Speaker: (Dear Mr. President:)

I am writing you concerning my decision on a west-to-east crude oil transportation system under Title V of the Public Utility Regulatory Policies Act of 1978 (Public Law 95-617).

Title V of PURPA provided for the submission of proposals for the construction of a west-to-east crude oil transportation system. It directed the Secretary of the Interior, after consultation with heads of appropriate Federal agencies, to establish an expedited schedule for conducting reviews and making recommendations concerning the submitted proposals. It required that the Interior Secretary secure recommendations from other Federal agencies and comments from State and local governments and the general public. He was then directed to prepare a report containing those recommendations and comments, together with his own recommendations, and submit it to the Presi-

dent. On October 15, 1979, Secretary Andrus submitted his report and recommendations to me.

Section 507(a) of Title V directs the President to issue his decision concerning the proposals within 45 days after receipt of the report, or within 60 days thereafter if he determines, and so notifies the Congress, that additional time is necessary. Pursuant to that section, by this letter I am notifying you of my determination that additional time will be required to permit thorough consideration of the Secretary's recommendation, and of additional information on unresolved issues.

I will reach a decision expeditiously thereafter.

Sincerely,

JIMMY CARTER

NOTE: This is the text of identical letters addressed to Thomas P. O'Neill, Jr., Speaker of the House of Representatives, and Walter F. Mondale, President of the Senate.

Panama Canal

Executive Order 12173. November 29, 1979

CONTINUING APPLICABILITY OF PANAMA CANAL REGULATIONS

By the authority vested in me as President of the United States of America by Section 301 of Title 3 of the United States Code, by the Panama Canal Code (76A Stat. 1), as amended, and by Public Law 96-70 (93 Stat. 452), and in accordance with the rights granted to the United States of America by the Panama Canal Treaty of 1977 "to manage, operate, and maintain the Panama Canal, its complementary works, installations and equipment and to provide for the orderly transit of vessels through the Panama Canal," it is hereby ordered as follows:

1-101. All regulations that were adopt-

ed by the President or his delegates pursuant to former Title 2 of the Canal Zone Code (76A Stat. 6-50), repealed by Section 303(a)(1) of Public Law 96-70, or actions taken pursuant thereto, that were in effect on September 30, 1979, and that address matters which the President is authorized to regulate pursuant to Public Law 96-70, shall remain in effect unless or until amended, superseded, or otherwise terminated by the President or the Panama Canal Commission. This extension shall not apply to the extent that any such regulation or action is inconsistent with the provisions of the Panama Canal Treaty of 1977, its implementing agreements, or Public Law 96-70.

1-102. The Secretary of Defense shall exercise the powers and carry out the responsibilities vested in the President of the United States by the Panama Canal Code (76A Stat. 1), as amended, and Public Law 96-70 (93 Stat. 452), except for those powers and responsibilities vested in the President by Sections 1102(b), 1103, 1104, 1105(a), 1106(b), 1108, 1109(a), 1112(d), 1243(a)(1), 1321(c), 1344(b), 1504(b), 1601(a), 2206(b) and 3301 of Public Law 96-70. This delegation shall be effective for 120 days after the date of this Order.

JIMMY CARTER

The White House,

November 29, 1979.

[Filed with the Office of the Federal Register, 2:23 p.m., November 29, 1979]

Department of Justice

*Nomination of Sanford M. Litvack To Be an Assistant Attorney General.
November 29, 1979*

The President today announced that he will nominate Sanford M. Litvack, of Rockville Centre, N.Y., to be Assistant

Attorney General. He would replace John Shenefield, who has been appointed Associate Attorney General.

Litvack has practiced law with the New York City firm of Donovan, Leisure, Newton & Irvine since 1961 and has been a member of the firm since 1969.

He was born April 29, 1936, in Brooklyn, N.Y. He received a B.A. from the University of Connecticut in 1957 and an LL.B. from Georgetown Law Center in 1959.

From 1959 to 1961, Litvack was a trial attorney with the Justice Department's Antitrust Division.

Civil Aeronautics Board

Nomination of Marvin S. Cohen To Be a Member, and Redesignation as Chairman. November 29, 1979

The President today announced that he will nominate Marvin S. Cohen for reappointment as a member of the Civil Aeronautics Board, for a term expiring December 31, 1985.

The President intends to redesignate Cohen as Chairman of the CAB when his term as Chairman expires on December 31, 1979.

Federal Paperwork Reduction

Remarks on Signing Executive Order 12174. November 30, 1979

THE PRESIDENT. Ever since I've been involved in public life, in the minds of many Americans, government—particularly the Federal Government—and redtape have been synonymous phrases.

In my first Cabinet meeting here after I was inaugurated President, the first item

of business that I brought up was my determination to eliminate redtape and paperwork from the Federal Government. I've been in office now almost 3 years, and with the help of these Members of Congress behind me and executive agencies, we've had a substantial degree of success.

We have been able to reduce the total number of hours devoted to Federal paperwork by 15 percent, which is a substantial achievement. This amounts to 130 million hours of filling out paperwork each year. That's as though every person in Dubuque, Iowa, to take a typical State—[laughter]—was working 40 hours a week the whole year. That's how much paperwork we've already eliminated. That's 15 percent, but we've still got a long way to go.

And I'm very deeply grateful to the men standing behind me, particularly Senator Chiles, who's in the forefront this year, Congressman Brooks, and Congressman Frank Horton. Obviously, others have done a great deal of work, including Senator Nelson and others.

A while back Frank Horton delivered to me the result of a long study of paperwork elimination. It consisted of several hundred recommendations. We have already implemented, Frank, more than half those recommendations, and we're working on the implementation of the others.

Today, I'm going to sign an Executive order that will go as far as I can legally go in reducing paperwork further. This sets a definite limit, or paperwork budget, that cannot be exceeded by any one of the Federal agencies without my direct approval; further, to reduce the amount of paperwork that they require either within Government or outside of the Federal Government.

Secondly, I'm eliminating every degree of interagency duplication. Quite

often the same data from an American citizen are required by more than one Federal agency, and their sharing of information when it comes in can greatly eliminate or reduce the amount of paperwork involved. If forms and reports are necessary—and many of them are—we're trying to reduce the number of forms required, to cut down on the length of those particular forms, and also to reduce the frequency with which reports and other data have to be submitted to the Federal Government.

In addition, we're implementing sunset provisions so that after a certain period of time, the paperwork required is automatically eliminated, unless it's reassessed by the Federal agencies and determined still to be of urgent need for the carrying out of the Government's business. Quite often, once a form or report or request is initiated into a requirement, it perpetuates itself long past the time when it's no longer needed.

Under the sponsorship of these men behind me, there has already been introduced the paperwork and redtape reduction act of 1979. I strongly support that legislation and will be working with these leaders to get it implemented. It will put real legal teeth into additional steps that I cannot legally do now because I don't have the authority. But under their sponsorship, I'll have a new law with which I can work closely with the congressional leaders to reduce paperwork throughout the Federal Government.

And the last thing that I'd like to mention is that we are sending to the Congress today an administration proposal to reduce congressional reports that are required by the executive branch. This will either completely eliminate or substantially reduce 224 different reports that have been required by the executive branch of Government, by Congress, in

days gone by, years gone by, decades gone by. And these have now been assessed, and we believe that this number can be eliminated or drastically reduced or consolidated and eliminate a great deal of burden on the executive branch of Government and also the Congress.

As everybody knows, many of these reports are never looked at. Nobody ever sees them after they are evolved with tremendous input by the private sector of American economy, by local and State governments, and particularly by small business, where they are a very serious and onerous burden.

And we are doing everything we can to cut down redtape and paperwork, and I'm deeply grateful for the leadership that's been shown by the congressional representatives here this morning.

I'd like to ask Senator Chiles if he has a comment to make, and then following that, Chairman Brooks and, also, Chairman Frank Horton. Lawton, would you speak to—

SENATOR CHILES. Well, Mr. President, I think you're indicating your support of and your attack on paperwork as you did when you first came to this office, as you said, in your first Cabinet meeting. I think the ball is now in our court with the bill that we now have. And I think with your sponsorship and with the bipartisan group that we've put together in both the House and the Senate, we're going to be able to move that bill quickly.

I find the great problem is that I know we've made some progress, but as I go around my State, I can't find anybody that's felt that progress yet. They all are waiting to see when we're going to reduce it. And so, I think that it's something that we have to take additional steps. But I think that we've got the ball moving there, and with your help, we'll continue to move.

religious faith on Earth which condones the sustained abuse of innocent people.

We are deeply concerned about the inhuman and degrading conditions imposed on the hostages. From every corner of the world, nations and people have voiced their strong revulsion and condemnation of Iran and have joined us in calling for the release of the hostages.

Last night, a statement of support was released and was issued by the President of the United Nations General Assembly, the Security Council, on behalf of all of its members. We expect a further Security Council meeting on Saturday night, at which more firm and official action may be taken to help in obtaining the release of the American hostages. Any claims raised by government officials of Iran will ring hollow while they keep innocent people bound and abused and threatened.

We hope that this exercise of diplomacy and international law will bring a peaceful solution, because a peaceful solution is preferable to the other remedies available to the United States. At the same time, we pursue such a solution with grim determination. The Government of Iran must recognize the gravity of the situation, which it has itself created, and the grave consequences which will result if harm comes to any of the hostages.

I want the American people to know and I want the world to know that we will persist in our efforts, through every means available, until every single American has been freed. We must also recognize now, as we never have before, that it is our entire Nation which is vulnerable, because of our overwhelming and excessive dependence on oil from foreign countries. We have got to accept the fact that this dependence is a direct physical threat to our national security, and we must join

together to fight for our Nation's energy freedom.

We know the ways to win this war: more American energy and the more efficient use of what we have. The United States Congress is now struggling with this extremely important decision. The way to victory is long and difficult, but we have the will, and we have the human and the natural resources of our great Nation.

However hard it might be to see into the future, one thing tonight is clear: We stand together. We stand as a nation unified, a people determined to protect the life and the honor of every American. And we are determined to make America an energy-secure nation once again. It is unthinkable that we will allow ourselves to be dominated by any form of overdependence at home or any brand of terrorism abroad. We are determined that the freest nation on Earth shall protect and enhance its freedom.

I'd be glad to answer questions.

QUESTIONS

WORLD REACTION TO IRANIAN SITUATION

Q. Mr. President, the Ayatollah Khomeini said the other day—and I'm using his words—he doesn't believe you have the guts to use military force. He puts no credibility in our military deterrent. I'm wondering, how do we get out of this mess in Iran and still retain credibility with our allies and with our adversaries overseas?

THE PRESIDENT. We have the full support of our allies, and in this particular instance, we have no adversaries overseas. There is no civilized country on Earth which has not condemned the seizure and the holding of the hostages by Iran.

It would not be advisable for me to ex-

plore publicly all of the options open to our country. As I said earlier, I'm determined to do the best I can through diplomatic means and through peaceful means to ensure the safety of our hostages and their release. Other actions which I might decide to take would come in the future, after those peaceful means have been exhausted.

But I believe that the growing condemnation of the world community on Iran will have a beneficial effect.

SHAH OF IRAN

Q. Mr. President, why did you reverse your policy and permit the Shah to come into this country when, one, medical treatment was available elsewhere; two, you had been warned by our chargé that the Americans might be endangered in Tehran; and three, the Bazargan government was so shaky that it was questionable whether he could deliver on the promise to protect our Embassy? And last of all, in view of the consequences, do you regret the decision?

THE PRESIDENT. No. The decision that I made, personally and without pressure from anyone, to carry out the principles of our country, to provide for the means of giving the Shah necessary medical assistance to save his life, was proper. At the same time, we notified the Government of Iran. We were assured by the Prime Minister and the Foreign Minister that our Embassy would be protected, and it was protected for several days, in spite of threats from outside.

Then peremptorily, after Khomeini made an aggravating speech to the crowds in the street and withdrew protection from the Embassy, it was attacked successfully. The Embassy was protected by our people for the length of time possible without help from the host government.

No embassy on Earth is a fortress that can withstand constant attacks by a mob, unless a host government comes to the rescue of the people within the embassy.

But I took the right decision. I have no regrets about it nor apologies to make, because it did help to save a man's life, and it was compatible with the principles of our country.

EFFECT ON U.S. POLITICAL ACTIVITIES

Q. Mr. President, we appear to be in a rather dangerous period of international tension and volatility, especially in the Islamic world, and it comes at a time when we're about to embark on our quadrennial election campaign, with all that that will bring. Have you given any thought to whether, following examples of other national emergencies, it may be wise to try to mute the political fallout of this by trying to bring opponents in and outside of your party into some kind of emergency coalition for this purpose?

THE PRESIDENT. We have attempted to keep the political leaders in our Nation informed, both publicly and through other channels. We have given frequent briefings, for instance, on the Hill, both to the Members of the Senate and to the House. We have encouraged all of those who have become announced candidates for President to restrain their comments, which might be misconstrued overseas, and to have a maximum degree of harmony among those who might be spokesmen for our country.

I myself, in order to stay close to the scene here, where constantly changing events could be handled by me as President, have eliminated the major portion of political-oriented activities.

I don't think the identity of the Islamic world is a factor. We have the deepest respect and reverence for Islam and for

all those who share the Moslem faith. I might say that, so far as I know, all the Islamic nations have joined us in condemning the activities and the actions of the Government of Iran. So, I don't think religious divisions are a factor here at all.

But I will have to continue to restrict my own political activities and call on those who might be opposing me in the future for President to support my position as President and to provide unity for our country and for our Nation in the eyes of those who might be looking for some sign of weakness or division in order to perpetuate their abuse of our hostages.

SECURITY FOR EMBASSIES

Q. What can the U.S. do now, what can it do to prevent future incidents of the nature of Iran? How can you satisfy the public demand to end such embarrassment?

THE PRESIDENT. Well, this is an unprecedented and unique occurrence. Down through history, we have had times when some of our people were captured by terrorists or who were abused, and there have obviously been instances of international kidnaping which occurred for the discomfort of a people or a government. So far as I know, this is the first time that such an activity has been encouraged by and supported by the government itself, and I don't anticipate this kind of thing recurring.

We have taken steps already, in view of the disturbances in the Middle East and the Persian Gulf region, to guard our people more closely, to provide them with higher degree of security, and to make arrangements with the host governments to provide assistance, if it's needed, in the fastest possible way.

Many other nations have reduced severely the number of persons overseas. I

think one of the points that should be made is that a year ago, we had 70,000 Americans in Iran—70,000. There were literally thousands of people who were killed in the Iranian revolution, from all nations. We were able to extract Americans from Iran safely. It was a superb demonstration of cooperation and good conduct on the part of the State Department and other American officials.

So, there will be disturbances in the future, but I think we are well protected as we possibly can be, without withdrawing into a shell, from protecting American interests in nations overseas.

My own experience, so far, has been that the leaders of nations have recommitted themselves to provide security for embassies of all countries. I think we've learned a lesson from this instance. But, because it is so unique, in the high degree of irresponsibility of the Iranian Government leaders, I don't believe that we'll see another reoccurrence of it any time soon.

HENRY KISSINGER

Q. Mr. President, former Secretary of State Kissinger has criticized your administration's handling of the situation in Iran. He has suggested that it came about because, partly because of the perceived weakness in American foreign policy, and that it has further damaged America's image as a result.

How do you respond?

THE PRESIDENT. I would rather not respond. There's no reason for me to get into a public debate at this time with former Secretary Kissinger about who is or who is not responsible for the events that took place in Iran.

Obviously, what has occurred could not have been predicted. And for 30 years, our country has had a relationship with a fairly stable government there. The changes took place very rapidly. So far as I know, no one on Earth predicted them.

And I think it's not becoming at this moment and not conducive to better American understanding to get involved in answering allegations that I or someone else may have been culpable and may have caused a further aggravation of a very difficult situation.

Q. Mr. President, just one followup. What role did the former Secretary play in your decision to permit the Shah into the country?

THE PRESIDENT. None. I did not hear at all from the Secretary, former Secretary Kissinger, nor did he contact Secretary Vance at any time during the days when we were deciding that the Shah should come into the United States for medical care to save his life. In previous weeks and months since the Shah was deposed, Secretary Kissinger and many others let it be known that they thought that we should provide a haven for the Shah. But Secretary Kissinger played no role in my decision to permit the Shah to come in for medical treatment.

SHAH OF IRAN

Q. Mr. President, speaking of the Shah, if he is well enough to travel, would you like him to leave the country?

THE PRESIDENT. That's a decision to be made by the Shah and by his medical advisers. When he decided to come to our country, with my permission, I was informed then, and I have been informed since, that as soon as his medical treatment was successfully completed, that his

intention was to leave. And I have not encouraged him to leave. He was free to come here for medical treatment, and he will leave on his own volition.

U.S. RELATIONS WITH ISLAMIC NATIONS

Q. Mr. President, yes, I would like to follow up Mr. Schorr's [Daniel Schorr, Des Moines Register] question. The consequences of the crisis in Iran is drifting the United States into almost a cold war with the Islamic countries. Watching TV news for 25 days, Americans soon will believe the whole Moslem world is hating them. Moreover, they are not told that the Shiites are a very minor minority among the population of the Islamic world, because the most majority is Sunni. Don't you think you get any help from any Islamic country, and what will your policy be towards the Islamic countries under these circumstances?

THE PRESIDENT. Well, the premise of your question is completely wrong. We're not approaching any sort of cold war with the Islamic countries. So far as I know, every Islamic country has condemned Iran for its capture of our hostages, and has been very supportive. This includes Moslem nations which, in the past, have not been close friends of ours—Iraq, Libya, and others. So, I don't see this as confrontation at all between our Nation and the Islamic world.

It's certainly not part of the Islamic faith to condone, as I said earlier, blackmail or the persecution or harm of innocent people or kidnapping or terrorism.

So, I think that we have a very good relationship with the people and the governments of the Islamic world, and I don't think it's deteriorated in this instance. In some ways, we've been drawn closer to these people, because they see

THE PRESIDENT. One of the things that I've done is to have in this same room all of the State school superintendents, for instance, and in a different meeting, I've had 18 or 20 representatives of the university system, and also mayors and Governors' representatives, to come in here and give me specific examples of what paperwork or reports or applications could be eliminated. And when they've done it, they've immediately gone to OMB, and we've cut them out. And we've made good progress so far.

Chairman Jack Brooks.

REPRESENTATIVE BROOKS. Thank you, Mr. President.

I would just like to commend you, Mr. President, for the results that you have already made in cutting down on the paperwork burdens and the results you've already achieved. And this is not a subject that's going to attract a lot of attention, and it won't help in the polls very much, but it's of tremendous importance to all the people, particularly the business community, because they're going to realize substantial benefits from what you're initiating today.

Now, I'm very pleased to say that the legislation that we're working on—that has been promoted substantially by Senator Chiles and others, and Frank Horton and myself, and your people; we're working on that legislation—I anticipate that it will be introduced this session, and we'll be ready to act on it the first of next year, very shortly after the beginning of the year.

With the legislation, with the Executive order in place, with the Government reorganizations and reforms that you have already put through, you will have clearly carried out your pledge to the American people to improve the efficiency of the Government, and I want to congratulate you on that achievement.

THE PRESIDENT. Thank you very much.

I might say that we've had remarkable success with our reorganization efforts under the leadership of these men here. I had the authority given to me early in my term to submit to the Congress reorganization plans, and so far, under the able leadership of Jack Brooks and Senator Ribicoff and Senator Nelson and others, we're batting a thousand, right? Haven't lost one yet.

Frank, would you like to say a word?

REPRESENTATIVE HORTON. Mr. President, speaking as the past Chairman of the Paperwork Commission, I'd just like to also add my congratulations to the administration for its determination and dedication to doing away with paperwork.

That was quite an interesting work that we did on the Paperwork Commission. I might say parenthetically, its life was 2 years. It self-destructed at the end of 2 years. And in October of 1977, I furnished to you the final report, which was right on time. In addition to finishing our work on time and not asking for an extension, we also turned back \$1.4 million, which is also unheard of.

But as a result of what we suggested, some 60 percent of those recommendations have been carried out by the administration, and I'm sure, as a result of this Executive order, many more are going to be followed up on. The legislation that you referred to, that is sponsored in the House by Jack and myself and Tom Steed—who is also a member of the Commission and who's here with us today—that legislation will go a long way to carry out the legislative mandates that would have to be done in order to carry out the work of the Commission.

The other thing I'd like to say is that it's my feeling, in dealing with the people

in my district, that they feel that there's what I call strangulation by regulation. And the manifestation of that strangulation is paperwork. And if we can do away with some of that paperwork, then they're going to be then aware of the fact that something is being done to eliminate that regulation.

Another thing is that Tom Steed, at our very first meeting, made the point that paperwork is like weeds: You can cut it down; it'll grow back. So, you've got to get to the root cause, and that's what this does and also what this legislation will do.

So, thanks a lot for your dedication, your personal interest in it, and making certain that this administration is carrying out the mandate. And I'll say that as a Republican, because I'm the one that gives it the bipartisan—[laughter]—like Tip O'Neill said when I gave him the report—he said, "How'd a Republican get to be Chairman of this Commission?" [Laughter]

THE PRESIDENT. Because of your good work.

I might say that it's a great pleasure for me to sign the Executive order now. Frank, this Executive order was originally five pages long. [Laughter] And it's now 2¼ pages long. So, we've already started on the good work.

[At this point, the President signed the Executive order.]

Well, that's a major step forward to getting redtape and paperwork burden off the shoulders of the American people, and I'm very grateful to all of you. Good luck to you.

One other point is—as a very important postscript—John Culver just said that our legislation that would provide for reduction in regulations, our deregulation legislation, is moving forward and they'll take a major stride, I think, next week.

John, thank you very much.

Thank you all.

NOTE: The President spoke at 10:53 a.m. in the Cabinet Room at the White House.

Federal Paperwork Reduction

Executive Order 12174. November 30, 1979

PAPERWORK

By the authority vested in me as President by the Constitution and statutes of the United States of America, and in order to establish procedures that eliminate all paperwork burdens on the public above the minimum necessary to determine and implement public policy and ensure compliance with Federal laws, it is hereby ordered as follows:

1-101. Agencies shall minimize the paperwork burden—i.e., the time and costs entailed in complying with requests for information and recordkeeping requirements—imposed on persons outside the Federal government. Forms should be used only to the extent necessary to gather the basic information required to fulfill an agency's mission. When forms must be used, they should be as short as possible and should elicit information in a simple, straightforward fashion.

1-102. Each agency shall designate an existing official to be responsible for minimizing both the agency's use of forms and the paperwork burden resulting from proposed legislation and regulations.

1-103. Agencies shall pay particular attention to the special burdens faced by individuals and small organizations in responding to requests for information. To minimize these burdens agencies should, whenever possible, forego uniform or universal reporting requirements and rely

instead on sampling, reduced frequency of reporting, differing compliance standards, or exemptions.

1-104. Each agency shall prepare an annual paperwork budget, i.e., an estimate of the total number of hours required to comply with requests for information. The budget should itemize each form used, describe its purpose and identify those affected by it. The Director of the Office of Management and Budget shall review and may modify each agency's proposed budget. After the Director has approved an agency's paperwork budget, it may be increased only by the Director upon request of the head of the agency.

1-105. Forms or similar requests for information shall be reviewed within two years after their initial issuance and then at least once every five years. Following review, they should be revised or abandoned to the extent they are not required to meet an agency's basic information needs. These reviews will be conducted by the agencies, and reports of the reviews will be submitted to the Director.

1-106. The Director shall audit compliance with this Order and may issue rules and regulations necessary to implement it. The Director may issue exemptions for agencies whose use of forms is limited. The Director also shall:

(a) Seek to eliminate duplication in requests for information by establishing a Federal information locator system, which will list all the types of information collected by Federal agencies and will be available for use by all agencies. This or similar systems will not contain any information obtained from the public. The Director shall take any other steps needed to prevent duplication, including the assignment to a particular agency of lead responsibility for the collection of certain types of information.

(b) Seek to inform the public and broaden public and agency comment by preparing and publishing in the *FEDERAL REGISTER* an annual paperwork calendar of significant requests for information. This calendar will be based on the information contained in the agencies' paperwork budgets.

(c) Report annually to the President on implementation of this Order and control of the paperwork burden generally.

1-107. The authority vested in the Director under this Order shall not affect any authority vested in him by any other Order. This Order shall be implemented in a manner consistent with all applicable Federal statutes.

1-108. For purposes of this Order, agency means those agencies covered by Executive Order 12044.

1-109. This Order will expire on September 30, 1983.

JIMMY CARTER

The White House,

Federal Paperwork Reduction

Message to the Congress.
November 30, 1979

To the Congress of the United States:

In the past two and one half years, my Administration has achieved real progress in cutting the paperwork burden government imposes on the public. Today I am announcing steps to expand and accelerate that effort.

I have today signed an Executive Order on paperwork reduction. I am also calling on the Congress to enact two bills which will help eliminate needless forms, cut

duplication, streamline those forms which are necessary and strengthen central oversight of Federal paperwork.

Government efficiency is a central theme of my Administration. If we are to restore confidence in government, we must eliminate needless burdens on the public. We have pursued this goal through regulatory reform, civil service reform, reorganization, and other initiatives. Paperwork reduction is an important part of this program.

Some Federal paperwork is needed. The government must collect information to enforce the civil rights laws, compile economic statistics, design sound regulations, and for many other purposes. In recent years, however, government forms, surveys and interviews have mushroomed. Much of this paperwork is unnecessary or duplicates information being collected elsewhere.

My Administration has stopped the paperwork surge and started cutting this burden down to size. We have reduced the amount of time Americans spend filling out Federal forms by almost 15%—127 million hours. That is the equivalent of 75,000 people working full-time for a year. We have evaluated the 520 recommendations of the Paperwork Commission and have already implemented more than half of them.

The Internal Revenue Service made it possible, for example, for five million taxpayers to switch from the long tax form to the short one. The Occupational Safety and Health Administration exempted 40,000 small businesses from reporting requirements. The Interstate Commerce Commission sliced a 70-page report required from 13,000 carriers down to 8 pages. The Labor and Treasury Departments slashed the paperwork burden that was crushing the small pension plans. I am today announcing that we are con-

solidating three reports required from the States on welfare and food stamp programs; this will eventually save 500,000 hours and \$10 million per year.

The progress in cutting Federal paperwork has been substantial, but we must do more. Congress is enacting new requirements in energy, environmental protection, and other programs that will add to the paperwork burden. To continue our success in eliminating Federal paperwork, we need the broad management program I am announcing today.

The Executive Order I have signed establishes strong management tools for the Executive agencies. First of all, it creates a "paperwork budget." Each agency will submit an annual estimate of the numbers of hours required to fill out all its forms. The Office of Management and Budget will then hold agencies to that total or order it cut. The process will be similar to the spending budget; it will give agencies incentives to set priorities and to eliminate or streamline burdensome forms.

The Order creates a Federal Information Locator System, which will list all the types of information collected by Federal agencies. Before an agency collects information, it will check in this System to see if another agency already has the data.

The Order also requires agencies to consider the special paperwork problems of small organizations and small businesses. Data gathering that may be easy for a corporation with computerized records may be very costly for a small business person who keeps records by hand. Some reports must necessarily be universal and uniform, but in many cases agencies can meet their information needs while providing exemptions or less burdensome reports for small businesses. Some agencies already have started do-

ing so. The Executive Order requires all agencies to review each form to identify those cases where small organizations can be exempted or given simpler forms. Senator John Culver deserves credit for leading the development of this concept of special consideration for small organizations.

Finally, the Order mandates a "sunset" process. This process will be similar to the legislation I am supporting to mandate sunset reviews for regulations, spending programs, and tax expenditures. The Paperwork Order requires that each form terminate every five years unless a new decision is made to continue it.

We also need legislation to build a complete paperwork control program and extend it to all agencies. Representatives Jack Brooks, Frank Horton, and Tom Steed and Senator Lawton Chiles have taken the lead in developing a Paperwork Reduction Act which will strengthen and unify existing paperwork oversight. The Federal Reports Act is insufficient in this regard. It gives OMB power to disapprove many agencies' forms, but the independent regulatory commissions are reviewed by the General Accounting Office and tax, education, and health manpower programs have no central review at all. These loopholes represent 81% of the total paperwork burden, of which tax forms are 73%.

This legislation will close these loopholes, providing central oversight for all forms. It also strengthens the paperwork clearance process by allowing members of the public to refuse to fill out forms that have not been properly cleared.

The legislation will provide additional tools to cut duplication in paperwork requirements. When several agencies want to collect overlapping data, the bill will empower the OMB to assign one agency to do the job. The bill will also

deal with the special problems of statistical systems. One cause of duplication is that agencies collect statistical data under pledges of confidentiality, and these pledges hamper sharing the data. The bill will authorize such sharing while strengthening safeguards to ensure the data is used only for statistical purposes and never to abuse personal privacy. These provisions will also strengthen our Federal statistical systems, which are crucial to economic and other policymaking.

While controlling the paperwork imposed on the public, we must also hold down paperwork within the Government itself. I am therefore submitting to the Congress the Reports Elimination Act of 1979. This bill, together with administrative action we are taking now, will eliminate or simplify 278 annual agency reports, saving at least \$5.5 million per year.

This overall paperwork reduction program has been developed in a cooperative effort with the leaders of the Senate Governmental Affairs and House Government Operations Committees. Working together, we will continue the progress on cutting away red tape.

I urge the Congress to act promptly on the two bills I have discussed.

JIMMY CARTER

The White House,
November 30, 1979.

Ambassador at Large and United States Coordinator for Refugee Affairs

*Nomination of Victor Palmieri.
November 30, 1979*

The President has asked me to say on his behalf that he intends to nominate

Victor Palmieri as Ambassador at Large, with special responsibilities for coordinating refugee affairs. Mr. Palmieri is one of the best managers in this country. He has made his reputation by solving large-scale, complicated problems in major organizational situations.

The President has selected him for this very important post, because the job of saving literally hundreds of thousands, perhaps millions of people, requires the best managerial skills that this Nation has to offer. Mr. Palmieri will have the President's full support in mobilizing every available resource of the Government and the private sector. Mr. Palmieri will be working closely with the First Lady, the Secretary of State, and the Secretary of Defense in carrying out the duties and responsibilities of this office.

NOTE: Press Secretary Jody Powell made the announcement at 11:32 a.m. to reporters assembled in the Briefing Room at the White House.

Following the announcement, the First Lady and Mr. Palmieri made brief remarks. Matthew Nimetz, Acting Coordinator for Refugee Affairs, Department of State, Ambassador Henry D. Owen, Special Representative of the President for International Economic Summits, and Lincoln Bloomfield, of the National Security Council staff, then answered reporters' questions. The press release also includes a transcript of those remarks and the question-and-answer session.

Law Enforcement Assistance Administration

Nomination of Ira M. Schwartz To Be Associate Administrator. November 30, 1979

The President today announced that he will nominate Ira M. Schwartz, of Bellevue, Wash., to be Associate Administrator of Law Enforcement Assistance. He would replace John M. Rector, resigned.

Schwartz has been executive director of the Washington Council on Crime and Delinquency since 1977.

He was born November 1, 1944, in Minneapolis, Minn. He received a B.S. from the University of Minnesota in 1966 and an M.S.W. from the University of Washington in 1968.

From 1968 to 1969, Schwartz was senior planner in social services for the Minneapolis Department of Planning & Development. From 1969 to 1972, he was director of community services for the Hennepin County (Minnesota) Department of Court Services, and from 1969 to 1973, he was an instructor in the law enforcement program at North Hennepin State Junior College.

From 1972 to 1973, Schwartz was director of purchase services for the Hennepin County Welfare Department. From 1973 to 1977, he was executive director of the John Howard Association.

Department of Energy

Nomination of Leslie J. Goldman To Be an Assistant Secretary. November 30, 1979

The President today announced that he will nominate Leslie J. Goldman, of Des Plaines, Ill., to be an Assistant Secretary of Energy. He would replace Harry Bergold, resigned, and his area of responsibility would be international affairs.

Goldman has been principal Deputy Assistant Secretary of Energy for International Affairs since earlier this year.

He was born April 22, 1945, in Chicago, Ill. He received a B.A. from the University of Michigan in 1967 and an LL.B. from the University of Michigan Law School in 1970.

From 1970 to 1977, Goldman was special counsel to Senator Adlai E. Stevenson. In 1977 he served as counsel to Spe-

cial Assistant to the President James R. Schlesinger, then as Assistant Administrator for Energy Resource Development at the Federal Energy Administration. From October 1977 to September 1979, he was principal Deputy Assistant Secretary of Energy for Policy and Evaluation.

Department of Health, Education, and Welfare

***Nomination of John A. Calhoun III To Be
Chief of the Children's Bureau.
November 30, 1979***

The President today announced that he will nominate John A. Calhoun III, of Belmont, Mass., to be Chief of the Children's Bureau at the Department of Health, Education, and Welfare. He would replace Blandina Cardenas Ramirez, who has resigned.

Calhoun is former commissioner of the Massachusetts Department of Youth Services, currently serving as an instructor at Harvard Graduate School of Education on a part-time basis.

He was born December 1, 1939, in Philadelphia, Pa. He received an A.B. from Brown University in 1962 and a Masters of Divinity from Episcopal Theological School in 1965.

From 1965 to 1966, Calhoun was an elementary schoolteacher in Philadelphia. From 1966 to 1970, he was with Action for Boston Community Development, where he served as director of the Job Corps, director of the New Careers program, director of the Summer Work and Cultural Enrichment programs, and director of the Manpower Program Development Department.

From 1970 to 1973, he was vice president of Technical Development Corp.,

where he worked on program development and administration in the field of corrections and technical assistance to various private and government agencies whose functions related to criminal justice. From 1971 to 1973, he was also director of the Court Resource Project.

From 1973 to 1976, Calhoun was executive director of the Justice Resource Institute, a nonprofit criminal justice reform agency which he helped found. He was commissioner of the Massachusetts Department of Youth Services from 1976 to 1979. He has been a part-time instructor at Harvard Graduate School of Education, teaching a course on "Delinquents, Schools and Families," since last August.

Calhoun has served as a consultant to numerous government and private agencies and is the author of a number of articles.

Conference on Security and Cooperation in Europe

***Statement on a Report on United States
Compliance With the Final Act.
November 30, 1979***

My administration is deeply committed to the cause of human rights both here and abroad. As a means to promote respect for fundamental freedoms and the development of a more peaceful, stable world, the United States attaches great significance to the Final Act of the Conference on Security and Cooperation in Europe. This document, signed in 1975 at Helsinki by the leaders of 33 European nations, Canada, and the United States, pledges its signers to work toward lowering barriers and improving cooperation between East and West. Each nation made solemn promises to take steps to improve the lives of its citizens. These obligations

required some adjustments in the foreign and domestic policies of all 35 nations.

I am extremely pleased that the U.S. Commission on Security and Cooperation in Europe has taken the lead in assessing U.S. implementation and identifying areas where American performance can be improved. The Commission's report, "Fulfilling Our Promises: The United States and the Helsinki Final Act"—released on November 8—is the first comprehensive review by any CSCE signatory which takes into account criticism from other Helsinki states as well as domestic observers.

CSCE signatory states which suppress human rights cannot in good conscience justify their record of compliance. But I believe our record of implementation has been second to none, even among the other democracies among the 35 participating states. American political history is testimony to the firm foundation of civil liberties enshrined in our own Constitution with its Bill of Rights, long before Helsinki.

As this report points out, our work is never complete. Our own traditions, reinforced by the Helsinki Final Act, pledge us to strive constantly for improvement in both domestic, civil, and economic rights, and in the expanded cooperation with other participating states. This report should go far to persuade other CSCE governments that the United States is serious about its obligations under the Helsinki accords.

I also hope that it will stimulate other Helsinki countries to undertake similar public assessments of their performance. Implementation of the Final Act is critical to peace and security in Europe and for our own Nation. We cannot permit the Helsinki agreement to become meaningless words on parchment. We must bring it to life, and I believe the CSCE

Commission has made a major contribution to that end.

Department of Transportation and Related Agencies Appropriation Act, 1980

*Statement on Signing H.R. 4440 Into Law.
November 30, 1979*

This bill, H.R. 4440, includes funding for the Interstate Commerce Commission. The ICC's regulation of trucking and railroads is a top item on the regulatory reform agenda for 1980. I have submitted far-reaching bills to Congress to cut away the regulations that overburden these industries. The Commission itself has launched administrative reform actions.

Chairman Howard Cannon of the Senate Commerce, Science and Transportation Committee and Harold Johnson and Jim Howard of the House Public Works and Transportation Committee recently announced that they intend to seek passage of trucking reform legislation by June 1, 1980. Therefore, they and their colleagues who wrote this appropriation bill have asked the ICC to continue building a record of reforms but not to implement any major policy changes before that date. The regulatory reform we need should best come through legislation, and I applaud the chairmen's determination to press forward. If, of course, appropriate legislation is not enacted, I would expect the Commission to proceed with all powers to implement reform initiatives.

As to rail reform, I congratulate Chairmen Cannon and Russell Long of the Senate Commerce Committee and Harley Staggers and James Florio of the House Interstate and Foreign Commerce Committee for moving legislation this session. I hope that the Congress will resist pres-

sure to weaken this measure by exempting specific commodities from the reforms. We cannot afford to accept only cosmetic change in rail regulation.

The existing trucking and railroad regulatory structures restrict competition, reduce efficiency, and increase costs. It is time for action, and I urge the Congress to pass meaningful trucking and railroad deregulation legislation.

NOTE: As enacted, H.R. 4440 is Public Law 96-131, approved November 30.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

November 25

The President returned to the White House from Camp David, Md.

November 26

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Frank B. Moore, Assistant to the President for Congressional Liaison;
- Vice President Walter F. Mondale.

November 27

The President met at the White House with:

- Dr. Brzezinski;
- the Democratic congressional leadership;
- Mr. Moore;
- Stansfield Turner, Director of Central Intelligence, and Dr. Brzezinski;
- Mrs. Carter, for lunch.

In a ceremony in the Oval Office, the President was presented with an award by representatives of Outdoor Life magazine for his activities on behalf of conservation.

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Vermont, Maine, and New Hampshire in the East Room at the White House.

The White House announced that the President has canceled his trip to Seattle, Wash., and Portland, Ore. The President regrets that the continuing situation in Iran requires the cancellation of the trip.

November 28

The President met at the White House with:

- Dr. Brzezinski;
- Representatives Jack Brooks of Texas and L. H. Fountain of North Carolina;
- Mr. Moore;
- James T. McIntyre, Jr., Director of the Office of Management and Budget.

The President transmitted to the Congress and to the Comptroller General copies of the reports issued by the United Nations Joint Inspection Unit during the first half of 1979.

The White House announced that Army Aide to the President, Maj. Jose A. Muratti, Jr., will represent the President at memorial services for Marine Corporal Steven J. Crowley, in Port Jefferson, New York. Corporal Crowley was killed during an attack on the American Embassy in Pakistan.

November 29

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of Health, Education, and Welfare

Patricia R. Harris, Secretary of Housing and Urban Development
Moon Landrieu, Secretary of Labor
Ray Marshall, Secretary of Transportation
Neil Goldschmidt, Charles L. Schultze, Chairman of the Council of Economic Advisers, Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, Alonzo L. McDonald, Jr., Assistant to the President, and Mr. McIntyre, to discuss domestic policies;

—Mr. Moore;

—Mr. McIntyre and other administration officials to review the fiscal year 1981 budget;

—Mayor-elect Bill Green of Philadelphia, Pa.

The President participated in a briefing by administration officials on the strategic arms limitation treaty given for community leaders from Iowa, Indiana, and Michigan in the East Room at the White House.

The President has designated John A. Knauss as Vice Chairman of the National Advisory Committee on Oceans and Atmosphere (NACOA). Knauss has been a member of NACOA since 1978. He is dean of the Graduate School of Oceanography at the University of Rhode Island.

The President has accorded John W. McDonald, Jr., the personal rank of Ambassador while he serves as United States Representative to the Third General Conference of the United Nations Industrial Development Organization (UNIDO). The conference is to be held in New Delhi, India, from January 20 to February 8, 1980.

November 30

The President met at the White House with:

—Dr. Brzezinski;

—Vice President Mondale, Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown, Hamilton Jordan, Assistant to the President, Hedley W. Donovan, Senior Adviser to the President, and Dr. Brzezinski;
—a group of mayors and county officials to discuss the fiscal year 1981 budget;

—Mr. Moore;

—Representative Charles B. Rangel of New York and a delegation from his congressional district.

The President attended the funeral mass at Arlington National Cemetery for Cpl. Steven J. Crowley.

The President transmitted to the Congress the Aggregate Report on Personnel for fiscal year 1979.

The President left the White House for a weekend stay at Camp David.

An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program, and for other purposes.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, December 7, 1979

Shah of Iran

White House Statement. December 2, 1979

The doctors at Cornell medical facility have told the Shah that he is able to leave the hospital in New York. They have indicated the Shah should not undertake a prolonged trip and that he needs a period of recuperation under medical supervision.

The United States Government has agreed for humanitarian reasons to provide a secure convalescent facility where he can recuperate pending further travel plans. The Shah is en route to Wilford Hall Air Force Hospital near San Antonio, Tex. At the Shah's request, the United States is continuing to assist in making arrangements for a permanent place of residence.

Architectural and Transportation Barriers Compliance Board

Appointment of 11 Members and Designation of Chairman. December 4, 1979

The President today announced the appointment of 11 persons as members of the Architectural and Transportation Barriers Compliance Board. They are:

PATRICK C. CASEY, of Taylor, Mich., a self-employed attorney;

DAVID F. CRUZ VELEZ, of Santurce, P.R., director of the Office of the Advisor of the Governor on the Comprehensive Development of the Handicapped;

CAROL A. GRANT, a rehabilitation counselor with the North Carolina Division of Vocational Rehabilitation and a former member of the North Carolina Governor's Study Committee on Architectural Barriers;

PAUL MULDAWER, of Atlanta, Ga., an award-winning architect and urban designer and member of HEW's National Advisory Committee on an Accessible Environment of the Architectural and Transportation Barriers Compliance Board;

KAY E. NEIL, of Omaha, Nebr., a retired businesswoman, former chairman of the Omaha Mayor's Advisory Committee on the Handicapped and the Nebraska Governor's Committee on the Employment of the Handicapped, now a member of the statewide Health Coordinating Council and honorary chairman of the Employment Advisory Council for the Handicapped;

WILLIAM A. PASSMORE, of Chicago, Ill., a job developer with the East Chicago Federal Programs Office, who was named Handicapped American of the Year in 1968 and is active in community affairs;

WILLIAM R. RALLS, of Okemos, Mich., an attorney and former chairman of the Michigan Rail Action Association;

WALTER H. RICHTER, director of government relations for Texas Electric Cooperatives, a former Texas State senator, and active in civic affairs;

MASON H. ROSE V, a city councilman and attorney in Rolling Hills, Calif., Chairman of the National Advisory Committee of the Architectural and Transportation Barriers Compliance Board;

ROBERT G. SAMPSON, of Arlington Heights, Ill., vice president and special assistant to the president of United Airlines, Inc., a member of People to People International Committee for the Handicapped and its affiliate, Disabled Professionals;

HALE J. ZUKAS, coordinator for community affairs and cofounder of the Center for Independent Living in Berkeley, Calif., an organization working with the disabled community there.

The President also announced the designation of Veterans Affairs Administrator Max Cleland as Chairman of this Board.

1980 Democratic Presidential Nomination

*Remarks Announcing Candidacy.
December 4, 1979*

I speak to you this afternoon at a somber time. Fifty Americans continue to be held captive in Iran, hostages of a mob and a government that have become one and the same. This crisis, precipitated by this unlawful and unprecedented act, has demanded my closest attention since the first moment that it began.

But the process of democratic self-government is the heart of our liberties and our strength, and it must go forward. Every 4 years, in good times and in bad, in times of peace and in times of war, in times of crisis and in times of calm, the American people elect a President. So it has been since 1789, and so it will be in 1980.

For the last month, I have curtailed my political activities, and I would have preferred to postpone this announcement

until a later time. However, election laws in certain States require formal declarations of candidacy within the next few days.

Therefore, I formally declare that I am a candidate for reelection as President of the United States of America.

I intend to be renominated by the Democratic Party, and I intend to ask the Democratic Convention to renominate the most effective Vice President in the history of the United States—Walter Mondale. We intend to lead the Democratic Party to victory next year, and we also intend to lead the Nation in continuing the good work which all of us have begun together.

As President, I have had to make some very difficult decisions, and I expect to make some more. I've made some mistakes, and I have learned from them. I've fought some bitter fights against selfish special interests, and I expect to go on leading the fight for the common good of the American people. I carry some scars, and I carry them with pride.

I also carry the knowledge, strengthened by my own experience in this office, that the greatness of our Nation and the goodness of the American people will prevail. We've set a firm and constructive course for the history of our people. It is a difficult course, but it's a right one and we must not turn aside.

The course of a great nation is not changed overnight. The problems we face are very difficult. There are no easy solutions, and I promise none. But there are solutions.

In the past 3 years, the United States has begun to move in a new and better direction. We are a strong nation. We are a nation at peace. We are enhancing our nation's security. We are improving social and economic justice, and we are leading

the struggle for human rights throughout the world.

Our superb system of government and our great natural and human resources give us the strength and the flexibility to meet rapidly changing times. The world of the 1980's will be as different from the world of 1960 as 1960 was from the world of the 1930's. As we enter the next decade, the work that we've begun together will let us meet even the most serious challenges. What we do now will bring us safely and at an even better time of peace and security, if we have the determination to see it through and if we have the courage to continue making the hard decisions.

In these difficult times, our greatest single ally is the truth. As President and as a candidate, I will continue to ask you to join me in looking squarely at the truth. I will continue to talk sense to the American people. Only by facing up to the world as it is can we lift ourselves toward a better future. There is no such thing as cheap energy, and never will be; that is the truth. We cannot wish our way out of inflation; that is the truth. We cannot spend our way out of every problem; that is the truth. We cannot toss aside a generation's work, patient work in the control of nuclear power, nuclear explosives, nuclear bombs; and that is the truth. We cannot have peace without a strong defense; that is also the truth.

If we act together in the unifying spirit of our deep and unchanging values, we can triumph together, and that is the most important truth of all.

With the support of the American people, I propose to carry on the struggle

for a secure nation, for a just society, and for a peaceful world—and I intend to carry on this struggle as President of the United States.

Thank you very much.

NOTE: The President spoke at 2:32 p.m. in the East Room at the White House to members of the President's family, the Cabinet, the White House and Carter/Mondale Presidential Committee staffs, and campaign volunteers.

1980 Democratic Presidential Nomination

Remarks Concerning Candidacy and Campaign Plans. December 2, 1979

Good evening.

Today I announced my candidacy for reelection, and so I speak to you tonight as President of the United States of America and also as a candidate. This is a paid political statement, but it is not a campaign speech.

Our American political system—one of the great miracles in the history of civilized human activity—runs on a schedule. My announcement could not be postponed. In just a few days, those who would enter early State primary contests must file as candidates, and then those of us who run for President must stand before the people for election.

During the campaign, we will take our record to you—what we have done in the past and what we propose for our Nation's future. We will be talking about a nation strong and at peace, about our demonstrated willingness to face tough problems with courage, about jobs provided for our people, and about restoring

a sense of trust and confidence in our own Government.

With calm, strong, and effective leadership, with a prosperous and expanding economy, with inflation and energy shortages behind us, with people believing again, we can set our course for the kind of future about which we have all dreamed. I will discuss these themes with you, and I will do it effectively, but I will not do it tonight.

I was scheduled tomorrow to begin a week-long political tour to set the tone of the reelection campaign for 1980. It was also, to be frank about it, a money-raising trip. While there are certain clear advantages to campaigning as President, they are symbolic and historic rather than financial. The President, like all other candidates, needs campaign contributions.

My campaign travels must be, for a time, postponed. I must remain here, near the White House, because of the situation in Iran. While the crisis continues, I must be present to define and to lead our response to an ever-changing situation of the greatest sensitivity and importance.

I am proud—but not surprised—at the quiet unity of the American people over the past 4 weeks as we have faced this outrageous situation together. Not since Pearl Harbor, some 40 years ago, have we felt such a nationwide surge of determination and mutual purpose. But I must warn you that this crisis may not be resolved easily or quickly. It is possible that in the days ahead, our patience and sense of unity may waver as frustration builds up among us. I am determined to do everything I can to have the hostages released as soon as possible.

At the height of the Civil War, President Abraham Lincoln said, "I have but one task, and that is to save the Union."

Now I must devote my concerted efforts to resolving the Iranian crisis. The overriding fact is that 50 of our fellow Americans have been unjustifiably thrust into agony and danger, and I have a personal responsibility to get them out of that danger as fast as possible.

During this crisis I will, of course, continue to perform the many other tasks that are part of my job as President. And though I cannot yet campaign, myself, we will carry out our campaign duties as best we can under the circumstances. Vice President Mondale, my wife, Rosalynn, and members of my family, and other friends and supporters across the Nation will have to replace me until I can be on the campaign trail myself. Until then, I need your understanding, your help, and your support.

Thank you, and good night.

NOTE: The President's remarks were videotaped on December 2 in the Map Room at the White House for broadcast on December 4 on the CBS television network. Time for the broadcast was purchased by the Carter/Mondale Presidential Committee.

As printed above, the item follows the transcript of the remarks, which was released on December 4.

American Hostages in Iran

*Remarks by the Vice President on the Treatment of the Hostages.
December 5, 1979*

Over the past several weeks, we have been hearing a drumfire of propaganda out of Tehran, some of it from people calling themselves students, some of it from the government-controlled radio and television in Iran, and some of it from various officials or people in authority. The message is very clear. It says over and over that the world and the American people should ignore the hos-

tages, forget about the innocent people bound hand and foot, overlook the continued outrage to law and standards of human behavior. We are told to forget all that and focus on the hatred of one man. We are not going to forget, and the American people are not going to get their priorities confused.

How are our hostages being treated? The facts are there for all to see, and the simple fact is that 50 human beings are being held at inhuman conditions, contrary to all civilized standards, in order to prove a political point. They are not permitted regular visitors. They are isolated and not allowed to speak, except to their captors. As far as we know, the hostages have not been allowed to receive mail or messages. There has never been a systematic accounting of the numbers and welfare of the hostages.

The so-called students have not permitted any outside observers even to see these people for 10 days. They are refusing to let international organizations, such as the Red Cross, into the compound. They refuse visits by religious organizations. They refuse representatives of neutral states. Even prisoners of war are guaranteed certain standards of human treatment. But these standards are being dragged in the dirt every day by a group of kidnapers, with the acquiescence of the government.

We are hearing daily propaganda about the alleged crimes of our people in Tehran, most of whom volunteered to serve their country at a difficult and dangerous time. We are not and will not respond to that propaganda.

I would note that one of those being held as a so-called spy in Tehran is, in fact, a private American citizen who simply happened to be visiting the Embassy on business at the time of the attack on

November 4. It was many days before we even learned, indirectly, that he was being held. That man, like the rest, has now been held for 31 days—tied up, denied contact with his family, denied exercise, denied access even to the comfort of religion.

We hear a great deal about the crimes of the Shah, but that is not the issue. The issue which disturbs the American people is that 50 of our fellow citizens are being abused, in violation of international law. These are our brothers and sisters.

Yesterday, the United Nations Security Council passed a resolution which called—as the first most important priority, as it should—for the release of the American hostages. That is the issue. It is the only issue, and we're not going to forget they must be set free.

NOTE: The Vice President spoke at 12:01 p.m. to reporters assembled in the Briefing Room at the White House.

Commission on Proposals for the National Academy of Peace and Conflict Resolution

*Appointment of Three Members.
December 5, 1979*

The President has appointed three persons as members of the Commission on Proposals for the National Academy of Peace and Conflict Resolution. They are:

ARTHUR H. BARNES, president of the New York Urban Coalition and vice president of the Institute for Mediation and Conflict Resolution, a private, nonprofit organization that mediates community disputes and teaches the techniques of mediation, negotiation, and arbitration;

ELISE BOULDING, a professor of sociology at the Institute of Behavioral Science at the University of Colorado, an expert, lecturer, and writer in the field of peace research;

JAMES HOWARD LAUE, director of the Center for Metropolitan Studies at the University of Missouri—St. Louis, an expert in the field of conflict resolution, especially as it applies to community conflict of all types.

This Commission was created by Public Law 95-561 on November 1, 1978, to determine the feasibility of establishing a National Academy of Peace and Conflict Resolution to assist the Federal Government in accomplishing the goal of promoting international peace.

President's Cancer Panel

Appointment of Two Members and Designation of Chairman. December 5, 1979

The President today announced the appointment of two persons as members of the President's Cancer Panel. They are:

Bernard Fisher, director of oncology and professor of surgery at the University of Pittsburgh and a specialist in breast cancer. Fisher serves on several committees of the National Cancer Institute and is on the editorial boards of a number of journals on cancer.

Joshua Lederberg, president of the Rockefeller University in New York City, an expert in genetics, and winner of the 1958 Nobel Prize in medicine for studies on the organization of the genetic material in bacteria. Lederberg has also been designated Chairman of the President's Cancer Panel.

Fiscal Assistance to State and Local Governments

White House Statement on the House Government Operations Committee's Approval of Legislation. December 5, 1979

The House Government Operations Committee today reported, by a vote of

27 to 12, legislation that would provide countercyclical aid to State and local governments and targeted fiscal assistance to the most distressed cities and counties. The bill was introduced by the leadership of the House Government Operations Committee and is supported by the administration.

The legislation would provide up to \$1 billion to State and local governments if the economy goes into a recession. It also would provide \$250 million to cities and counties that experience high unemployment. The legislation would provide essential aid to most needy cities, counties, and rural towns, and help them maintain essential police, fire, and sanitation services, and prevent layoffs of essential employees.

The President expressed his appreciation to Chairman Jack Brooks and Chairman L. H. Fountain for their cooperation and fine work on this legislation and his hope that the legislation will move quickly through the House Rules Committee and the House floor, so that the Congress can complete action on this legislation by the end of this year.

United Nations

Nomination of H. Carl McCall To Be Alternate U.S. Representative for Special Political Affairs. December 6, 1979

The President today announced that he will nominate H. Carl McCall, of New York City, to be the Alternate Representative of the United States for Special Political Affairs in the United Nations, with the rank of Ambassador. He would replace Richard Petree, who has been appointed Deputy U.S. Representative in the Security Council.

McCall is a New York State senator. He was born October 17, 1935, in Boston, Mass. He received an A.B. from Dart-

mouth College in 1958 and an M. Div. from Andover Newton Theological School in 1963. He served in the U.S. Army in 1959.

From 1965 to 1972, McCall was project director for the Taconic Foundation. From 1967 to 1968, he was deputy administrator of the New York City Human Resources Administration. From 1971 to 1975, he was executive director of the Florence and John Schumann Foundation. He has been a New York State senator since 1974.

McCall is an ordained minister of the United Church of Christ and a preaching minister at Metropolitan Community United Methodist Church in Harlem. He is secretary for the Urban Church of the United Church of Christ and serves as a consultant to the Ministerial Interfaith Association of Harlem.

McCall is chairman of the New York City Council Against Poverty, the Citizen's Voter Education Committee of New York State, the editorial board of the New York Amsterdam News, and the National Association of Minority Broadcasters. He is president of Inner City Broadcasting Corp. and serves on the advisory board of the African American Institute.

Aid for Kampucheans

White House Statement. December 6, 1979

Starvation still threatens millions of Cambodian lives, despite a massive international relief effort. This sad reality is due to no failure of global concern. The international community has offered the means and has the will to allay the suffering of the Cambodian people.

Growing quantities of food and medical supplies are now reaching that country, but too often the relief cannot get through

to those in need. Instead, the flow of aid is deliberately blocked and obstructed by the Vietnamese and Heng Samrin authorities. Their Soviet allies have not brought any discernible influence to bear to alleviate the situation, while supporting Vietnam heavily.

—Relief supplies are piling up in Phnom Penh and other points of initial delivery, because local and Vietnamese authorities continually change or delay agreed arrangements for distribution.

—Taxes and tariffs are collected on the delivery of relief supplies—in effect, imposing a surcharge on human survival.

—We continue to receive reports that relief supplies are diverted or stockpiled for the use of military forces and that what distribution does take place is skewed to favor officials and supporters of the Heng Samrin regime.

—There is even interference with the attempts of the Kampuchean people to feed themselves. For example, refugees have reported the mining of rice fields to prevent a harvest.

In the face of widespread human anguish, this delay and diversion of humanitarian efforts is unconscionable.

As many as 2 million Cambodians may have died under the brutal Pol Pot regime. Now, in the wake of a Vietnamese invasion and occupation of Cambodia, the long-suffering people of that country face a new wave of oppression, hunger, and disease.

To counter this mounting tragedy, we call upon responsible leaders in both Hanoi and Moscow to recognize and act upon the compelling humanitarian requirements of the Cambodian people—which they thus far have not done. We call on them to cooperate fully with the international community in opening all routes for supplies to enter Cambodia—which they thus far have not done. We

call on them to take the steps necessary to speed the distribution of humanitarian aid to starving people throughout all parts of that country—which they thus far have not done. We call on them not to feed the flames of war, but use aircraft and airfields to ferry food to feed the people of Kampuchea.

Bill of Rights Day, Human Rights Day and Week, 1979

Proclamation 4705. December 6, 1979

*By the President of the United States
of America*

A Proclamation

On December 15, 1791, the Bill of Rights became part of the Constitution of the United States. On December 10, 1948, the United Nations General Assembly adopted the Universal Declaration of Human Rights. In marking these anniversaries, we renew our dedication both to our own liberties and to the promotion of human rights everywhere on earth.

In our open society, a freely elected government, an independent judiciary, a free and vigorous press, and the vigilance of our citizens combine to protect our rights and liberties—civil, political, economic and social.

We can be proud of what we have achieved so far. Yet we cannot rest satisfied until the Bill of Rights is a living reality for every person in the United States. The Equal Rights Amendment would help do that by explicitly guaranteeing the basic rights of American women. I urge every state that has not yet done so to ratify this wise and necessary measure in the coming year.

The Universal Declaration of Human Rights sets global standards that reflect the same vision that inspired our own Bill of Rights. Almost every country has endorsed the Declaration. Yet in too much of the world its promise is mocked.

Arbitrary arrest and imprisonment, summary executions and torture, disappearances and acts of genocide still shatter the lives of millions. Fundamental human liberties are continually threatened by the silencing of political dissenters, by discrimination based on race, religion, ethnic origin and sex, by violations of the freedoms of assembly, association, expression and movement, and by the suppression of trade unions. And as the kidnapping and abuse of American Embassy employees in Iran have reminded us, the internationally protected rights of diplomatic envoys are a basic condition of civilized relations among nations.

Those who cause others anguish—whether they are the secret police of dictators, the faceless bureaucrats of totalitarian states or the chanting mobs of revolutionary zealots—must know that we will not defend them, but their victims.

Bill of Rights Day and Human Rights Day and Week should be marked by redoubled support for international efforts on behalf of the full range of human rights.

I renew my request to the Senate to give its advice and consent to the Genocide Convention, the Convention on the Elimination of all Forms of Racial Discrimination, the Covenant on Civil and Political Rights, the Covenant on Economic, Social and Cultural Rights, and the American Convention on Human Rights. I commend the Senate Foreign Relations Committee for holding hearings on these treaties, and I urge all Americans to support their ratification.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim December 10, 1979, as Human Rights Day and December 15, 1979, as Bill of Rights Day, and call on all Americans to observe Human Rights Week beginning December 10, 1979. Let us rededicate ourselves to promoting the ideals embodied in the Bill of Rights and the Universal Declaration so that, one day, they will be enjoyed by all peoples of the world.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of December, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 10:45 a.m., December 7, 1979]

Department of Education

Remarks at the Swearing In of Shirley Hufstедler as Secretary. December 6, 1979

THE PRESIDENT. This is a good day for our Nation. Many people look around us in this great country, and we see the notable achievements that have benefited our own lives in so many varied ways that we tend to give credit to diverse reasons for the great achievements of America: that we've started out in a land that was unexplored, without knowing what our natural resources were, with the most heterogeneous population, I guess, of any nation on Earth—widely diverse motivations and interests and backgrounds, religions, beliefs, languages, great challenges, all too frequent wars, racial problems. And still, in spite of all those

obstacles, our Nation has been the greatest of all.

We've overcome obstacles, and we've answered questions, and we've solved problems, and we've made progress, because our people have always believed in good education. It's let us transcend potential language barriers and the barriers of communication. It's let us explore the frontiers of knowledge to learn about the world around us, to stretch our hearts and minds to people throughout the world, and to bind ourselves together in a spirit of unity of purpose and understanding.

We still have a long way to go in providing a quality education for all American people. I promised you in my own campaign more than 3 years ago, that if I was elected President that one of my goals would be to establish a separate Department of Education, to give it a high profile in Government, to let it have a single purpose which would focus the attention of the Nation on unmet needs and potential ways to resolve and to meet those needs.

At the same time, a department must encompass a wide gamut of opportunities for learning. And as I've sought around the last 3 or 4 months for a person to be the first Secretary of Education in our Nation, I was very grateful to be able to induce Judge Shirley Hufstедler to take over this job. She's a person who has a wide range of interests herself. She's a person of character. She is strong. She has a breadth of experience and background in education and scholarship that will stand her in good stead in this difficult achievement.

She has demonstrated a feeling of compassion for those who need help in our society, and she has sound and good judgment. She's interested in colonial Williamsburg. She's interested in jet propul-

sion. She's interested in good symphony orchestras. She's interested in teaching ethics to young people. She's interested in a fine quality of justice in the court system of our country. She believes in excellence, and she believes in the value of individual human beings, and she sees education as a means of binding all these varied interests, purposes, and opportunities together.

I've talked to Shirley about this opportunity and the fact that the classroom is just one place among many where Americans can constantly expand their educational opportunities—also, of course, in the museums, in the concert halls, through the public media, in the workplace, in libraries, and in the encounters among Americans themselves.

We have tried to improve education in our Nation from the Federal level, recognizing that the encroachment in the decisionmaking process for the management of schools, the establishment of curriculum, the choosing of persons to teach and to administer ought to be entirely a local and a State responsibility. But the Federal Government has a role to play. We've had a greater increase in Federal aid to the educational system than any other administration ever, in the period of 3 years that I've been in office. That's just part of the problem and the opportunity.

I'm very glad now to introduce to you Judge Shirley Hufstедler, who will be the first Secretary of Education. She started out herself in the career as a secretary. She then taught part-time, typing. She taught shorthand. She taught English. She taught music. And now, she is becoming a secretary once again. [Laughter] Having completed that full circle, I know she'll be eager to address you now.

Judge Shirley Hufstедler.

JUDGE HUFSTEDLER. *Mr. President,*

Mr. Chief Justice, Mrs. Carter, members of my dear beloved extended family, colleagues, friends of education:

It is, of course, for me, a glorious day. It is for education an event of great visibility in the creation of the Department of Education. But the beginnings of today involve many people and many things, but most of all it began with an idea, an idea by which the values of the United States and the meaning of education for every person could be demonstrated to the country and to the world through the creation of an equal partnership at the Cabinet level for the Department.

Ideas, like children, can never reach their full potential without faith, without love, without determination, and without nurturing. This Department could not have happened and that idea could not be well begun unless the administration created a climate in which that nourishment could occur.

But even with the nurturing strength of the administration for education, the idea could not have grown this far but for the thoughtful cooperation of myriads of people in this country—on the Hill, in the communities, among scholars, among leaders—to make it happen. This Department can never nourish the idea of education unless those who were against the idea and those who were for it will come together in a spirit of cooperation to make all these ideas come true.

I would hope, Mr. President, that we can see new coalitions, new hope, new faith, new charity, and new dedication to the concept of education. In the words of George Washington, "Let us raise a standard." And the standard, if you please, that I would like each of you—and all the people who cannot be here, but who are represented by each of you—

to raise the standard to say, "Let this not simply be a country with freedom and justice; let us be a country of freedom, justice, and quality education for all."

NOTE: The President spoke at 3 p.m. in the East Room at the White House. Chief Justice of the United States Warren E. Burger administered the oath of office to Judge Hufstедler following her remarks.

International Trade Functions

Executive Order 12175. December 7, 1979

REORGANIZATION OF FUNCTIONS RELATING TO INTERNATIONAL TRADE

By the authority vested in me as President of the United States of America by Section 9 of Reorganization Plan No. 3 of 1979 (transmitted to the Congress on September 25, 1979), the time period prescribed by Section 906 of Title 5 of the United States Code having elapsed without the adoption of a resolution of disapproval by either House of Congress, it is hereby ordered that Section 2(b)(1) of that Plan, establishing the Office of Deputy Secretary of Commerce, is effective immediately.

President's Commission on the Coal Industry

Executive Order 12176. December 7, 1979

By the authority vested in me as President by the Constitution of the United

States of America, and in order to extend the time for the President's Commission on the Coal Industry to complete its report, Sections 1-401 and 1-402 of Executive Order No. 12103 of December 14, 1978 are hereby revised to read as follows:

"1-401. The final report required by section 1-202 of this Order shall be transmitted no later than March 15, 1980.

"1-402. The Commission shall terminate on March 15, 1980."

Meetings With Prime Minister Odvar Nordli of Norway and Prime Minister Andreas van Agt of the Netherlands

White House Statement. December 7, 1979

In separate meetings this morning, the President met with the Prime Minister of Norway, Odvar Nordli, and the Prime Minister of the Netherlands, Andreas van Agt. These meetings were undertaken at the request of the two Prime Ministers; the requests were separate, and the Prime Ministers met with the President separately.

The President discussed with both leaders the forthcoming NATO Alliance decisions on TNF modernization and arms control. Both leaders conveyed their Governments' views, and the President made clear the importance he attaches to the forthcoming decisions and to an Alliance consensus.

President's Commission on the Accident at Three Mile Island

Remarks Announcing Actions in Response to the Commission's Report. December 7, 1979

The purpose of this brief statement this afternoon is to outline to you and to the public, both in this country and in other nations of the world, my own assessment of the Kemeny report recommendations on the Three Mile Island accident. And I would like to add, of course, in the presentation some thoughts and actions of my own.

I have reviewed the report of the Commission, which I established to investigate the accident at the Three Mile Island nuclear powerplant. The Commission, headed by Dr. John Kemeny, found very serious shortcomings in the way that both the Government and the utility industry regulate and manage nuclear power.

The steps that I am taking today will help to assure that nuclear powerplants are operated safely. Safety, as it always has been and will remain, is my top priority.

As I've said before, in this country nuclear power is an energy source of last resort. By this I meant that as we reach our goals on conservation, on the direct use of coal, on development of solar power and synthetic fuels, and enhanced production of American oil and natural gas—as we reach those goals, then we can minimize our reliance on nuclear power.

Many of our foreign allies must place much greater reliance than we do on nuclear power, because they do not have the vast natural resources that give us so many alternatives. We must get on with the job of developing alternative energy resources, and we must also pass, in order to do this, the legislation that I have proposed to the Congress in making an effort, at every level of society, to conserve energy. To

conserve energy and to develop energy resources in our country are the two basic answers for which we are seeking. But we cannot shut the door on nuclear power for the United States.

The recent events in Iran have shown us the clear, stark dangers that excessive dependence on imported oil holds for our Nation. We must make every effort to lead this country to energy security. Every domestic energy source, including nuclear power, is critical if we are to be free as a country from our present overdependence on unstable and uncertain sources of high-priced foreign oil.

We do not have the luxury of abandoning nuclear power or imposing a lengthy moratorium on its further use. A nuclear powerplant can displace 35,000 barrels of oil per day, or roughly 13 million barrels of oil per year. We must take every possible step to increase the safety of nuclear power production. I agree fully with the letter and the spirit and the intent of the Kemeny commission's recommendations, some of which are within my own power to implement, others of which rely on the Nuclear Regulatory Commission, or the NRC, or the utility industry itself.

To get the Government's own house in order, I will take several steps. First, I will send to the Congress a reorganization plan to strengthen the role of the Chairman of the NRC, to clarify assignment of authority and responsibility, and provide this person with the power to act on a daily basis as a chief executive officer with authority to put needed safety requirements in place and to implement better procedures. The Chairman must be able to select key personnel and to act on behalf of the Commission during any emergency.

Second, I intend to appoint a new Chairman of the Nuclear Regulatory Commission, someone from outside that

agency, in the spirit of the Kemeny commission's recommendation. In the meantime, I've asked Commissioner Ahearne, now on the NRC, to serve as the Chairman. Mr. Ahearne will stress safety and the prompt implementation of the needed reforms.

In addition, I will establish an independent advisory committee to help keep me and the public of the United States informed of the progress of the NRC and the industry in achieving and in making clear the recommendations that nuclear power will be safer.

Third, I'm transferring responsibility to the Federal Emergency Management Agency, the FEMA, to head up all off-site emergency activities and to complete a thorough review of emergency plans in all the States of our country with operating nuclear reactors by June 1980.

Fourth, I have directed the Nuclear Regulatory Commission and the other agencies of the Government to accelerate our program to place a resident Federal inspector at every reactor site.

Fifth, I'm asking all relevant Government agencies to implement virtually all of the other recommendations of the Kemeny commission—I believe there were 44 in all. A detailed fact sheet is being issued to the public, and a more extended briefing will be given to the press this afternoon.

With clear leadership and improved organization, the executive branch of Government and the NRC will be better able to act quickly on the crucial issues of improved training and standards, safety procedures, and the other Kemeny commission recommendations. But responsibility to make nuclear power safer does not stop with the Federal Government. In fact, the primary, day-by-day responsibility for safety rests with utility company management and with suppliers

of nuclear equipment. There is no substitute for technically qualified and committed people working on the construction, the operation, and the inspection of nuclear powerplants.

Personal responsibility must be stressed. Some one person must always be designated as in charge, both at the corporate level and also at the powerplant site. The industry owes it to the American people to strengthen its commitment to safety.

I call on the utilities to implement the following changes. First, building on the steps already taken, the industry must organize itself to develop enhanced standards for safe design, operation, and construction of plants. Second, the nuclear industry must work together to develop and to maintain in operation a comprehensive training, examination, and evaluation program for operators and for supervisors. This training program must pass muster with the NRC through accreditation of the training programs to be established. Third, control rooms in nuclear powerplants must be modernized, standardized, and simplified as much as possible to permit better informed decisionmaking among regular operating hours and, of course, during emergencies.

I challenge our utility companies to bend every effort to improve the safety of nuclear power.

Finally, I would like to discuss how we manage this transition period during which the Kemeny recommendations are being implemented. There are a number of new nuclear plants now awaiting operating licenses or construction permits. Under law, the Nuclear Regulatory Commission is an independent agency. Licensing decisions rest with the Nuclear Regulatory Commission, and, as the Kemeny commission noted, it has the authority to proceed with licensing these plants on a case-by-case basis, which may be used as

circumstances surrounding a plant or its application dictate.

The NRC has indicated, however, that it will pause in issuing any new licenses and construction permits in order to devote its full attention to putting its own house in order and tightening up safety requirements. I endorse this approach which the NRC has adopted, but I urge the NRC to complete its work as quickly as possible and in no event later than 6 months from today. Once we've instituted the necessary reforms to assure safety, we must resume the licensing process promptly so that the new plants we need to reduce our dependence on foreign oil can be built and operated.

The steps I'm announcing today will help to ensure that our safety has the safety of nuclear plants. Nuclear power does have a future in the United States. It's an option that we must keep open. I will join with the utilities and their suppliers, the Nuclear Regulatory Commission, the executive departments and agencies of the Federal Government, and also the State and local governments to assure that the future is a safe one.

And now Dr. Frank Press, Stu Eizenstat, and John Deutch will be glad to answer your questions about these decisions and about nuclear power and the future of it in our country. Frank?

NOTE: The President spoke at 2:45 p.m. in Room 450 of the Old Executive Office Building.

Following the President's remarks, Frank Press, Director of the Office of Science and Technology Policy, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Under Secretary of Energy John M. Deutch held a news conference on the announcements.

Department of State

Nomination of Deane R. Hinton To Be an Assistant Secretary. December 7, 1979

The President today announced that he will nominate Deane R. Hinton, of Chicago, Ill., to be an Assistant Secretary of State. He would replace Julius L. Katz, resigned, and his area of responsibility would be economic and business affairs.

Hinton has been United States Representative to the European Communities, with the rank of Ambassador Extraordinary and Plenipotentiary, since 1975.

He was born March 12, 1923, in Missoula, Mont. He received an A.B. from the University of Chicago in 1943. He served in the U.S. Army from 1943 to 1945.

Hinton joined the Foreign Service in 1946 and was posted in Damascus, Mombasa, Paris, and at the State Department. He was Chief of Overseas Development and the Finance Section at USEC in Brussels from 1958 to 1961. He attended the National War College in 1961-62.

From 1962 to 1963, Hinton was Chief of the Commodity Programming Division at the Bureau of Economic Affairs. From 1963 to 1967, he was Director of the Office of Atlantic Political-Economic Affairs in the Bureau of European Affairs. From 1967 to 1971, he was Director of the USAID mission and counselor for economic affairs in Guatemala, then in Santiago.

From 1971 to 1973, Hinton was detailed to the White House as Deputy Executive Director of the Council on International Economic Policy. He was Ambassador to the Republic of Zaire from 1974 to 1975. In 1975 he served as senior adviser to the Under Secretary of State for Economic Affairs.

American Hostages in Iran

*Remarks to State Department Employees.
December 7, 1979*

. . . in the last 30 days has been not only the support and understanding and patience of the American people and the strength of the hostages' families but also the superb work of the State Department and all of you, who I know have put in many extra hours, prayers, and extra commitments to help protect the lives and the safety of our hostages.

The most important single message that I can give to you is this: As far as I am concerned, as far as the State Department is concerned, as far as our Nation is concerned, there is one issue, and that is the early and the safe release of the American hostages from their captors in Tehran. And it's important for us to realize that from the very first hour of the captivity of our hostages by a mob, who is indistinguishable from the Government itself, that has been our purpose. And we have tried to restrain every other nation and the United Nations and the people in our own country from confusing the issues.

At this time, I am not interested in trying to resolve whether or not the Shah was a good or bad leader or the history of Iran. I'm not trying to interfere in the Government of Iran or the inclination of the people there, and we do not want to confuse the issue by injecting these extraneous questions or debates into the present situation. When that does happen, in my opinion, it delays the day when we will see the American hostages come home.

I am not going to take any military action that would cause bloodshed or arouse the unstable captors of our hostages to attack them or to punish them. I'm going to be very moderate, very cautious, guided and supported and ad-

vised by Secretary Vance. Our purpose is to get the hostages home and get them safe. That's my total commitment, and I know you join with me as full partners in this effort.

Just one other comment: I'm not trying to be presumptuous in speaking for them, but there's no doubt in my mind that every hostage and every person who loves those hostages, not just the families but 220 million American people, thank you—working with Secretary Vance and all those in this Department—for the superb work that you have done in ensuring, so far, the safety in which I am confident and which I pray every moment of my life will be successful in getting our hostages home where they belong.

Thank you very much.

NOTE: The President spoke at 4:20 p.m. in the lobby at the State Department. Prior to his remarks, the President and Secretary of State Cyrus R. Vance met with members of the families of the hostages in the Benjamin Franklin Room.

The press release does not include the President's opening remarks.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

December 1

The President declared a major disaster for the Marshall Islands of the Trust Territory of the Pacific Islands as a result of sea wave action and flooding, beginning on or about November 26, which caused extensive public and private property damage.

Administration of Jimmy Carter, 1979

—Vice President Mondale, Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown, Lloyd N. Cutler, Counsel to the President, Dr. Brzezinski, and Mr. Donovan;

—Mr. Moore;

—Members of the House of Representatives to discuss the energy security corporation legislation;

—a group of Governors and State legislators to discuss the fiscal year 1981 budget.

The President participated in a briefing on the administration's programs and policies given for civic and community leaders from Virginia in the East Room at the White House.

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted December 3, 1979

LESLIE J. GOLDMAN, of Illinois, to be an Assistant Secretary of Energy (International Affairs), vice Harry E. Bergold, Jr., resigned.

IRA M. SCHWARTZ, of Washington, to be Associate Administrator of Law Enforcement Assistance, vice John M. Rector, resigned.

JOHN A. CALHOUN III, of Massachusetts, to be Chief of the Children's Bureau, Department of Health, Education, and Welfare, vice Blandina Cardenas, resigned.

HELEN JACKSON FRYE, of Oregon, to be United States District Judge for the District of Oregon, vice a new position created by P.L. 95-486, approved October 20, 1978.

JAMES ANTHONY REDDEN, JR., of Oregon, to be United States District Judge for the District of Oregon, vice a new position created by P.L. 95-486, approved October 20, 1978.

NOMINATIONS—Continued

Submitted December 3—Continued

OWEN M. PANNER, of Oregon, to be United States District Judge for the District of Oregon, vice Otto R. Skopil, Jr., elevated.

BARBARA J. ROTHSTEIN, of Washington, to be United States District Judge for the Western District of Washington, vice a new position created by P.L. 95-486, approved October 20, 1978.

Submitted December 6, 1979

H. CARL MCCALL, of New York, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

THOMAS EUGENE STELSON, of Georgia, to be an Assistant Secretary of Energy (Conservation and Solar Applications), vice Omi Gail Walden, resigned.

HARRY T. EDWARDS, of Michigan, to be United States Circuit Judge for the District of Columbia Circuit, vice David L. Bazelon, retired.

Submitted December 7, 1979

DEANE R. HINTON, of Illinois, a Foreign Service Officer of the class of Career Minister, to be an Assistant Secretary of State.

EARL BEN GILLIAM, of California, to be United States District Judge for the Southern District of California, vice a new position created by Public Law 95-486, approved October 20, 1978.

CHECKLIST OF WHITE HOUSE PRESS RELEASES

The following listing contains releases of the White House Press Office which are not included in this issue.

Released December 1, 1979

Announcement: nomination of Helen Jackson Frye to be United States District Judge for the District of Oregon

Announcement: nomination of James Anthony Redden, Jr., to be United States District Judge for the District of Oregon

Announcement: nomination of Owen M. Panner to be United States District Judge for the District of Oregon

Administration of Jimmy Carter, 1979

CHECKLIST—Continued

Released December 1—Continued

Announcement: nomination of Barbara J. Rothstein to be United States District Judge for the Western District of Washington

Released December 4, 1979

Advance text: remarks announcing candidacy for the 1980 Democratic Presidential nomination

Released December 5, 1979

Announcement: nomination of Harry T. Edwards to be United States Circuit Judge for the District of Columbia Circuit

Released December 6, 1979

Announcement: nomination of Earl Ben Giliam to be United States District Judge for the District of Columbia Circuit

Released December 7, 1979

Statement: actions in response to the report of the President's Commission on the Accident at Three Mile Island (as announced in the President's remarks in Room 450 of the Old Executive Office Building)

Fact sheet: the President's response to the recommendations of the President's Commission on the Accident at Three Mile Island

**ACTS APPROVED BY
THE PRESIDENT**

Approved December 5, 1979

S. 1686----- Public Law 96-134
An act to designate the building known as the Federal Building in Wilmington, Delaware, as the "J. Caleb Boggs Building".

H.R. 1885----- Public Law 96-135
An act to amend Civil Service retirement provisions as they apply to certain employees of the Bureau of Indian Affairs and of the Indian Health Service who are not entitled to Indian employment preference and to modify the application of the Indian employment preference laws as it applies to those agencies.

S. 132----- Private Law 96-19
An act for the relief of Dirk Vierkant.

S.151----- Private Law 96-20
An act for the relief of Jerry W. Manandic and Ceferino W. Manandic.

S. 170----- Private Law 96-21
An act for the relief of Janet Abraham, also known as Janet Susan Abraham.

H.R. 4483----- Private Law 96-22
An act for the relief of Jung-Sook Mun.

Approved December 7, 1979

H.J. Res. 448----- Public Law 96-136
A joint resolution proclaiming the week of December 3 through December 9, 1979 as "Scouting Recognition Week".

PRESIDENTIAL DOCUMENTS

Week Ending Friday, December 14, 1979

Scouting Recognition Week, 1979

Proclamation 4706. December 7, 1979

*By the President of the United States
of America*

A Proclamation

Scouting teaches boys and girls self-reliance, physical fitness and good citizenship. It fosters character development and nurtures a love and understanding of nature and of other people.

Scouting has a long and proud tradition of service and leadership training. Many of our Nation's most accomplished men and women in every field of endeavor are former Scouts, and cite Scouting as one of their most important early experiences.

Through the years Scouts have broadened their activities to meet the changing needs of young Americans and help them prepare for useful and rewarding lives.

In recent years Scouts have been particularly active in promoting energy awareness and conservation, and are continuing this important effort. They are also planning activities designed to aid in taking an accurate census next year.

By House Joint Resolution 448, the Congress has designated the week of December 3 through December 9, 1979 as "Scouting Recognition Week."

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, call upon all Americans to recognize the contributions of Scouting and to support Scouting programs in their communities.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of December, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register,
10:33 a.m., December 10, 1979]

NOTE: The text of the proclamation was released on December 8.

American Hostages in Iran

*Announcement of Attorney General Civiletti's
Appearance Before the International Court of
Justice. December 9, 1979*

The President has asked Attorney General Benjamin Civiletti to travel to the Netherlands tonight to appear personally before the International Court of Justice in the United States case against Iran.

The Court is holding hearings at The Hague Monday on the request of the United States for an interim order that

Iran should immediately release and ensure the safety of the Americans held hostage in Tehran. In the view of the United States, the continued detention of the hostages is a gross violation of the basic rules of international law and human rights.

In light of the importance and urgency of this case, the President has asked the Attorney General personally to present the position of the United States to the Court. Roberts B. Owen, Legal Adviser to the Department of State, will also be appearing before the Court for the United States.

Dinner Honoring Thomas P. O'Neill, Jr.

*Remarks at the Fundraising Dinner for the
O'Neill Chair at Boston College.
December 9, 1979*

Mr. Speaker, Millie O'Neill, sons and daughters, who've brought grandchildren and who have blessed this marriage of 38 years, and friends of Tip O'Neill from all over this Nation:

Thank you, Father Monan, president of Boston College, for your kind introduction.

Many people have asked why I'm here tonight in the midst of some very important business in Iran. When I was presented with my schedule for this month, my immediate and firm Presidential response was, "I am not going to any fundraising events for the time being." And Frank Moore, my congressional liaison chief, said, "Mr. President, the Speaker thinks you ought to be there." [Laughter] So, it is a real pleasure for me to be—[laughter]—it's a real pleasure for me to be here with a thousand other close friends—[laughter]—of Tip O'Neill's to

honor Boston College and its most distinguished graduate.

Tip is a man of great achievement. Tip is a man of great caution. He roomed with [Representative] Eddie Boland here for more than 23 years before he decided that his seat was safe enough to bring Millie down from Boston—[laughter]—and I guarantee you it was a great boon to our Nation when he finally decided to do so. Tip, you don't need to worry. The voters of the Eighth District of Massachusetts know the value, which I cherish along with you, of reelecting the incumbent. [Laughter]

Tip O'Neill is a wonderful political analyst, philosopher, and adviser. He told me that the key to his own success in politics—and I've made the same point recently—is to wait your turn. [Laughter]

We have a very serious purpose tonight. It's to honor a man who, for 27 years, has served his entire country with distinction and greatness, which is good training for an even greater career, Tip, in the future. We are also here to support and to honor Boston College, whose contributions to our entire Nation have become more evident with each passing year. I understand that this dinner has raised a record figure of \$1.2 million, and I hope that this is only the beginning of generous, ever more generous support for Boston College of those who love it and who honor it and who recognize its great contribution.

By naming an endowed chair for him, the college is indeed honoring a rare man. I could take up the entire evening listing for you his qualities and his accomplishments. But just let me say that in this last 3 years he's become for me a great personal friend—and a President needs all the friends he can get. [Laughter] I turn to him constantly for advice, as he knows;

for his knowledge, most of which comes from Millie, which I appreciate—[laughter]—for his instincts in politics, in times of trial and tribulation, of hopes and dreams and frustrations and desires; and for his support, which has been unwavering.

When I took office and this country faced more than 8-percent unemployment, Tip made sure that the Congress of the United States passed the most ambitious jobs programs since the New Deal, the Great Depression. He's often said that work and wages are what the Democratic Party is all about.

I remember those depression years, Tip, when you were in college and I was a farmboy. The day's wages for a grown, able man was a dollar; for a woman working alongside of him, 50 cents; for a child less than 16 years old, 25 cents a day. And the Democratic Party was struggling with a minimum wage law, opposed by some who called it the verge of socialism, to guarantee factory workers 25 cents an hour.

Today, after 3 years, there are 8 million more Americans on the job with work and wages, earning their own way, living in dignity because of that belief. This past month we added hundreds of thousands of new jobs and brought the unemployment rate down again. Now, that's Tip O'Neill, Democratic Party government, and I am proud to be part of it.

He's long believed in giving our young people the best education that this country can offer. This affair tonight is a vivid demonstration of that commitment. In the last 3 years since Tip O'Neill has been Speaker, Federal aid to education has increased by 60 percent, and now we have a new Department of Education to focus ever more attention on this integral part of America's present and its future. And Tip O'Neill deserves much of the credit.

That's Tip O'Neill, Democratic Party government, and I'm proud to be part of it.

When it became imperative to act with our national security at stake, he led the House to enact without delay the most far-reaching energy program our country has ever seen. Victory is now in sight for both Houses of the Congress if we work together. That's Tip O'Neill, Democratic Party government, and I'm proud to be a part of it.

Tip has never been afraid to stand up and to speak up for what he believes and to work for what he knows is right. At a time when people have hungered for leaders who tell the truth, the unvarnished truth, he has spoken the truth, unafraid of the consequences.

Most of all, however, I admire Tip O'Neill's undiluted patriotism. It's a patriotism that seeks to build on the greatness of America. It's a patriotism that never changes. It's a patriotism deep within his heart. It's a patriotism he's not embarrassed to express. It's a patriotism that preserves the enduring values that founded our country: a commitment to peace, the freedom, and the opportunity of our land, the compassion and the generosity of our people that seeks to harness change, never afraid of it, and to build an even greater future for our children and our grandchildren. That's the patriotism of Tip O'Neill, and that is the root of the strength of America.

The events in Iran remind us that our basic values mean as much today as at any time in our Nation's history. Now those qualities are being severely tested, not just by a mob in Iran, who hold hostage innocent Americans, but by the changing nature of the entire world. I have no doubt that we in America will prevail, because we are right, because we are strong, because we are united.

Our form of government has endured every test. Americans have never found a question that we could not answer if we were united. Americans have never found an obstacle that we could not overcome if we were united. Americans have never found a challenge we could not meet if we were united. Our form of government has endured, and it has grown. It has improved itself in quality for two centuries. And long after the mobs have gone home in Iran, long after there have been many changes of government and constitutions and ideologies elsewhere in the world, American democracy and the ideal of America will stand as they do today—the brightest and the best hope of mankind, a clear, undimmed beacon of fundamental human rights and human values.

Tonight America stands as the greatest nation on Earth. Boston College stands as a great and a fortunate institution. Tip O'Neill has enhanced the greatness of both, and we are all grateful to him.

Ladies and gentlemen, let me introduce the Speaker of the House of the United States of America, Thomas P. O'Neill, Jr.

NOTE: The President spoke at 10:11 p.m. in the Regency Ballroom at the Hyatt Regency Hotel.

Federal Council on the Aging

Remarks at the Swearing-In Ceremony for Five Members. December 10, 1979

THE PRESIDENT. This is a very good day for our country and a very exciting time for me, and I know it is for all those assembled around behind me. We have an opportunity with the White House Conference on the Aging, scheduled for 1981, to have another exhilarating and challenging presentation to make to our Nation

for one of the most important issues of our time.

In the last 20 years, there have been two previous White House Conferences on the Aging, and both of them have, in effect, transformed the thinking of Americans about those among us who have reached an age, potentially, of retirement, but who have so much to offer to our country in a rapidly increasing fashion. We have this afternoon, also, an opportunity to address the Federal Council on the Aging by swearing in five new members to that very important body.

In the last 3 years, we have made a good bit of progress in issues dealing with the aging. We've passed legislation, finally, to prohibit discrimination among Americans because of age. We've had a chance to strengthen the Older Americans Act. We've had an opportunity to expand the SSI, primarily for elderly people. And, in addition, we have strengthened and made much more secure social security, which is the basis for our social programs for those who've reached the retirement age.

It's very important that we recognize the need for elderly people to have a maximum opportunity for self-determination. Their lives have become ever more valuable with the passing years, because they've accumulated experience. After retirement, or at the age of retirement, they have, sometimes, time to contribute to their country. They have vivid insight into the problems and challenges of our time. They have a broad perspective, in having seen crises come and go. They are completely conversant with the elements that comprise American society. They have confidence in our country, because they've seen us meet similar challenges in the past.

Many elements of American societal life can be harnessed to provide a part-

nership with the aging people of our country. In academic circles, in business and labor, local, State, and Federal agencies of government, in community programs, in churches and other benevolent institutions, there is an opportunity for free interchange of advice and counsel, communication and common work, to realize the hopes and dreams of many Americans, regardless of age.

I would like at this time to recognize those who will be leading the White House Conference on the Aging, to be conducted next year. The Chairman is Sadie Alexander, immediately behind me, who will be saying a few words in a moment. She's a famous person on her own. She's been part of the progress made in our country in the finest possible way. She happens to be the first black woman ever awarded an earned Ph. D. in this country, in economics, and she later achieved her doctor of laws degree from the University of Pennsylvania.

Their Executive Director will be a very well known person in Washington, former Congressman from California, Jerry Waldie. Our Deputy Chairman is a man who conducted the last White House Conference on the Aging, who's been in the forefront of eliminating discrimination of all kinds in our country and been a constant prod for the conscience of America, Dr. Arthur Flemming. The Cochairmen and Chairwomen of this group will be Dr. Neugarten, Miss Morales, and Miss Winston.

And this is a wonderful group who will lead the planning and help to conduct the White House Conference on the Aging. My wife and I and other members of my immediate family and my entire administration will be supportive of this very fine effort.

And now I would like to call on our new Chairperson, Dr. Alexander, to say a few words.

DR. ALEXANDER. *Mr. President, Mrs. Carter, Madame Secretary, members of the commission, and distinguished guests:*

As a child I lived some years in Washington, and I remember that my mother used to frequently take us to chapel at Howard University, 4 o'clock on Sunday afternoon. On one of these occasions, Booker T. Washington was to speak. And I heard my mother and her lady friends discussing what they would wear to the reception for Mr. Carter—Mr. Washington. *[Laughter]* Yes, that's on my mind; we're going to give him a great one, too.

When we got to the chapel and Mr. Washington was introduced, he of course thanked the persons who were responsible for his invitation, and then he stated how he regretted that he couldn't possibly remain for the reception. He was to meet with some very important people, upon whose decision would rest whether or not Tuskegee would continue. He said, "You know, perhaps it's fortunate I cannot spend the night in Washington. I find that people who come here for appointments—seem impossible for them to leave. They never seem to realize that they were appointed by one administration." *[Laughter]* But he said, "I'm afraid that if I inhale the air of Washington for a whole evening, I, too, might not be able to leave." Well, I want to assure you that I will be able to leave. *[Laughter]*

I have not come back too often, because I was too busy in Philadelphia. Last June, I told the members of my firm that I was going to leave by December 31 of this year. Nobody believed me. But then I went ahead quietly to get my work out of the way. I only have two important cases left, and I intend to get them off the docket. But I thought to myself that the French expression, that important ventures cast their shadows, was certainly true in my case.

I wondered, after I had made the decision to leave the practice of law, which I'd been in for 52 years, that I might not be as happy as I thought I would be. And along came this unexpected call from Madame Secretary. And what did she tell me? She had an appointment with the President, and she was going to present to him my name to chair this very important commission.

I am grateful to the President. I am grateful to Madame Secretary. I am grateful to the committee and to all of you who I know. The commission will receive your support. I thank you.

THE PRESIDENT. Pat Harris told me I was getting a senior citizen to head up our Conference. I didn't know I was getting somebody so young. *[Laughter]* Dr. Alexander is the same age as my mother. They were both born in 1898. And I think the vivacious attitude that she has, and the full life that she lives, and the tremendous contribution that she will undoubtedly make in the future, is indicative of the need for all of us in this country never to consider any person, regardless of age, other than a tremendous potential asset for our country.

I know that my mother is as young as I am, or as she was 35 or 40 years ago or 50 years ago. And many people who are not as well known as Lillian Carter or Dr. Alexander have the same ability to contribute on a continuing basis to a better life for all Americans. There is no doubt in my mind that under her leadership, the White House Conference on the Aging will be not only successful and beneficial to others, but it will be exciting and enjoyable and stimulating and inspirational as well. And I'm deeply grateful to Dr. Alexander for being willing to serve in this capacity.

We have with us also, in addition to those who will run the White House Con-

ference, the members who will serve with Nelson Cruikshank, the Chairman, who's also my Presidential Counselor on the Aging. And these members are Dr. Jean Perdue, of Florida, Miss Mary Mulvey, of Rhode Island—right? I think I've got the States right, I'm not sure. Mr. Cy Carpenter, of Minnesota. Everytime I swear in a group, I always have at least one person from Minnesota—*[laughter]*—a lot more than from Georgia. I never have figured that out. *[Laughter]* And Dr. Aaron Henry, who's almost from Georgia; he's from Mississippi and an old friend of mine. And John Martin, who will be reappointed.

I might say that this group will now be sworn in by Secretary Pat Harris. I would like to say a word before I depart this meeting, though, and that is that Nelson Cruikshank not only serves as the Chairman of the Federal Council on the Aging, but he serves as my personal Counselor on the Aging. This is a group that not only gives advice to the President but also to the Nation at large, to all the agencies of the Federal and other governments, and, in addition, to the Congress. It's a constant stimulation to us all, and it's the only advisory council in the Government that's predominantly made up of the aging, who have a particular knowledge and insight and ability to deal with this exciting possibility for us to improve life in the future.

As you know, over a period of years ahead, a larger and larger portion of American citizens will have reached the retirement age. They not only provide a great responsibility for us to ensure that they have an adequate life, those particularly who are poor and who need the direct and daily help in their lives from the Government, but they also provide a tremendous resource, a reservoir of talent and ability and inspiration and dedication

that can help the rest of us enjoy a better life, even before the retirement age.

So, I'm very grateful to Nelson Cruikshank and this group, who will now be sworn in. And I'd like to thank all of those who are present here for their willingness to serve along with me in making us have a better nation for the aging. And I'd like now to call on the Secretary, Pat Harris, who will administer the oath of office. All of you have my congratulations and my thanks.

And now, Secretary Harris.

SECRETARY HARRIS. Thank you, sir.

THE PRESIDENT. Good luck to you, Pat. Thank you very much. Thank you, everybody.

[At this point, the President left the Cabinet Room, and Secretary of Health, Education, and Welfare Patricia R. Harris administered the oath of office to the five members of the Council.]

SECRETARY HARRIS. Congratulations to you. The five people I've just sworn in are taking up their responsibilities at a critical time in the development of Federal policy for the aging. That point was reemphasized for me in a recent book entitled "The View in Winter." A key element in this book is the recognition that for the first time in our history old age has come to be the expected, not the exceptional, condition.

Happily, all of us in this room can reasonably expect to live what used to be called a ripe old age; some of us, of course, sooner than later. That fact is a triumph of our health and social service systems, but it also has fundamental implications for future policy. Today, 11 percent of our population is age 65 or older; by the year 2020, which isn't very far away, older people will make up almost 16 percent of our population. That's about one in every seven people.

We cannot continue a public policy that views old age as the exception rather than the rule. Public policy toward older Americans must focus on helping them maintain their economic, physical, and social independence. That will not be an easy task, but it is one that we must accomplish.

What is needed is a national policy that emphasizes the strengths, rather than the weakness or problems of older Americans. As members of the Federal Council on Aging, the five people I have just sworn in will play an important part in shaping that policy. Each brings a special expertise to the deliberations of the Council.

Mary Mulvey has broad experience in education and research. Jean Perdue has spent years providing health care to the elderly. Cy Carpenter has firsthand experience with the employment problems of older Americans. Aaron Henry understands the problems of aging blacks, particularly those in rural areas. And John Martin, who is back for a second term on the Council, brings with him the practical experience of administering Federal programs for the aging.

But perhaps the most difficult task has been left to the leadership of the 1981 White House Conference on Aging—difficult because they have such a short time within which to reach their objectives.

Let me briefly outline the concerns of older Americans that this conference must address: the need for improved economic well-being, the need for suitable housing at a reasonable price, the need for comprehensive quality health care that is readily accessible to the aging, the need for a more comprehensive system for delivering social services, the need for a Federal policy on long-term care, the need for greater employment opportunities for those who want or need to work, the need

for a national policy on retirement, the need for a national policy encouraging biomedical research into the aging process, and the need for a national policy to overcome stereotypes on aging.

Were I not so well acquainted with the leadership of this conference, I would wonder if the job could be done. But, I know it will be. I know of no one who is more qualified by experience, training, and character to undertake this massive task than Dr. Sadie Tanner Mossell Alexander.

The President has already told you the highlights of Sadie Alexander's career. She has made a career of breaking down stereotypes. Now, I see that one of the conference's specific responsibilities is with the destruction of the stereotype of aging. With Sadie Alexander at the helm of this conference, that particular stereotype doesn't have a chance.

I want to say something. The President was noting that Sadie and his mother were born in the same year. I know a little something about that generation, and I'm beginning to think that those were the truly liberated, movement vanguard women. They had no models, as I had with Sadie Alexander. And there's a member of my family, my mother, who now tells me—Sadie, 'cause she doesn't tell her age—tells me I am now older than she will ever admit to being. [Laughter] But that was the generation that really began the liberation of women. But you will be pleased this time, Sadie—you won't have to do it all by yourself.

You will have the help of some very able people: your chairperson emeritus, your deputy chairpersons, and your staff, headed by Jerry Waldie. Jerry has the special advantage of knowing the workings of government from at least three angles. He served 13 years in the California Assembly, five of them as majority

leader. He served 8 years as a Member of Congress from California. And most recently, he has come to know the workings of the Federal bureaucracy through his activities as Chairperson of the Federal Mine Safety and Health Review Commission. He is uniquely qualified to reshape government policies at all levels, in order to serve the needs of older Americans better. We're very lucky to have him in this role.

This Nation has no precedents for dealing with the situation that now confronts it. The aging of America is a new phenomenon, and we are only beginning to understand what it really means to be old, the problems and the rewards, the difficulties and the satisfactions. Ronald Blythe summarized it well in his book "The View in Winter." "Old age," he says, "is full of death and full of life; it is a tolerable achievement and it is a disaster; it transcends desire and taunts it; it is long enough and it is far from being long enough."

Our challenge is to develop policies that will enhance the meaning of all our lives, young and old alike. With the leadership announced today, I am confident we will achieve the goal. And for every one of us in this room, that goal is important, because if we are lucky, we will live long enough to benefit from what they do. And certainly, all of us hope that we do, and we wish them well.

NOTE: The President spoke at 2:30 p.m. in the Cabinet Room at the White House.

Federal Home Loan Bank Board

Nomination of John H. Dalton To Be a Member. December 10, 1979

The President today announced his intention to nominate John H. Dalton as a

member of the Federal Home Loan Bank Board. He would replace Anita Miller, who has resigned.

Dalton is former President of the Government National Mortgage Association and was national treasurer of the Carter/Mondale Presidential Committee from March to November 1979.

He was born December 13, 1941, in New Orleans, La. He received a B.S. from the U.S. Naval Academy in 1964 and an M.B.A. from Wharton School of Finance and Commerce at the University of Pennsylvania.

Dalton served in the U.S. Navy from 1964 to 1969 in the nuclear submarine program. From 1971 to 1977, he was an account executive with the Dallas, Tex., firm of Goldman, Sachs & Co., working with institutions and individuals in the management of their equity and fixed income investments. He was President of the Government National Mortgage Association from 1977 until last March.

United States Ambassador to Norway

*Nomination of Sidney Anders Rand.
December 10, 1979*

The President today announced that he will nominate Sidney Anders Rand, of Northfield, Minn., to be Ambassador Extraordinary and Plenipotentiary of the United States to Norway. He would replace Louis A. Lerner, who is resigning. Rand has been president of St. Olaf College since 1963.

He was born May 9, 1916, in Eldren, Minn. He received a B.A. from Concordia College in 1938 and a C.T. from Luther Theological Seminary in 1943.

From 1943 to 1945, Rand was a Luth-

eran pastor in Nashwauk, Minn. He was a faculty member at Concordia College, Moorhead, Minn., from 1945 to 1951 and president of Waldorf College, Forest City, Iowa, from 1951 to 1956.

From 1956 to 1960, Rand was executive director of the Board of Christian Education of the Evangelical Lutheran Church. From 1960 to 1963, he was executive director of the Board of College Education of the American Lutheran Church. From 1962 to 1963, he was a tutor with the Ecumenical Institute of the World Council of Churches in Celigny, Switzerland.

Rand is a member of the Norwegian American Historical Association, and in 1974 he was made a knight first class of the Order of St. Olaf by the Government of Norway.

United Nations Commission on Human Rights

*Appointment of Jerome J. Shestack as U.S.
Representative. December 10, 1979*

The President today announced that he will appoint Jerome J. Shestack, of Philadelphia, Pa., to be U.S. Representative to the United Nations Commission on Human Rights. He replaces Edward Mezvinsky, resigning. Shestack is an attorney in Philadelphia and president of the International League for Human Rights.

He was born February 11, 1923, in Atlantic City, N.J. He received a B.A. from the University of Pennsylvania in 1943 and an LL.B. from Harvard Law School in 1949. He served in the U.S. Navy from 1943 to 1946.

From 1949 to 1950, Shestack was an instructor at Northwestern Law School, and from 1950 to 1952, he was an instruc-

tor at Louisiana State University Law School. In 1952 he served as deputy city solicitor of Philadelphia.

From 1953 to 1955, Shestack was first deputy city solicitor. In 1953 he was also an instructor at the University of Pennsylvania Law School. Since 1955 he has been with the firm of Schnader, Harrison, Segal and Lewis; he has been a partner since 1956.

Shestack is president of the International League for Human Rights, a non-governmental international human rights organization with consultative status at the United Nations and with affiliates in some 35 nations. He is founder and cochairman of the Lawyers Committee for International Human Rights, a public interest law association which deals with international human rights problems. He has chaired a number of international human rights conferences.

Shestack was a founding member of the Lawyers Committee for Civil Rights Under Law and has served on the board of directors of the Mexican-American Legal Defense Fund. He was a founder of the section of individual rights and responsibilities of the American Bar Association and served as chairman of the section in 1969-70.

In 1973 he became the first chairman of the Commission on Mentally Disabled of the American Bar Association, where he established projects to help provide legal services and promote rights for the mentally disabled. He served on the first steering committee to organize the legal services program of the Office of Economic Opportunity and then became a member of the OEO National Advisory Committee to the Legal Services Program.

Shestack is chairman of the ABA Standing Committee on Legal Aid and

Indigent Defendants and is on the board of directors of the American Jewish Committee.

Price Advisory Committee

Appointment of Six Members.

December 10, 1979

The President today announced the selection of six prominent public sector representatives to serve as members of the anti-inflation program's Price Advisory Committee.

The President announced on September 28 that an advisory panel would be named in order to broaden public participation in the design and implementation of the voluntary price standard. Panel membership was enlarged from five to six to ensure greater public input.

A Pay Advisory Committee, with six representatives each from the business, labor, and public sectors, was named on October 16. That panel, which is chaired by Harvard University economist John T. Dunlop, has been meeting regularly to discuss possible changes in the voluntary pay standard.

The Price Committee will advise the Council on Wage and Price Stability on the development of policies to encourage anti-inflationary price behavior. The policies are intended to slow the rate of inflation and assure equitable distribution of the burden of restraint. The Committee may recommend modifications of the price standard, new or revised interpretations of the standard, or make any other recommendations on the standards that it considers necessary to assure fairness and equity.

The Committee's first meeting is scheduled for Thursday, December 13,

1979, at 10 a.m. in Room 2008, New Executive Office Building. The Chairman will be announced at the first meeting.

The following persons will serve as members of the Price Advisory Committee:

ROBERT ATWOOD, a partner in the international accounting firm of Deloitte Haskins & Sells. He is currently director of the firm's national affairs office in Washington.

BARBARA BERGMANN, professor of economics at the University of Maryland.

CAROL SCHWARTZ GREENWALD, visiting associate professor of business administration at Harvard Business School and former commissioner of banks of the Commonwealth of Massachusetts.

STANLEY RUTTENBERG, president of the consulting firm of Ruttenberg, Friedman, Kilgallon, Gutchess & Associates and former Assistant Secretary of Labor.

JOHN SHEAHAN, professor of economics at Williams College and author of "Wage-Price Guidepost."

ALBERT T. SOMMERS, chairman, senior vice president and chief economist of the Conference Board.

Federal Government Pension Plans

Executive Order 12177. December 10, 1979

By the authority vested in me as President of the United States of America by Section 121(a)(1) of the Budget and Accounting Procedures Act of 1950, as amended (92 Stat. 2541, Public Law 95-595, 31 U.S.C. 68a), and Section 301 of Title 3 of the United States Code, and in order to provide consistency among the financial and actuarial statements of Federal Government pension plans, it is hereby ordered as follows:

1-101. All the functions vested in the President by Section 121(a) of the Budget and Accounting Procedures Act of 1950, as amended (31 U.S.C. 68a), are delegated to the Director of the Office of Management and Budget. The Director may, from time to time, designate other officers or agencies of the Federal Government to perform any or all of the functions hereby delegated to the Director, subject to such instructions, limitations, and directions as the Director deems appropriate.

1-102. The head of an Executive agency responsible for the administration of any Federal Government pension plan within the meaning of Section 123(a) of the Budget and Accounting Procedures Act of 1950, as amended (31 U.S.C. 68c), except subsection (a)(9) and (b), shall ensure that the administrators of those plans comply with the form, manner, and time of filing as required by the Director of the Office of Management and Budget.

1-103. Subject to the provisions of Section 1-101 of this Order, and in the absence of any contrary delegation or direction by the Director, the Secretary of the Treasury, with respect to the development of the form and content of the annual reports, shall perform the functions set forth in Section 121(a) of the Budget and Accounting Procedures Act of 1950, as amended (31 U.S.C. 68a). In performing this function, the Secretary shall also be responsible for consulting with the Comptroller General.

Foreign Assistance Functions

Executive Order 12178. December 10, 1979

FUNCTIONS UNDER THE FOREIGN ASSISTANCE ACT OF 1961, AS AMENDED

By the authority vested in me as President of the United States of America by Section 633 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2393), Executive Order No. 11223 of May 12, 1965, is hereby amended by adding at the end thereof the following Section:

"Sec. 6. I determine it to be in furtherance of the purposes of the Foreign Assistance Act of 1961, as amended, and in the national security interest of the United States that the functions authorized by chapter 7 of Part II of that Act, relating to air base construction in Israel, be performed without regard to the following additional specified provisions of law:

- (1) Title IX of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 541-544);
- (2) Section 612 of the Military Construction Authorization Act, 1967, as amended (31 U.S.C. 723a);
- (3) Section 719 of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2168); and
- (4) Section 111 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 759)."

Nationwide Outdoor Recreation Plan

Message to the Congress Transmitting the Plan. December 11, 1979

To the Congress of the United States:

It is with pleasure that I transmit the third Nationwide Outdoor Recreation Plan to the Congress of the United States, as required by P.L. 88-29 (16 U.S.C. 460l-1(c)). This Plan has been prepared by the Department of the Interior to address a number of current recreation issues, and assess the existing supply, demand, and opportunities associated with outdoor recreation in America.

The Plan was derived from a new planning process which maximizes public involvement and leads to specific actions. The rivers and trails directives issued in my 1979 Environmental Message are among the major decisions which originated with this Plan. Also included in the Plan are specific actions related to Federal land acquisition policy, environmental education, recreation access for the handicapped, and energy conservation. The Urban Parks and Recreation Recovery Program, which I proposed as one of my urban initiatives, is already helping to enhance close-to-home recreation opportunities, conserving energy while meeting basic recreation needs.

The challenge of enhancing recreation opportunity cannot be met by government action alone. New partnerships among all levels of government and the private sector will be required. New ways of combining resources from a variety of existing programs must be tested to meet our Nation's recreation needs.

American Anhydrous Ammonia Industry

Letter to the Speaker of the House and the President of the Senate Transmitting a Report. December 11, 1979

Dear Mr. Speaker: (Dear Mr. President:)

In accordance with section 203(b) (2) of the Trade Act of 1974, enclosed is a report to the Congress setting forth my determination that import relief for the U.S. anhydrous ammonia industry is not in the national economic interest, and explaining the reasons for my decision.

Sincerely,

JIMMY CARTER

IMPORT RELIEF ACTION

ANHYDROUS AMMONIA

As required under section 203(b) (2) of the Trade Act of 1974, I am transmitting this report to Congress setting forth the action I will take with respect to anhydrous ammonia covered by the affirmative finding on October 12, 1979 of the U.S. International Trade Commission (USITC) under section 406 of the Trade Act. As my action differs from that recommended by the USITC, I have included the reasons for my decision:

After considering all relevant aspects of the case, including those considerations set forth in section 202(c) of the Trade Act of 1974, I have determined that provision of import relief is not in the national economic interest for the following reasons:

(1) Anticipated conditions in the U.S. and overseas markets for anhydrous ammonia do not warrant import relief at this time. The industry is currently operating at 86 percent of capacity and should continue to operate at comparable levels,

prices are sharply higher and expected to continue rising, and strong market conditions are projected for the current and next marketing years. Given anticipated growth in demand for grains and other crops, it is critical that farmers have access to sufficient fertilizer supplies at reasonable prices.

(2) Relief would not limit the growth in U.S. imports of anhydrous ammonia but will merely shift the source of foreign supplies from the Soviets to other low-cost producers. Thus, the domestic industry would realize little benefit from relief and relief would be unlikely to promote industry adjustment.

I have directed the U.S. Trade Representative to request the U.S. International Trade Commission to follow closely overall market conditions for ammonia until further notice and to issue annual reports beginning in November 1980. I would plan to have these reports discussed with appropriate Soviet officials through existing channels.

NOTE: This is the text of identical letters addressed to Thomas P. O'Neill, Jr., Speaker of the House of Representatives, and Walter F. Mondale, President of the Senate.

American Anhydrous Ammonia Industry

*Memorandum From the President.
December 11, 1979*

Memorandum for the Special Representative for Trade Negotiations

Subject: Determination under Section 406 and 202 of the Trade Act of 1974; Anhydrous Ammonia from the Union of Soviet Socialist Republics

Pursuant to section 406(b) and 202 of the Trade Act of 1974 (P.L. 93-618, 88 Stat. 1978), I have determined the action I will take with respect to the report of the United States International Trade Commission (USITC), transmitted to me on October 12, 1979, concerning the results of its investigation of a petition for import injury filed on behalf of 12 U.S. producers and one U.S. distributor of anhydrous ammonia provided for under items 417.22 and 480.65 of the Tariff Schedules of the United States (TSUS).

After considering all relevant aspects of the case, including those considerations set forth in section 202(c) of the Trade Act of 1974, I have determined that provision of import relief is not in the national economic interest for the following reasons:

1. Anticipated conditions in the U.S. and overseas markets for anhydrous ammonia do not warrant import relief at this time. The industry is currently operating at 86 percent of capacity and should continue to operate at comparable levels, prices are sharply higher and expected to continue rising, and strong market conditions are projected for the current and next marketing years. Given anticipated growth in demand for grains and other crops, it is critical that farmers have access to sufficient fertilizer supplies at reasonable prices.

2. Relief would not limit the growth in U.S. imports of anhydrous ammonia but will merely shift the source of foreign supplies from the Soviets to other low-cost producers. Thus, the domestic industry would realize little benefit from relief and relief would be unlikely to promote industry adjustment.

You should request the U.S. International Trade Commission to issue a factual report on overall market conditions for ammonia as prescribed under section 332

of the Tariff Act of 1930. This report should be prepared on an annual basis, beginning in November 1980, until further notice. I would plan to have these reports discussed with appropriate Soviet officials through existing channels.

This determination is to be published in the FEDERAL REGISTER.

Holiday for Federal Employees

Executive Order 12179. December 11, 1979

PROVIDING FOR THE CLOSING OF GOVERNMENT DEPARTMENTS AND AGENCIES ON MONDAY, DECEMBER 24, 1979

By virtue of the authority vested in me as President of the United States, it is hereby ordered as follows:

SECTION 1-1. *General Provisions.*

1-101. All Executive departments and agencies shall be closed and their employees excused from duty on Monday, December 24, 1979, the day before Christmas Day, except as provided by Section 1-102 below.

1-102. The heads of Executive departments and agencies may determine that certain offices and installations of their organizations, or parts thereof, must remain open and that certain employees must report for duty on December 24, 1979, for reasons of national security or defense or for other public reasons.

SECTION 1-2. *Pay and leave for Employees.*

1-201. Monday, December 24, 1979, shall be considered a holiday for the pur-

poses of the pay and leave of employees of the United States.

Geneva Protocol to the General Agreement on Tariffs and Trade

Proclamation 4707. December 11, 1979

PROCLAMATION TO CARRY OUT THE
GENEVA (1979) PROTOCOL TO THE
GENERAL AGREEMENT ON TARIFFS AND
TRADE AND FOR OTHER PURPOSES

*By the President of the United States
of America*

A Proclamation

1. Pursuant to Section 101(a) of the Trade Act of 1974 (19 U.S.C. 2111(a)), I determined that certain existing duties and other import restrictions of the United States and of foreign countries were unduly burdening and restricting the foreign trade of the United States and that one or more of the purposes stated in Section 2 of the Trade Act of 1974 (19 U.S.C. 2102) would be promoted by entering into the trade agreements identified in the third and fourth recitals of this proclamation.

2. Sections 131, 132, 133, 134, 135, and 161(b) of the Trade Act of 1974 (19 U.S.C. 2151, 2152, 2153, 2154, 2155, and 2211(b)) and Section 4(c) of Executive Order No. 11846 of March 27, 1975, (3 CFR 1971-1975 Comp. 974), have been complied with.

3. Pursuant to Section 101(a)(1) of the Trade Act of 1974 (19 U.S.C. 2111

(a)(1)), I, through my duly empowered representative, (1) on July 11, 1979, entered into a trade agreement with other contracting parties to the General Agreement on Tariffs and Trade (61 Stat. (pts. 5 and 6)), as amended (the General Agreement), with countries seeking to accede to the General Agreement, and the European Economic Community, which agreement consists of the Geneva (1979) Protocol to the General Agreement, including a schedule of United States concessions annexed thereto (hereinafter referred to as "Schedule XX (Geneva-1979)"), a copy of which Geneva (1979) Protocol (including Schedule XX (Geneva-1979) annexed thereto) is annexed to this proclamation as Part 1 of Annex I, (2) on November 18, 1978, entered into a trade agreement with the Hungarian People's Republic, including a schedule of United States concessions annexed thereto, a copy of which agreement, and schedule, is annexed to this proclamation as Part 2 of Annex I, (3) on October 31, 1979, entered into a trade agreement with the United Mexican States, which agreement consists of an exchange of letters, one enclosing a schedule of United States concessions, a copy of which exchange of letters, including such enclosed schedule, is annexed to this proclamation as Part 3 of Annex I, and (4) on March 2, 1979, entered into a trade agreement with the Socialist Republic of Romania, which agreement consists of an exchange of letters, one enclosing a schedule of United States concessions, a copy of which exchange of letters, including such enclosed schedule, is annexed to this proclamation as Part 4 of Annex I; and on October 24, 1979, the American Institute in Taiwan entered into a trade agreement with the Coordination Council for North American Affairs (see the Taiwan Relations Act, Sections 4(b)(1), 6(a)(1), and 10

(a), 93 Stat. 15, 17, and 18, E.O. 12143, sections 1-203 and 1-204, 44 Fed. Reg. 37191), which agreement consists of an exchange of letters, one enclosing a schedule of the United States concessions, a copy of which exchange of letters, including such enclosed schedule, is annexed to this proclamation as Part 5 of Annex I.

4. Pursuant to Section 102 of the Trade Act of 1974 (19 U.S.C. 2112), I have determined that barriers to (and other distortions of) international trade were unduly burdening and restricting the foreign trade of the United States, and, through the Special Representative for Trade Negotiations (the Special Representative), I have consulted with the appropriate Committees of the Congress, notified the House of Representatives and the Senate of my intention to enter into the agreements identified in Section 2(c) of the Trade Agreements Act of 1979 (93 Stat. 148), transmitted to the Congress copies of such agreements (a copy of one of which agreements, with the Hungarian People's Republic, is annexed to this proclamation as Part 6 of Annex I), together with a draft of an implementing bill and a statement of administrative action, and such implementing bill, approving the agreements and the proposed administrative action, has been enacted into law (Section 2(a) of the Trade Agreements Act of 1979 (93 Stat. 147)).

5. (a) Pursuant to Section 502 of the Trade Agreements Act of 1979 (93 Stat. 251), I have determined that appropriate concessions have been received from foreign countries under trade agreements entered into under Title I of the Trade Act of 1974 (19 U.S.C. 2111 *et seq.*);

(b) Pursuant to Section 601(a) of the Trade Agreements Act of 1979 (93 Stat. 267), I have determined that duty-free treatment for certain articles now classified in the items of the Tariff Schedules

of the United States (19 U.S.C. 1202) (TSUS) listed in, and certified pursuant to, Section 601(a)(2) of that Act (93 Stat. 267), will provide treatment comparable to that provided by foreign countries under the Agreement on Trade in Civil Aircraft;

(c) Pursuant to Section 503(a)(2) (A) of the Trade Agreements Act of 1979 (93 Stat. 251), I have determined, after providing interested parties an opportunity to comment, that each article identified in Annex IV to this proclamation is not import sensitive;

(d) Pursuant to Section 855(a) of the Trade Agreements Act of 1979 (93 Stat. 295), I have determined that adequate reciprocal concessions have been received, under trade agreements entered into under the Trade Act of 1974, for the application of the rate of duty appearing in rate column numbered 1 on January 1, 1979, for the comparable item on a proof gallon basis in the case of alcoholic beverages classified in all items in subpart D of part 12 of schedule 1 of the TSUS, except items 168.09; 168.12, 168.43, 168.77, 168.81, 168.87, and 168.95;

(e) Pursuant to Section 2(b)(2)(A) of the Trade Agreements Act of 1979 (93 Stat. 147), I have determined that obligations substantially the same as those applicable to developing countries set forth in the agreements listed in Section 2(c)(1), (2), (3), (4), and (5) of that Act (93 Stat. 148) will be observed in Taiwan.

6. Each modification of existing duty proclaimed herein which provides with respect to an article for a decrease in duty below the limitation specified in Sections 101(b)(1) or 109(a) of the Trade Act of 1974 (19 U.S.C. 2111(b)(1) or 2119 (a)), and each modification of any other import restriction or tariff provision so proclaimed is authorized by one or more

of the following provisions or statutes:

(a) Section 101(b)(2) of the Trade Act of 1974 (19 U.S.C. 2111(b)(2)), by virtue of the fact that the rate of duty existing on January 1, 1975, applicable to the article was not more than 5 percent ad valorem (or ad valorem equivalent);

(b) Section 109(b) of the Trade Act of 1974 (19 U.S.C. 2119(b)), by virtue of the fact that I have determined, pursuant to that section, that the decrease authorized by that section will simplify the computation of the amount of duty imposed with respect to the article;

(c) Sections 503(a)(2)(A) and 503(a)(3) to (6) of the Trade Agreements Act of 1979 (93 Stat. 251 and 252) by virtue of the fact that they permit departures from the staging provisions of Section 109(a) of the Trade Act of 1974 (19 U.S.C. 2119(a));

(d) Sections 502(a), 855(a), and 601(a) of the Trade Agreements Act of 1979 (93 Stat. 251, 295, and 267) by virtue of the authority in such sections for specified concessions based on reciprocity, but in the case of the last such section only after the conditions for acceptance of the Agreement on Trade in Civil Aircraft, identified in Section 2(c)(10) of that Act (93 Stat. 148), are fulfilled;

(e) Sections 505 through 513, inclusive, of the Trade Agreements Act of 1979 (93 Stat. 252-257) by virtue of the fact that they permit exceeding the limitations specified in Sections 101 or 109 of the Trade Act of 1974 (19 U.S.C. 2111 or 2119);

(f) Section 255 of the Trade Expansion Act of 1962 (19 U.S.C. 1885) by virtue of the fact that it permits termination of proclamations issued pursuant to authority contained in that act;

(g) Section 2(a) of the Trade Agreements Act of 1979 (93 Stat. 147) by virtue of its approval of the agreements

identified in Section 2(c) of that Act (93 Stat. 148); and

(h) Section 304(a)(3)(J) of the Tariff Act of 1930 (19 U.S.C. 1304(a)(3)(J)) and Section 602(f) of the Trade Act of 1974 (19 U.S.C. 2101 note), by virtue of the fact that I have found that the effectiveness of the proviso to Section 304(a)(3)(J) with respect to the marking of articles provided for in headnote 2 of part 1 of schedule 2 of the TSUS is required or appropriate to carry out the first agreement identified in the third recital of this proclamation.

7. In the case of each decrease in duty, including those of the type specified in clause (a) or (b) of the sixth recital of this proclamation, which involves the determination of the ad valorem equivalent of a specific or compound rate of duty, and in the case of each modification in the form of an import duty, the United States International Trade Commission determined, pursuant to Section 601(4) of the Trade Act of 1974 (19 U.S.C. 2481(4)) in accordance with Section 4(e) of Executive Order No. 11846 of March 27, 1975, (3 CFR 1971-1975 Comp. 973), and at my direction, the ad valorem equivalent of the specific or compound rate, on the basis of the value of imports of the article concerned during a period determined by it to be representative, utilizing, to the extent practicable, the standards of valuation contained in Sections 402 and 402a of the Tariff Act of 1930 (19 U.S.C. 1401a and 1402) applicable to the article during such representative period.

8. Pursuant to the Trade Act of 1974 and the Trade Agreements Act of 1979, I determined that the modification or continuance of existing duties or other import restrictions or the continuance of existing duty-free or excise treatment hereinafter proclaimed is required or ap-

propriate to carry out the trade agreements identified in the third recital of this proclamation or one or more of the trade agreements identified in Section 2(c) of the Trade Agreements Act of 1979 (93 Stat. 148).

9. Following unsatisfactory negotiations with the European Economic Community under Articles XXIV: 6 and XXVIII of the General Agreement regarding the maintenance by the European Economic Community of unreasonable import restrictions upon imports of poultry from the United States, the President, by Proclamation 3564 of December 4, 1963 (77 Stat. 1035), suspended certain United States tariff concessions; as a result of the reciprocal concessions contained in the Geneva (1979) Protocol to the General Agreement, I determine that the termination of such suspension of tariff concessions contained in Proclamation 3564 (except those applicable to automobile trucks valued at \$1,000 or more (provided for in TSUS item 692.02)) is required to carry out the General Agreement.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes, including but not limited to Title I and Section 604 of the Trade Act of 1974, Section 2 and Titles V, VI, and VIII of the Trade Agreements Act of 1979, Section 255 of the Trade Expansion Act of 1962, and Section 301 of Title 3 of the United States Code, do proclaim that:

(1) At the close of December 31, 1979, the suspension of tariff concessions contained in Proclamation 3564 (except those applicable to automobile trucks valued at \$1,000 or more (provided for in TSUS item 692.02)) shall terminate.

(2) The amendment to Section 466 of the Tariff Act of 1930 (19 U.S.C. 1466) provided for in Section 601(a) (3) of the

Trade Agreements Act of 1979 (93 Stat. 268) shall be effective with respect to entries made under Section 466 on and after the date designated by the President under paragraph 5(b) of this proclamation.

(3) The rate of duty applicable to each item as to which the determination has been made in recital 5(d) is the rate of duty appearing in rate column numbered 1 on January 1, 1979, for the comparable item on a proof gallon basis or such rate as reduced under Section 101 of the Trade Act of 1974 (19 U.S.C. 2111).

(4) Subject to the provisions of the General Agreement, of the Geneva (1979) Protocol, of other agreements supplemental to the General Agreement, of the other agreements identified in recitals 3 and 4, and of United States law (including but not limited to provisions for more favorable treatment), the modification or continuance of existing duties or other import restrictions and the continuance of existing duty-free or excise treatment provided for in Schedule XX (Geneva-1979) (except those provided for in the items listed in Parts 1C, 1D, 2D, 2E, 2K, 3C, 3D, 4C, and 4D of Annex I to Schedule XX which are required to implement the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade and those provided for in Section 1, Chapter 4, Unit C, note 2 (cheese quotas), and in Section 1, Chapter 10, Unit B, note 2 (chocolate quotas), all of which will be the subject of one or more separate proclamations), in the agreements identified in the third and fourth recitals of this proclamation, and in trade agreements legislation, shall become effective on or after January 1, 1980, as provided for herein.

(5) To this end—

(a) Except as provided for in subparagraph (b), the modifications to the TSUS

made by Annex II, Section A of Annex III, and Sections B(1) through (4) of Annex IV of this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse, for consumption on and after the effective dates specified in those annexes;

(b) The modifications provided for in Section A of Annex II to this proclamation which are authorized by Section 601 (a) of the Trade Agreements Act of 1979 (93 Stat. 267) shall apply to articles entered, or withdrawn from warehouse, for consumption on and after the date designated by the President when he determines that the requirements of Section 2 (b) of the Trade Agreements Act of 1979 (93 Stat. 147) have been met with respect to the Agreement on Trade in Civil Aircraft;

(c) The Special Representative shall make any determinations relevant to the designation of the effective dates of the modifications of the TSUS made by Sections B through G of Annex III, and Sections B(5) through (10) of Annex IV of this proclamation, and shall publish in the FEDERAL REGISTER the effective date with respect to each of the modifications made by these sections; such modifications shall apply to articles entered, or withdrawn from warehouse, for consumption on and after such effective date;

(d) The modifications to the TSUS made by Section C of Annex IV to this proclamation, relating to special treatment for the least developed developing countries (LDDC's), shall be effective with respect to articles entered, or withdrawn from warehouse, for consumption on and after the effective dates as provided for in Section B of Annex IV; whenever the rate of duty specified in the column numbered 1 for any TSUS item is reduced to the same level as the corresponding rate of duty specified in the

column entitled "LDDC" for such item, the rate of duty in the column entitled "LDDC" shall be deleted from the TSUS, and when the duty rates for all such items in Annex IV have been deleted, the modifications to the TSUS made by Section C of Annex IV to this proclamation shall be deleted;

(e) Section A of Annex IV shall become effective on January 1, 1980.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of December in the year of our Lord nineteen hundred and seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

NOTE: The annexes are printed in the FEDERAL REGISTER of December 13, 1979.

Cheese and Chocolate Crumb Imports

Proclamation 4708. December 11, 1979

IMPORT LIMITATIONS ON CERTAIN CHEESE AND CHOCOLATE CRUMB

*By the President of the United States
of America*

A Proclamation

Import limitations have been imposed on certain dairy products, including certain cheese and chocolate crumb, pursuant to the provisions of Section 22 of the Agricultural Adjustment Act, as amended, 7 U.S.C. 624, (Section 22). Those limitations are set forth in Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS).

Sections 701 and 703 of the Trade Agreements Act of 1979, P.L. 96-39 (The

Act), require that the President proclaim a) limitations on the quantity of types of cheese specified therein which may enter the United States in any calendar year after 1979 to an annual aggregate quantity of not more than 111,000 metric tons and b) increases in a specified manner, of the quantity of chocolate crumb now subject to certain import quotas which may be entered in any calendar year after 1979. Such limitations and increases are required to become effective on January 1, 1980.

It is provided in Sections 701 and 703 of the Act that such proclamation shall be considered a proclamation issued under Section 22 and which meets the requirements of such section.

The Act also approved bilateral agreements entered into during the Multilateral Trade Negotiations (MTN) by the United States and certain foreign countries with respect to the quantity of cheese and chocolate crumb subject to such limitations that may be imported from such countries. These agreements contained the provision that "the United States agrees to take all necessary measures to permit the maximum utilization of the quotas."

On the basis of the information submitted to me, I find and declare that the import limitations hereinafter proclaimed with respect to cheese and chocolate crumb are in accord with the requirements of Sections 701 and 703 of the Act and the bilateral agreements approved by such Act which were entered into by the United States and certain foreign countries with respect to the quantity of cheese and chocolate crumb subject to such limitations that may be imported from such countries.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under and by virtue of the

authority vested in me as President, and in conformity with the provisions of Section 22 of the Agricultural Adjustment Act of 1933, as amended, the Tariff Classification Act of 1962, the Trade Act of 1974, the Trade Agreements Act of 1979, and the bilateral agreements relating to cheese and chocolate crumb approved by the Trade Agreements Act of 1979, do hereby proclaim that Part 3 of the Appendix to the Tariff Schedules of the United States is amended, effective January 1, 1980, as set forth in the Annex to this proclamation.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of December, in the year of our Lord nineteen hundred and seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

JIMMY CARTER

[Filed with the Office of the Federal Register, 9:51 a.m., December 12, 1979]

NOTE: The annex is printed in the *FEDERAL REGISTER* of December 13, 1979.

Generalized System of Preferences for Developing Countries

Executive Order 12180. December 11, 1979

AMENDING THE GENERALIZED SYSTEM OF PREFERENCES

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including Title V of the Trade Act of 1974 (88 Stat. 2066, 19 U.S.C. 2461 *et seq.*), as amended by Section 1111 of the Trade Agreements Act of 1979 (93 Stat. 315), and Section 604 of the Trade Act of 1974 (88 Stat. 2073, 19 U.S.C. 2483), and as President of the United States of America, in order to adapt the preferential

treatment under the Generalized System of Preferences (GSP) for articles from countries designated as beneficiary developing countries which are currently eligible for such treatment, to the numerous changes of the law and of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) which have resulted from the enactment of the Trade Agreements Act of 1979 (93 Stat. 144 *et seq.*) and Proclamation 4707 to Carry Out the Geneva (1979) Protocol to the General Agreement on Tariffs and Trade and for Other Purposes; and to make conforming modifications to the TSUS, it is hereby ordered as follows:

SECTION 1. General Headnote 3(c) (ii) of the TSUS, is modified by substituting therefor the new General Headnote 3(c) (ii) as provided in Annex I, attached hereto and made a part hereof.

SEC. 2. Annex II of Executive Order No. 11888 of November 24, 1975, as amended, listing articles that are eligible for benefits of the GSP when imported from any designated beneficiary developing country, is further amended as provided in Annex II, attached hereto and made a part hereof.

SEC. 3. Annex III of Executive Order No. 11888, as amended, listing articles that are eligible for benefits of the GSP when imported from all designated beneficiary countries except those specified in General Headnote 3(c) (iii) of the TSUS, is further amended as provided in Annex III, attached hereto and made a part hereof.

SEC. 4. General Headnote 3(c) (iii) of the TSUS, listing articles that are eligible for benefits of the GSP except when imported from the beneficiary countries listed opposite these articles, is modified as provided in Annex IV, attached hereto and made a part hereof.

SEC. 5. General Headnote 3(c) (i) of the TSUS is modified by deleting from the list of independent designated beneficiary countries "Central African Empire" and "Yemen Arab Republic", and by substituting therefor, in alphabetical order, "Central African Republic," and "Yemen (Sana)", respectively.

SEC. 6. The amendments and modifications made by this Order shall be effective with respect to articles both: (1) imported on and after January 1, 1976, and (2) entered, or withdrawn from warehouse, for consumption on and after January 1, 1980.

JIMMY CARTER

The White House,

December 11, 1979.

NOTE: The annexes are printed in the FEDERAL REGISTER of December 13, 1979.

Generalized System of Preferences for Developing Countries

Executive Order 12181. December 11, 1979

AMENDING THE GENERALIZED SYSTEM OF PREFERENCES

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including Title V and Section 604 of the Trade Act of 1974 (88 Stat. 2066, 19 U.S.C. 2461 *et seq.*; 88 Stat. 2073, 19 U.S.C. 2483), and as President of the United States of America, in order to modify, as provided by Section 504(c) of the Trade Act of 1974 (88 Stat. 2070, 19 U.S.C. 2464(c)), the limitations on preferential treatment for eligible articles from countries desig-

nated as beneficiary developing countries, and to adjust the original designation of eligible articles taking into account information and advice received in fulfillment of Sections 503(a) and 131-134 of the Trade Act of 1974 (88 Stat. 2069, 19 U.S.C. 2463(a); 88 Stat. 1994, 19 U.S.C. 2151-2154), it is hereby ordered as follows:

SECTION 1. The Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) are modified by striking out items 791.24 and 791.26, including the superior heading thereto, and inserting in lieu thereof the following:

"791.26 Other . . . 5% ad val. 15% ad val."

SEC. 2. Annex II of Executive Order No. 11888, as amended, listing articles that are eligible for benefits of the GSP when imported from any designated beneficiary country is further amended by deleting item 652.99 and by adding items 145.08, 653.00, and 653.01 thereto.

SEC. 3. Annex III of Executive Order No. 11888, as amended, listing articles that are eligible for benefits of the GSP when imported from all designated beneficiary countries except those specified in General Headnote 3(c)(iii) of the TSUS, is further amended by deleting item 145.08 therefrom.

SEC. 4. General Headnote 3(c)(iii) of the TSUS, listing articles that are eligible for benefits of the GSP except when imported from the beneficiary countries listed opposite those articles, is amended by deleting therefrom the following:

"145.08 . . . Philippine Republic
724.35 . . . Republic of Korea";

and by adding thereto, in numerical sequence, the following:

"724.35 . . . Mexico".

SEC. 5. The amendments made by Executive Order 12124 of February 28, 1979, with respect to TSUS items 680.55

and 680.56 shall be effective as to articles that are both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse, for consumption on or after October 21, 1978, and as to which the liquidations of the entries or withdrawals have not become final and conclusive under Section 514 of the Tariff Act of 1930 (19 U.S.C. 1514).

SEC. 6. The amendments made with respect to items 145.08 and 724.35 by Sections 2, 3, and 4 of this Order shall be effective as to articles that are both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse, for consumption on or after March 1, 1979, and as to which the liquidations of the entries or withdrawals have not become final and conclusive under Section 514 of the Tariff Act of 1930 (19 U.S.C. 1514).

SEC. 7. The amendments made with respect to items 652.99, 653.00, and 653.01 by Section 2 of this Order shall be effective as to articles that are both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse, for consumption on or after July 26, 1979, and as to which the liquidations of the entries or withdrawals have not become final and conclusive under Section 514 of the Tariff Act of 1930 (19 U.S.C. 1514).

SEC. 8. The amendments made by Section 1 of this Order shall be effective with respect to articles that are both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse, for consumption on or after the third day following the date of publication of this Order in the **FEDERAL REGISTER**.

Department of Commerce

Nomination of Homer E. Moyer, Jr., To Be General Counsel. December 11, 1979

The President today announced that he will nominate Homer E. Moyer, Jr., of Washington, D.C., to be General Counsel of the Commerce Department. He would replace C. L. Haslam, resigning. Moyer has been Counsellor to the Secretary of Commerce since earlier this year and was Deputy General Counsel from 1976 to 1979.

He was born November 20, 1942, in Atlanta, Ga. He graduated from Emory University in 1964 and from Yale Law School in 1967.

From 1968 to 1971, Moyer was an attorney in the Office of the Judge Advocate General of the Navy. From 1971 to 1973, he was a fellow with the Public Law Education Institute in Washington. From 1973 to 1976, he practiced law with the firm of Covington & Burling.

Appalachian Regional Commission

Nomination of Albert P. Smith To Be Federal Cochairman. December 12, 1979

The President today announced that he will nominate Albert P. Smith, of Russellville, Ky., to be Federal Cochairman of the Appalachian Regional Commission. He would replace Robert W. Scott, resigned.

Smith is editor and publisher of the Russellville, Ky., *News-Democrat* and *Logan Leader* and head of a publishing company, Al Smith Communications, Inc., which owns these and four other weekly newspapers in western Kentucky and Tennessee.

He was born January 9, 1927, in Sara-

sota, Fla. He served in the U.S. Army in 1945 and 1946 and attended Vanderbilt University in 1946-47.

Smith was with the New Orleans *Times-Picayune* from 1947 to 1954, as assistant State editor and day police and criminal courts reporter. From 1954 to 1957, he was assistant city editor of the *New Orleans Item*.

In 1957 he became editor and part owner of the *Russellville News-Democrat*. Over the next 20 years he bought the other newspapers, and in 1977 he consolidated all the companies into Al Smith Communications, Inc.

Smith has also been producer and moderator for the weekly Kentucky educational television program "Comment on Kentucky" since 1974. He served as president of the Kentucky Press Association in 1975. He is chairman of the Kentucky Arts Commission and chairman of the Kentucky Oral History Commission. He is on the advisory board of the Tennessee River Valley Association.

Soviet Mission to the United Nations

White House Statement on the Bombing of the Mission. December 12, 1979

The United States Government strongly and unequivocally condemns last night's criminal bombing of the Soviet Mission to the United Nations. There have been two cowardly bomb attacks against foreign diplomatic missions in New York in the last week, both allegedly perpetrated by the same group, which calls itself Omega 7. (The Cuban Mission to the U.N. was also attacked on December 7.) We want to emphasize that the United States is totally committed to the

carrying out of its responsibilities for the protection of foreign diplomats in the United States.

Ambassador McHenry has expressed the official regrets of the U.S. Government to the Soviet Permanent Representative to the U.N., and the Department of State has made a parallel statement of regret to the Soviet Chargé d'Affaires. We shall do all in our power to see that such outrages are not repeated.

Department of the Navy

Nomination of Joseph A. Doyle To Be an Assistant Secretary. December 12, 1979

The President today announced that he will nominate Joseph A. Doyle, of New York City, to be Assistant Secretary of the Navy. He would replace Edward Hidalgo, who has been appointed Secretary of the Navy, and his responsibility would be manpower, reserve affairs, and logistics.

Doyle has been a partner in the New York law firm of Shearman and Sterling since 1956.

He was born June 13, 1920, in New York City. He received a B.S. from Georgetown University in 1941 and an LL.B. from Columbia University School of Law in 1947.

Doyle served in the U.S. Navy from 1941 to 1945. He was a naval aviator and served on board the U.S.S. *Enterprise* in the Pacific from 1943 to 1945. He was awarded the Navy Cross, the Distinguished Flying Cross, and the Air Medal.

Doyle joined the law firm of Shearman and Sterling in 1947 as an associate and became a partner in 1956.

United States Defense Policy

Remarks to Members of the Business Council. December 12, 1979

Chairman Reg Jones, members of the Business Council:

It's indeed a pleasure for me to be with you again. This afternoon I would like to make a very important statement to you, following which the chairman and I will walk down the hall, and I'd like to greet each one of you individually, as has been my custom in the past when we've been together. And then we'll have a chance for a few questions that you might want to put to me concerning energy or inflation or legislation before the Congress or Iran or other matters of interest to you.

But my first concern, and the first concern of every President who has ever lived in this house, is and must be the security of our Nation. This security rests on many kinds of strength, on arms and also on arms control, on military power and on economic vitality and the quality of life of our own people, on modern weapons, and also on reliable energy supplies. The well-being of our friends and our allies is also of great importance to us. Our security is tied to human rights and to social justice which prevails among the people who live on Earth and to the institutions of international force and peace and order which we ourselves have helped to build.

We all hope and work and pray that we will see a world in which the weapons of war are no longer necessary, but now we must deal with the hard facts, with the world as it is. In the dangerous and uncertain world of today, the keystone of our national security is still military strength, strength that is clearly recognized by

Americans, by our allies, and by any potential adversary.

Twice in this century, each time in the aftermath of a global war, we were tempted in this country by isolationism. The first time, we succumbed to that temptation, withdrawing from our global responsibilities, and you know what the result was. A generation later the world was again engulfed by war. But after the Second World War, we built a national consensus, based on our own moral and political values, around the concept of an active role for America in preserving peace and security for ourselves and for others.

Despite all the changes that have swept across this world in the last 30 years, that basic consensus has endured. We've learned the mistake of military intervention in the internal affairs of another country when our own American security was not directly involved. But we must understand that not every instance of the firm application of the power of the United States is a potential Vietnam. The consensus for national strength and international involvement, already shaken and threatened, survived that divisive and tragic war.

Recent events in Iran have been a vivid reminder of the need for a strong and united America, a nation which is supported by its allies and which need not bluff or posture in the quiet exercise of our strength and in our continued commitment to international law and the preservation of peace. Today, regardless of other disagreements among ourselves, we are united in the belief that we must have a strong defense and that military weakness would inevitably make war more likely.

So, the issue we face is not whether we should be strong; the issue is how we will

be strong. What will be our defense responsibilities for the 1980's and beyond? What challenges must we confront in meeting those responsibilities? What defense programs do we need, and how much will we spend to meet them? How can we correlate most successfully our military readiness and our arms control efforts? To begin with, our defense program must be tailored to match our responsibilities.

In Europe our military forces have provided the foundation for one of the longest periods of peace and prosperity that continent has ever enjoyed. Our strength, both conventional and nuclear, helps to maintain peace while our allies work together and build together through the European Community and also nurture their historical ties to the countries of Eastern Europe. Our mutual commitments within the Atlantic Alliance are vital to us all, and those commitments are permanent and unshakable.

American military strength provides the framework within which our mature friendships with Japan, Korea, Australia, New Zealand, the Philippines, and Thailand all contribute to stability in the Pacific basin and throughout the world.

The prospects for peace in the Middle East have been enhanced by a strong America and by confidence in us among our friends in Egypt and in Israel. We are determined to continue the progress which has been made in the Middle East.

We must and we will continue to meet these and our other responsibilities. But there are reasons for concern about our ability to sustain our beneficial and our peaceful influence throughout the world—real reasons for concern.

For nearly 20 years now, the Soviet Union has been increasing its real defense spending by 3 or 4 percent each

year, 3 or 4 percent compounded annually. In contrast, our own defense spending has declined in real terms every year from 1968 through 1976. This is creating a real challenge to American leadership and to our influence in the world.

We will almost certainly face other challenges, less direct, though no less serious. The 1980's are very likely to bring continued turbulence and upheaval, as we've experienced in the 1970's. Problems of energy price and energy supply will continue to strain the economy of the developed world and will put even more severe pressures on the developing nations. Political instability, which is already serious enough, may even intensify as the newer nations struggle to cope with these problems, which are serious enough for us.

As in the past, when the winds of change threaten to arouse storms of conflict, we must be prepared to join our friends and our allies in resisting threats to stability and to peace. The steady build-up by the Soviets and their growing inclination to rely on military power to exploit turbulent situations call for calm, deliberate, and sustained American response.

Through the mid-1970's, the United States relied on the defense strategy and also on force structures devised during the early 1960's, a time when we enjoyed strategic nuclear superiority and a tactical nuclear monopoly, when Soviet seapower was limited and the Soviet military presence outside Eastern Europe almost nonexistent. All that had changed by the time I took office as President.

Beginning in 1976 and continuing in my own administration, we've set out to counterbalance the growth in Soviet military power by launching new efforts that draw on our own considerable strengths. During each of the last 4 years, there has

been a moderate increase in real defense spending. In Europe we've taken steps, as you know, to reverse a decade of relative decline in the military strength of the Atlantic Alliance.

When I first began to meet with Atlantic Alliance leaders almost 3 years ago, I found them very troubled by the state of our military strength in the Atlantic Alliance. I promised to raise our own level of defense spending, in real terms, by some 3 percent per year, and our NATO Allies responded by making the same pledge. With American leadership, NATO also took the crucial step of adopting a bold, long-term defense program, which will extend over 15 years. That program is helping us to increase our capacity to deter or to defeat any surprise attack that may be launched against our European allies and, therefore, against ourselves.

We are also taking steps to redress the balance in other theater nuclear forces. This action, as you know, we've been pursuing in the last few days.

In the early 1960's, the United States removed its medium-range missiles from Europe. We could do this then, because there was overwhelming United States strategic superiority. But the Soviet Union did not show similar restraint. The accelerating development of their relatively long-range, mobile, multiwarhead SS-20 missile is a major escalation in theater nuclear armaments. With the advent of rough strategic parity, this new missile creates a potentially dangerous weakness in NATO's ability to deter aggression. In the SALT II negotiations, we carefully protected our freedom to correct this weakness.

Just a few hours ago, I was informed that the NATO Alliance resolved to strengthen its theater nuclear weapons to offset actual Soviet deployments. The

agreement reached this afternoon in Europe was a unanimous agreement very encouraging to all of us. Now, on the basis of strength, we can negotiate with the Warsaw Pact to reduce nuclear weapons and also to reduce, we hope, conventional weapons throughout the European theater.

In the area of intercontinental or strategic forces, we also face adverse trends that must be corrected. Improved Soviet air defenses now threaten to make our strategic bombers vulnerable. The cruise missile will be our solution to that problem. Production of the first generation of air-launched cruise missiles will begin next year.

In addition, our land-based Minuteman ICBM's are becoming increasingly vulnerable because of the improved accuracy of the Soviet Union's multiwarhead missiles. That's why we decided last spring to produce the MX missile. The relatively small number of MX missiles to be deployed will have mobility and a large number of shelters and will be far less vulnerable than our present fixed-shelter Minutemen. Further, in response to any first strike against us, the MX will have the capability to attack a wide variety of Soviet military targets.

The MX missile, deployed as I've just described, will not undermine stability, but it will deter attack and encourage negotiations on further nuclear arms limits. In addition, by increasing the difficulty of any contemplated Soviet strike, it will contribute to the survivability of our own strategic bombers and submarines. Even with SALT II, America needs the MX to maintain the strategic nuclear balance.

We are also modernizing our strategic submarine force. The first new Trident submarine has already been launched, and the first of our new Trident missiles, with

a range of more than 4,000 miles, have already been put to sea.

Thus, each leg of our strategic triad is being modernized—cruise missiles for our bombers, the MX for our intercontinental missiles, and Trident for our undersea deterrent. Nor will we neglect our conventional forces, though here we must rely heavily on the parallel efforts of our allies, in Asia as well as in Europe. They must bear their proportional share of the increased costs of a common defense.

I'm determined to keep our naval forces more powerful than those of any other nation on Earth. Our shipbuilding program will sustain a 550-ship navy in the 1990's, and we will continue to build the most capable ships afloat. Seapower is indispensable to our global strategy, in peace and also in war.

And finally, we are moving rapidly to counterbalance the growing ability of the Soviet Union, directly or through surrogates, to use its military power in Third World regions, and we must be prepared to deal with hostile actions against our own citizens or our vital interests from others as well. For this purpose, we need not only stronger forces but better means for rapid deployment of the forces that we already have.

Our 1981 defense budget and our 5-year defense program will meet this need in two different ways. The first will be a new fleet of maritime prepositioning ships that will carry the heavy equipment and the supplies for three Marine brigades that can be stationed in forward areas where United States forces may be needed. With their supplies already near the scene of action, the troops themselves can then be moved in by air very rapidly. The second innovation will be a new fleet of large cargo aircraft to carry Army tanks and other equipment over intercontinental distances.

Having rapid deployment forces does not necessarily mean that we will use them. We intend for their existence to deter the very developments that would otherwise invoke their use.

We must always remember that no matter how capable or advanced our weapons systems, our military security depends on the abilities, the training, and the dedication of the people who serve in our Armed Forces. I'm determined to recruit and to retain, under any foreseeable circumstances, an ample level of such skilled and experienced military personnel.

To sum up, the United States is taking strong action: first, to improve all aspects of our strategic forces, thus assuring our deterrent to nuclear war; second, to upgrade our forces in NATO and in the Pacific, as part of a common effort with our allies; third, to modernize our naval forces and keep them the best in the world; fourth, to strengthen our rapid deployment capabilities to meet our responsibilities outside NATO; and fifth, to maintain an effective force of highly trained military personnel.

We must sustain these commitments in order to maintain peace and security in the 1980's. To ensure that we press forward vigorously, I will submit for fiscal year 1981 a budget to increase funding authority for defense to more than \$157 billion, a real growth of more than 5 percent over my request for fiscal year 1980. Just as in 1979 and in 1980, requested outlays for defense during fiscal year 1981 will grow by more than 3 percent, in real terms, over the preceding year. We will sustain this effort.

My 5-year defense program provides a real funding increase that will average more than 4½ percent each year. I intend to carry out this program. With careful and efficient management, we should be able to do so within the budget increases

I propose. If inflation increases or exceeds the projected rates that we now expect, I intend to adjust the defense budget as needed, just as has been done in 1980 fiscal year.

Much of this program which I've outlined to you will take 5 years or more to reach fruition. The imbalances it will correct have been caused by more than a decade of disparity. This cannot be remedied overnight, so we must be willing to see this program through. To ensure that we do so, I'm setting a growth rate for defense that will be tolerable for our country over the long haul.

The most wasteful and self-defeating thing that we could do would be to start this necessary program, then alter it or cut it back after a year or two when such an action might become politically attractive. The defense program that I'm proposing for the next 5 years will require some sacrifice—but sacrifice that we can well afford. It will not increase at all the percentage of our gross national product devoted to defense, which will remain steady at almost exactly 5 percent per year.

We must have a long-range, balanced approach to the allocation of Federal expenditures. We will continue to meet such crucial needs, of course, as jobs and housing and education and health, but we must realize that a prerequisite to the enjoyment of such progress is to assure peace for our Nation. So, in asking congressional support for our defense efforts, I'm asking for consistent support, steadfast support—not just for 1980 or 1981, but until these commitments have been fulfilled.

Sustained American strength is the only possible basis for the wider, truly reciprocal détente which we seek with the Soviet Union. Only through strength can we create global political conditions hospitable to worldwide economic and politi-

cal progress and to controlling both conventional and nuclear weapons.

As the strongest, most advanced country on Earth, we have a special obligation to seek security through arms control as well as through military power. So, I welcome the debate by the Senate in its consideration of the SALT II treaty. It will enable us to build a clearer understanding that these efforts in both arms control and in defense are vital to our security and they are mutually compatible, one with another.

There are several reasons why SALT II will strengthen the military aspect of our national security:

First, we can better maintain strategic equivalence in nuclear weapons with SALT II. Without it, the Soviet Union can add more to the power of their own forces, widen any advantage that they may achieve in the early 1980's, and conceal from us what they are doing. For us, maintaining parity with these uncontrollable Soviet activities would add to our costs in time, money, and also uncertainty about our own safety.

Second, we can better maintain the combat efficiency and readiness of our nonnuclear forces with SALT II than we can without it. Whatever the level of the defense budget, more of it will have to go into strategic weapons, atomic weapons, if SALT II is not ratified.

Third, we can better strengthen the unity, resolve, and capability of the NATO Alliance with SALT II than we can without it. That's why the heads of other NATO countries have urged strongly its ratification.

Fourth, we can better continue the SALT process, which has now been going on for more than 30 years, the process of negotiating further reductions in the world's nuclear arsenals, with SALT II than without it. Without SALT II and

all its limits, its rules, and definitions in place, any agreement in SALT III would, at the very best, take many more years to achieve.

And finally, we can better control the proliferation of nuclear weapons among currently nonnuclear nations with SALT II than without it. This could be one of the most important factors involved in our pending decision on the SALT treaty.

All of these issues are extremely important, and they are intimately interrelated. A strong defense is a matter of simple common sense; so is SALT II.

I will do my utmost as President to keep America strong and to keep our Nation secure, but this cannot be done without sustained effort and without some sacrifice, which our Nation can certainly afford.

The best investment in defense is in weapons that will never have to be used and in soldiers who will never have to die. But the peace we enjoy is the fruit of our strength and our will to use this strength if we need to. As a great nation devoted to peace, we must and we will continue to build that American strength.

Thank you very much.

NOTE: The President spoke at 5 p.m. in the East Room at the White House.

Domestic Volunteer Service Act Amendments of 1979

*Statement on Signing S. 239 Into Law.
December 13, 1979*

I have today signed S. 239, which reauthorizes funding for the domestic volunteer service programs administered by the ACTION agency. The most notable of these is VISTA, a program through which volunteers donate their talents to

help low-income people combat poverty and poverty-related problems.

I am especially pleased that this bill emphasizes use of existing authority for the new urban volunteer program, an important part of the comprehensive urban policy which I first presented in March 1978. Included in my urban initiatives and adopted in this act are the Urban Volunteer Corps, which will provide neighborhood groups with skilled volunteers, and a Good Neighbor Fund to make small grants to local urban organizations that undertake projects for community development. In addition, the act authorizes a fixed-income consumer counseling program to help low-income elderly people manage their money and Helping Hand programs through which volunteer, in-home services will be provided to reduce the number of the elderly and the handicapped requiring institutionalization.

In my urban policy I called for a partnership involving Federal, State, and local governments, the private sector, and neighborhood groups to revitalize the Nation's distressed urban communities. An important part of that policy was the desire to encourage citizens to take an active part in this revitalization activity. S. 239 will help to make such voluntary efforts a reality.

Some of the activities covered by the new urban volunteer program are currently being conducted on a demonstration basis in selected areas around the country, where, at minimal cost, volunteers have been successful in helping to solve problems and improve the quality of life in their communities.

With the passage of this legislation, 15 out of the 19 legislative proposals I originally submitted to Congress in my urban policy have been signed into law.

Finally, I want to recognize the diligent efforts and support of Senator Alan Cran-

ston, and Representative Carl Perkins in getting this legislation enacted.

NOTE: As enacted, S. 239 is Public Law 96-143, approved December 13.

United States Ambassador to Turkey

*Nomination of James W. Spain.
December 13, 1979*

The President today announced that he will nominate James W. Spain, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States to Turkey. He would replace Ronald I. Spiers, who is resigning. Spain was Ambassador to the United Republic of Tanzania from 1975 until earlier this year.

He was born July 22, 1926, in Chicago, Ill. He received an M.A. from the University of Chicago in 1949 and a Ph. D. from Columbia University in 1959. He served in the U.S. Army from 1946 to 1947.

Spain was a consultant to the Secretary of the Army in Tokyo from 1949 to 1950 and cultural officer in Karachi from 1951 to 1953. From 1953 to 1955, he was a research fellow with the Ford Foundation, and from 1955 to 1963, he was a research lecturer at Columbia University.

Spain was a member of the policy planning staff at the State Department in 1963 and 1964 and Director of the Office of Research and Analysis for Near East-South Asian Affairs from 1964 to 1966. From 1966 to 1969, he was country director for Pakistan and Afghanistan, and in 1969 he was Chargé d'Affaires in Islamabad.

From 1970 to 1972, Spain was consul general in Istanbul. From 1972 to 1974, he was Deputy Chief of Mission in An-

kara. In 1974–75 he was diplomat in residence at Florida State University.

American Hostages in Iran

Statement by the White House Press Secretary. December 13, 1979

We have read reports from Iran today that international observers will be allowed to see our people who are being held hostage.

I want to emphasize that for any such visit to the hostages to accomplish a humanitarian objective and to be responsive to international opinion and to acceptable standards of behavior, it is important that those who see the hostages be allowed to see all of them, to talk with them, and to report to the families of the hostages and to the world on the condition of each hostage. Any observers allowed on the Embassy compound should be qualified, internationally recognized, impartial, neutral observers and should include a qualified medical doctor. Visits by these observers should occur regularly and frequently until the hostages are released.

If this occurs, we would consider it a step forward.

NOTE: Press Secretary Jody Powell read the statement at approximately 11:45 a.m. during his regular briefing for reporters in the Briefing Room at the White House.

Gannett Newspaper and Broadcast Executives

Remarks and a Question-and-Answer Session at a White House Briefing. December 13, 1979

THE PRESIDENT. Good afternoon.

Well, it's a pleasure to be back with you. The last time I was joined with this

group was in the same building in a different room, and now you see what Room 450 looks like. This is where your reporters put me through a grilling on the occasions when I come over for a press conference.

Some people ask me how I react to those press conferences, and it's hard for me to answer that question honestly and on the record. But I was thinking about one of the things that Hedley Donovan¹ said—one of your past associates. When he was at Fortune, he was working late at night, I understand, typing, bent over, sweating, worrying, and somebody came up and said, "Do you really enjoy writing?" And he said, "Well, let me put it this way: I enjoy having written." [Laughter] That's kind of the way with me. I enjoy having had press conferences, but I don't particularly enjoy it at the time.

I'm delighted to be with you. This is an important occasion, I know, in the history of Gannett. You have achieved a great level of performance and, also, business success. A very reliable source I have within Gannett has told me confidentially that you're now the largest news chain in the Nation, has more readers. The same reliable source told me when he was working for me that it was very important to have a better working relationship with the press. [Laughter] I understand that Vice President Walt Wurfel² has put that philosophy to work since he's been with you.

I thank you for coming. I would like to say a couple of things and then answer two or three questions if you don't mind.

ADMINISTRATION POLICIES

Our Nation is now embroiled in a circumstance in Iran that's not only difficult

¹ Senior Adviser to the President.

² Walter W. Wurfel, former Deputy Press Secretary to the President.

but also extremely sensitive and may have historic connotations for the future. I think it's demonstrated that Americans can be remarkably united, that Americans can be remarkably resolved, and that, contrary to our basic nature, Americans can also be very patient, when patience is the better part of valor.

I think we've learned, as I said yesterday in my speech to the Business Council, that it's a general consensus now in our country that military strength and also a strong nation is not contrary to the desires for peace. I think we've learned from the Vietnam war that to become unnecessarily involved in the internal affairs of another country when our own security is not directly threatened is a serious mistake. But we've also learned since then, particularly now, that a strong America, willing to exert its strength when necessary, is an integral part of the psyche of our country and also a legitimate role for America to play.

I don't know what the future will bring in the Iran situation. It's so far been handled with, I think, dispatch and also with wisdom. I've got good advisers, and we're very cautious about how we have approached this difficult circumstance.

We have emphasized over and over, not adequately yet, that there is no confrontation or schism between the world of Islam, the Moslem countries and our own country. This is not the point at all. And as far as the hostages are concerned, they are the only issue for us. It's not a proper time for us to discuss the wisdom or the role that the Shah played as a good or bad leader. It's not a proper time for us to get involved in a debate about whether he is or has been sick, or how sick, or where he goes, or to discuss the history of Iran.

It's important, and we have recognized the importance of maintaining one issue foremost in our mind and in our national consciousness in our dealing with other countries, in our dealing with Iran, in

our dealing with the United Nations, and that is the early and the safe release of the American hostages. I'm very proud of the way our Nation has performed.

We do have adequate military presence in the Arabian Sea at the mouth of the Persian Gulf. We've not made idle threats; we've not had to. We've made a clear statement of our purpose and our resolve, which will be exercised if necessary. What we want is peace, and what we want is a good relationship, now and in the future, with the people of Iran. We're not trying to decide what form of government they should have. We're not trying to interfere in their own internal affairs. We think they've violated every international law imaginable—the Geneva agreements, the premises on which the United Nations Charter is based.

And we've had an additional responsibility, which has been difficult, but, I think, which has been successfully achieved so far, of keeping world opinion on our side. This even involves the less developed countries and other Moslem nations who would not ordinarily be inclined to do so. It has encompassed, as well, nations who in the past have not been our close friends. And in the United Nations Security Council vote, the three small nations, coincidentally, happen to have been and are Moslem countries.

Our presentation to the International Court of Justice by the Attorney General this week has been well received. We anticipate—I can't say for sure—that we'll have a ruling from that Court, perhaps even as early as tomorrow. I have no way to determine that accurately; that's what the Attorney General believes. And we hope it will be resolved in our favor. We're trying to keep legality, propriety, and world opinion and the right on our side.

I think we've seen in this incident a very serious additional piece of evidence

that our Nation is vulnerable to our suppliers of oil. My guess is that the trend in OPEC oil production among the Arab and non-Arab countries in the coming months will be downward, not upward. And with a shorter and shorter supply in prospect, there's no doubt in my mind that prices will be going up. It would be a mistake for me to mislead the American people.

Some of the countries are producing more oil than they want to produce. Saudi Arabia is a typical example—a very good example, not typical. They would be adequately compensated, in money of all denominations and foreign holdings, with a much lower level of production. They are not the only country producing perhaps more than they would prefer to produce for their own, narrowly focused, parochial needs.

Other countries have an attenuation in their production, because their explorations have not been successful in revealing additional supplies of oil. And there are additional countries who would like to use a shortage of oil, or a reduction in their sales of oil, for political purposes. I don't know of any instance where there is an inclination among the Arab oil-producing countries to increase production.

So, we're going to see shortages, and it's a very serious problem for us in not having an adequate national energy policy. As you know, I proposed such a policy in April of 1977, after I'd been in office 90 days, and the Congress has still not acted. They've not passed any legislation, not one line of legislation relating to oil. And, as you know, there is a very difficult and sensitive problem on the Hill in passing legislation to take away the prerogatives, sometimes the exaggerated prerogatives, unwarranted prerogatives, of the oil companies.

I, in effect, represent two major and different kinds of nations. One is by far

the largest oil-consuming nation on Earth, and at the same time, one of the largest oil-producing nations on Earth. And for the first time in the last 2 years, we have seen a rough equivalency between the influence on the Hill of oil consumers compared to oil producers. In the past the field was open to oil producers exclusively, and you could understand that when oil was \$1.50 a barrel.

I'd like very much now to answer two or three questions of yours, if you have any, and, Al,³ perhaps I could call on you for the first question, if the others don't object. *[Laughter]*

QUESTIONS

PUBLIC OPINION POLLS

Q. In light of what's happened in the polls recently and the general tone of editorials about your administration, are you reading newspapers any more and enjoying them any more? *[Laughter]*

THE PRESIDENT. A few months ago I doubted very seriously the authenticity and accuracy of the polls. *[Laughter]* Lately my opinion of them has increased substantially. *[Laughter]*

But I would guess, to be serious about it, that a lot of the poll response has been because of the Iranian question, a natural desire on the part of Americans to support their President in a time of crisis or challenge. That's part of it. The other part, to be equally frank, is that I believe that the expectations that were felt among many Democrats concerning Senator Kennedy's ability has been attenuated since he became an active candidate. That was almost inevitable, and I don't say that in derogation of him. But those two factors are obviously at play.

³ Allen H. Neuharth, president and chief executive officer, Gannett Co., Inc.

We have a long way to go. There's only one poll that counts, as my wife said on the "Today" show this morning, and that's the final vote. But we're prepared. I think it's obvious that in 1975, 1976, that we were constantly underestimated, maybe even by some of your editorial writers and reporters. But we've got a good ability to organize, and we have a longstanding, even a lifetime commitment, at least a political lifetime commitment, to stay close to the American people. We do this through my own interrelationships and those of my staff and those of my family. And I think that sensitivity of American needs and desires and hopes and aspirations and concerns pay rich dividends.

But we know how to organize, and we are successful and have been in the past in conducting a campaign. So, I would guess that we have a good chance next year. I look forward to it with anticipation and confidence.

AMERICAN HOSTAGES IN IRAN

Q. Mr. President, you mentioned the patience of the American people. There was an instance in the late sixties when some British diplomats were taken hostage in Peking and were held for—I think it was over a year. It got to the point where people stopped talking about it and the Government of Britain stopped talking about it. They were released. Is it possible or conceivable that this situation could drag on in Tehran until we get sort of the same situation?

THE PRESIDENT. I'm determined that that will not happen, Don.⁴

We had, as you know, one of our Ambassadors who was captured in Manchuria—maybe the incident to which you refer, maybe a different one—and he

⁴ Don Campbell, White House correspondent, Gannett News Service.

stayed imprisoned for more than a year. It was during President Truman's administration. He was finally released, I think, in the fall or winter of 1949. I'm not sure about the exact date.

There, President Truman—I've re-read the history on it and even the private memoranda that were exchanged within the White House—and President Truman did ask the Joint Chiefs of Staff and others to analyze how he might, through physical action if necessary, cause the release of our Ambassador and his staff. It was not done, and eventually the Ambassador was released.

I'm determined that in this particular incident we will not forget those hostages one day and that we will continue to keep the issue of their illegal incarceration in the forefront of the consciousness not only of America but of the entire world. There are a series of steps that we can take. There are also steps that the Iranians are taking, not for the same purpose, to keep this a vivid issue in the minds of the people throughout the world.

We will not let it become a dormant issue, or we will not let the status quo become acceptable. In my judgment there has been some change, substantial change, in the attitude even among the Iranians. And if you go back and look at the early comments or statements that were made and compare them to the more recent ones, you see that there has been some evolutionary change, not always in the right direction, but, I think, in general it has.

The promise that our hostages would be tried individually as war criminals and perhaps even executed was the earliest threats made. That has, to some degree, been changed. Their early expectation that the Shah would be returned to them through blackmail—I think those expectations have now been lowered, if not eliminated altogether, and so I think that, in itself, is good.

But I will not permit this incident to become acceptable and to be dragged out. I'll do my utmost to prevent that. I don't want that to be interpreted as threatening military action. I'll do everything I can to avoid any bloodshed, provided our hostages are not physically harmed.

Maybe one more question.

GASOLINE RATIONING

Q. Mr. President, in light of your comments about the oil shortage possibility, what is the likelihood of rationing?

THE PRESIDENT. In my opinion we must do something about the excessive consumption of oil products, particularly gasoline. We made an effort in the International Energy Agency this week, as you may know. The Secretary of Energy went over there, and we pointed out to the other members—I think it's almost all the democratic developed nations on Earth, except France is not a member; 24 nations, I believe—we pointed out to them that the prospects next year are for a reduction in oil exports from the OPEC countries of about a million and a half to 2 million, maybe as high as 2½ million barrels per day, and that we needed to form an alliance, in effect, or a commitment that instead of increasing our bids for spot market oil as the shortages did evolve, if they do, then we would have an arrangement ahead of time for us to lower our demand for imported oil collectively, so that we could share the shortages.

We are part of that process, and we will have another meeting in March to follow up on those tentative commitments made at that meeting this week.

Gasoline is obviously the easiest energy supply to curtail as far as waste is concerned, because Americans do waste so much. There are several ways that this can be done. One is voluntary action on the part of Governors and States—this involves a gamut of things; secondly, an in-

crease in the price of gasoline through an imposed tax. We are considering that as one of the options. Rationing is another option that we are considering. Either one of those last two would require congressional action, and before long—I don't know exactly the time schedule yet—I'll be having some meetings on it this week—we will decide what approach to take.

An increase in the price of gasoline has shown, in the last few months, to be much closer related to conservation than we had previously anticipated. There was a guess earlier, a presumption earlier, that the elasticity factor was one-tenth, which means that if you increase the price of gasoline 10 percent, you would only have a 1-percent reduction in consumption. It's probably twice that much, which has been a fairly pleasant surprise, that we have had voluntary conservation among Americans.

This summer, for instance, we had an average, not only in gas consumption reduced, but we had an average increase in mileage derived from automobiles all over the country of 1 mile per gallon, which is a substantial amount of saving. This is because of smaller cars, more careful driving, and so forth. In addition to that, there are other factors—less use of automobiles and, of course, more sharing of automobiles as they make the trip. We have experienced lately a 7- or 8-percent reduction in gasoline consumption.

So, we are exploring opportunities. I've not yet made a decision on how to cut gasoline consumption more. We can do it without hurting our economy.

AL.

MR. NEUHARTH. Thank you very much.

THE PRESIDENT. Thank you very much. I've enjoyed being with you.

NOTE: The President spoke at 2:21 p.m. in Room 450 of the Old Executive Office Building.

Christmas Pageant of Peace

*Remarks on Lighting the National
Community Christmas Tree.
December 13, 1979*

Christmas means a lot of things. It means love. It means warmth. It means friendship. It means family. It means joy. It means light. But everyone this Christmas will not be experiencing those deep feelings. At this moment there are 50 Americans who don't have freedom, who don't have joy, and who don't have warmth, who don't have their families with them. And there are 50 American families in this Nation who also will not experience all the joys and the light and the happiness of Christmas.

I think it would be appropriate for all those in this audience and for all those listening to my voice or watching on television to pause just for a few seconds in a silent prayer that American hostages will come home safe and come home soon—if you'd please join me just for a moment.

[Pause for silent prayer.]

Thank you very much.

Nineteen seventy-nine has not been a bad year. Many good things have happened to us individually and have also happened to our Nation. Not far from here, on the north side of the White House, we saw a remarkable ceremony, headed by a Jew, the leader of Israel, a Moslem, the President of Egypt, and myself, a Christian, the President of our country, signing a treaty of peace. This peace treaty was a historic development, and it was compatible with the commitment that we feel so deeply in the religious season now upon us.

Our Nation also opened up its arms of understanding, diplomatic relationships,

and friendship—our Nation, the strongest on Earth, and China, the most populous nation on Earth. The establishment of new friendships is part of the Christmas season.

I went to Vienna and met with President Brezhnev. And he and I signed the SALT II treaty, which will help to limit and to reduce the spread of nuclear weapons, to bring about a better understanding between our two great countries, and to search for the kind of reduction of armaments that will lead, I think, to the realization of the true spirit of Christmas.

This fall we had a visit from a great spiritual leader, Pope John Paul II, who traveled throughout our country and who spoke in a quiet voice of understanding, of compassion, of love, of commitment, of morality, of ethics, of the unchanging things that are part of the spirit of Christmas. And I remember one thing in particular that he said on the White House lawn. He said, "Do not be afraid. Do not be afraid." And as you know, that's the same message that the angels brought to the shepherds near Bethlehem the night that our Savior was born: "Fear not. Be not afraid." Many of the problems in our world derive from fear, from a lack of confidence in ourselves and, particularly, a lack of confidence in what we can do, with God.

We hope we'll soon see peace in Zimbabwe-Rhodesia, a nation that has suffered much in the last few years. But we've also seen some needs for additional effort.

This is the Year of the Child, but it's possibly true that in Cambodia, or Kampuchea, the children will have suffered more in 1979 than in any other year in our lifetime—children so weak, so starved, that they don't even have the strength to cry. We've seen Vietnam refugees put to sea with very little hope of ever reaching land again. And our country has

reached out its arms to help those starving children and those refugees adrift.

We've seen divisions among people because of religious beliefs. The recent events in Iran are an unfortunate example of that misguided application of belief in God. But I know that all Americans feel very deeply that the relationships between ourselves and the Moslem believers in the world of Islam is one of respect and care and brotherhood and good will and love.

So, we do have disappointments; we do have suffering; we do have divisions; we often have war. But in the midst of pain, we can still remember what Christmas is—a time of joy, a time of light, a time of warmth, a time of families, and a time of peace.

In our great country we have an awful lot for which we can be thankful: the birth of our Savior, the initiation of religious holidays tomorrow night for the Jews of America, and a realization that in our Nation we do have freedom to worship or not worship as we please. So, let's remember our blessings, yes, but let's also remember the needs for us to be more fervent in our belief in God and especially in the sharing of our blessings with others.

Thank you very much. Merry Christmas to you all.

And now we'll go over—Amy and I and Rosalynn—and we'll light the lights that signify Christmas. Thank you very much.

Is everybody ready?

I'm going to ask Amy to throw the switch.

[At this point, Amy Carter threw the switch that lit the star on top of the National Community Christmas Tree and the lights on the 50 smaller trees, which traditionally represent the 50 States.]

I want to tell you what just happened. Around the periphery of this crowd, there

are 50 small Christmas trees, one for each American hostage, and on the top of the great Christmas tree is a star of hope. We will turn on the other lights on the tree when the American hostages come home.

Merry Christmas, everybody.

NOTE: The President spoke at 5:50 p.m. on the Ellipse.

Cahaba River in Alabama

Message to the Congress Transmitting a Study. December 14, 1979

To the Congress of the United States:

Pursuant to the Wild and Scenic Rivers Act (Public Law 90-542, as amended), I am transmitting the attached study of the feasibility of adding the Cahaba River in Alabama to the national Wild and Scenic Rivers system. Although the study finds that the river does not possess the qualities to be eligible to be added to the national system, the State of Alabama has initiated efforts to manage the river to protect its attributes, including its recreational qualities.

JIMMY CARTER

The White House,

December 14, 1979.

NOTE: The 196-page report, prepared by the Department of Agriculture's Forest Service and the Alabama Forestry Commission, is entitled "Cahaba River, Alabama—Wild and Scenic River Study."

Christmas 1979

*Statement by the President.
December 14, 1979*

Rosalynn and I send our warmest Christmas greetings to those of our fel-

low citizens who celebrate this religious holiday.

At this time of traditional joy and family festivity, as we join in thanking God for His blessings to us as a nation and as individuals, we ask that you offer a special prayer for the Americans who are being held hostage in Iran and for their families. We remember also the plight of all people, whatever their nationality, who suffer from injustice, oppression, hunger, war, or terrorism.

May this Christmas season truly be the beginning of a time of peace among nations and good will among all peoples, and may the spirit of love and caring continue from this holy season through the coming year.

Emergency Board To Investigate a Railway Labor Dispute

Executive Order 12182. December 14, 1979

CREATING AN EMERGENCY BOARD TO INVESTIGATE A DISPUTE BETWEEN THE LONG ISLAND RAIL ROAD AND CERTAIN OF ITS EMPLOYEES

A dispute exists between The Long Island Rail Road and certain of its employees represented by Participating Labor Organizations designated in list attached hereto and made part hereof.

This dispute has not heretofore been adjusted under the provisions of the Railway Labor Act, as amended; and

This dispute, in the judgment of the National Mediation Board, threatens substantially to interrupt interstate commerce to a degree such as to deprive a

section of the country of essential transportation service:

Now, THEREFORE, by the authority vested in me by Section 10 of the Railway Labor Act, as amended (45 U.S.C. 160), it is hereby ordered as follows:

1-101. *Establishment of Board.* There is established a board of three members to be appointed by the President to investigate this dispute. No member of the board shall be pecuniarily or otherwise interested in any organization of railroad employees or any carrier.

1-102. *Report.* The board shall report its finding to the President with respect to the dispute within 30 days from the date of this Order.

1-103. *Maintaining Conditions.* As provided by Section 10 of the Railway Labor Act, as amended, from this date and for 30 days after the board has made its report to the President, no change, except by agreement, shall be made by The Long Island Rail Road, or by its employees, in the conditions out of which the dispute arose.

JIMMY CARTER

The White House,
December 14, 1979.

Participating Labor Organizations

International Brotherhood of Teamsters (IBT)

United Transportation Union (UTU)

Brotherhood of Locomotive Engineers (BLE)

Brotherhood of Railroad Carmen (BRC)

Brotherhood of Railroad Signalmen (BRS)

Railroad Yardmasters of America (RYA)

Police Benevolent Association (PBA)

[Filed with the Office of the Federal Register, 11:15 a.m., December 17, 1979]

Emergency Board To Investigate a Railway Labor Dispute

*Appointment of the Membership.
December 14, 1979*

The President today announced the three persons whom he will appoint as members of the Emergency Board to investigate the Long Island Rail Road dispute. They are:

James J. Reynolds, of Washington, D.C., a former Assistant Secretary of Labor and Under Secretary of Labor in the Kennedy and Johnson administrations. Reynolds was president of the American Institute of Merchant Shipping until his retirement in 1978. He will serve as Chairman of this Emergency Board.

Ida Klaus, of New York City, an arbitrator and mediator with more than 40 years' experience in the labor relations field. She has served as special arbitrator under the U.S. Steel agreement since 1975. She was executive director of the Office of Labor Relations and Collective Bargaining of the New York City Board of Education from 1962 to 1975.

Nicholas H. Zumas, of Washington, D.C., an attorney and arbitrator who has been in private practice since 1965. He is a member of the District of Columbia Board of Labor Relations and has served as assistant to the Under Secretary of Health, Education, and Welfare.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of

general interest announced by the White House Press Office and not included elsewhere in this issue.

December 8

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Frank B. Moore, Assistant to the President for Congressional Liaison.

December 10

The President met at the White House with:

- Dr. Brzezinski;
- Mr. Moore;
- members of the Presidential Commission on World Hunger to receive the Commission's preliminary report;
- Vice President Walter F. Mondale.

December 11

The President met at the White House with:

- Dr. Brzezinski;
- the Democratic congressional leadership;
- Mayor Kenneth A. Gibson of Newark, N.J.;
- Mr. Moore;
- Kenneth T. Blaylock, president of the American Federation of Government Employees;
- Representative Harold E. Ford of Tennessee.

The President and Mrs. Carter hosted a Christmas reception in the evening for Members of Congress and their guests on the State Floor of the White House.

December 12

The President met at the White House with:

- Dr. Brzezinski;
- Mr. Moore;
- Stansfield Turner, Director of Central Intelligence;
- Vice President Mondale, Paul A. Volcker, Chairman of the Board of Governors of the Federal Reserve System, James T. McIntyre, Jr., Director of the Office of Management and Budget, Charles L. Schultze, Chairman of the Council of Economic Advisers, and Alfred E. Kahn, Advisor to the President on Inflation.

The White House announced that the President has designated Max M. Kampelman as Chairman of the Woodrow Wilson International Center for Scholars in the Smithsonian Institution. Kampelman was appointed a member of the board of trustees of the Center last month. He is a Washington, D.C., attorney.

December 13

The President met at the White House with:

- Dr. Brzezinski;
- Attorney General Benjamin R. Civiletti;
- Mr. Moore;
- members of the Price Advisory Committee;
- former President Gerald R. Ford;
- representatives of women's organizations.

The President and Mrs. Carter hosted a Christmas reception in the afternoon for members of the Residence staff and their families on the State Floor of the White House.

The President and Mrs. Carter hosted a Christmas reception in the evening for

members of the White House press corps on the State Floor of the White House.

The President transmitted to the Congress the 1978 annual reports of the Great Lakes Basin Commission, Missouri River Basin Commission, New England River Basins Commission, Ohio River Basin Commission, Pacific Northwest River Basins Commission, and Upper Mississippi River Basin Commission.

December 14

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of Defense Harold Brown, Deputy Secretary of State Warren M. Christopher, Hedley W. Donovan, Senior Adviser to the President, Hamilton Jordan, Assistant to the President, and Dr. Brzezinski;
- Mr. Moore;
- Thomas R. Ehrlich, Director of the International Development Cooperation Agency;
- 6-year-old Betsy Burch, of Stone Mountain, Ga., the 1980 March of Dimes Poster Child;
- Mrs. Carter, for lunch;
- members of the United States-Japan Economic Relations Group;
- Mr. McIntyre, and other administration officials to review the fiscal year 1981 budget;
- Secretary of State Cyrus R. Vance.

The President and Mrs. Carter hosted a Christmas reception in the evening for members of the White House staff on the State Floor of the White House.

The President transmitted to the Congress the fiscal year 1978 annual report of ACTION.

The President left the White House for a weekend stay at Camp David, Md.

Administration of Jimmy Carter, 1979

NOMINATIONS SUBMITTED TO THE SENATE

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted December 11, 1979

PHILIP M. KLUTZNICK, of Illinois, to be Secretary of Commerce.

VICTOR MARRERO, of New York, to be Under Secretary of Housing and Urban Development, vice Jay Janis.

SIDNEY ANDERS RAND, of Minnesota, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Norway.

Submitted December 12, 1979

HOMER E. MOYER, JR., of the District of Columbia, to be General Counsel of the Department of Commerce, vice Charles Linn Haslam, resigning.

JOSEPH A. DOYLE, of New York, to be an Assistant Secretary of the Navy, vice Edward Hidalgo, elevated.

REGINALD E. GILLIAM, JR., of Virginia, to be a member of the Interstate Commerce Commission for the term of 7 years from January 1, 1976, vice Kenneth H. Tuggle.

VICTOR H. PALMIERI, of California, to be Ambassador at Large and United States Coordinator for Refugee Affairs.

ALBERT P. SMITH, of Kentucky, to be Federal Cochairman of the Appalachian Regional Commission, vice Robert Walter Scott, resigned.

Submitted December 13, 1979

JOHN J. PARTINGTON, of Rhode Island, to be United States Marshal for the District of Rhode Island for the term of 4 years, vice Donald W. Wyatt, term expired.

Submitted December 14, 1979

JAMES W. SPAIN, of California, a Foreign Service officer of the Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Turkey.

LUTHER H. HODGES, JR., of North Carolina, to be Deputy Secretary of Commerce (new position).

NOMINATIONS—Continued

Submitted December 14—Continued

HENRY WOODS, of Arkansas, to be United States District Judge for the Eastern District of Arkansas, vice a new position created by P.L. 95-486, approved October 20, 1978.

RAUL A. RAMIREZ, of California, to be United States District Judge for the Eastern District of California, vice a new position created by P.L. 95-486, approved October 20, 1978.

RICHARD S. ARNOLD, of Arkansas, to be United States Circuit Judge for the Eighth Circuit, vice a new position created by P.L. 95-486, approved October 20, 1978.

CHECKLIST OF WHITE HOUSE PRESS RELEASES

The following listing contains releases of the White House Press Office which are not included in this issue.

Released December 10, 1979

News conference: on their preliminary report on world hunger—by members of the Presidential Commission on World Hunger

Announcement: appointment by Secretary of Health, Education, and Welfare Patricia R. Harris of persons to positions with the 1981 White House Conference on Aging

An act to waive the time limitation on the award of certain military decorations to members of the Intelligence and Reconnaissance Platoon of the 394th Infantry Regiment, 99th Infantry Division, for acts of valor performed during the Battle of the Bulge.

H.R. 4732----- Public Law 96-146
An act to fix the annual rates of pay for the Architect of the Capitol and the Assistant Architect of the Capitol.

PRESIDENTIAL DOCUMENTS

Week Ending Friday, December 21, 1979

Shah of Iran

*Statement by the White House Press
Secretary on the Shah's Departure From the
United States. December 15, 1979*

The former Shah of Iran departed Lackland Air Force Base this morning for Panama. He will establish residence there in response to a longstanding request [invitation]¹ from the Government of Panama. The Government of Panama has stated its hope that the provision of a place of residence for the Shah in Panama will help to bring about a peaceful resolution of the present crisis.

President Carter has expressed to President Royo the appreciation of the American people for the humanitarian and statesmanlike attitude of the Government of Panama.

The Shah entered the United States on October 22 for diagnosis and evaluation of his medical condition at Cornell Medical Facility in New York. On December 2, he entered Wilford Hall Air Force Hospital at Lackland Air Force Base. There he has continued his recuperation.

As the Shah stated when he entered the United States, he intended to leave the United States when his medical condition permitted. After an examination and consultation yesterday, his physicians, headed by Dr. Benjamin Keane, advised the

Shah that his medical condition does not preclude his taking up residence in Panama.

NOTE: Press Secretary Jody Powell read the statement at 11:46 a.m. during his regular briefing for reporters in the Briefing Room at the White House.

Revoking Rhodesian Sanctions

Executive Order 12183. December 16, 1979

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 5 of the United Nations Participation Act of 1945, as amended (22 U.S.C. 287c), and in order to terminate current limitations relating to trade and other transactions involving Zimbabwe-Rhodesia, it is hereby ordered as follows:

1-101. (a) Subject to the provisions of this order, the following are hereby revoked with respect to transactions occurring after the effective date of this order:

(1) Executive Order 11322 of January 5, 1967 (32 FR 119);

(2) Executive Order 11419 of July 29, 1968 (33 FR 10837); and

(3) Executive Order 11978 of March 18, 1977 (42 FR 15403).

(b) To the extent consistent with this order, all determinations, authorizations, regulations, rulings, certificates, orders, directives, licenses, contracts, agreements,

¹ Printed in the transcript.

and other actions made, issued, taken, or entered into under the provisions of such Executive orders and not previously revoked, superseded, or otherwise made inapplicable, shall continue in full force and effect until amended, modified, or terminated by appropriate authority.

1-102. (a) The Secretaries of State, the Treasury, Commerce, and Transportation, and the heads of other government agencies, shall retain the authority and responsibility for the enforcement of Executive Orders 11322, 11419, and 11978 with respect to transactions occurring prior to the effective date of this order.

(b) The revocation, in Section 1-101 of this order, of such prior Executive orders shall not affect:

(1) any act done or omitted to be done or any suit or proceeding finished or started in civil or criminal cases prior to the revocation, but all such liabilities, penalties, and forfeitures under the Executive orders shall continue and may be enforced in the same manner as if the revocation had not been made; or

(2) any violation of any rules, regulations, orders, licenses, or other forms of administrative action under those revoked orders during the periods those orders were in effect.

1-103. (a) The Secretaries of State, the Treasury, Commerce, and Transportation, and the heads of other government agencies, shall take the appropriate measures to implement this order.

(b) In carrying out their respective functions and responsibilities under this order, the Secretaries of the Treasury, Commerce, and Transportation, and the heads of other government agencies, shall, as appropriate, consult with the Secretary of State. Each such Secretary and agency head and the Secretary of State shall also consult with other government

agencies and private persons, as appropriate.

JIMMY CARTER

National Unity Day, 1979

Proclamation 4709. December 16, 1979

*By the President of the United States
of America*

A Proclamation

Fifty American citizens are being held hostage in Iran by a mob and a government that have become one and the same. The United States has made it clear to the leaders of Iran that we hold them personally and fully responsible for the well-being and safe return of every American in their hands.

The people of the United States are unanimous in their concern for their fellow citizens held in Iran. Americans have shown this concern in numerous ways that are consistent with our country's respect for law—the ringing of church bells, letters to the Iranian Mission at the United Nations, and messages to the hostages themselves.

A most fitting symbol of this concern is the American flag itself. We respect our flag because we know that it stands for freedom. It stands for justice. It stands for human dignity. It stands too for our united determination to uphold these great ideals.

To demonstrate support for the hostages in Iran, the Congress has, by joint resolution, designated December 18, 1979.

as "National Unity Day." It has requested the President of the United States to call upon all citizens and organizations to observe that day by prominently displaying the American flag.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate December 18, 1979, as National Unity Day. I direct the appropriate officials of the Government to display the flag on all Government buildings during that day. I urge all Americans to observe National Unity Day, December 18, 1979, by flying the Stars and Stripes from their homes and other suitable places.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of December, in the year of our Lord nineteen hundred seventy-nine, and of the independence of the United States of America the two hundred and fourth.

JIMMY CARTER

Multilateral Trade Negotiations

*Memorandum From the President.
December 14, 1979*

Memorandum for the Special Representative for Trade Negotiations

Subject: Determination Regarding the Multilateral Trade Negotiations

I have signed the enclosed document concerning certain international trade agreements pursuant to the authority vested in me under the Constitution and laws of the United States, including the Trade Agreements Act of 1979 (Public Law 96-39, 93 Stat. 144) and section 301 of title 3 of the United States Code.

On my behalf, please transmit copies of this document to the Speaker of the House of Representatives and the President of the Senate.

This document shall be published in the FEDERAL REGISTER.

JIMMY CARTER

PRESIDENTIAL DETERMINATION REGARDING THE ACCEPTANCE AND APPLICATION OF CERTAIN INTERNATIONAL TRADE AGREEMENTS

1. Pursuant to section 102 of the Trade Act of 1974 (19 U.S.C. 2112(b)), I, through my duly empowered representative, on April 12, 1979, entered into the international agreements negotiated in the Tokyo Round of Multilateral Trade Negotiations. These agreements were:

- (i) Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade;
- (ii) Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade;
- (iii) Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade;
- (iv) Agreement on Government Procurement;
- (v) Agreement on Technical Barriers to Trade;
- (vi) Agreement on Import Licensing Procedures;
- (vii) Agreement on Trade in Civil Aircraft;
- (viii) International Dairy Arrangement, and
- (ix) Arrangement Regarding Bovine Meat.

These agreements are collectively referred to herein as the "MTN agreements".

2. In accordance with sections 102 and 151 of the Trade Act of 1974 (19 U.S.C. 2112 and 2191), the MTN agreements were submitted to Congress for its approval. Section 2 of the Trade Agreements Act of 1979 (93 Stat. 147) approves the MTN Agreements and authorizes the President to accept each of the MTN agreements provided that the President determines that all, or all but one, of the major industrial countries (as defined in section 126(d) of the Trade Act of 1974 (19 U.S.C. 2136(d))) is also accepting the agreement. If the President determines that only one major industrial country is not accepting an agreement, the President may nevertheless accept such an agreement if he determines that the acceptance of that agreement by that country is not essential to the effective operation of the Agreement, and if:

- (A) that country is not a major factor in trade in the products covered by that agreement;
- (B) the President has authority to deny the benefits of the agreement to that country and has taken steps to deny the benefits of the agreement to that country; or
- (C) a significant portion of United States trade would benefit from the agreement, notwithstanding such nonacceptance, and the President determines and reports to the Congress that it is in the national interest of the United States to accept the agreement.

3. Section 2 of the Trade Agreements Act of 1979 also provides that no agreement accepted by the President shall apply between the United States and any other country unless the President determines that such country:

- (A) has accepted the obligations of the agreement with respect to the United States, and
- (B) should not otherwise be denied the benefits of the agreement with respect to the United States because such country has not accorded adequate benefits, including substantially equal competitive opportunities for the commerce of the United States to the extent required under section 126(c) of the Trade Act of 1974 (19 U.S.C. 2136(c)), to the United States.

4. Section 701 of the Tariff Act of 1930, as amended effective January 1, 1980 (93 Stat. 151) provides that the President must determine that certain conditions must be met before a country can be considered a "country under the Agreement" and, therefore, entitled to the injury determination provided for in section 703 (a) and 705(b) of the Tariff Act of 1930 (93 Stat. 152 and 159).

5. Section 601(a) of the Trade Agreements Act of 1979 (93 Stat. 267) authorizes the President to proclaim certain modifications in the Tariff Schedules of the United States if the President determines that the conditions under section 2(b) of the Trade Agreements Act of 1979 (93 Stat. 147) on acceptance of the Agreement on Trade in Civil Aircraft have been fulfilled.

Now, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under and by virtue of the authority vested in me as President, and in conformity with the provisions of sections 2 and 601(a) of the Trade Agreements Act of 1979 (93 Stat. 147 and 267), herein referred to as "the Act", section 701 of the Tariff Act of 1930, as amended effective January 1, 1980 (93 Stat. 151), and

section 301 of title 3 of the United States Code do hereby

1. Determine that:

a. With respect to the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade, the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade, the Agreement on Technical Barriers to Trade, the Agreement on Import Licensing Procedures, and the Agreement on Trade in Civil Aircraft,

- (i) in accordance with sections 2(b) (1) and (3) of the Act (93 Stat. 147), each major industrial country (as defined in section 126(d) of the Trade Act of 1974 (19 U.S.C. 2136(d))) is also accepting the agreement with the exception of Japan;
- (ii) in accordance with section 2(b) (3) of the Act (93 Stat. 147), the acceptance of these agreements by Japan is not essential to the effective operation of the agreements for that period of time during which Japan is completing its Constitutional procedures to accept the agreements and in light of the stated intention of the Government of Japan to act in the interim in line with the agreements within its existing powers; and
- (iii) in accordance with section 2(b) (3) (C) of the Act (93 Stat. 148), a significant portion of United States trade will benefit from these agreements, notwithstanding the anticipated short delay in acceptance by Japan, and it is in the national interest of the United States to accept these agreements.

b. The conditions in sections 701(b) (3) (A), (B) and (C) of the Tariff Act of 1930, as amended effective January 1, 1980 (93 Stat. 151), will have been met with respect to Venezuela, Honduras, Nepal, North Yemen, El Salvador, Paraguay and Liberia.

c. With respect to the International Dairy Arrangement,

- (i) in accordance with sections 2(b) (1) and (3) of the Act (93 Stat. 147), each major industrial country (as defined in section 126(d)) is also accepting the agreement with the exception of Canada;
- (ii) in accordance with section 2(b) (3) of the Act (93 Stat. 147), the acceptance of this agreement by Canada is not essential to the effective operation of the agreement; and
- (iii) in accordance with section 2(b) (3) (A) of the Act, Canada is not a major factor in trade in the products covered by the agreement.

d. With respect to the Arrangement Regarding Bovine Meat, in accordance with sections 2(b) (1) and (3) of the Act (93 Stat. 147), each major industrial country (as defined in section 126(d) of the Trade Act of 1974 (19 U.S.C. 2136(d))) is also accepting the agreement.

e. In accordance with section 601(a) of the Trade Agreements Act of 1979 (93 Stat. 267),

- (i) the conditions under section 2(b) of that Act (93 Stat. 147) on acceptance of the Agreement on Trade in Civil Aircraft have been fulfilled;

- (ii) the modifications provided for in section A of Annex II to Proclamation No. 4707 of December 11, 1979, which were authorized by section 601(a) of the Trade Agreements Act of 1979 (93 Stat. 267), shall be effective with respect to articles entered, or withdrawn from warehouse, for consumption on and after January 1, 1980; and
- (iii) the amendment to section 466 of the Tariff Act of 1930 (19 U.S.C. 1466) provided for in section 601(a)(3) of the Trade Agreements Act of 1979 (93 Stat. 268) shall be effective with respect to entries made under section 466 on and after January 1, 1980.

2. Authorize the United States Special Representative, for Trade Negotiations, or his designee, on behalf of the United States of America,

(a) to sign and accept the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade, the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade, the Agreement on Technical Barriers to Trade, the Agreement on Import Licensing Procedures, the Agreement on Trade in Civil Aircraft, the International Dairy Arrangement and the Arrangement Regarding Bovine Meat;

(b) to sign the Agreement on Government Procurement subject to satisfactory completion of negotiations on entity coverage under the Agreements; and

(c) to sign the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade subject to acceptance.

3. Delegate the functions of the President under section 2(b) of the Trade Agreements Act of 1979 (the Act) and

section 701(b) of the Tariff Act of 1930, as amended by section 101 of the Act, to the Special Representative for Trade Negotiations who shall exercise such authority with the advice of the Trade Policy Committee and in accordance with the provisions of this determination.

JIMMY CARTER

The White House,

NOTE: The memorandum was announced on December 17.

Strategic Arms Limitation Treaty

Letter to 19 Members of the Senate.
December 17, 1979

Thank you for your letter concerning the Senate's view of the SALT II agreement. I welcome your commendation of the statements Secretary Brown and I have made relating to the Five Year Defense Program.

I have also noted your comments about certain aspects of SALT II's terms and about the shift in the comparative military positions of the Soviet Union and the United States, and your views on a number of further considerations bearing on various aspects of the Soviet-American relationship.

The issues you raise have been probed in depth during the hearings before the Senate committees, and will be further examined in preparing for the floor debate and in the course of the debate itself. I therefore share your interest in discussing these matters in detail with me and members of my Administration.

I also share your desire to achieve a bipartisan consensus on these issues of long-range national security strategy and arms

control, and to that end we should begin these meetings at an early date. I am confident we can find the common ground on which the prompt ratification of this treaty, so important to our own national security and the peace of the world, will be achieved.

Sincerely,

JIMMY CARTER

NOTE: This is the text of identical letters addressed to Senators Henry Bellmon of Oklahoma, Lloyd Bentsen of Texas, David L. Boren of Oklahoma, Rudolph E. Boschwitz of Minnesota, Lawton Chiles of Florida, John C. Danforth of Missouri, Dennis DeConcini of Arizona, Pete V. Domenici of New Mexico, David Durenberger of Minnesota, J. James Exon of Nebraska, S. I. Hayakawa of California, H. John Heinz III of Pennsylvania, Sam Nunn of Georgia, Larry Pressler of South Dakota, Harrison Schmitt of New Mexico, Alan K. Simpson of Wyoming, Richard Stone of Florida, John W. Warner of Virginia, and Edward Zorinsky of Nebraska.

Visit of Prime Minister Margaret Thatcher of the United Kingdom

*Remarks at the Welcoming Ceremony.
December 17, 1979*

THE PRESIDENT. It's indeed an honor for me, on behalf of the people of our Nation, to welcome to the United States the Prime Minister of the United Kingdom, Margaret Thatcher.

Our country has in its ancestry people from almost every nation on Earth. We are, Madame Prime Minister, indeed a commonwealth of almost every nation, located within the boundaries of one country. But there is no doubt that from your own country has come the heritage and the political faith and the civilization of our country, as the preeminent and the prime source.

We share a lot in common. Although our cars, or our automobiles, may drive on opposite sides of the highway, our people generally move in the same direction. And we share, or at least we attempt to share, a common language. Sometimes we don't succeed. But in the most important things, we do see issues and ideas, challenges, hopes, and expectations in the same way.

We're bound together with a common belief that our national security is intertwined with yours. When we deal with important issues of the present and future years, like energy, our consultations are very close. We are bound together through trade and through culture, through tourism and through blood kin. Perhaps the most important things, however, which bind us together are a common belief in freedom and democracy, the right of people to speak their own minds without interference, and the belief in equal justice for all.

We believe in the dignity of individual human beings, in the importance of it, and the enhancement of human rights throughout the world. We also set a benchmark for other nations to study and perhaps to emulate on how great and sovereign nations can deal with one another in a constructive and harmonious way, even when at times there are differences between us.

As another strong Prime Minister of the United Kingdom has said—Winston Churchill—"The price of greatness is responsibility." It's obvious to all Americans that in the last 7 months, Madame Prime Minister, you've exhibited greatness in the form of assuming responsibility; not only to deal with important and difficult domestic issues, which we also have in our own country, but in searching for ways in which you can meet the challenges of the international world.

You've helped us in the evolution of our SALT treaty, and your strong support for it plays a major role in shaping opinion in our own country. The recent decision made in the European Community, Atlantic Alliance nations on theater nuclear forces have felt the benefit of your strong leadership. We joined together many months ago in strengthening this NATO Alliance. And, of course, we share as well a determination that in the future our efforts on controlling both conventional and nuclear weapons will be successful.

We had long discussions in Tokyo earlier this year about how to deal with the increasing price of energy and the prospective shortage of energy on a world-wide basis. And I'm very grateful that we do share that responsibility, because you add great strength to our own efforts and help to induce other countries to be responsible and forthright in meeting this challenge in a successful way.

Our people have been deeply grateful and filled with admiration at the successful efforts that you have brought to resolving the longstanding problems in Zimbabwe-Rhodesia. And we hope that soon that nation, because of your own efforts, will be blessed with a majority-rule government, and will be free of war and combat, and can indeed have peace and join the democratic nations of the world.

I want the American people to get to know you, Madame Prime Minister, as I have come to know you and admire you. And I particularly want to emphasize that our people in Great Britain, the United Kingdom, and the United States have always seen our finest achievements in times of crisis and in times of challenge. I particularly want to thank you personally, on behalf of all Americans, and remind all the citizens of this country that from the very first moment when American hos-

tages were captured and held illegally in Iran, your government has been in the forefront of those who have helped us in every way; both privately and through diplomatic means, and through public means, you've been staunch allies, staunch friends, staunch supporters of ours. And I deeply appreciate it.

I might say in closing, Madame Prime Minister, that this is typical of the interrelationship which our two nations have always enjoyed in the past. You are at home here. This is not your first visit. Many Americans already know you and admire you from a distance. And I'm very grateful that you've come at this time, not a time of dormancy or a time of self-satisfaction, but a time of crisis and a time of challenge, as a strong leader of one of the great nations on Earth.

Madame Prime Minister, we deeply appreciate your visit; the people of my government, the people of our Nation welcome you to the United States. Thank you very much. God bless you and the people whom you represent.

THE PRIME MINISTER. Mr. President, thank you very much for your warm welcome and for the very generous terms in which you expressed it. I'm delighted to be back in Washington and to have the opportunity of meeting you, Mr. President, and many other friends once again.

I don't need to dwell on the emotion which any British Prime Minister must feel on taking part in this ceremony on the White House lawn for the first time. The United States is the most powerful force for freedom and democracy the world over, and we salute and we honor you.

Our meeting, Mr. President, extends a long and historic series. The friendship between our two countries stretches far into the past. It rests on a natural affinity and affection which stand above the buffeting of fate and fortune. The relation-

ship, as you've said, Mr. President, is indeed an exceptional one. It's exceptional in its ease; it's exceptional in its durability; it's exceptional in its consequences. And I look to see it deepened further in the talks that we are about to begin.

Mr. President, this isn't an easy time for the United States, and I want you to know that every British home has followed anxiously the events of the last 6 weeks in Tehran. The cruel ordeal inflicted on the hostages has aroused the indignation of the civilized world, and our hearts go out to the hostages and our thoughts are with them and their families here.

Our admiration goes to the American people for their patience and wisdom and self-control. You yourself, Mr. President, if I may say so, have won enormous respect in Britain for the statesmanship, calmness, and courage with which you've faced an agonizing problem. At times like this you're entitled to look to your friends for support. We are your friends. We do support you. And we shall support you. Let there be no doubt about that.

Mr. President, as well as the grievous events in Iran, there is much to discuss; for example, Rhodesia, which you have mentioned, where we're deeply grateful for your understanding and support throughout the negotiations, and not least in the last few days; on defense, where we applaud the program that you've just announced and where we take our full part in the modernization of the theater nuclear forces in NATO; on energy and economic problems, where we're both actively seeking to control inflation and to use our resources better; and on Europe, where I will tell you of my confidence that the Community will resolve its present difficulties and emerge a stronger partner for the United States.

After this splendid welcoming cere-

mony, Mr. President, for which I do indeed thank you, I look forward to tackling our formidable agenda and on reaching a broad measure of agreement. We bring you affectionate greetings and good wishes to all the people of the United States of America.

NOTE: The President spoke at 10:09 a.m. on the South Lawn of the White House.

Following the ceremony, the President and the Prime Minister held meetings in the Oval Office and the Cabinet Room at the White House.

Visit of Prime Minister Thatcher of the United Kingdom

*Remarks Following a Meeting.
December 17, 1979*

THE PRESIDENT. Prime Minister Thatcher and I have had very extensive and very productive conversations, even negotiations on a few points. There are no differences between us that cause any concern among Americans or people who live in Great Britain. We've reached agreement on a few items which we have discussed.

We have had long discussions about Iran. I've expressed again my thanks to the Prime Minister about the strong and unequivocal support on that issue. We've expressed our admiration and appreciation for the progress that has been made by her and by Lord Carrington in negotiating for a peaceful and democratic settlement in Rhodesia and again pledged our full support in their efforts in that difficult issue.

We've discussed the appreciation that we feel for the British for their strong support for SALT II, the strong role that they played in developing the theater nuclear force agreement among the Euro-

pean nations, Atlantic Alliance, in the last few days. We discussed matters of trade and commerce and the future of our two countries in dealing with the problem of energy.

In every instance we have made good progress. There are very few, if any, differences between the people of Great Britain and the people of the United States. It's a delight for us to have her here, and she will be meeting with some of our congressional leaders and some of the Cabinet officers this afternoon. I will be with her again tonight.

We are very grateful that you've come, Madame Prime Minister, and we look forward to seeing you this afternoon, this evening, at the banquet. And in the meantime our officials will be discussing matters with one another.

Thank you again for being with me. Perhaps you'd like to make a statement for the press.

THE PRIME MINISTER. Thank you.

Mr. President, I would like really to confirm what you've said, how well and how easily the talks and discussions went. I don't find that surprising in any way. We, after all, share very similar views about the importance of defending freedom under the law and therefore the importance of giving defense a good deal of priority in our national programs. We notice what the President has done for defense over here, and we've felt that we in Great Britain have been able to respond, and we also put it in the forefront of our election program.

We are particularly grateful to the President for the great help we have had in trying to bring the Rhodesian problem to a successful settlement and a successful conclusion. At all stages we've kept in touch with the President and with Secretary Vance, and they've been most helpful.

Of course a large part of our discussions were taken up with Iran, for reasons which everyone in the whole world will understand. And we indicated very clearly to the President that when the United States wishes to go to the Security Council for further powers under chapter seven, Great Britain will be the first to support him in his endeavors. You'd expect nothing less, and you will receive nothing less but our full support.

Naturally, we're concerned about energy, the Middle East, the future of oil supplies, and we've talked too about that. You all look now just a little bit chilly, so perhaps I can conclude those—so am I—those few comments with everything went extremely well. We're very happy to be here, very grateful to the President for giving us so much of his time, and we felt that everything went just as you would expect it to go between America and Great Britain, and that couldn't be more satisfactory.

Thank you.

NOTE: The President spoke at 12:48 p.m. on the South Grounds of the White House.

President's Special Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research

Executive Order 12184. December 17, 1979

RELATING TO THE PRESIDENT'S COMMISSION FOR THE STUDY OF ETHICAL PROBLEMS IN MEDICINE AND BIOMEDICAL AND BEHAVIORAL RESEARCH

Public Law 95-622 established the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. Appro-

priations to fund the work of the Commission, although authorized, have not been sought or received, but entities within the Department of Health, Education and Welfare have authority and funds which may be available to carry on activities identical to those to be undertaken by the Commission. Therefore, in order to permit these entities to support the conduct of those activities by the Commission, and under the authority vested in me as President by the Constitution of the United States, it is ordered:

1-101. There is established the President's Special Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. The Special Commission established by this Order shall be constituted in accordance with and subject to the provisions of Title III of Public Law 95-622, except that it shall receive financial support, to the extent permitted by law and subject to the availability of funds, from the Department of Health, Education and Welfare. The Administrator of General Services shall provide administrative support services to the Special Commission on a reimbursable basis.

1-102. The Special Commission established by this Order shall terminate upon enactment and availability of appropriations for the Commission established by Public Law 95-622, and in any event, unless extended, no later than two years from the date of this Order. No funds transferred by the Department of Health, Education and Welfare pursuant to this Order shall be expended by either Commission following termination of the Special Commission.

Conservation of Petroleum and Natural Gas

Executive Order 12185. December 17, 1979

By the authority vested in me as President of the United States of America by Section 403(b) of the Powerplant and Industrial Fuel Use Act of 1978 (92 Stat. 3318; Public Law 95-620) and Section 301 of Title 3 of the United States Code, in order to encourage additional conservation of petroleum and natural gas by recipients of Federal financial assistance, it is hereby ordered as follows:

1-101. Each Federal agency, as that term is defined in Section 103(a) (25) of the Powerplant and Industrial Fuel Use Act of 1978 (92 Stat. 3297), shall effectuate through its financial assistance programs the purposes of that Act relating to the conservation of petroleum and natural gas.

1-102. Each Federal agency which extends financial assistance shall review those programs of financial assistance and identify those which are most likely to offer opportunities for significant conservation of petroleum and natural gas.

1-103. Within two months, and annually thereafter, each agency shall publish for comment a list of those programs which it has identified as likely to offer significant opportunity for conservation. The public shall be given 60 days to submit comments, including suggestions for rules which would effectuate the conservation purposes of the Act.

1-104. After receiving public comment and suggestions, and after consulting with the Director of the Office of Management and Budget, each agency shall publish proposed rules designed to achieve conservation of petroleum and natural gas in connection with the receipt of financial assistance.

Proposed rules should be published within 30 days of the close of the comment period under Section 1-103.

1-105. Final rules shall be adopted by each agency in accordance with the provisions of Sections 102(b), 403(b) and 701(a) of the Powerplant and Industrial Fuel Use Act of 1978, and the provisions of this Order, not later than 180 days from the date of this Order.

1-106. No one shall be awarded any financial assistance unless that award complies with the provisions of the conservation rules adopted by the agency pursuant to this Order.

1-107. To the extent permitted by law and where not inconsistent with the financial assistance program, final rules may provide for the reduction or suspension of financial assistance under any award. Such reduction or suspension shall not be ordered until there has been an opportunity for a hearing on the record, and shall last for such time as the recipient fails to comply with the terms of the conservation rule.

1-108. No conservation rule shall be adopted which is inconsistent with the statutory provisions establishing the financial assistance program.

1-109. No conservation rule shall be used to enforce compliance with any prohibition under the Act against any person or facility which has been specifically determined by the Secretary of Energy as subject to or exempt from a prohibition under the Act. The conservation rules shall be used to enforce other new ways of achieving the purposes of the Act related to the conservation of petroleum and natural gas.

1-110. In order to assess the effectiveness of this program, each agency shall annually prepare a report on its activities in accord with Section 403(b)(1)(B) of the Act. These reports shall be submitted

to the President through the Secretary of Energy.

1-111. The Secretary of Energy shall prepare for the President's consideration and transmittal to the Congress the report required by Section 403(c) of the Act.

1-112. The Director of the Office of Management and Budget may issue any rules, regulations, or orders he deems necessary to ensure the implementation of this Order. The Director may exercise any of the authority vested in the President by Section 403(b) of the Act, and may redelegate such of that authority as he deems appropriate to the head of any other agency.

Settlement of Conflict in Zimbabwe-Rhodesia

White House Statement. December 17, 1979

Today, final agreement was reached at Lancaster House on a Rhodesian settlement. The world can celebrate a triumph of reason and an extraordinary diplomatic success. A long, destructive, and tragic conflict is ending.

This settlement is a tribute to the parties concerned, who rose above bitterness and suspicion to agree upon a formula for peace. It is a tribute to the United Kingdom, whose leaders took the issue directly in hand and applied a remarkable combination of wisdom, courage, persistence, and skill. The concerned African states played a vital role.

Active American involvement in the search for a Rhodesian settlement began

in the last administration. In cooperation with the British we intensified that effort, and, since last summer, have given our full support to the British negotiations.

The settlement which has been attained can lead to an enduring peace in Zimbabwe and promote tranquillity in the region. It is founded upon majority rule with protection of minority rights and reflects the interest of all of the parties.

As the process leading to an independent Zimbabwe unfolds, it will be incumbent upon the international community, and especially the surrounding states, to support and respect the electoral process and its outcome.

For its part, the United States looks forward to the day when an independent Zimbabwe can be welcomed to the family of nations.

Chanukah

Remarks at the Lighting of the National Menorah. December 17, 1979

It's a real honor for me to come from the White House here to this ceremony celebrating the commencement of Chanukah, last night, the Feast of Lights.

As many of you know, the season of Chanukah commemorates the victory of religious freedom. At the commencement of the celebration of this annual event, this season of thanksgiving and closeness to God, there was a miracle within which the candle which was supposed to only burn a short time burned for 8 days and nights.

This miracle showed that God meets our needs. If we depend on Him, He will meet our needs. This also shows that there is a need to celebrate courage and to re-

member that hope in one's breast need never die.

This season, religious season, commemorates the perpetuation of age-old dreams and the hunger of men and women down through the ages to maintain a spirit committed to life under the most difficult circumstances, the most difficult persecutions, the most difficult dangers, and under the most difficult suffering. It also commemorates humankind's commitment to be free.

These commitments to live and to be free are ever present these days in the minds and hearts of all Americans, because we know that 50 of our fellow human beings, our fellow citizens, are not free and they want to live. We pray that this will prevail, this desire to be free and to maintain life.

The first candle that I lit, the *shammes* candle, has given its light now in this glass cage to five other candles. It has not itself been diminished. It shows that when we give life and love to others, the life and love in our own hearts is not diminished. As a matter of fact it grows the more we share it. So, tonight we pray that our closeness to God, our memory of these fine commitments of human beings down through the ages will strengthen our desires to share our life and our love, not only with the 50 American hostages, for whom we pray constantly, but for men and women throughout the world who don't always have freedom and whose lives might be in danger.

I'm very grateful that this beautiful menorah has been dedicated for the commemoration of the season of Chanukah, and I'm very grateful as President to be partaking in this commemoration of a season when human beings are drawn closer

to God and, in that spirit, have confidence that the future will bring us a better life with God and with one another.

Thank you very much.

NOTE: The President spoke at 6:58 p.m. at Lafayette Square.

The ceremony was sponsored by the American Friends of Lubavitch.

Visit of Prime Minister Thatcher of the United Kingdom

*Toasts at the State Dinner.
December 17, 1979*

THE PRESIDENT. As you all know, England is one of the first nations on Earth, perhaps the first, to have a woman as ruler of the country, and we are very honored tonight to have the Prime Minister of the United Kingdom, who's a distinguished guest. She's able to share the responsibilities for the United Kingdom with the Queen. Unfortunately, the President of the United States has to do both. *[Laughter]*

One of the ceremonial duties of every President when the Prime Minister of the United Kingdom, Great Britain, comes here, is to remind him or her that the British burned this house in 1812. *[Laughter]* Fortunately, we had a very lively woman who lived here then, Dolley Madison, who unrolled these portraits of George Washington and his wife, Martha, took them out beyond the Potomac River, and saved them. And George Washington returned to the White House, in his portrait, after the war was over. I hope that after the visit of this British entourage that the present President might be able to return to the White House after the next election year. *[Laughter]* But I can't make any predictions about that.

I've had a chance today to meet with Prime Minister Margaret Thatcher, and I met her earlier when she visited this country before she was Prime Minister. And I met with her in some very intense economic and energy discussions and talked about the interrelationship among the democratic developed nations of the Earth in Tokyo early this year. I've been very highly impressed with her. Charles Dickens said in "The Pickwick Papers," "She knows what's what, she does." *[Laughter]* And I think this very accurately describes the Prime Minister of Great Britain.

Today we talked about strategic arms limitation talks, the control of conventional weapons, the deployment of theater nuclear forces in Europe, the strengthening of the Atlantic Alliance, the European Community and how those nations interrelate one with another, the problems in Rhodesia. And I want officially to congratulate her and Lord Carrington for the tremendous achievement that was announced today when the Patriotic Front initialed the agreement on which you've worked so successfully, and I want to congratulate you both.

This shows what the yearning for peace and freedom can do, when given an opportunity by a distinguished and strong and courageous leader and a diplomat who knows the sensitivities of others and who honors those sensitivities in a strong and forceful way. It's indeed a triumph, and we are grateful to be part of the announcement today.

We talked about the future of Namibia, which I think will be greatly enhanced by the achievement of the recent days. We talked about the refugees, not only in Indochina but around the world, the unfortunate people, and the need for the developed democratic nations on Earth, who've been blessed so greatly, to give

them a better life, some alleviation of their suffering, some hope for the future.

We talked about the intricate problems of energy, of nations who are great energy producers, and nations who are great, perhaps excessive, energy consumers. We talked about the domestic problems of inflation and providing jobs for our people. We talked about international trade and how this might draw nations closer together and to transcend international borders.

We talked about terrorism, the harming of innocent people to achieve political goals which quite often, most often, are indeed unworthy. She is dealing on a daily basis with terrorism in Northern Ireland. We stand staunchly beside her in condemning bloodshed and violence, death and murder, and I hope that our country will always be an assistant to her and to the leaders of Great Britain in dealing with this threat to peace and freedom and the proper interrelationship of human beings.

We talked about Iran and another exhibition of international terrorism, where innocent people are being persecuted, held prisoner, threatened with their very lives for the achievement of unworthy political goals.

We talked about many other issues that are important to our people. But the overwhelming sense that I had was one that we constantly share responsibilities and opportunities, both now, in the future, and in the past. The ties that bind the people of Great Britain with those of the United States are so strong that nothing can sever them one from another.

We are a nation, as I said this morning, of diverse nationalities. Perhaps the most diverse constituency in the world is the one that I have. People from all over this Earth came here to live. But we have a special relationship with Great Britain,

our mother country. Walt Whitman, who perhaps more than any other American poet represented what Americans see and feel and believe, said, "I hear the running of the Thames River in my speech." Perhaps you can't hear the running of the Thames River in my speech since I'm a Georgian—[laughter]—but I don't think anyone can escape who lives here—whether we're from the South or the North, whether our ancestors came from England or Ireland or Poland or from China or from Japan or from the Philippines—we have part of England in us, because the principles on which our Nation was founded, our deep concepts of freedom and individuality, of democratic government originated in our mother country.

We are very honored to have Prime Minister Margaret Thatcher as our guest, and we would like to pay tribute now to her, to her nation, and to the United Kingdom. And I would like to propose a toast to Her Majesty the Queen.

To the Queen.

THE PRIME MINISTER. *Mr. President, Mrs. Carter, ladies and gentlemen:*

It has been my first visit to Washington as head of the British Government, and I should like, at the end of a memorable day, to say thank you. Thank you, to you, Mr. President, to you, Mrs. Carter, and through you to the American people for the wonderfully warm welcome I've been given everywhere.

I know, Mr. President, that as you pointed out at the beginning of your speech, the relationship between America and Britain started off with one or two errors of judgment on our side. [Laughter] Looking around me at the beauty here and at the wonderful nation you've created, I'm really rather glad that my predecessors weren't successful in all things they tried to carry out.

Now, I know that official visits to Washington recur almost with the regularity of the passing seasons, but as far as I'm concerned, this really has been an exceptional event in the year for me. Alas, I'll not be staying long, but it makes a great difference to me to have this chance of direct discussion and to sense at first hand what it is that quickens the pulse of the American people, their yearnings and preoccupations.

I'm very much aware, Mr. President, of the ordeal that the United States is going through at the moment. It's a double ordeal, for the fate of the 50 hostages in Tehran, from whom our thoughts are never far, and for the temper of the United States as a whole. You'll not want me to speak at length about this now, but I'd be giving you a false impression if I allowed the evening to proceed any further without letting you know how much we, in Britain, support you in your ordeal at this time.

The United States is our friend, our ally, and our time-honored partner in peace and war. The history and the destiny of our countries have been and always will be inextricably intertwined. Our friendship goes back a very long way. We are, after all, among the very few countries in the world whose constitutions and national identities have remained intact over two centuries. I hope you won't mind, Mr. President, my recalling that George Washington was a British subject until well after his 40th birthday. *[Laughter]* I've been told, to my surprise, that he does not have a place in the British Dictionary of National Biography. I suppose the editors must have regarded him as a late developer. *[Laughter]*

I confess to you that in some ways my visit got off to rather a shaky start, because I was told on arrival at Andrews Field that I had interrupted your Secre-

tary of State, Mr. Vance, in one of his few moments of relaxation. He was watching the Redskins playing the Cowboys. *[Laughter]* He had to take his eye off the game to greet me. I'm very grateful, but I don't think the Redskins can have been very grateful to me, because it was no doubt as a result of this diversion of Mr. Vance's attention that the Redskins lost the game. I do apologize for having intervened in your internal affairs. *[Laughter]*

Mr. Vance's opposite number, Lord Carrington, who's with us this evening, has, as you know—and as you very kindly said, Mr. President—had something of a triumph in the Rhodesia negotiations at Lancaster House in London. If you think he looks a little pale, it's because he's been shut up in Lancaster House for many months, indeed has become known as the prisoner of Lancaster House. And he's so pleased to be free at last.

Lord Carrington would, I know, want me to repeat this evening how grateful the British Government are to the United States authorities for the stalwart support they've given us unfailingly over Rhodesia. And you, Mr. President, and you, Mr. Vance, we would like to give our warmest and most heartfelt thanks, because without your support the whole process would have been incomparably more difficult, and we may never have reached success.

May I say one more thing, Mr. President. The government which I lead has been in power now for just over half a year. We face great difficulties, some of them deep-seated and longstanding and some stemming from beyond our shores—and I don't pretend that anything is going to be remedied immediately. But we are determined upon a change. We're determined to return to the first principles which have traditionally governed our political and economic life, namely, the

overall responsibility of the individual rather than the state for his own welfare, and the paramountcy of Parliament for the protection of fundamental rights.

The government I lead has a resounding mandate to restore the faith and the fortunes of the nation. We shall stick at the task whatever the difficulties and however great the endurance required. And we shall do so, Mr. President, in the conviction that our allies across the Atlantic have confidence in us, just as we have confidence in the strength and ingenuity of the United States to meet any challenge and triumph over any adversity that confronts them.

And it's in that spirit that I would like to ask all your other guests this evening to drink a toast to you, the President of the United States of America.

The President.

NOTE: The President spoke at 7:50 p.m. in the East Room at the White House.

Visit of Prime Minister Thatcher of the United Kingdom

White House Statement. December 18, 1979

The President met December 17 with Prime Minister Margaret Thatcher of the United Kingdom. Prime Minister Thatcher is making an official visit to the United States, her first to this country as Prime Minister.

The President and the Prime Minister reviewed the exceptionally close relations between their two countries and discussed a number of key world issues which are of particular concern to both. These included the Iran crisis, the Rhodesia settlement, Middle East, Northern Ireland, theater nuclear force modernization and arms control, strategic cooperation,

SALT, the comprehensive test ban talks, international economic issues and energy, common approaches to the Caribbean and aid to developing countries, transatlantic defense trade, and bilateral economic and commercial issues.

The President expressed his appreciation and that of the entire American people for the United Kingdom's assistance and support in connection with the international effort to secure release of American hostages held by Iran in defiance of universally accepted standards of decency and law. The President and the Prime Minister agreed that the principle of civilized behavior and the rule of law, vital to the whole world community, is at stake in the present crisis. The Prime Minister made it clear that Britain shared the anguish of America and would do its utmost to convince the Iranian authorities to release all the hostages unharmed.

The President congratulated the Prime Minister on her government's vigorous role in the Lancaster House negotiations and the potential these have for contributing to peace and stability in southern Africa. The Prime Minister expressed warm appreciation for the full support of the United States for an all-party solution to outstanding issues and its readiness to promote further progress in Rhodesia towards a fully democratic, independent state, within the framework of the arrangements agreed upon by the parties directly concerned.

The Prime Minister explained the British Government's recent political initiative in proposing a conference of the principal political parties in Northern Ireland with the aim of finding an acceptable way of giving the people of Northern Ireland more responsibility for their own affairs. Both leaders condemned support for organizations and individuals engaged directly or indirectly in cam-

paigms of violence and agreed that such campaigns only delay the day when peace and reconciliation can come to Northern Ireland. The President reaffirmed U.S. policy concerning the tragic problem of Northern Ireland as set forth in his statement of August 1977.

In security matters directly affecting their two countries, the President and the Prime Minister (1) applauded the decision taken last week by NATO governments to proceed with effective modernization and deployment of theater nuclear forces and with arms control proposals designed to reduce, on a basis of equality, nuclear weapons of both NATO and the Warsaw Pact; (2) agreed that the earliest possible ratification of the SALT II treaty would significantly contribute to a safer and more stable international security environment.

The President and Prime Minister agreed on the importance of maintaining a credible British strategic deterrent force and U.S./U.K. strategic cooperation. The leaders agreed that their governments should continue their discussions of the most appropriate means of achieving these objectives for the future. In this connection the President and Prime Minister discussed the importance of increased efforts to strengthen NATO's defenses, both nuclear and conventional. The President reviewed the new U.S. Five-Year Defense Plan, noting that in order to carry out that plan the United States will be increasing defense spending, in real terms, steadily over the next 5 years.

The President and Prime Minister reaffirmed their strong support for the NATO Long-Term Defense Program and for the NATO aim of 3-percent real growth in annual defense spending. The Prime Minister noted plans for further significant increases in the U.K. defense budget to improve the effectiveness of

United Kingdom conventional forces, including provision of modernized equipment and reserves. The Prime Minister agreed that it was essential for America's European Allies to share equitably in any collective defense buildup to meet the needs of the common defense.

During her visit to the United States, the Prime Minister is also meeting with Secretary of Defense Brown, Chairman of the Joint Chiefs of Staff, General Jones, and other senior defense officials; Members of Congress; Chairman Volcker of the Federal Reserve Board; U.N. Secretary-General Waldheim, and the President of the U.N. General Assembly.

Prime Minister Thatcher invited the President to visit the United Kingdom at a mutually agreeable date, and the President accepted the invitation with pleasure.

American Hostages in Iran

White House Statement. December 18, 1979

There continue to be confusing and sometimes conflicting reports that American citizens being illegally held as hostages might be placed before some type of public trial or tribunal. As we made clear on November 20, such an action would be a further provocation to the United States and to the world community. The gravity of the situation created by the illegal and irresponsible holding of the hostages would be compounded by any such public exploitation of American citizens. The authorities in Iran would bear full responsibility for any ensuing consequences.

As also stated on November 20, the United States is seeking a peaceful solution through every available channel.

This is far preferable to the other remedies available to the United States.

NOTE: Press Secretary Jody Powell read the statement at approximately 3:45 p.m. during his regular briefing for reporters in the Briefing Room at the White House.

International Bank for Reconstruction and Development

Nomination of Colbert I. King To Be U.S. Executive Director. December 19, 1979

The President today announced that he will nominate Colbert I. King, of Rockville, Md., to be United States Executive Director of the International Bank for Reconstruction and Development. He would replace Edward R. Fried, resigned.

King has been Deputy Assistant Secretary of the Treasury for Legislative Affairs (International) since 1977.

He was born September 20, 1939, in Washington, D.C. He received a B.A. from Howard University in 1961. He served in the U.S. Army from 1961 to 1963.

From 1963 to 1964, King was with the U.S. Civil Service Commission. From 1964 to 1970, he was State Department Attaché in Bonn, West Germany. From 1970 to 1971, he was Special Assistant to the Under Secretary of Health, Education, and Welfare.

From 1971 to 1972, King was Chief of the Policy and Program Development Staff at VISTA. From 1972 to 1976, he was minority staff director for the Senate Committee on the District of Columbia and was on Senator Charles McC. Mathias, Jr.'s staff, as legislative assistant, then chief of the legislative department. From 1976 to 1977, King was director of government relations for Potomac Electric Power Co.

International Bank for Reconstruction and Development

Nomination of David S. King To Be U.S. Alternate Executive Director. December 19, 1979

The President today announced that he will nominate David S. King, of Kensington, Md., to be U.S. Alternate Executive Director of the International Bank for Reconstruction and Development. He would replace William Dixon, resigned.

King has been a partner in the Washington law firm of Williams and King since 1970, specializing in international trade, and is a former U.S. Representative from Utah.

He was born June 20, 1917, in Salt Lake City, Utah. He received a B.A. from the University of Utah in 1937 and a J.D. from Georgetown College of Law in 1942.

From 1942 to 1943, King was law clerk to Justice Harold M. Stephens of the U.S. Court of Appeals for the District of Columbia. From 1943 to 1944, he was Counsel to the Office of Price Administration, and from 1944 to 1947, he was counsel to the Utah State Tax Commission.

From 1947 to 1959, King was a partner in the Salt Lake City law firm of King & Anderson. He represented the Second District of Utah from 1959 to 1962 and from 1964 to 1966. In 1963 and 1964, he practiced law in Salt Lake City, specializing in the organization of national banks.

From 1967 to 1969, King was U.S. Ambassador to the Malagasy Republic and to Mauritius.

He is chairman of the Federal Bar Association Committee on International Resources.

United States Arms Control and Disarmament Agency

Resignation of George M. Seignious II as Director and Nomination of Ralph Earle II. December 19, 1979

The President today accepted with regret the resignation, for reasons of health, of George M. Seignious as Director of the U.S. Arms Control and Disarmament Agency and announced his intention to nominate Ralph Earle II as Director.

Seignious was appointed Director of ACDA on the resignation of Paul C. Warnke in November 1978 and was sworn in on December 4, 1978. He was confirmed by the Senate on March 1, 1979.

Earle has been serving since November 1978 as Chairman of the U.S. Delegation to the Strategic Arms Limitation Talks and as Special Representative for Arms Control and Disarmament Negotiations, with the rank of Ambassador.

Seignious will continue as Director until Earle assumes office. On assumption of the office of Director, Earle intends to resign from his present positions.

The President also announced his intention to nominate Seignious as the at-large delegate on U.S. arms control delegations, such as the SALT and MBFR delegations, with the personal rank of Ambassador.

Earle was born September 26, 1928, in Bryn Mawr, Pa. He received an A.B. from Harvard College in 1950 and an LL.B. from Harvard Law School in 1955. He served in the U.S. Army from 1950 to 1952.

Earle practiced law with the firm of Morgan, Lewis and Bockius in Philadelphia from 1956 to 1968. In 1968 and 1969, he served as Principal Deputy As-

sistant Secretary of Defense, and subsequently as Acting Assistant Secretary of Defense and as Special Advisor for Europe and NATO in the Office of the Secretary of Defense.

From 1969 to 1972, Earle was defense adviser to the U.S. Mission to NATO. In 1972 and 1973, he was a consultant for SALT in the Office of the Secretary of Defense. He was the ACDA representative on the U.S. Delegation to SALT from 1973 until 1977, when he became Alternate Chairman of the Delegation.

Department of State

Nomination of Matthew Nimetz To Be Under Secretary for Security Assistance, Science and Technology. December 19, 1979

The President today announced his intention to nominate Matthew Nimetz as Under Secretary of State for Security Assistance, Science and Technology. He would replace Lucy Wilson Benson, who has resigned.

Nimetz has been Counselor of the Department of State since 1977.

He was born June 17, 1939, in New York City. He received a B.A. from Williams College in 1960, a B.A. (1962) and M.A. (1966) from Balliol College, Oxford University, and an LL.B. from Harvard Law School in 1965.

From 1965 to 1967, Nimetz was law clerk to Justice John M. Harland of the U.S. Supreme Court. From 1967 to 1969, he was a staff assistant to President Johnson. From 1969 to 1971 and 1972 to 1977, he was with the New York City firm of Simpson, Thacher & Bartlett. From 1975 to 1977, he also served as a commissioner of the Port Authority of New York and as a member of the New York State Health Advisory Council.

Department of State

Nomination of Rozanne L. Ridgway To Be Counselor of the Department. December 19, 1979

The President today announced his intention to nominate Rozanne L. Ridgway as Counselor to the Department of State. She would replace Matthew Nimetz, who will be nominated as an Under Secretary of State.

Ridgway has been U.S. Ambassador to Finland since 1977.

She was born August 22, 1935, in St. Paul, Minn. She received a B.A. from Hamline University in 1957.

Ridgway joined the Foreign Service in 1957 as an information specialist at the State Department and served in Manila and Palermo. From 1967 to 1970, she was political officer in Oslo, and from 1970 to 1972, she was an international relations officer at the State Department.

From 1972 to 1973, Ridgway was Deputy Director of Policy Planning and Coordination in the Bureau of Inter-American Affairs. From 1973 to 1975, she was Deputy Chief of Mission in Nassau. She served as Deputy Assistant Secretary of State for Oceans and Fisheries Affairs from 1975 to 1977.

Department of the Air Force

Nomination of Joseph Charles Zengerle III To Be an Assistant Secretary. December 19, 1979

The President today announced that he will nominate Joseph Charles Zengerle III, of Washington, D.C., to be an Assistant Secretary of the Air Force. He would replace Antonia Handler Chayes, who has been appointed Under Secretary of the Air Force, and his area of responsi-

bility would be manpower, reserve affairs, and installations.

Zengerle has been with the Washington law firm of Shea & Gardner since 1974.

He was born August 16, 1942, in Jamaica, N.Y. He received a B.S. from the U.S. Military Academy in 1964 and a J.D. from the University of Michigan Law School in 1971.

In 1972 Zengerle was an associate with the Washington firm of Arnold & Porter. In 1972 and 1973, he was law clerk to Judge Carl McGowan of the U.S. Court of Appeals for the District of Columbia Circuit, and in 1973 and 1974, he was law clerk to Chief Justice Warren Burger of the U.S. Supreme Court.

Regulatory Reform Legislation

White House Statement on Action by the Senate Administrative Practices and Procedures Subcommittee. December 19, 1979

The Senate Administrative Practices and Procedures Subcommittee has drafted and today reported out S. 2147, the Regulatory Flexibility and Administrative Reform Act of 1979.

The President congratulated Senators John Culver and Paul Laxalt and their colleagues on the subcommittee on an impressive job of melding and refining regulatory reform proposals from the administration, other Senators, and many expert witnesses. He said that this issue urgently needs to be addressed by responsible and well-crafted legislation.

The President is gratified that major provisions of the bill carry forward the essentials of his regulatory reform program, established through Executive orders and other administrative initiatives. These include strengthening regula-

tory management and cost-effective decisionmaking, elimination of unnecessary regulatory burdens, enhanced opportunities for meaningful public participation, and reduction of redtape and unnecessary delay in the regulatory process. This is the type of balanced reform effort which will streamline the Government's efforts to protect the health, safety, and welfare of our citizens, without wasting public or private resources.

The President hopes for speedy and responsible action in the full Judiciary Committee and in the Senate Governmental Affairs Committee, where Senator Ribicoff has introduced and held hearings on similar legislation.

United States-Peru Treaty on Penal Sentences

Message to the Senate Transmitting the Treaty. December 20, 1979

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty between the United States of America and Peru on the Execution of Penal Sentences, which was signed at Washington on July 6, 1979.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the Treaty.

The Treaty would permit citizens of either nation who had been convicted in the courts of the other country to serve their sentence in their home country; in each case the consent of the offender as well as the approval of the authorities of the two Governments would be required.

This Treaty is significant because it represents an attempt to resolve a situation which has inflicted substantial hardships on a number of citizens of each

country and has caused concern to both Governments. The Treaty is similar to those currently in force with Bolivia, Canada and Mexico. I recommend that the Senate give favorable consideration to this Treaty at an early date.

JIMMY CARTER

The White House,

December 20, 1979.

Council on Wage and Price Stability

Message to the Congress Transmitting a Report. December 20, 1979

To the Congress of the United States:

In accordance with Section 5 of the Council on Wage and Price Stability Act, as amended, I hereby transmit to the Congress the nineteenth quarterly report of the Council on Wage and Price Stability. The report contains a description of the Council's activities during the second quarter of 1979 in monitoring both prices and wages in the private sector and various Federal Government activities that may lead to higher costs and prices without creating commensurate benefits. It discusses Council reports, analyses, and filings before Federal regulatory agencies. It also describes the Council's activities of monitoring wages and prices as part of the anti-inflation program.

The Council on Wage and Price Stability will continue to play an important role in supplementing fiscal and monetary policies by calling public attention to wage and price developments or actions by the Government that could be of concern to American consumers.

JIMMY CARTER

The White House,

December 20, 1979.

Small Community and Rural Development Policy

*Remarks Announcing the Policy.
December 20, 1979*

Being here this afternoon to announce the administration's small community and rural development policy is a very special occasion for me. It's special, because I know how important this policy will be to rural America, and I know how important rural America is to our country.

As a life-long resident of Plains, Georgia, and as a farmer; as an organizer and the original manager of a seven-county rural area planning and development commission; as a State senator, representing a rural district; as a Governor, representing a predominantly rural State; and as a President: I feel that I know rural America.

I know its greatness; I know its beauty. I know its diversity and its resilience in time of trial and trouble and testing. I know its strength, and I know the character of the people who live in rural America. I know the critically important role that it plays in the production of food and fiber, of energy and of wood, minerals. I understand the ultimate, strategic value of the land, and what it will mean in the future, as a force for peace, and the beneficial influence of our Nation around the world. And I also know the problems of rural America: its pockets of poverty; its problems of isolation; the hardships and deprivation of some of its residents, which they still have to endure.

I grew up on a farm, within 7 or 8 miles of my town, of my present home. My wife's ancestors and mine are buried, who were born in the 1700's; we haven't moved very far. I remember my life on the farm during the Depression, when we didn't have electricity, we didn't have tractors. We did the work with our hands.

Wages for an able-bodied man were a dollar a day. And health problems and education problems and racial discrimination problems were very difficult to overcome.

We made a lot of progress. And I am convinced, as President, that we ought not to measure the quality of life of people according to how densely the area is populated. I don't care if a thousand years from now Plains still has 700 people; but I would like to make sure that those 700 have a good education, good homes to live in, good transportation opportunities, good health; that they know what's going on in the rest of the world; that they have a purposeful life; that they have jobs; and that the quality of their life will equal that of any other community in this country.

For the first 150 years or so of our Nation's existence we were primarily a rural nation. National policy and rural policy were often almost always the same. More lately, as our cities have grown and the suburbs have grown, we've become predominantly an urban nation. But now the demographic trends of the 1950's and 1960's, the migration of people from the rural areas into the cities has reversed. And since 1970 the population of the rural areas has increased 40 percent more than has the population in our urban centers.

The rural economy is also growing. It's becoming more diverse. In contrast to the rural America known by myself and by my parents and my grandparents and yours, a much larger proportion of the rural residents are now employed, not in agriculture as such, but in manufacturing and trade and the provision of services to other human beings. These changes create new demands, new challenges, new opportunities. They require us to take stock of who we are and what we want in life. They point to the need for wise use and continued productivity of the bountiful

rural resources that God has given us. And they challenge us to renew our commitment to address basic, unmet needs, and to redress longstanding inequities.

There have been calls for a more conscious national policy for our rural areas for more than 50 years. It's become increasingly evident that rural areas are unique, that they are not well served by government programs designed for the majority of the population.

With the leadership of Senator Humphrey, Senator Talmadge, Tom Foley, other Members of Congress, including those on this platform this afternoon, this concern eventually has become translated into the Rural Development Act of 1972 and its evolutionary changes since that time. This provided the letter of the law, but it could not provide the spirit and a sense of common purpose that must come from those who execute the laws.

Thus, while programs have grown and prospered under this basic legislation, something important had been missing, as all of you well know. That is the dedicated and the wholehearted commitment of all of us to a better life in rural America: a mechanism by which we could join together, not complaining about one another and not complaining about the deprivations of rural life, but through an easy sense of common purpose and communication and cooperation, work together to overcome the problems, to meet the challenges, and to answer the difficult questions that face the people who don't live in the urban parts of our country.

The goals of our Nation's first comprehensive rural policy, which we'll describe this afternoon, are to create new jobs and provide a favorable climate for rural business and economic development; to promote the responsible use and the proper

stewardship of rural America's natural resources; to address the special rural problems of distance and size; and to meet the basic human needs of rural Americans.

To accomplish these goals, the policy that I'm announcing today does three important things. First, in recognition of the need for a strong partnership between the public and private sectors of American life, and among all levels of government, we will recognize the primacy of local priorities and local decisionmaking. We will assure that Federal investments support and reinforce those State and local development initiatives. We will use Federal assistance to increase private sector cooperation and participation. We will target Federal assistance specifically toward individuals in rural communities which are most in need. We will make Federal programs more accessible and better adapted to rural circumstances. And we will help to strengthen local management and development capability.

Second, this policy presents an action agenda—nearly 100 specific actions that address pressing rural needs and translate the policy principles into tangible results. This agenda of things to be done expands on the White House rural development initiatives that have evolved in an uncoordinated way, perhaps, in the White House over the last 2½ years, and it's based on months of extensive consultations, as you know, with all of you here.

Beginning more than a year ago, we began to put together a program, and more than 6 months ago, we called you in to let you look over what we had done because of your initial recommendations and ideas. And then we have forged this, not in an isolated ivory tower here in Washington, but we've kind of put into practice, in putting this program together,

what you wanted done, and other people around the country, including, obviously, Members of Congress, State and local officials, and rural leaders of all kinds of organizations. Just a few weeks ago I, myself, met with the leaders of 50 different rural organizations in the Cabinet Room. Many of you were there.

Third, our policy will provide us with the ability to develop programs to solve problems and to get things done without unnecessary delay. In order to implement this strategy, that is, to get things done without delay, I will seek authority for an under secretary of small community and rural development at the U.S. Department of Agriculture, to work for me and to assist the Secretary of Agriculture, working under him, in rural development activities throughout the entire administration.

I will form a working group of high-level Federal program managers in many different agencies, I think about 17 of them, to ensure implementation of the program being introduced today, and this working group will be cochaired by Jack Watson, and by the under secretary for rural development, working under the Secretary of Agriculture.

I will appoint a citizens advisory council to monitor the progress that we make and to advise me and the Secretary of Agriculture on needed Federal actions. I'll invite the Nation's Governors to establish in each State a rural development council to ensure effective coordination among the different levels of government. And I'll direct my Cabinet and all the heads of my agencies to review all relevant policies and programs in existence now, or to be proposed to the Congress in the future, in order to monitor implementation of the policy that will be described today. And I would like to ask them, and

will, to designate a senior official in each agency to serve as a rural advocate and to act as a point of contact for small community and rural leaders like you, who are seeking information and assistance.

I'm pleased with the achievements that we've realized in the last 2½ years or so since I've been President in addressing the problems of rural America and the small communities. It's a good record, and it provides experience and a firm foundation for the policy initiatives that we've announced today. But the more we have dealt with these problems, the more we've seen the need for a comprehensive national policy with a large group of people directly involved in it.

This policy is the first of its kind. It redeems my own pledge that the rural areas of our country will receive the attention that they've needed and which they have deserved for so long. It also represents a return to the principle that government should encourage but never dictate the decisions made by American people and by local initiative. With your cooperation some elements of this program have already been tested in action.

The comprehensive policy we announced today is not the end of our work. It's just the beginning. It'll give us the tools to do the job, to finish the job, something that I know from my experience, both as a farmer and as a President, that rural America knows how to do, to start a job, to do it well, and to finish it.

In closing let me say that I want to express my gratitude for the strong and continued support that we've had in preparing this policy, to all of you, the groups and individuals who've contributed, too numerous to mention specifically—but I would like to thank Senator Patrick Leahy, the chairman of the Senate Subcommittee on Rural Development, who

will follow me at this podium; Congressman Wes Watkins, the chairman of the Congressional Rural Caucus; Governor Jim Hunt, my good friend and chairman of the Governors' subcommittee on small cities and rural development; Lynn Cutler, county commissioner from Iowa; David Humes, mayor of Hayti Heights, in Missouri; Charles Bannerman, the president of the Delta Foundation and cochairman of the Rural Coalition; the Rural Caucus; the National Governors' Association; the Rural Coalition; and many other individuals and groups that have given us so much encouragement.

Together, I'm convinced that you and I together and all those who work with us can bring a new and a better life to rural America. I'm dedicated to it. With your help we will not fail.

Thank you very much.

[At this point, Senator Leahy and Governor Hunt spoke. The President then resumed speaking as follows.]

We have an overflow crowd. Part of the group is in the Treaty Room down the hall. So, I'll be listening very carefully to Congressman Watkins, who's done such a good job on this program, from the other room, and this will give him a double audience. It's in honor of him that I'm going to stop in the other group and listen to his speech. Wes, good luck to you.

NOTE: The President spoke at approximately 2:30 p.m. to a group of community and civic leaders assembled in Room 450 of the Old Executive Office Building.

The transcript also includes the remarks of Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, Hal Wilson, co-chairman of the Rural Coalition and director of the Housing Assistance Corporation, as well as those of Senator Leahy, Governor Hunt, Representative Watkins, Mayor Humes, and Supervisor Cutler.

Commissioner of Education

*Nomination of William Lee Smith.
December 20, 1979*

The President today announced that he will nominate William Lee Smith, of Maryland, to be Commissioner of Education. He would replace Ernest Boyer, resigned. This position will be abolished when the Department of Education is activated in 1980.

Smith has been Director of the Teacher Corps at the Department of Health, Education, and Welfare since 1973.

He was born January 3, 1929, in Boston, Mass. He received a B.A. from Wiley College in 1949, an M. Ed. from Massachusetts State Teachers College in 1955, and a Ph. D. from Case Western Reserve University in 1970.

Smith was a social groupworker from 1954 to 1956. He was with the Cleveland, Ohio, public schools from 1956 to 1968, as a high school teacher, guidance counselor, and principal. From 1968 to 1969, he was executive director of the Pace Association (Program of Action by Citizens in Education) in Cleveland.

Smith joined the U.S. Office of Education at HEW in 1969 as Chief of the Career Opportunity Program. He served subsequently as Director of the Division of School Programs, Acting Director of the Teacher Corps, Associate Commissioner for Educational Personnel Development and Director of the National Center for Improvement of Educational Systems, Acting Deputy Commissioner for Development, and Associate Commissioner for Career Education.

Smith has served as Chairman of the U.S. Delegation to the International Management Training on Educational Change Training Program of the Orga-

nization for Economic Cooperation and Development (OECD) in Oslo, Norway, and the U.S. Delegation to the OECD Conference on Teacher Policy in Paris, France. He has received numerous awards for his work in education.

National Commission on Libraries and Information Science

*Nomination of Three Members.
December 20, 1979*

The President today announced three persons whom he will nominate to be members of the National Commission on Libraries and Information Science for terms expiring July 19, 1984. They are:

Helmut A. Alpers, vice president of the General Bookbinding Co. of Chesterland, Ohio. Alpers spent 18 years with IBM, where he was extensively involved in information systems. He was a delegate to the White House Conference on Libraries and Information Services, held in November 1979.

Carlos A. Cuadra, of Los Angeles, president of Cuadra Associates, Inc., for reappointment. Cuadra is also an adjunct professor at UCLA's Graduate School of Library and Information Science, and has been a member of this Commission since 1971.

Margaret S. Warden, of Great Falls, Mont., chair of the Constitutional Convention Proceedings Printing Committee and a former Montana State senator. She served on the Advisory Committee for the White House Conference on Libraries and Information Services. She is a former librarian and a member of the Montana State Library Advisory Council.

International Economic Sanctions Against Iran

*Remarks Announcing Intention To Seek
United Nations Action. December 21, 1979*

THE PRESIDENT. From the first day the American Embassy was invaded and our diplomatic staff was seized as hostages by Iran, we have pursued every legal channel available to us to secure their safe and prompt release. On at least four separate occasions the world community, through the United Nations Security Council and through the International Court of Justice, has expressed itself clearly and firmly in calling upon the Iranian Government to release the American hostages.

Yet Iran today still stands in arrogant defiance of the world community. It has shown contempt not only for international law but for the entire international structure for securing the peaceful resolution of differences among nations.

In an irresponsible attempt at blackmail, to which the United States will never yield, kidnapers and terrorists, supported by Iranian officials, continue to hold our people under inhumane conditions. With each day that passes, our concern grows for the health and for the well-being of the hostages. We have made clear from the very beginning that the United States prefers a peaceful solution, in preference to the other remedies which are available to us under international law. For a peaceful resolution to be achieved, it is now clear that concrete action must be taken by the international community.

Accordingly, I have decided to ask for an early meeting of the United Nations Security Council to impose international economic sanctions upon Iran, under title VII of the United Nations Charter. The Government of Iran must realize that it

cannot flaunt with impunity the expressed will and law of the world community. The Security Council must act to enforce its demand that Iran release the hostages. The world community must support the legal machinery it has established, so that the United Nations and the International Court of Justice will continue to be relevant in settling serious disputes which threaten peace among nations.

I can think of no more clear and compelling challenge to the international community than the one we face today. The lives of over 50 innocent people are at stake; the foundation of civilized diplomacy is at stake; the integrity of international law is at stake; the credibility of the United Nations is at stake. And at stake, ultimately, is the maintenance of peace in the region. As we call on the Security Council to act, on behalf of international law and on behalf of peace, we again call on the Government of Iran to end this crisis by releasing the hostages without delay.

And now, because our holy days approach—a time to think of peace—I would like to add a few special words for the American people, indeed the people of good will in all countries, including Iran, who share concern for 50 innocent human beings who hope, themselves, for peace and for the salvation of their lives.

Henry Longfellow wrote a Christmas carol in a time of crisis, the War Between the States, in 1864. Two verses of that carol particularly express my thoughts and prayers and, I'm sure, those of our Nation in this time of challenge and of concern and of crisis. And I would like to quote from that poem:

"And in despair I bowed my head.
'There is no peace on earth,' I said.
'For hate is strong and mocks the song
Of peace on earth, good will to men.'

Then pealed the bells, more loud and deep,

'God is not dead, nor does he sleep.

The wrong shall fail, the right prevail,
With peace on earth, good will to men.' "

Thank you very much.

REPORTER. Mr. President, do you have any hope of observers getting to see the hostages on Christmas Day?

THE PRESIDENT. We don't know what the answer to that question is. We always hope, but we don't expect it to happen.

Q. Sir, do we have the votes in the Security Council?

THE PRESIDENT. We'll have to answer that question later.

NOTE: The President spoke at 4:01 p.m. to reporters assembled in the Briefing Room at the White House.

Price Controls on Heavy Crude Oil

Executive Order 12186. December 21, 1979

CHANGE IN DEFINITION OF HEAVY OIL

By the authority vested in me as President by the Constitution and statutes of the United States of America, including the Emergency Petroleum Allocation Act of 1973, as amended (15 U.S.C. 751 *et seq.*), Executive Order No. 12153 is hereby amended by deleting Section 1-102, renumbering Section 1-103 as 1-102, and deleting in Section 1-101 the figure "16.0° API" and inserting in lieu thereof "20.0° API."

JIMMY CARTER

The White House,

December 21, 1979.

[Filed with the Office of the Federal Register, 10:50 a.m., December 26, 1979]

Price Controls on Heavy Crude Oil

White House Statement. December 21, 1979

The President today acted to lift price controls from expanded volumes of heavy crude oil production. By signing an amendment to Executive Order 12153, the President decontrolled, effective immediately, heavy crude oil with an average specific gravity up to 20.0° API. In taking this action today, the President expressed his deep appreciation to Senator Cranston and the California delegation for their assistance in this effort.

This action follows a Presidential directive to the Department of Energy at the time Executive Order 12153 was signed (August 17, 1979). That order decontrolled heavy crude oil production below 16.0° API. The President asked DOE to review and hold public hearings on the advisability of expanding the definition of heavy crude oil above the 16.0° level. The action taken today responds to the findings and recommendations made by DOE as a result of the hearing and review process.

Both Executive Order 12153 and the amendment signed today apply only to current production of heavy crude oil or production from known reservoirs. Newly discovered supplies of heavy crude are covered under the President's April 5, 1979, decision to decontrol this category of oil effective June 1, 1979.

It is expected that decontrol of oil in the 16.0°–20.0° range will significantly accelerate production of this resource and will yield approximately 140 million barrels of additional supplies between now and 1986. Daily production should increase by about 65,000 barrels per day in 1981, and peak at an added 130,000 barrels per day in 1983.

The President does not recommend

that oil in the 16.0°–20.0° range be exempt from the windfall profits tax, as he did for heavy crude oil below 16.0° API. The extra incentives provided by the decontrol action itself are sufficient to generate added production as well as to prevent heavy oil wells in this range from being shut in, because they are only marginally economic or uneconomic under price controls.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

December 15

The President spoke by telephone with the Shah of Iran prior to his departure from Lackland A.F.B., Texas, for Panama.

December 16

The President returned to the White House from Camp David, Md.

December 17

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- Frank B. Moore, Assistant to the President for Congressional Liaison;
- a group of Chassidic rabbis from New York;
- James T. McIntyre, Jr., Director of the Office of Management and Budget, and other administration officials to review the fiscal year 1981 budget.

December 18

The President met at the White House with:

- Dr. Brzezinski;
- the Democratic congressional leadership;
- Mr. Moore;
- a group of Democratic Party State chairmen and vice chairmen;
- Mayor George Athanson of Hartford, Conn.

The President and Mrs. Carter hosted a Christmas reception in the afternoon for members of the U.S. Secret Service and their guests on the State Floor of the White House.

December 19

The President met at the White House with:

- Dr. Brzezinski;
- Ambassador Donald F. McHenry, U.S. Representative to the United Nations;
- Mr. Moore;
- a group of VISTA volunteers, Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, and Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, to mark the 15th anniversary of the Federal volunteer service program;
- Vice President Walter F. Mondale;
- Mr. McIntyre and other administration officials to review the fiscal year 1981 budget.

The President and Mrs. Carter hosted a Christmas reception for members of the Cabinet and their guests in the Residence.

December 20

The President met at the White House with:

- Dr. Brzezinski;
- Representative Stephen J. Solarz of New York and constituents from his congressional district;

—Mr. Moore;

—Charles L. Schultze, Chairman of the Council of Economic Advisers;

—Senator Patrick J. Leahy of Vermont;

—members of the Congressional Coal Caucus.

The President participated in a briefing by administration officials on administration policies and programs given for community and civic leaders from Illinois in the East Room at the White House.

The President transmitted to the Congress the 1977 annual report of the National Endowment for the Arts and the National Council on the Arts.

December 21

The President met at the White House with:

- Dr. Brzezinski;
- Vice President Mondale, Secretary of State Cyrus R. Vance, Secretary of Defense Harold Brown, Hamilton Jordan, Assistant to the President, Hedley W. Donovan, Senior Adviser to the President, and Dr. Brzezinski;
- Mr. Moore;
- Mr. McIntyre and other administration officials to review the fiscal year 1981 budget;
- former professional football player Roosevelt Grier;
- Mr. McIntyre and other administration officials to review the fiscal year 1981 budget.

The President left the White House for a stay at Camp David.

**NOMINATIONS SUBMITTED
TO THE SENATE**

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

NOMINATIONS—Continued

Submitted December 19, 1979

COLBERT I. KING, of Maryland, to be United States Executive Director of the International Bank for Reconstruction and Development for a term of 2 years, vice Edward R. Fried, resigned.

DAVID S. KING, of Maryland, to be United States Alternate Executive Director of the International Bank for Reconstruction and Development for a term of 2 years, vice William P. Dixon, resigned.

G. WIX UNTHANK, of Kentucky, to be United States District Judge for the Eastern District of Kentucky, vice a new position created by P.L. 95-486, approved October 20, 1978.

HIPOLITO FRANK GARCIA, of Texas, to be United States District Judge for the Western District of Texas, vice a new position created by P.L. 95-486, approved October 20, 1978.

CLYDE FREDERICK SHANNON, JR., of Texas, to be United States District Judge for the Western District of Texas, vice Dorwin W. Suttle, retired.

Submitted December 20, 1979

JOSEPH CHARLES ZENGERLE III, of the District of Columbia, to be an Assistant Secretary of the Air Force, vice Antonia Handler Chayes, elevated.

THOMAS K. BERG, of Minnesota, to be United States Attorney for the District of Minnesota for the term of 4 years, vice Andrew W. Danielson, resigned.

WILLIAM LEE SMITH, of Maryland, to be Commissioner of Education, vice Ernest LeRoy Boyer, resigned.

The following-named persons to be members of the National Commission on Libraries and Information Science for terms expiring July 19, 1984:

HELMUT A. ALPERS, of Connecticut, vice Joseph Becker, term expired.

CARLOS A. CUADRA, of California (reappointment).

MARGARET S. WARDEN, of Montana, vice John E. Velde, Jr., term expired.

An act for the relief of Jesus Reveles y Rivera.
- H.R. 2532----- Private Law 96-29
An act for the relief of Gail Williamson.

PRESIDENTIAL DOCUMENTS

Week Ending Monday, December 31, 1979

Windfall Profits Tax Legislation

*Statement by the President.
December 22, 1979*

The House and Senate conferees have taken important steps toward reconciling their differences on the windfall profits tax. The basic agreement reached on revenue levels brings us closer to enactment of a windfall tax which will pay for vital investments in *American* alternatives to imported oil.

Progress on the tax has been painfully slow. First we were promised action by October, then by Thanksgiving, and then by Christmas. Although the Congress made progress before it adjourned, we still do not have a windfall profits tax in law.

When I announced my decision to phase out controls on domestic crude oil last April, I made clear that the windfall profits tax was an essential companion to decontrol. The schedule was carefully set to encourage American energy production and to give the Congress plenty of time to act on the tax. It is my present intention to continue the necessary general decontrol schedule, but I will postpone further increases in the price allowed for marginal wells until a windfall profits tax satisfactory to me is on my desk.

It must be clear that the costs of delay are high. I am determined that the American public will be protected with a windfall profits tax which is fair and which

provides the funds we need to invest in our energy future.

The conference committee and their staff will continue work on the tax between now and the start of the new congressional session to ensure that precious time is not lost. It is also critical that the conferees on the energy mobilization board and the energy security corporation complete their work without further delay. We must not dissipate our opportunity for actions during this time of crisis. The eyes of the world are focused on us to see if we meet our energy challenges. What Congress does over the next few weeks will determine whether this country will meet its challenge.

We can and must send a strong and accurate signal that we, the American people, are determined to cut our dependence on imported oil. The windfall profits tax, the energy mobilization board, and the energy security corporation are critical to this effort, and we will not shirk our duty.

Pan American World Airways-National Airlines Merger

*Letter to the Chairman of the Civil
Aeronautics Board. December 22, 1979*

To Chairman Marvin Cohen

I have reviewed the following orders proposed by the Civil Aeronautics Board:

Pan American Acquisition of, Control
of, and Merger with National
Docket 33283

and

Texas International-National Acquisition
Case
Docket 33112

I do not intend to disapprove the Board's orders within the 60 days allowed by statute.

In these orders, the Board approved the acquisition of National Airlines by Pan American World Airways. However, the Board deleted from the authority granted the merged airline the right now held by National, to provide service between Miami and London. Instead, the Board has initiated a separate proceeding to select a successor to National to operate the Miami-London route.

Under the Airline Deregulation Act of 1978, the President is given 60 days following a CAB decision such as this affecting international routes to review the decision. The President may disapprove a Board decision "solely upon the basis of foreign relations or national defense considerations . . . but not upon the basis of economic or carrier selection considerations."

Questions have been raised about that portion of the Board's decision deleting the Miami-London route from the transferred authority. I do not find sufficiently compelling foreign relations or national defense considerations to disturb the Board's decision on this issue or any other issue. I note that Pan American is one of several applicants for the Miami-London route in a proceeding now under consideration by the Board. I also note that the Board's opinion here underscores the right of the United States to assure any American carrier serving Miami-London complete competitive equality with any Brit-

ish carrier providing similar service, a right which must be assured in the final disposition of this matter.

To assure the opportunity for judicial review of the Board's action, I note that no foreign relations or national defense consideration underlies my action here.

Sincerely,

JIMMY CARTER

[The Honorable Marvin S. Cohen, Chairman,
Civil Aeronautics Board, Washington, D.C.
20428]

United States Savings Bonds Program

Memorandum From the President.
December 26, 1979

Memorandum for the Heads of Executive Departments and Agencies

The U.S. Savings Bonds Program has played an important role in sound debt management and in our continuing efforts to help control inflation. Over \$80 billion in Savings Bonds are currently held by Americans.

In 1980, the Savings Bonds Program will assume an additional purpose. The new Series EE Savings Bonds, which will be introduced to payroll sales during the first six months of 1980, will be designated U.S. Energy Savings Bonds, Series EE.

While helping to finance the large Federal energy expenditure required in the coming years, U.S. Energy Savings Bonds will also help to focus the country's attention on the national goals of reducing energy consumption and increasing domestic supplies.

Series EE Savings Bonds not only offer increased benefits to the country as a whole but to each individual saver as well. The interest rate on these securities will

be increased from 6.5 percent to 7 percent for Bonds held for the full 11 years to maturity.

I believe it is appropriate for employees of the Federal Government to take the leadership responsibility in furthering the sale of U.S. Energy Savings Bonds. We must set the example for all Americans to follow.

Consequently, I have appointed Secretary of Defense Harold Brown to serve as Chairman of the Interagency Savings Bonds Committee.

The introduction this year of the U.S. Energy Savings Bonds, Series EE not only presents new challenges, but also new opportunities for close cooperation at all levels of government.

Secretary Brown and the members of the Committee have a special duty to ensure that all Departments and Agencies complete the transition to U.S. Energy Savings Bonds, Series EE smoothly and effectively, maintaining a high record of employee participation in the Savings Bonds Program.

Secretary Brown has my full support in undertaking this new responsibility. In turn, I want him to be able to count on your full support through your active personal involvement in this year's payroll savings campaign in your agency.

JIMMY CARTER

Budget Deferrals

Message to the Congress. December 26, 1979

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three new deferrals totalling \$28.7 million and three revisions to previously transmitted deferrals increasing the amount

deferred by \$34.5 million. These items affect programs in the Departments of Defense and Treasury, the National Consumer Cooperative Bank, the National Commission on Social Security, and the District of Columbia.

The details of the deferrals are contained in the attached reports.

JIMMY CARTER

The White House,
December 26, 1979.

NOTE: The attachments detailing the deferrals are printed in the *FEDERAL REGISTER* of December 31, 1979.

United States International Trade Commission

Designation of Catherine May Bedell as Chairman. December 26, 1979

The President today announced that he has designated Catherine May Bedell as Chairman of the United States International Trade Commission (USITC).

Bedell has been a member of USITC and its predecessor agency, the United States Tariff Commission, since 1971. She has previously served as Chairman. She is a former U.S. Representative from the State of Washington.

Iranians in the United States

White House Statement on a Court Decision Upholding the President's Authority To Investigate Student Visas. December 27, 1979

The decision by the Court of Appeals confirms the view that the administration has held all along—that the action taken in surveying Iranian students was both constitutional and lawful. The President is, of course, gratified by the decision. The

Attorney General has assured the President the program will continue to be carried out expeditiously in strict compliance with due process standards.

As of December 20, more than 45,000 of the nearly 55,000 students interviewed under the program were found to be in the country legally. Some 6,500 were found to be out of status, with the balance requiring a further check of documents.

Energy Emergency in Oregon

Memorandum From the President.
December 27, 1979

Memorandum for the Administrator of the Environmental Protection Agency

Subject: Determination Under Section 110(f) of the Clean Air Act

Governor Atiyeh of the State of Oregon petitioned me on December 22, 1979, for a determination under Section 110(f) of the Clean Air Act that a regional energy emergency exists in Oregon of such severity that a temporary suspension of the federally promulgated new source construction and permitting prohibition under Section 110 and Part D of the Clean Air Act and appropriate provisions of Oregon's State Implementation Plan is necessary to help alleviate potentially high levels of unemployment caused by possible curtailments of electricity supply to the region. After considering the information and views provided to me by Governor Atiyeh, the Secretary of the Department of Energy, and the Administrator of EPA, I am hereby making the requested determination, subject to the conditions listed below:

(1) This determination applies only to the Harborton facility discussed in the Governor's petition.

(2) This determination expires on February 7, 1980. I will rescind this determination before that date if the potential energy shortage is substantially eased in the interim.

(3) Oregon's Department of Environmental Quality will monitor the air quality impact of operating the Harborton facility and will require the termination of its operation if air quality levels approach the primary ambient air quality standards. In no case would this declaration permit excesses of the health related primary ambient air quality standards.

(4) The Governor calls for a statewide electricity conservation effort. The State will submit to EPA and DOE biweekly reports on electricity consumption levels in the State, including the effects of its electricity conservation program. This determination is made in full recognition of Oregon's excellent record in the area of energy conservation.

(5) The operation of the Harborton facility will not result in a reduction in the electric energy output of other fossil fuel fired generating facilities in the State of Oregon.

(6) PGE will make maximum practicable effort to purchase available electric power from other regional utilities. State regulatory authorities will seek to remove regulatory impediments to power purchase by PRE and allow timely recovery of prudently incurred purchased power costs.

This determination shall be published in the **FEDERAL REGISTER**.

JIMMY CARTER

[Filed with the Office of the Federal Register,
8:56 a.m., December 31, 1979]

NOTE: The text of the memorandum was released on December 28.

American Hostages in Iran and Soviet Intervention in Afghanistan

Remarks to Reporters. December 28, 1979

Secretary of State Vance will proceed to the United Nations tomorrow to press the world's case against Iran in order to obtain the speediest possible release of American hostages, in accordance with the demands which have already been made earlier by the United Nations Security Council and the International Court of Justice.

The United States reserves the right to protect our citizens and our vital interests in whatever way we consider appropriate in keeping with principles of international law and the Charter of the United Nations. But our clear preference is now, and has been from the beginning of this crisis, for a quick and a peaceful solution of this problem through concerted international action.

We must never lose sight of our basic goals in this crisis—the safety of our fellow citizens and the protection of the long-term interests of the United States. A thoughtful and determined policy, which makes clear that Iran will continue to pay an increasingly higher price for the illegal detention of our people, is the best policy to achieve those goals, and it is the policy that I will continue to pursue.

Another serious development which has caused increased concern about peace and stability in the same region of the world is the recent Soviet military intervention in Afghanistan, which has now resulted in the overthrow of the established government and the execution of the President of that country. Such gross interference in the internal affairs of Afghanistan is in blatant violation of accepted international rules of behavior.

This is the third occasion since World War II that the Soviet Union has moved militarily to assert control over one of its neighbors, and this is the first such venture into a Muslim country by the Soviet Union since the Soviet occupation of Iranian Azerbaijan in the 1940's.

The Soviet action is a major matter of concern to the entire international community. Soviet efforts to justify this action on the basis of the United Nations Charter are a perversion of the United Nations that should be rejected immediately by all its members.

I have discussed this serious matter personally today with several other heads of government, all of whom agree that the Soviet action is a grave threat to peace. I will be sending the Deputy Secretary of State to Europe this weekend to meet with representatives of several other nations to discuss how the world community might respond to this unwarranted Soviet behavior. Soviet military action beyond its own borders gives rise to the most fundamental questions pertaining to international stability, and such close and extensive consultation between ourselves and with our allies are urgently needed.

Thank you very much.

REPORTER. Mr. President, do we have the votes in the U.N. Security Council, and do we have the Russians' promise they won't veto our resolution?

THE PRESIDENT. I expect we will see adequate support in the United Nations Security Council for our position.

Q. Have you gotten in touch with Brezhnev?

THE PRESIDENT. I have sent him a message.

NOTE: The President spoke at 4:30 p.m. in the Briefing Room at the White House.

Endangered Species Act Amendments

*Statement on Signing S. 1143 Into Law.
December 28, 1979*

I am very pleased today to sign into law S. 1143, a 3-year reauthorization of the Endangered Species Act. This act is one of the most far-reaching and progressive laws ever enacted by any nation to protect wildlife and plant resources. Reauthorization of the act has been one of my high legislative priorities.

In addition to reauthorization, the bill I am signing strengthens our endangered species protection program by including plant, as well as animal, species in the emergency listing and international cooperation provisions. The act also authorizes funds to the Department of Agriculture to enforce provisions related to plants.

The bill revises the procedures for implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The Congress has established a strong and independent International Convention Advisory Commission to advise the Secretary of the Interior on scientific authority responsibilities related to the convention. The scientific integrity of the convention will be preserved by the Commission's advice on the effects of trade, the listing of species on the convention appendices, and the interpretation and implementation of the convention.

I look forward to and will continue to support the implementation of a vigorous endangered species program.

NOTE: As enacted, S. 1143 is Public Law 96-159, approved December 28.

Financial Institutions Deregulation Bill

*Statement on Signing H.R. 4998 Into Law.
December 28, 1979*

I am deeply gratified by the passage of this legislation, which will help many Americans to obtain residential mortgage loans that would otherwise have been unavailable in many States. The administration has strongly supported a limited Federal preemption of State usury ceilings on mortgage loans, and the Congress approval of this provision will alleviate serious mortgage availability problems in the coming months in States with binding usury ceilings.

I am also pleased that the Congress has deferred the effective date of a court decision which would have prohibited depository institutions from offering share drafts, remote service, and automatic transfer accounts. These services have benefited millions of Americans, and we will work with the Congress to give institutions permanent legislative authority to offer these accounts.

Finally, I am pleased to note the extension of NOW account authority to federally chartered savings and loan institutions in New Jersey. Senator Williams and the New Jersey congressional delegation deserve credit for this provision, which will remove a serious competitive inequity. We will continue to seek nationwide NOW account authority.

I am hopeful that the bill I am signing today is only an interim step toward the passage of historic financial reform legislation early next year, legislation that would assure small savers a fair rate of return on their deposits, give our Nation's central bank the necessary tools to implement an effective noninflationary mone-

tary policy, provide broader powers for thrift institutions to compete in a modern financial environment, and remove obsolete regulatory constraints.

The administration will work actively to assure the phaseout of Regulation Q deposit rate ceilings and the passage of legislation to stem the decline in Federal Reserve membership. During a period of high inflation, it is simply unacceptable for the Federal Government to force small savers to accept a submarket rate of return on their deposits. Similarly, as Chairman Volcker and Secretary Miller have noted, the decline in Federal Reserve membership ultimately threatens the ability of our central bank to conduct monetary policy, and it is critically important to stem membership attrition on a fair and equitable basis.

The banking committees are to be commended for their progress toward this landmark legislation, which was outlined in my 1979 State of the Union message. We will work closely with the Congress to assure the enactment of comprehensive financial reform legislation.

NOTE: As enacted, H.R. 4998 is Public Law 96-161, approved December 28.

National Medal of Science

*Announcement of Award to 20 Recipients.
December 28, 1979*

The President today announced the award of the National Medal of Science to 20 recipients. The Medal is the highest honor the Federal Government accords the Nation's scientists and engineers.

The recipients are:

ROBERT H. BURRIS, W. H. Peterson professor of biochemistry, University of Wisconsin, Madison, Wis.:

ELIZABETH C. BROSBY, professor of anatomy, University of Michigan, Ann Arbor, Mich.;
JOSEPH LEO DOOB, professor of mathematics, University of Illinois, Urbana, Ill.;
RICHARD PHILLIPS FEYNMAN, Richard Chase Tolman professor of physics, California Institute of Technology, Pasadena, Calif.;
DONALD E. KNUTH, professor of computer science, Stanford University, Stanford, Calif.;
ARTHUR KORNBERG, professor of biochemistry, Stanford University, Stanford, Calif.;
EMMETT NORMAN LEITH, professor of electrical engineering, University of Michigan, Ann Arbor, Mich.;
HERMAN F. MARK, professor of chemistry, Polytechnic Institute of New York, Brooklyn, N.Y.;
RAYMOND D. MINDLIN, James Kip Finch professor of applied science, Columbia University, New York, N.Y.;
ROBERT N. NOYCE, chairman, Intel Corp., Santa Clara, Calif.;
SEVERO OCHOA, Roche Institute of Molecular Biology, Nutley, N.J.;
EARL R. PARKER, professor of metallurgy, University of California, Berkeley, Calif.;
EDWARD MILLS PURCELL, professor of physics, Harvard University, Cambridge, Mass.;
SIMON RAMO, vice chairman of the board, TRW, Inc., Redondo Beach, Calif.;
JOHN H. SINFELT, scientific adviser, EXXON Corporate Research Laboratories, Linden, N.J.;
LYMAN SPITZER, JR., Charles A. Young professor of astronomy, Princeton University, Princeton, N.J.;
EARL REECE STADTMAN, chief, Laboratory of Biochemistry, National Health, Lung, and Blood Institute, National Institute of Health, Bethesda, Md.;
GEORGE LEDYARD STEBBINS, JR., professor of genetics, University of California, Davis, Calif.;
PAUL A. WEISS, Rockefeller University, New York, N.Y.;
VICTOR F. WEISSKOPF, Institute professor of physics, Massachusetts Institute of Technology, Cambridge, Mass.

The National Medal of Science was established in 1959 by the 86th Congress. It is presented to individuals who, in the judgment of the President, "are deserving of special recognition by reason of their outstanding contributions to knowledge in

the physical, biological, mathematical, or engineering sciences." To date, 133 Medals have been awarded, beginning in 1962. Each President beginning with Kennedy has awarded Medals. President Carter presented the most recent awards on November 22, 1977.

The presentation of the award to the 1979 recipients will occur in the near future.

Decontrol of Marginal Oil Wells

Executive Order 12187. December 29, 1979

BASE PRODUCTION CONTROL LEVEL FOR MARGINAL PROPERTIES

By the authority vested in me as President by the Constitution and statutes of the United States of America, including the Emergency Petroleum Allocation Act of 1973, as amended (15 U.S.C. 751 *et seq.*), and notwithstanding the delegations to the Secretary of Energy in Executive Order No. 11790, as amended by Executive Order No. 12038, and in order to delay the decontrol of marginal oil wells, it is hereby ordered as follows:

1-101. For purposes of the pricing regulations adopted pursuant to the Emergency Petroleum Allocation Act of 1973, with respect to months commencing after December 31, 1979, the base production control level for marginal properties shall equal 20 percent of the total number of barrels of old crude oil produced and sold from the property concerned during calendar year 1978, divided by 365, multiplied by the number of days during the month in 1978 which corresponds to the month concerned.

1-102. For purposes of this Order, the term "marginal properties" has the same meaning as that term under the crude oil pricing regulations adopted pursuant to

the Emergency Petroleum Allocation Act of 1973, as amended.

1-103. The Secretary of Energy may, pursuant to Executive Order No. 11790, as amended by Executive Order No. 12038, adopt such regulations as he deems necessary or appropriate to conform the crude oil pricing regulations to this Order.

JIMMY CARTER

The White House,
December 29, 1979.

[Filed with the Office of the Federal Register,
12:43 p.m., December 31, 1979]

NOTE: The text of the Executive order was released on December 31.

Export Controls for Foreign Policy Purposes

Letter to the Speaker of the House and the President of the Senate. December 29, 1979

Dear Mr. Speaker: (Dear Mr. President:)

In accordance with the authority contained in section 6 of the Export Administration Act of 1979 (Public Law 96-72 of September 29, 1979; hereinafter "the Act"), I hereby extend export controls maintained for foreign policy purposes as specified in Enclosure 1. In accordance with section 6(e) of the Act I hereby notify Congress of this extension.

I am also submitting, as Enclosure 2, my conclusions with respect to: the criteria set forth in section 6(b) of the Act; the nature and result of alternative means attempted to achieve the purposes of these controls or the reasons for extending them without attempting any such alternative means; and the ways in which such controls will further significantly the foreign policy of the United States or will further its declared international obligations.

Pursuant to section 6(k) of the Act, the countries and the goods and technologies

listed in Enclosure 1 will be clearly identified in Export Administration Regulations published in the **FEDERAL REGISTER** as being subject to export controls for foreign policy purposes.

With reference to section 4(c) of the Act, adequate evidence has been presented demonstrating that, notwithstanding foreign availability, the absence of these controls would prove detrimental to the foreign policy of the United States.

Revisions of the regulations are being issued with an effective date of January 1, 1980, to comply with section 6(a) (2). They will be reissued in final form later in 1980, in order to take into consideration public comments received pursuant to section 13(b) of the Act.

Sincerely,

JIMMY CARTER

[Enclosure 1]

**EXPORT CONTROLS FOR FOREIGN POLICY
PURPOSES EXTENDED FOR THE PERIOD
JANUARY 1 THROUGH DECEMBER 31,
1980**

I. All countries except members of the North Atlantic Treaty Organization, Japan, Australia, and New Zealand:

A. A validated license is required for the export of crime control and detection instruments, equipment, and related technical data.

B. Applications for validated export licenses will generally be considered favorably on a case-by-case basis unless there is evidence that the government of the importing country may have violated internationally recognized human rights and that the judicious use of export controls would be helpful in deterring the development of a consistent pattern of such violations or in distancing the United States from such violations.

II. South Africa and Namibia only:

A. A validated license is required for the export of:

1. All U.S.-origin commodities and technical data for military and police entities;
2. Aircraft and helicopters and items controlled pursuant to the South African arms embargo for all consignees; and
3. Computers for government consignees exceeding performance levels permitted for shipment at national discretion under multilaterally agreed security export controls.

B. Applications for validated export licenses will:

1. Be denied for military or police entities except, on a case-by-case basis, for medicines, medical supplies, and medical equipment not primarily destined to military or police entities or for their use; and
2. Generally be considered favorably on a case-by-case basis for:
 - a. Aircraft and helicopters for which adequate written assurances have been obtained against military, paramilitary, or police use; and
 - b. Computers which would not be used to support the South African policy of apartheid.

III. Libya, Iraq, People's Democratic Republic of Yemen, and Syria only:

A. A validated license is required for the export of aircraft valued at \$3 million or more and helicopters over 10,000 pounds empty weight.

B. Applications for validated export licenses will generally be considered favorably on a case-by-case basis for such aircraft and helicopters for civil use if issuance of the licenses would be consistent with the policies set forth in subsections 3(4), 3(8), and 3(10) of the Act and subject to the requirement in sub-

section 6(i) of the Act to notify Congressional committees.

IV. Libya only:

A. A validated license is required for off-highway wheel tractors of carriage capacity of 10 tons or more.

B. Applications for validated export licenses will generally be considered favorably on a case-by-case basis for such tractors in reasonable quantities if for civil use, such as transportation of oil field equipment.

V. North Korea, Vietnam, Kampuchea, and Cuba only:

A. A validated license is required for all commodities and technical data except:

1. Technical data generally available to the public and educational materials;
2. Personal baggage, crew baggage, vessels and aircraft on temporary sojourn, ship stores, and plane stores;
3. Foreign-origin items in transit through the United States;
4. Shipments for U.S. Government personnel and agencies; and
5. Gift parcels not exceeding \$200 of commodities such as food, clothing (non-military), and medicines.

B. Applications for validated licenses will generally be denied. Exports on a non-commercial basis to meet emergency needs will be considered on a case-by-case basis.

VI. USSR only:

A validated license is required for the export of petroleum equipment.

VII. All countries:

A. A validated license is required for the export of the following commodities and related technical data:

1. Commodities which could be of significance for nuclear explosive purposes; and

2. Any commodities which the exporter knows or has reason to know will be used directly or indirectly for:

- a. Designing, developing, or fabricating nuclear weapons or nuclear explosive devices;
- b. Devising, carrying out, or evaluating nuclear weapons tests or nuclear explosions;
- c. Designing, constructing, fabricating, or operating the following facilities or components for such facilities:

- i. Facilities for the chemical processing of irradiated special nuclear or source material;
- ii. Facilities for the production of heavy water;
- iii. Facilities for the separation of isotopes of source and special nuclear material; or
- iv. Facilities for the fabrication of nuclear reactor fuel containing plutonium.

B. In reviewing applications for validated licenses pursuant to sub-paragraph VII A above, the following considerations are among those which will be taken into account:

1. The stated end-use of the component;
2. The sensitivity of the particular component and its availability elsewhere;
3. The types of assurances or guarantees given in the particular case; and
4. The non-proliferation credentials of the recipient country.

[Enclosure 2]

CONCLUSIONS WITH RESPECT TO CRITERIA, ALTERNATIVE MEANS, AND FURTHERANCE OF FOREIGN POLICY OR INTERNATIONAL OBLIGATIONS

I. Crime Control and Detection Instruments and Equipment

These controls continue in effect pursuant to section 6(j) of the Act.

No country has been formally determined to have a government engaging in a consistent pattern of gross violations of internationally recognized human rights. Therefore, except for the embargoes on North Korea, Vietnam, Kampuchea, Cuba, and the South African police and military, the validated license requirement for these items does not constitute a presumption that an application for such a license would be denied. However, where a consistent pattern of such violations appears to be developing, either positive or negative use of export controls might help to deter such development.

II. *South Africa and Namibia*

Prohibition of the export of virtually all items to military and police entities and controls on the export of aircraft and helicopters to all consignees and on the export of specified computers to government consignees are intended to distance the United States from the practice of apartheid, strengthen the effect of the United Nations arms embargo, and support racial justice throughout Africa.

There has been no movement toward fundamental social and political change in South Africa. Not extending controls would adversely affect the credibility of our South African policy in the minds of both the South African Government and black African nations.

The United States has attempted to influence the South African Government through public expressions of dissatisfaction with its social and political systems and reduction of diplomatic and other relationships. These other means have been insufficient to serve as an adequate alternative to export controls.

Regarding enforcement, it is recognized that it is extremely difficult, if not impossible, to prevent the South African

military and police from acquiring U.S. goods indirectly. On the other hand, we believe that U.S. firms have been conscientious in complying with the controls. Foreign firms with no U.S. ties are probably less zealous in adhering to U.S. regulations, especially for items exported to them under general license and for U.S. components or technology incorporated in foreign manufactured products.

Most types of equipment and technology affected by the controls are available from foreign sources. However, Australia recently restricted sales of aircraft to South Africa.

The effects of the controls on U.S. exports can be only roughly estimated. Factors other than export controls affect the overall export picture.

In general terms, the U.S. share of the South African market dropped from 13 percent in 1977 to 11 percent in 1978. If the 13 percent share had been maintained, U.S. exports would have been \$400 million higher in 1978. In 1977 the United States had the largest market share; in 1978 the United Kingdom and Germany had larger shares. Significant decreases in U.S. market shares occurred from 1977 to 1978 in pharmaceuticals, tires, chemicals, trucks, locomotives, motor vehicle components, and computers. For the first five months of 1979 the U.S. share of the market had recovered to 12.8 percent. There have been substantial U.S. sales since May.

Although it is difficult to determine whether losses are the result of the embargo or of other factors, examples reported by individual U.S. firms include the following:

- loss to a Japanese firm of a \$45 million order for a commodity for which previous orders alternated between U.S. and German suppliers;

- inability of a U.S. company to provide technical data to its South African

subsidiary, which resulted in the loss of \$1 million in annual royalty payments and ultimately led to divestiture of the subsidiary;

—loss to a British firm which stresses U.S. export controls in its marketing efforts of three contracts for about \$10 million and of estimated follow-on sales of about \$26 million;

—placement with a non-U.S. firm of a \$50 million order by a South African company which had previously purchased exclusively from U.S. companies;

—sourcing by a U.S. project manager of \$500 million worth of contracts in 1979 without U.S. participation;

—damage to reputation as a reliable supplier because of inability to supply parts and servicing for previously sold equipment;

—loss of exports because of the difficulty of determining whether an insignificant portion might reach the military or police; and

—additional administrative expenditures in order to comply with U.S. regulations while attempting to meet existing contractual and servicing agreements.

III. Terrorism

The listing of Libya, Iraq, People's Democratic Republic of Yemen, and Syria in the heading of part III of Enclosure 1 of this notification constitutes the determination, pursuant to subsection 6 (i) (1) of the Act, as to which countries have repeatedly provided support for acts of international terrorism.

Exports to these countries of crime control and detection instruments and equipment (which include vehicles designed to military specifications), aircraft valued at \$3 million or more, and helicopters over 10,000 pounds empty weight are controlled pursuant to section 6(i) of the Act.

Syria and Iraq have not made major purchases of U.S. aircraft since 1976. The People's Democratic Republic of Yemen trades largely with the USSR and exports of aircraft to that nation have been minimal. Libya, however, has the potential to continue to be a significant market for U.S. aircraft and helicopter manufacturers.

Controls on the export to these countries of U.S.-origin aircraft valued at \$3 million or more and helicopters over 10,000 pounds can be effectively enforced.

Large transport aircraft are available from French, German, and British companies as well as from the Soviet Union. Helicopters are produced by the same countries, as well as by Israel and Japan.

Examples of consequences attributed to these controls by individual U.S. firms include the following:

—U.S. helicopter manufacturers report that they have not pursued inquiries from or marketing efforts in these four countries because of the uncertainties caused by the U.S. controls; and

—a major U.S. aircraft manufacturer may lose a \$186 million sale of aircraft to Libya because of application of this control.

IV. Libya

Controls on the export to Libya of large tractors further the foreign policy objective of regional stability and are consistent with our policy on military sales to that country. Libyan troops have been directly involved in three countries in the past year (Chad, Uganda, and the Central African Republic) and are on a high state of alert along the border with Egypt, where a brief border war broke out in 1977.

Large tractors could be used to transport tanks and other outsized military vehicles, thereby enhancing the mobility of Libya's sizable armored force.

This type of vehicle is available from foreign suppliers in adequate quantities to serve the Libyan market. However, U.S. controls prevent an American contribution to Libyan military activity.

Controls of sales of off-highway tractors of carriage capacity of 10 tons or more can be effectively enforced.

Discontinuation of the controls would be seen by other friendly countries as a United States contribution to strengthening Libyan capability to mount hostile actions along its borders.

The controls supplement other means designed to influence Libyan behavior, including numerous demarches on issues such as Libyan activity in Uganda. There are very few alternative means available to the United States. For example, Libya has no need for U.S. economic or military assistance.

In 1977 the U.S. exported to Libya 330 vehicles of this type with a value of \$7.1 million; these figures dropped in 1978 to 14 vehicles at \$0.3 million. A sale of about \$60 million was lost to a foreign firm in 1978. Industry representatives estimate a potential Libyan market of about \$50 million. There is also some indirect adverse effect on exports to other markets.

V. Embargoes of Communist Countries

The embargoes on exports to North Korea, Vietnam, Kampuchea, and Cuba are administered not only under the Export Administration Act but also under the Trading With the Enemy Act. The latter authority continues by virtue of sections 101(b) and (c) and 207 of Public Law 95-223, and has been extended twice pursuant to national interest determinations, the most recent being from September 14, 1979, to September 14, 1980.

These embargoes were originally imposed for security reasons. During the Korean conflict we imposed an embargo against North Korea. During the Vietnam

war we embargoed trade with communist controlled portions of that country and, when the communists took over complete control in 1975, this embargo was extended to all of Vietnam and to Kampuchea. The embargo against Cuba came at a time when Cuban actions presented a serious threat in the Western hemisphere.

The circumstances which prompted imposition of these embargoes have changed over the years. However, it would be irresponsible to discard them on that basis alone. Ending a virtually total embargo is a dramatic action with significant policy ramifications.

North Korea is still technically in a state of war with the United States, the Republic of Korea, and the United Nations. It is expanding its offensive military and subversive potential and suppressing human rights. It recently rejected U.S. overtures for tripartite discussions on ways to ease tensions on the Korean peninsula.

In the case of Vietnam, we announced our willingness some time ago to end the embargo at such time as normal diplomatic relations are established and Ambassadors are in place. Subsequent Vietnamese invasion and occupation of Kampuchea have blocked progress.

Controls on exports to Kampuchea should be similar to those affecting Vietnam, particularly in light of the present occupation. The United States is making a major exception to the embargo of Kampuchea in the form of humanitarian aid to the people.

Full normalization of trade and diplomatic relations with Cuba hinges upon Cuban willingness to address, among other issues, restraint in other countries and compensation for American citizens whose property was expropriated by the Cuban Government.

The controls on North Korea, Vietnam, Kampuchea and Cuba are understood and generally supported by the public, so there is little difficulty in enforcing them.

Other countries are not formally co-operating with the United States in these embargoes. However, third country exports to North Korea are minimal because that country is in default on its international trade payments, there is very little trade of any kind with Kampuchea, and Vietnam and Cuba now largely orient their former trade with the United States toward the USSR.

All of the OECD countries combined exported only \$435 million to Vietnam in 1977. Even without the embargo, the Vietnamese would probably have turned elsewhere whenever possible, buying from the United States only when it was in their particular interest to do so. The most notable loss has been the replacement of U.S. firms by European firms in oil and gas exploration activities in and offshore Vietnam.

In 1959, U.S. firms supplied 64 percent of Cuba's total imports. If the embargo were lifted, the USSR would probably continue to be Cuba's major trade partner, but U.S. exporters, with the advantage of proximity, could be expected to replace some Japanese, Canadian, and European firms currently exporting to Cuba.

In aggregate value, U.S. exports to Cuba would likely not exceed \$300 million annually over the medium term and would probably reach no more than \$100-150 million in the first year if trade were resumed.

Because Cuba does not represent a substantial incremental market for any specific U.S. industries, the embargo has not retarded the ability of any U.S. economic sectors to compete in world trade. Ex-

porting to Cuba would not, therefore, substantially raise production levels or efficiency in any industries.

VI. Petroleum Equipment to the USSR

The control on the export of petroleum equipment to the USSR provides a flexible foreign policy tool. When necessary and appropriate it can be used to sensitize the Soviets regarding actions which are damaging to United States foreign policy interests.

The United States supports the improvement of bilateral economic relations with the Soviet Union as an element in our effort to improve overall relations. At the same time it is recognized that improvement in one sector of the bilateral relationship cannot be long sustained if it is not accompanied by improvements in other areas. Discontinuation of this control would represent a change in policy not warranted by existing circumstances in our relationship with the USSR.

Among the various means of furthering U.S. objectives vis-a-vis the Soviet Union, this control continues to be useful.

While the United States Government can effectively control exports of U.S.-produced petroleum equipment, for most items adequate quantities of similar equipment are available from foreign sources. There is only limited foreign availability of some deep submersible pumps and seismic equipment.

The effect of the controls on U.S. exports can be only roughly estimated since other factors affect the data. Although no license applications have been denied since the control was imposed in August 1978, some exports have been lost.

U.S. exports of petroleum equipment to the USSR average about two percent of total U.S. petroleum equipment exports. The U.S. share of the Soviet market had been generally increasing until the third

quarter of 1978. In 1974, U.S. suppliers received 13.6 percent of all Soviet oil and natural gas machinery orders placed with Western manufacturers. The 26.9 percent U.S. share of the 1977 Soviet market for petroleum equipment increased markedly to 55.5 percent in the first quarter of 1978 and to 51.1 percent for the third quarter. It dropped to 8.0 percent for the last quarter, bringing the figure for all of 1978 down to 44.6 percent. The U.S. shares for the first three quarters of 1979 were 23.5, 20.0, and 9.7 percent.

Although it is difficult to determine whether losses are the result of the controls or of other factors, reports by U.S. firms include the following:

- loss to foreign competition of contracts for gas lift equipment valued at about \$70 million (plus larger anticipated follow-on sales) because of delays and uncertainty in the U.S. licensing process;

- expenditures in the range of hundreds of thousands of dollars attributable to late delivery penalties and other costs related to the licensing process;

- use of the U.S. license requirement by foreign companies as leverage to obtain sales, since U.S. companies must schedule delivery to allow time for a license review and U.S. firms are never certain that the license will be granted.

VII. Nuclear Non-Proliferation Controls

Section 17(d) of the Act and section 309(c) of the Nuclear Non-Proliferation Act of 1978 (Public Law 95-242 of March 10, 1978), are interpreted as intending that:

- a) nuclear non-proliferation controls do not expire on December 31, 1979, and a determination to extend them is thus not required; and
- b) the criteria and other factors set forth in sections 6 (b) and (e) of

the Act are not applicable to these controls.

The Congress is therefore notified that these controls continue in force.

Nuclear non-proliferation controls further significantly the foreign policy of the United States and its declared international obligations.

NOTE: This is the text of identical letters addressed to Thomas P. O'Neill, Jr., Speaker of the House of Representatives, and Walter F. Mondale, President of the Senate.

Economic Compact Between New York and New Jersey

Statement on Signing H.R. 4943 Into Law. December 31, 1979

H.R. 4943 grants approval to the interstate compact between New York and New Jersey, providing for increased economic and industrial development in the New York City and northern New Jersey metropolitan region. While this bill is only a small part of the Port Authority's bold program, I take great personal pleasure in signing it.

Congressman Peter Rodino and the other Members of Congress from these two great States deserve considerable credit for expediting the passage of this legislation. I also extend my congratulations to Governors Carey and Byrne, Mayor Koch, and Alan Sagner and Peter Goldmark of the Port Authority of New York and New Jersey.

As I have emphasized throughout the past 3 years, the most effective remedy for the problems of our older urban centers—and of the Northeast in general—is to restore the private economic base of our inner cities. The steps taken in this direction by the Port Authority serve as a fine

example of what government can do to retain existing businesses and jobs and to attract new private-sector development and employment.

NOTE: As enacted, H.R. 4943 is Public Law 96-163, approved December 28.

Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980

*Statement on Signing S. 673 Into Law.
December 31, 1979*

I have signed S. 673, the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980.

In addition to authorizing appropriations in fiscal year 1980 for the Department of Energy's national security programs, S. 673 authorizes the creation of a facility to demonstrate the feasibility of storing certain nuclear wastes from defense activities. This project is known as the Waste Isolation Pilot Plant (WIPP), and its proposed location is in New Mexico. Specifically, the bill provides that:

"The Secretary of Energy shall proceed with the Waste Isolation Pilot Plant construction project. . . . Notwithstanding any other provision of law, the Waste Isolation Pilot Plant is authorized as a defense activity of the Department of Energy . . . for the express purpose of providing a research and development facility to demonstrate the safe disposal of radioactive wastes resulting from the defense activities and programs of the United States exempted from regulation by the Nuclear Regulatory Commission."

In signing S. 673, I am not endorsing this approach to the WIPP facility. As

evidenced by the efforts of the Inter-agency Review Group on Nuclear Waste Management, which I established in March 1978, my administration is committed to the safe management of nuclear wastes. I have reviewed a number of alternatives for managing both defense and commercial wastes, and I believe that the future of WIPP ought to be resolved only in the context of an overall nuclear waste management policy. I will be making a comprehensive statement on the management of nuclear wastes in the near future.

NOTE: As enacted, S. 673 is Public Law 96-164, approved December 29.

Knoxville International Energy Exposition of 1982

*Statement on Signing H.R. 5079 Into Law.
December 31, 1979*

I take great pleasure in signing H.R. 5079, which authorizes United States participation in Energy-Expo '82—the International Energy Exposition to be held in Knoxville, Tennessee, in 1982.

Energy-Expo '82 has the prospect of being critically important to the future of every nation and perhaps of every individual on Earth. With "Energy Turns the World" as its theme, the exposition will focus attention on one of the world's most pressing problems, and give participating nations an opportunity to demonstrate working prototypes of their newest energy-related inventions and developments as well as to discuss their energy policies in a variety of conferences.

The planning of this internationally significant event has been going on for several years. In April 1977, I granted it Federal recognition as being in the national interest; in December 1978, I in-

vited all the nations with which the United States has diplomatic relations to take part; and in August of this year I transmitted to Congress the proposal for United States participation which I now have the satisfaction of signing into law.

Knoxville, known as the Energy Capital of the World, is an appropriate site for Energy-Expo '82. It is surrounded by energy production—the Appalachian coal fields, Oak Ridge, the Tennessee Valley Authority—and it is the home of the University of Tennessee, with its diverse energy research facilities.

I look forward expectantly to Energy-Expo '82 and to the benefits it can bring to the people of this Nation and the world.

NOTE: As enacted, H.R. 5079 is Public Law 96-169, approved December 29.

Beef and Veal Imports Bill

Statement on Signing H.R. 2727 Into Law. December 31, 1979

I am pleased to sign into law today H.R. 2727, the Meat Import Act of 1979, a measure that will change the procedure we use to regulate imports of beef and veal into the United States.

Under the Meat Import Act of 1964, the Secretary of Agriculture had the authority to limit beef and veal imports. However, because the level of U.S. imports was tied to the level of U.S. production, the limitations were most restrictive when U.S. consumers most needed beef, and least restrictive when our cattle producers were suffering the most from low prices.

The new law makes much more sense. It provides that at least 1.25 billion pounds of imported beef will be available each year. That level increases when domestic production is low and more im-

ports are needed. It better protects consumers against short supplies, and it better protects cattlemen against low prices. I believe it is a balanced measure which will provide needed stability and certainty for both the domestic cattle industry and the American consumer.

This bill has been a long time in development, and it is the result of cooperation and hard work by cattlemen, the Congress, and the administration.

It retains sufficient Presidential discretion in instances where the counter-cyclical formula does not fully protect the public interest. The bill is considerably less restrictive than last year's unacceptable measure. I especially want to thank Senators Talmadge and Bentsen and Congressmen Ullman, Foley, and Bedell for their diligence in developing this measure with the administration. It is a good and fair bill, and I am pleased to sign it into law.

NOTE: As enacted, H.R. 2727 is Public Law 96-177, approved December 31.

Foreign Military Sales Credits for Israel

White House Statement. December 31, 1979

The President met with Israeli Minister of Defense Ezer Weizman on December 28, 1979. Subsequently, the President has decided to request the Congress to increase by \$200 million the foreign military sales (FMS) credits previously authorized for Israel in the special legislation in support of the peace treaty.

The decision was based on consideration of such factors as inflation and Israel's balance of payments deficit and takes into account the fact that the Israeli

Government has instituted since November extremely tough austerity measures designed to overcome these economic problems.

The decision, taken at a time when the President is determined to hold down Federal expenditures, reflects our sympathy and concern for Israel's security and well-being.

Presently, U.S. FMS credits for Israel total \$2.2 billion, in addition to a grant of \$800 million, to be disbursed over a period of approximately 3 years.

Digest of Other White House Announcements

The following listing includes the President's public schedule and other items of general interest announced by the White House Press Office and not included elsewhere in this issue.

December 27

The President announced the recess appointment of William A. Lubbers as General Counsel of the National Labor Relations Board. Lubbers was nominated for this position on November 28.

December 28

The President returned to the White House from Camp David, Md.

The President met at the White House with his foreign policy advisers to discuss the situation in Iran and other developments in that region.

The White House announced that due to the situation in Iran the President will not participate in the Democratic Presidential candidates debate in Des Moines, Iowa.

December 29

The President met at the White House with Dr. Brzezinski.

December 31

The President declared a major disaster for the State of Washington as a result of severe storms, high tides, mudslides, and flooding during the period December 13-23, which caused extensive property damage.

NOMINATIONS SUBMITTED TO THE SENATE

NOTE: The Senate having adjourned *sine die* on Friday, December 21, no nominations were submitted during the period covered by this issue. The second session of the 96th Congress will begin on Thursday, January 3, 1980.

CHECKLIST OF WHITE HOUSE PRESS RELEASES

NOTE: All releases of the White House Press Office have been included in this issue.

ACTS APPROVED BY THE PRESIDENT

Approved December 27, 1979

S. 716----- Public Law 96-156
An act to amend the Retired Federal Employees Health Benefits Act, as amended, with respect to the Government contribution toward subscription charge.

S. 241----- Public Law 96-157
Justice System Improvement Act of 1979.

An act for the relief of Grace Maria Salazar Santos.
- H.R. 918----- Private Law 96-34
An act for the relief of Maryrose and Rosemary Evangelista.
- H.R. 1283----- Private Law 96-35
An act for the relief of Pang Chong Ae.
- H.R. 1489----- Private Law 96-36
An act for the relief of In Sun Pineiro.
- H.R. 1827----- Private Law 96-37
An act for the relief of Emiko Okuma Colona.
- H.R. 1887----- Private Law 96-38
An act for the relief of Solomon Mani.
- H.R. 3234----- Private Law 96-39
An act for the relief of Rodolfo Jose Kozul.
- H.R. 3320----- Private Law 96-40
An act for the relief of Eileen Ferraren Fair.

Approved December 29, 1979

- S. 673----- Public Law 96-164
Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980.

ACTS APPROVED—Continued

Approved December 29—Continued

- H.R. 600----- Public Law 96-165
An act to incorporate United Service Organizations, Incorporated.
- H.R. 5015----- Public Law 96-166
Federal Physicians Comparability Allowance Amendments of 1979.
- H.R. 5224----- Public Law 96-167
An act to continue through May 31, 1981, the existing prohibition on the issuance of fringe benefit regulations, and for other purposes.
- H.J. Res. 462----- Public Law 96-168
A joint resolution expressing the sense of Congress concerning the White House Preservation Fund.
- H.R. 5079----- Public Law 96-169
An act to provide for participation of the United States in the International Energy Exposition to be held in Knoxville, Tennessee, in 1982, and for other purposes.
- H.R. 3343----- Public Law 96-170
An act to permit civil suits under section 1979 of the Revised Statutes (42 U.S.C. 1983) against any person acting under color of any law or custom of the District of Columbia who subjects any person within the jurisdiction of the District of Columbia to the deprivation of any right, privilege, or immunity secured by the Constitution and laws.
- H.R. 3948----- Public Law 96-171
An act to require a study of the desirability of mandatory age retirement for certain pilots, and for other purposes.
- H.R. 2771----- Public Law 96-172
An act to change the name of the Palmetto Bend Reservoir on the Navidad River in Texas to Lake Texana.
- H.R. 5025----- Public Law 96-173
An act to amend title 10, United States Code, to provide that any person eligible for medical care under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) who is a veteran with a service-connected disability may not be denied care and treatment for such disability under CHAMPUS solely because such person is eligible for care and treatment for such disability in Veterans' Administration facilities.
- H.R. 5174----- Public Law 96-174
An act to amend section 209 of title 18, United States Code.
- H.R. 595----- Public Law 96-175
Strategic and Critical Materials Transaction Authorization Act of 1979.

Administration of Jimmy Carter, 1979

ACTS APPROVED—Continued

Approved December 29—Continued

- H.R. 901----- Private Law 96-41
An act for the relief of John A. Townsley.
H.R. 1619----- Private Law 96-42
An act for the relief of Rolando R. Gaza,
Teresita C. Gaza, and Rolynne Therese
Gaza.
H.R. 2593----- Private Law 96-43
An act for the relief of Mariana de Jesus
Roca and Francisco Rubira Roca.

ACTS APPROVED—Continued

Approved December 31, 1979

- H.R. 5523----- Public Law 96-176
An act to establish an improved program for
extra long staple cotton.
H.R. 2727----- Public Law 96-177
An act to modify the method of establishing
quotas on the importation of certain meat,
to include within such quotas certain meat
products, and for other purposes.
